At the point that we exceeded 40 staff we stopped adding parking access and I believe the staff who were not given parking access were told that they needed to utilize the public parking options.

Thank you,

So I am confused. I know shocking.

Are we to deny EPA officials from parking in the ramp or are they being programmed so they can?

Thanks,
Jeff

Subject: RE: Parking Issues- Genesee County Union St.

Ms. Wozniak-

My apologies for your recent parking inconvenience however with the Flint water issue being declared a state emergency things are pretty chaotic at the moment. We are working very closely with the emergency staff to resolve the parking issues and things should be settling down very soon. Unfortunately you are not the only one that has encountered your parking space occupied by another vehicle however is the first complaint that the DTMB Parking Office has received from you. The DTMB Facility staff in Flint is working very hard to accommodate both the employees and the emergency staff. Please continue to be patient with us during this process and report any issues that you encounter directly to the facility staff in Flint or to the DTMB Parking Office.

Thank you.

Subject: Parking Issues- Genesee County Union St.

Since the Flint water oversight began, it is rare that I am able to park in my assigned parking spot, spot 31. I have had this spot assigned to me since November of 2012. Since the Flint water crisis oversight began, I have had my spot unoccupied about three times, allowing me to park there. Every day I come in, my spot is usually occupied. I report it to building security and will now start reporting it to Central Office, as instructed. The building security is great about handling the situation but new cars park in my spot on a daily basis. I also know that security has been telling people to park on the upper levels, because I see them do it. People aren't listening to them. There has even been one occasion that security has had a car moved from my spot, and another car took that as an opportunity to take my spot before I could, within an hour of the other car moving. I arrived today at 11:30 and the car that was in my spot when I arrived is still there. As a mobile employee, it is frustrating to pay double the parking fee for a covered and reserved spot parking that I cannot use unless I come into the office at 8am, which is rare. I am not the only one having these issues. It is not fair to me to have to pay extra to have to park in a random spot that is uncovered, because people do not want to follow protocol that they are made aware of. I am hoping that some type of compensation can be issued for the difference between what I am paying for parking and the standard parking fee for our office, until I am able to reliably use my assigned spot. Thank you in advance for your assistance.

Carl,
Thanks for bringing this to my attention. I spoke with Mike Noonan, Facilities Manager for Flint and there will be some people working on Monday. It is ok to perform the network upgrade from 9:00-10:00 a.m. that day. Mike will notify every one of the disruption during that time period.

Subject: Flint State Office Building Network Upgrade

Hi Marsha,

I just received a call from Jay Salmon (DTMB Network) regarding a network upgrade that his team and ATT would like to perform on Monday, February 15, 2016. Although it is a State Holiday, the question that immediately came to mind.. are there going to be any individuals working the Flint Water Emergency Management Center on Monday? The change would require the network to be disrupted from 9am to 10am to perform the connections necessary and install new network routing equipment.

Are you aware of anyone working in that office Monday? If you are not aware, would you know who I could contact to confirm. As stated, even if there are individuals in the Flint office Monday morning the disruption would only be for approximately one hour mid-morning.

Thanks,

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

asking. Again, there appears to be space here on the 5th Floor near the UCG, but I know folks are reluctant to give it up.

>

> Perhaps you could help me with another matter. I could use a parking pass for the ramp located immediately south of the SOB. I believe the ramp is owned by U of M-Flint, but this is where the state employees who are assigned to this building park. Their IDs work on the parking gate. My ID works for the building entrance but not on the parking gate. The federal partners activated my badge and other UCG members' badges for parking in the ramp for a period of time, but now they are told (I believe by building management here) that there is no longer enough parking space for us. Again, on any given day, over half of the ramp spaces are empty, so I sure don't see why I can't park in the ramp.

>>

>> Stay tuned.....DHHS sent an email late yesterday stating the space we were going to use was already promised to auditors so we are working on Plan B. I apologize for the miscommunication.

>>

>> There was one option that DTMB showed us that we could use right away, BUT it is not pretty! It's a small room on the loading dock with a window. Right now it's storing supplies, but DTMB said they can spruce it up a bit for us until the end of March when the 7th floor is done with construction and will open up more options for us. Thoughts?

Subject: East zone updates

State fair: transformers 5 toured the site for possible movie shoot. (if sale is not completed at the end of March)

Flint : water result for the community still shows areas with high levels of lead. We still have over 40 federal employees onsite

Saginaw : business as usual

As far as I know he has only been here on Friday last week. They do have two office spaces on 5th floor.

I know The JIC group is working all weekend as well as our federal visitors. We have an average of 25 people working the weekends since this started. The only day his card was used for this facility

So is this our space or somewhere else?

Calley said he's be working out of an office in Flint, where he said he already has office space. He also said he's working Saturdays as he meets with Flint officials about a long-range strategy to make sure those impacted by the lead-laced water of Flint get the services they need.

East Zone update 2-2-16

Sorry we could not attend... Rick is on vacation and Brian is dealing with Saginaw control issue and has to take photos for New DHHS staff ID's Flint I am waiting for the Head of the EPA to arrive on sight. Security Detail arrived yesterday with late notice that she would be here.

Saginaw : Painting and door handle replacement

State Fair : Dumars was Denied use of the Parking lot off of 8 mile for an event in May

Jackson : New Air handler project is just about complete. There has been some Variable speed drive questions as related to pumps and horse power. Brian Knox has clarified the questions.

Flint : The short.....

This past few weeks the East Zone staff has shown exceptional intestinal fortitude. They have made space for the for 40+ federal employees who are here to help the State of Michigan, the City of Flint and most importantly the residents of this city. It has been days and nights of quick thinking and problem solving. It has involved making many unpopular decisions and thinking out of box to get these groups together. This group is working long after the close of business and all weekend.

Staff in the East zone has been on the front line going above and beyond any position description we have.

Richard Baird the governor's appointed flint man has been here working with both city and federal officials. He has been doing meet and greets and doing media interviews. Last week LT Governor and appointed staff had a meeting on sight for the flint water crisis and will continue to meet here.

I want to thank my staff for going above and beyond, they have been doing ID's, Parking assisting the SEOC in all the needs such as : Installing TV's, helping with Direct TV, IT, Governor's office needs and the list goes on and on. The complaints on parking are flying in daily and the staff here is the ones that have to handle it and here about it again and again.

Construction: Still not done and the schedule still continues to change.

Ice storage and Solar: Kick off meeting was last week. They will start February 15th and Chiller tie in's and Structural support welds on 7th floor.

The contact will be me but I will need to know the size of the bins and who will be disposing the used filters into the bins.

What will the response time be for removing old filters?

Subject: City of Flint - Emergency Operations Center Recycling

Good Morning,

My name is Shane, I work for Genesee County. We are coordinating efforts with the City of Flint to recycle used water filter cartridges in order to help curtail the amount of cartridges ending up in a landfill. With this, I have already received permission from the City to provide bins for collecting the Brita and Pur filter cartridges at the locations they are responsible for. In an effort to remain uniform at all of the distribution sites, I am seeking your permission to provide two bins (one for Brita filters, one for Pur filters) at the two locations below that are under your direction. I will be responsible for ensuring the bins are emptied and will subsequently ship them to be recycled. Please let me know if I have your permission to start this effort at your locations. If you have any questions please feel free to call me. I appreciate your time and look forward to hearing from you soon.

All the best,

Shane L. Kelley, Planner I

35. This includes Federal partners from FEMA, HHS, CDC and EPA.

The ideal space would be an open space that can accommodate the entire amount and also include a break-out area for meetings of about 12-15 people. I talked directly to the FEMA representative requesting the space. They will make whatever we give them work. They do not want to incur any additional costs.

Chris, we can work out the details on providing the 12 spaces to FEMA tomorrow. The concern is that we are told there could be a total of 40 FEMA spaces needed? Can you confirm? Will need to solution another option to meet those needs if valid? Plan for taking the 12 tomorrow for short term, we will need to communicate with DHHS. Please advise, thanks

Mike-

Keith Paasch, Bob Burns, Larry Scates, Jim Clark and I met to discuss the request for additional space in Flint. The building is considered full, as in the office space as designed is assigned. We determined that the best way to serve our current clients and the additional resources needed to deal with this crisis may be to find additional space close by. We came up with several ideas (U of M Flint, School for the Deaf in Flint, City of Flint or FEMA bringing in trailers onsite). Maureen Bailey has confirmed 7,000 sq ft is available on Bristol Road at \$12/sq. ft. plus utilities.

Please see the attached prints in reference to space. There is one group of 12 stations that was occupied by Civil Rights plus two offices originally designed for the Governor that the Governor no longer needed on the 5th floor that is highlighted in green. DHHS is taking over the space and has a reconfigure planned starting in March. DHHS is temporarily using the majority of this space until 7th floor is complete. The area reference below is highlighted in yellow

within the green space. As stated below, DHHS staff are already in these station and in order for it to accommodate we would need to relocate the staff and tear down the furniture. The other rooms highlighted in orange within the green box have already been occupied by the Governor's staff as well as FEMA personnel. Two open areas are left in the building-the 5th and 6th floor lobbies. The 6th floor is already over occupancy and therefore we cannot add people here. As for adding people in the 5th floor lobby, I'm not sure how our tenants of the floor would be with that as this floor was not supposed to be accessed by the public.

Please let us know how you would like to proceed.

Subject: Flint Office Space Issue

Chris,

MSP has requested that we find additional space in the Flint State Office Building for additional Federal personnel that will need space in the next few days. DTMB had a meeting this morning in regards to this and after the meeting, BOD/Real Estate determined that we are at "max" in the Flint State Office Building. I asked if that meant we filled all the cubicles or if we are at building occupancy limits. The response was that we filled the cubicles and not at occupancy limits.

Can you assist in getting traction? If we can get these Federal partners in the same area as the State personnel, they can better coordinate response efforts. I spoke with Brian Walts (Flint BTS) and he indicated that if we move 3 DHHS staff members on the 5th floor, they could setup tables capable of housing 30-40 individuals. Brian confirmed that he has space on other floors that they could sit temporarily.

Subject: Flint SOB drinking water notice action

Team,

We have the notices posted and the new water dispensers have been installed at all the drinking fountain locations at the Flint State Office Building in reaction to the City of Flint's notice of a violation in the drinking water standard for the water they supply to our Flint Facility. Please see photo attached. The potable water vendor couldn't deliver till Friday so we pick up the equipment and installed to avoid any extra disruption this issue may cause our tenants and visitors to the building. We worked the vendor for a new customer price so the first month rent on the dispensers was free and will only be \$7.00 per month after that with a price of \$4.00 per 5 gallon container of water. I have made contact with the City of Flint Water Department to gain more information on the corrective action plan and possibly the time line to correct the issue but they were unable to provide any more information at this time. Please let me know if more action is necessary and I will keep everyone posted if I hear any new information on this issue.

Thank you,
Brian

Thanks Jeanette,
We are getting 5 new phones up to the Flint SOB tomorrow (1-29-16). These phones will be configured and usable out of the box. We can set them up where needed or give them to Brian as he has installed a few of the phones himself in emergency situations.
Just an FYI on the total amount of phones-As of today there are 14 phones being used for the ECC and assorted other people working on the water issue. These 5 new phones will make the total 19 phones.
Thanks,
Tom Hengesbach

Hi Team,

An on-site request has been made for a few more desk top phones to be utilized at the Flint Facility on the 5th floor. Tom Hengesbach sent 5 up a few weeks ago but the couple that was left was used for the request today. It looks like the team on site will request at least 3 more. The ones Tom sent are plug and play and appear to work great. Should the on-site team request through you or could they get a few more??

Thanks,

Brian Walts

Hello everyone,

I apologize that I have not sent this e-mail out sooner. I am still working on a new location for our next meeting, and will let you know as soon as I have a place set. However, our next meeting is still scheduled for this Thursday, February 4th at 3:00 p.m.

As promised, I have attached a number of documents to this e-mail. They are...

<!--[if !supportLists]-->1. <!--[endif]-->Minutes from last Thursday's meeting
<!--[if !supportLists]-->2. <!--[endif]-->Volunteer Request Form for any organization that needs event based volunteers from the Community Volunteer Reception Center. (Also, please remember that groups interested in volunteering in the

work that is being done around the water crisis should visit www.flintvolunteer.org)

<!--[if !supportLists]-->3. <!--[endif]-->Updated contact list for the Community Partners Meetings

<!--[if !supportLists]-->4. <!--[endif]-->Catholic Charities support group for those affected by the water crisis

<!--[if !supportLists]-->5. <!--[endif]-->Long term community recovery model (introduced at last week's meeting)

Finally, remember that tomorrow (Monday), there will be a rally at First Trinity Missionary Baptist Church (1226 Beach St., Flint, MI)...at 12:00 p.m. Everyone is invited.

Hope to see everyone on Thursday. Take care.

Importance: High

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

<!--[if !supportLists]--> <!--[endif]--> Mobilize tools/materials onsite
<!--[if !supportLists]--> <!--[endif]--> Install temp. protection, as needed

<!--[if !supportLists]--> <!--[endif]-->Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)

<!--[if !supportLists]--> <!--[endif]-->Identify which electrical and mechanical components need to be disconnected and removed.

<!--[if !supportLists]-->o <!--[endif]-->This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down

<!--[if !supportLists]-->\$ <!--[endif]-->Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work

<!--[if !supportLists]--> <!--[endif]-->Begin fire proofing removal

<!--[if !supportLists]--> <!--[endif]-->Get 220v power installed for welder for Wednesday 2/10 (SOM to handle) 2/9

<!--[if !supportLists]--> <!--[endif]-->finalize fire proofing removal

<!--[if !supportLists]--> <!--[endif]-->All lighting removed

<!--[if !supportLists]--> <!--[endif]-->All HVAC diffusers removed

<!--[if !supportLists]--> <!--[endif]-->Confirm 220V power 2/10

<!--[if !supportLists]--> <!--[endif]-->Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work) 2/11

<!--[if !supportLists]--> <!--[endif]-->Continue with welding efforts for stiffeners, plates, etc. 2/12

<!--[if !supportLists]--> <!--[endif]-->Finalize all welding efforts

<!--[if !supportLists]--> <!--[endif]-->Clean up 2/15 (Monday)

<!--[if !supportLists]--> <!--[endif]-->Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight

<!--[if !supportLists]--> <!--[endif]-->Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer) 2/16

<!--[if !supportLists]--> <!--[endif]-->Continue with steel stub columns and roof patching 2/17

<!--[if !supportLists]--> <!--[endif]-->Continue with steel stub columns and roof patching, if needed.

<!--[if !supportLists]--> <!--[endif]-->Begin repairing all fire proofing and ceiling gird 2/18

<!--[if !supportLists]--> <!--[endif]-->Continue with fire proofing patching and ceiling grid, if needed

<!--[if !supportLists]--> <!--[endif]-->Reinstall lighting and mech. diffusers (B&B or SOM?) 2/19

<!--[if !supportLists]--> <!--[endif]-->Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group.

A couple of things we learned today and request that I wanted to make everyone aware of:

- <!--[if !supportLists]-->1. <!--[endif]-->Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.)
- <!--[if !supportLists]-->2. <!--[endif]-->220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders.
- <!--[if !supportLists]-->3. <!--[endif]-->There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work?

Adam,

I know you scheduled a kick off meeting Thursday next week with B&B but unfortunately that will be too late in the game if we want to accomplish all this scope of work. I can make myself and our superintendent available for a phone conference tomorrow anytime or we can have a quick meeting Monday morning onsite when we kick off LaSalle with the ceiling grid/fire proof demo. Either way, I think we need to discuss in depth as a group before we go at this Monday AM.

Jan,

Can you please forward me the security clearance form that I need to submit with names, etc. since guys will, be coming into the building as early as Monday next week. I would like to get that submitted later today or first thing tomorrow.

Please let me know on this ASAP so we can plan accordingly. My cell # is below if you need to reach me today.

Thank everyone!!

Good Morning –

Jeanette is looking for any extra costs related to Flint due to the water situation. From staff time/o.t. to water to supplies or purchases. Jeanette needs to report on this every Friday.

Dane, do you want to see this information or should our staff send it directly to Jeanette?

Mike, I know you and Dane have discussed this already.

Thank you in advance -

Kerri Droste

Subject: Flint Expenses

Kerri, is anybody keeping track of Flint water expenses, either OT hours or direct purchases? Jeanette called me last week and she needs to submit a report every Friday showing actual/estimated costs. I have e-mailed Mike Noonan and he is getting me some information but not sure if there is a central area within Facilities that is tracking.

Any ideas on what would be the best way to track for Facilities?

As you can see DHHS is has sent our tenants this list of things to do however our facility is not in the boil water zone. I have advised them not to post anything on our drinking fountains.

Sandi & Mike,

It has been brought to my attention that there is a water boil advisory covering the City of Flint. Please see the attached two documents. Please remind staff that water must be boiled before washing hands, dishes, etc. Please post signs indicating such and you should disable drinking fountains just to be sure. Please let me know if you have any questions.

DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

CERTIFICATION:

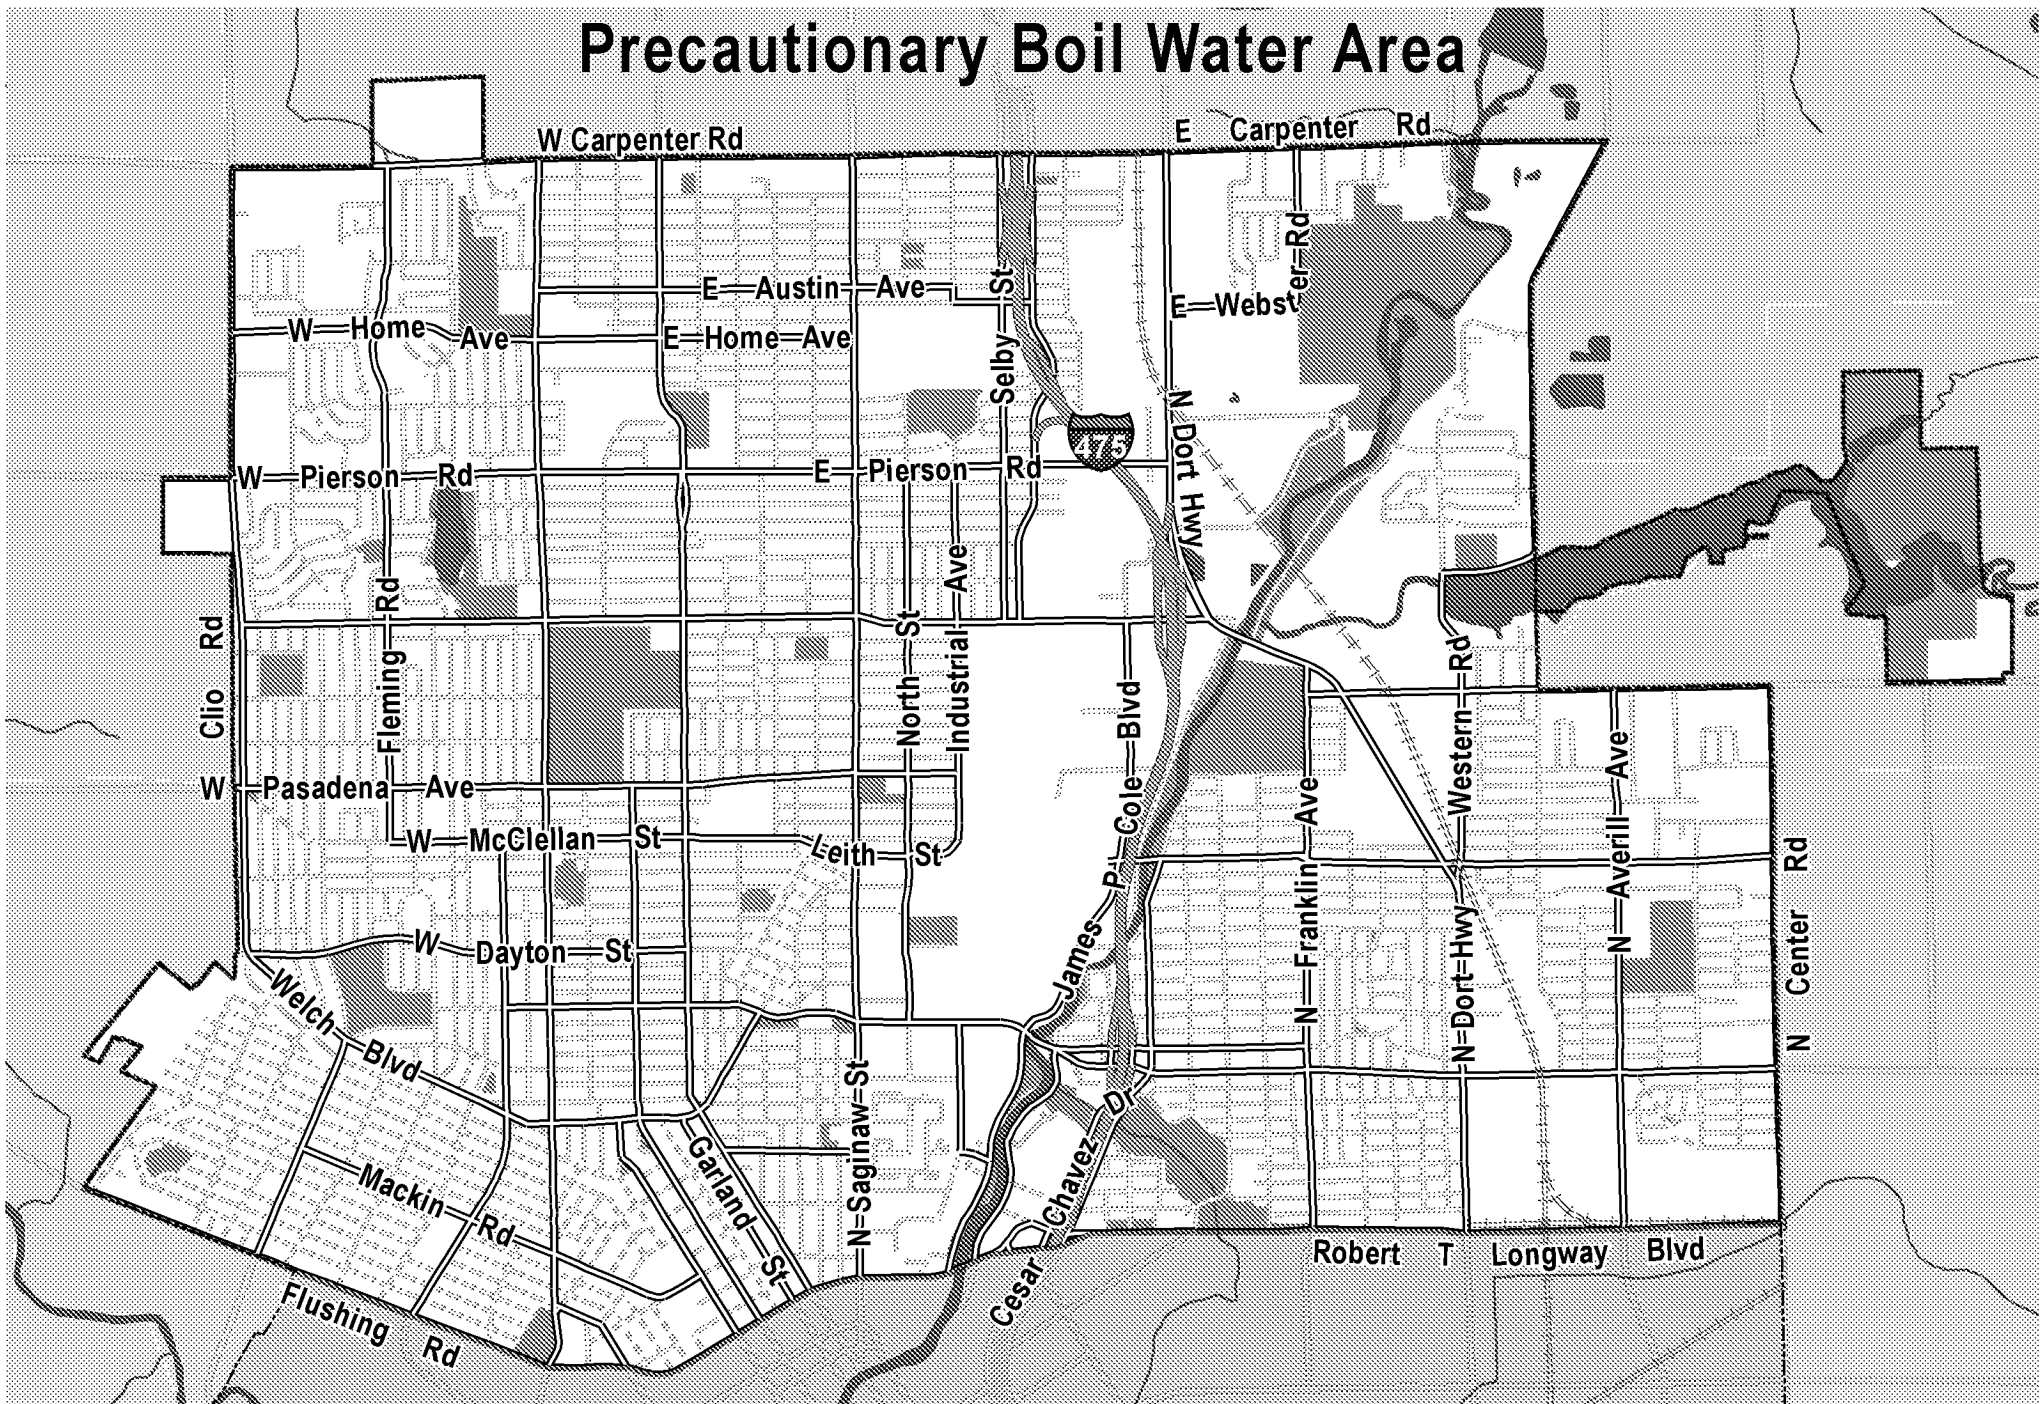

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Michael Glasgow UTILITIES ADMINISTRATOR 2/9/16
Signature Title Date Distributed

Reminder to water supplier: This notice / certification must be sent to the DEQ.

Subject: FW: Flint Expenses

Good Morning –

Jeanette is looking for any extra costs related to Flint due to the water situation. From staff time/o.t. to water to supplies or purchases. Jeanette needs to report on this every Friday.

Dane, do you want to see this information or should our staff send it directly to Jeanette?

Mike, I know you and Dane have discussed this already.

Thank you in advance -

Kerri Droste

Subject: Flint Expenses

Kerri, is anybody keeping track of Flint water expenses, either OT hours or direct purchases? Jeanette called me last

week and she needs to submit a report every Friday showing actual/estimated costs. I have e-mailed Mike Noonan and he is getting me some information but not sure if there is a central area within Facilities that is tracking.

Any ideas on what would be the best way to track for Facilities?

It has been brought to my attention, that there is a water advisory for the City of Flint basically north of the Flint River. I have attached the M-Live article, so at this time I would recommend

that staff do not drink the water in this building as well as in the designated neighborhoods. I feel it would be beneficial to our clients that if you are making contacts in those neighborhoods that you advise your clients of the water advisory if they are not aware. Foster Care staff, please take the time to alert your relative placements and foster homes of the importance of not letting the children in the designated areas drink the tap water. I am requesting additional information from the health department at this time. And I will keep you posted.

Flint says drinking water advisories will continue into Tuesday

Ron Fonger | rfonger1@mlive.com By Ron Fonger | rfonger1@mlive.com

on September 08, 2014 at 6:55 PM, updated September 08, 2014 at 6:56 PM

FLINT, MI -- **Boil water advisories** covering parts of Flint's west side will continue at least into Tuesday, Sept. 9.

The city said in a news release Monday, Sept. 8, that until the advisories are lifted, customers in the affected areas should continue to boil water or use bottled water.

The first advisory -- in effect since Friday, Sept. 5 -- covers areas bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road to the Flint River on the west.

A boil advisory also remains in effect for the area bordered by Stewart Avenue on the north, Saginaw Street on the east, Hamilton Avenue on the south, and Clio Road on the west. The advisory was extended to include that part of the city on Saturday, Sept. 6.

The city of Flint is flushing water from hydrants on the west side of the city today, Sept. 8, in an effort to rid the system of total coliform bacteria. Ron Fonger | The Flint Journal

"The Utilities Department believes that due to the low usage and demand of the area, water remains in the system for a longer period of time compared to the rest of the city," a news release says.

"The city of Flint Utilities Department is increasing the chlorine added to water in the area, and to improve water circulation, will continue flushing the system in that part of the city. Residents can expect to see open hydrants in the area," the statement says. "The city of Flint will continue to aggressively investigate this issue until it has been corrected."

Flint's advisories come after multiple positive tests for total coliform bacteria, an indication of a possible pathway for pathogens and fecal contamination to enter a drinking water system.

Total coliforms are used to determine the adequacy of water treatment and the integrity of the distribution system, according to the U.S. Environmental Protection Agency.

For most water users, the advisory suggests boiling water for one minute before using it for drinking, washing dishes or preparing food. The city says anyone with a severely compromised immune system, who is pregnant, or elderly may be at increased risk, however, and "should seek advice from your health care providers about drinking this water."

Although a district engineer for the state Department of Environmental Quality said boil advisories could be lifted Monday based on samples collected Saturday, the city's statement did not indicate the results of the latest testing.

MLive-The Flint Journal could not immediately reach city spokesman Jason Lorenz for further comment.

The latest news release from the city says, "The Utilities Department has opted to keep the advisory in effect until the results of a citywide sampling taken today are known. This advisory is a precautionary measure to ensure the safety of drinking water for city residents."

These most recent boil advisories come less than 30 days after another one in Flint, also on the west side of the city, but further south of the current advisory area.

Two members of the Flint City Council said Monday that questions remain about the city's water distribution system.

Councilman Eric Mays said in a Facebook post that Flint's drinking water problems are enough to constitute an emergency:

"I am asking that the City Council call a special council meeting and pursuant to the charter ask questions as to the quality of water concerns by putting folks under oath and asking the proper questions in this public and open meeting," Mays' statement says.

Councilman Sheldon Neeley said he has filed a damage claim with the city, seeking to refund residential water customers \$5 per day and businesses \$10 per day for as long as the boil advisory remains in effect.

Flint water is unsafe.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

Thanks for forwarding this information.

Just a couple of items to point out.

- 1) The attached notice entitled *Flint Water.pdf* says that the water is not unsafe. It states:

"What should I do?"

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are the elderly. In that case, you may be at increased risk and should seek advice about drinking water from your healthcare provider.
- **You do not need to boil your water or take other corrective actions.** If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours..."

- 2) The press release attached indicates that this notice was sent due to test results for a period ending 11/30/14.

Subject: Waterstreet deck

Mike,

I have been working with Mark-1, Tim Barden and Joel Ellis for UM-Flint on the Waterstreet deck stair tower repairs. We have additional measures which should be taken to prevent future water penetration at the stairs to the steel elements. Mark 1 has provided an estimate (in attached email) for sealing along all the nosing, treads, etc. in the 2 noted stairwells.

We also are awaiting additional costs for painting upgrades to a more dependable paint for the conditions regarding moisture, light, etc. The estimated cost could be an additional \$2000. We will submit all final costs to you prior.

We need to know whether to move on the sealant sooner than later so we can prepare to open the stairwells back up. The first stair tower paint did not take due to the cold and is peeling already. We will hold off on the remainder of the project until the weather warms up in a few months.

I have been asked to contact you regarding the added scope and costs. We do feel this is an important step to limiting any future decay of the stair pans. This would more to the total costs and would assumed to the prior 1/3-2/3 arrangement. Please advise.

If you need anymore information or explanation, please feel free to contact me via email or phone at (810) 406-6541. I will be happy to discuss any questions or concerns, or walk you through the tower (which has been cleared for lead).

Tim,

Do we have the extra 5000.00 to cover this? It should be done to seal up all of the towers to prevent water penetration. Let me know and I will move forward.

Joel,

Please see attached proposal for the caulking/sealant/trip hazard repairs for the Northeast and South Stair Towers. The Center stair tower will only need to be done on a as needed basis due to it already has been sealed with the deck coating system. If you have any questions please let me know.

Thanks,

Dave

Description of Work

Task #	Description	Unit		
		Quantity	Price	Total
PR001	Track and locate underground water main that services Michigan mart. Turn city stop box off and test for positive shut off. City valve continued to seep. At 4" OS&Y located in the mechanical room attempted to shut water to building. Interior valve also continued to leak. To insure positive shut off to building water main needed to be capped. Removed iron pipe flange with copper adaptor and replaced with blind flange. The main is now capped and wrapped in insulation. Water main was wrapped with heat tape prior to capping the main. Reused existing heat tape to help protect the main as it leaves the concrete to newly I stalled cap. (blind flange) Placed new covers on electrical connections boxes for heat tape to eliminate open wire connection.	1.00	\$1,800.00	\$1,800.00

Hello,

The phones are the ones in the elevators so it is a split cost and the way that they have to be connected causes the separate charges for the same time periods. The only service directly charged to the State for November and December is the administration of tracking the costs, managing the split costs, invoicing, etc. The other expenses in those months are the split utility costs.

Attention: Mike Noonan

Subject: Trane Compressor Overhaul for CVHA015 CenTraVac®

Trane's CenTraVac® Compressor Overhaul service program is a major inspection and maintenance program that brings the chiller compressors to like new condition. A compressor overhaul costs less than 10% of the cost of replacing the chiller and is recommended by Trane Service to be done every 8 to 10 years depending upon severity of use.

The CenTraVac Compressor Overhaul service addresses the following major components:

Gaskets and seals – Both internal and external elastomer seals give up elasticity and harden with time. The rate of deterioration depends on length of service, temperature, and operating conditions. Gasket and seal wear ultimately results in chiller efficiency loss, refrigerant loss and loss of lubrication capability.

Bearings – Individual unit operating conditions and certain site conditions can influence bearing permanence. These factors can result in bearing damage and compressor failure.

Compressor Motors – Over time compressor motors can develop flaws in the rotor and stator assemblies. These flaws, if left uncorrected, can result in compressor motor failure.

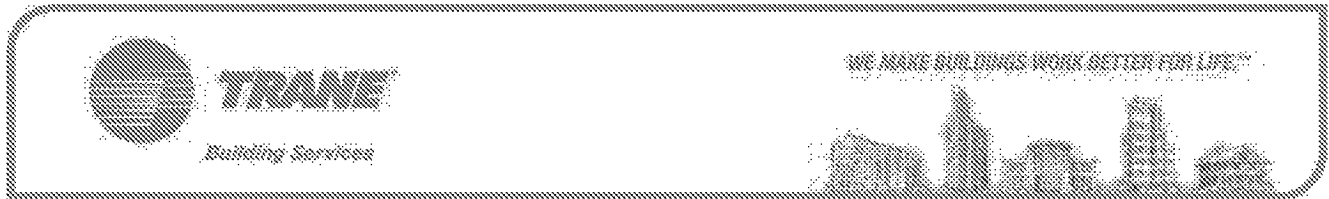

Trane Building Services uses the CenTraVac Compressor Evaluator to predict when a compressor should be considered for overhaul. The Compressor Evaluator takes into account run hours, starts, and seasons of operation to derive the service threshold indicator used in this evaluation process.

Per the attached proposal, it is our recommendation that your chiller be scheduled for a CenTraVac Compressor Overhaul.

Thank you for giving us this opportunity. If you have any questions or concerns, please call me at (810) 691-0639.

Sincerely,

Kurt Trierweiler

Subject: Trane Compressor R'newal™ for CVHA015

The R'newal™ services program is an exclusive, comprehensive program, available only from Trane Building Services, designed to prevent refrigerant leaks, compressor failures, and avoid unscheduled downtime. This process replaces worn materials, restores compressor performance, and updates applicable components to current design. The R'newal Service program delivers Trane's original commitment of reliability and performance and is backed by a long-term factory warranty.

Trane is pleased to offer you this proposal for performance of the following services:

Equipment:

Equipment	Qty	Manufacturer	Model Number	Serial Number	Area Served / Asset Tag
Water Cooled Centrifugal Water Chiller	1	Trane	CVHA015	L81C22541	

Scope of Service - CenTraVac Compressor Overhaul Service

- Refrigerant removal and replacement per applicable law
- Dismantling of the centrifugal compressor
- Refrigerant Analysis using Trane Chemical Laboratory*
- Inspection and verification of the inlet guide vane assembly, motor shaft, labyrinth seals, and the impellers compared to Trane specifications*.
- Motor inspection including a rotor bar and resistance analysis of the motor to Trane specifications*
- Verification and adjustment of the controls and measuring devices*
- Inspection of the overload controls, contactors, wiring, and other starter components*.
- Cleaning and inspection of the lubrication system including the oil pump, regulator, filters, heating elements, and sump*
- Cleaning and inspection of economizer and liquid line flanges (recommend repair as necessary*)
- Installation of new Trane compressor motor bearings
- Speed balance the rotor and impellers as one operating assembly prior to reassembly of the compressor
- Reassembly of the centrifugal compressor, auxiliary vapor and liquid lines, and sight glasses with all new Trane gaskets
- Selectable Options:
 - Replace oil pump and motor
 - Clean and verify purge
 - Perform vibration analysis as a base line at chiller start-up
 - Replace motor terminal board
- Installation of motor terminal board using new Trane approved gaskets and terminal O-rings
- Replace relief valve carbon disk and gaskets
- Chiller evacuation and leak testing to Trane specifications
- Charge with refrigerant and adjust charge as necessary (any additional refrigerant required must be provided by the Owner. Owner's approval will be required if refrigerant cleaning or additional refrigerant is needed.)
- Start-up and operation check by certified Trane technician
- Verification of operating parameters and adjustment of the chiller as per its original specifications
- Trane extended warranty on compressor motor, bearings, and lubrication system
- Installation of Trane R'newal nameplate indicating Trane issues CenTraVac compressor R'newal serial number.
- Factory parts and labor warranty on compressor – see Warranty section (below) for details

** Evaluations will be by Trane representative. Any required additional repairs will be brought to your attention, quoted separately, and will be done only following your approval.*

CenTraVac compressor R'newal warranties require the purchase and maintenance of a Service Agreement that includes, at a minimum, an annual chiller inspection, start-up inspection, run inspection, and an annual oil analysis for the duration of the extended warranty period. Cancellation of the service agreement voids the R'newal warranty.

For all other content, our warranty is one-year parts and 90 days labor

Clarifications

- The existing chiller refrigerant will be re-used provided it meets standards. Refrigerant cleaning, reclaiming, and additional refrigerant are not included and will be billable in addition to this proposal.
- Liquid and economizer line repairs, upon inspection, will be quoted in addition to this proposal.
- ASHRAE Std. 15 requirements for refrigerant monitor and self-contained breathing apparatus are not included. Please request a separate proposal if the equipment room does not meet this requirement.
- Disposal of waste oil shall be handled by Nelson Trane in accordance with EPA regulation and Nelson Trane oil disposal policy.
- The existing insulation will be re-used when possible. New insulation, if necessary, will be quoted in addition to this proposal.
- Upgrades to the motor starter and controls are not included in this proposal.
- CenTraVac compressor warranties require the purchase of a Service Agreement that includes, at a minimum, an annual chiller inspection, start-up, run inspection, and an annual oil analysis for the duration of the warranty period. Cancellation of the Service Agreement voids the R'newal warranty.
- Labor is at normal working hours only, and excludes labor costs due to unusual equipment access. All crane costs are excluded.

**TRANE R'NEWAL**

Pricing and Acceptance

TERMS AND CONDITIONS – QUOTED SERVICE

“Company” shall mean Nelson Trane for Company performance in the United States and Trane Canada ULC for Company performance in Canada.

To obtain repair service within the scope of Services as defined, contact your local Trane District office identified on the first page of the Agreement by calling the telephone number stated on that page. That Trane District office is responsible for Trane’s performance of this Agreement. Only Trane authorized personnel may perform service under this Agreement. For Service covered under this Agreement, Trane will be responsible for the cost of transporting a part requiring service.

1. Agreement. These terms and conditions are an integral part of Company’s offer and form the basis of any agreement (the “Agreement”) resulting from Company’s proposal (the “Proposal”) for the services (the “Services”) on equipment listed in the Proposal (the “Covered Equipment”). **COMPANY’S TERMS AND CONDITIONS ARE SUBJECT TO PERIODIC CHANGE OR AMENDMENT.**

2. Acceptance. The Proposal is subject to acceptance in writing by the party to whom this offer is made or an authorized agent (“Customer”) delivered to Company within 30 days from the date of the Proposal. If Customer accepts the Proposal by placing an order, without the addition of any other terms and conditions of sale or any other modification, Customer’s order shall be deemed acceptance of the Proposal subject to Company’s terms and conditions. If Customer’s order is expressly conditioned upon the Company’s acceptance or assent to terms and/or conditions other than those expressed herein, return of such order by Company with Company’s terms and conditions attached or referenced serves as Company’s notice of objection to Customer’s terms and as Company’s counter-offer to provide Services in accordance with the Proposal. If Customer does not reject or object in writing to Company within 10 days, the Company’s counter-offer will be deemed accepted. Customer’s acceptance of the Services by Company will in any event constitute an acceptance by Customer of Company’s terms and conditions. In the case of a dispute, the applicable terms and conditions will be those in effect at the time of delivery or acceptance of the Services. This Agreement is subject to credit approval by Company. Upon disapproval of credit, Company may delay or suspend performance or, at its option, renegotiate prices and/or terms and conditions with Customer. If Company and Customer are unable to agree on such revisions, this Agreement shall be cancelled without any liability, other than Customer’s obligation to pay for Services rendered by Company to the date of cancellation.

3. Cancellation by Customer Prior to Services; Refund. If Customer cancels this Agreement within (a) thirty (30) days of the date this Agreement was mailed to Customer or (b) twenty (20) days of the date this Agreement was delivered to Customer, if it was delivered at the time of sale, and no Services have been provided by Company under this Agreement, the Agreement will be void and Company will refund to Customer, or credit Customer’s account, the full Service Fee of this Agreement that Customer paid to Company, if any. A ten percent (10%) penalty per month will be added to a refund that is due but is not paid or credited within forty-five (45) days after return of this Agreement to Company. Customer’s right to cancel this Agreement only applies to the original owner of this Agreement and only if no Services have been provided by Company under this Agreement prior to its return to Company.

4. Cancellation by Company. This Agreement may be cancelled by Company for any reason or no reason, upon written notice from Company to Customer no later than 30 days prior to performance of any Services hereunder and Company will refund to Customer, or credit Customer’s account, that part of the Service Fee attributable to Services not performed by Company. Customer shall remain liable for and shall pay to Company all amounts due for Services provided by Company and not yet paid.

5. Services Fees and Taxes. Fees for the Services (the “Service Fee(s)”) shall be as set forth in the Proposal and are based on performance during regular business hours. Fees for outside Company’s regular business hours and any after-hours services shall be billed separately according to the then prevailing overtime or emergency labor/labour rates. In addition to the stated Service Fee, Customer shall pay all taxes not legally required to be paid by Company or, alternatively, shall provide Company with acceptable tax exemption certificates. Customer shall pay all costs (including attorneys’ fees) incurred by Company in attempting to collect amounts due.

6. Payment. Payment is due upon receipt of Company’s invoice. Company reserves the right to add to any account outstanding for more than 30 days a service charge equal to the lesser of the maximum allowable legal interest rate or 1.5% of the principal amount due at the end of each month. Customer shall pay all costs (including attorneys’ fees) incurred by Company in attempting to collect amounts due or otherwise enforcing these terms and conditions.

7. Customer Breach. Each of the following events or conditions shall constitute a breach by Customer and shall give Company the right, without an election of remedies, to terminate this Agreement or suspend performance by delivery of written notice: (1) Any failure by Customer to pay amounts when; or (2) any general assignment by Customer for the benefit of its creditors, or if Customer becomes bankrupt or insolvent or takes the benefit of any statute for bankrupt or insolvent debtors, or makes or proposes to make any proposal or arrangement with creditors, or if any steps are taken for the winding up or other termination of Customer or the liquidation of its assets, or if a trustee, receiver, or similar person is appointed over any of the assets or interests of Customer; (3) Any representation or warranty furnished by Customer in connection with this Agreement is false or misleading in any material respect when made; or (4) Any failure by Customer to perform or comply with any material provision of this Agreement. Customer shall be liable to the Company for all Services furnished to date and all damages sustained by Company (including lost profit and overhead)

8. Performance. Company shall perform the Services in accordance with industry standards generally applicable in the state or province where the Services are performed under similar circumstances as of the time Company performs the Services. Company is not liable for any claims, damages, losses, or expenses, arising from or related to work done by or services provided by individuals or entities that are not employed by or hired by Company. Company may refuse to perform any Services or work where working conditions could endanger property or put at risk the safety of people. Parts used for any repairs made will be those selected by Company as suitable for the repair and may be parts not manufactured by Company. Customer must reimburse Trane for services, repairs, and/or replacements performed by Trane at Customer’s request beyond the scope of Services or otherwise excluded under this Agreement. The reimbursement shall be at the then prevailing applicable regular, overtime, or holiday rates for labor/labour and prices for materials. Prior to Trane performing the additional services, repairs, and/or replacements, Customer may request a separate written quote stating the work to be performed and the price to be paid by Customer for the work.

9. Customer Obligations. Customer shall: (a) provide Company reasonable and safe access to the Covered Equipment and areas where Company is to work; and (b) unless otherwise agreed by Customer and Company, at Customer’s expense and before the Services begin, Customer will provide any necessary access platforms, catwalks to safely perform the Services in compliance with OSHA, state, or provincial industrial safety regulations or any other applicable industrial safety standards or guidelines.

10. Exclusions. Unless expressly included in the Proposal, the Services do not include, and Company shall not be responsible for or liable to the Customer for, any claims, losses, damages or expenses suffered by the Customer in any way connected with, relating to or arising from any of the following:

- (a) Any guarantee of room conditions or system performance;
- (b) Inspection, operation, maintenance, repair, replacement or performance of work or services outside the Services;
- (c) Damage, repairs or replacement of parts made necessary as a result of the acts or omission of Customer or any Event of Force Majeure;
- (d) Any claims, damages, losses, or expenses, arising from or related to conditions that existed in, on, or upon the premises before the effective date of this Agreement (“Pre-Existing Conditions”) including, without limitation, damages, losses, or expenses involving a Pre-Existing

Condition of building envelope issues, mechanical issues, plumbing issues, and/or indoor air quality issues involving mold/mould, bacteria, microbial growth, fungi or other contaminants or airborne biological agents; and

(e) Replacement of refrigerant is excluded, unless replacement of refrigerant is expressly stated as included with the Proposal.

11. Limited Warranty. Company warrants that: (a) the material manufactured by Company and provided to the Customer in performance of the Services is free from defects in material and manufacture for a period of 12 months from the earlier of the date of equipment start-up or replacement and (b) the labor/labour portion of the Services is warranted to have been properly performed for a period of 90 days from date of completion (the "Limited Warranty"). Company obligations of equipment start-up, if any are stated in the Proposal, are coterminous with the Limited Warranty period. Defects must be reported to Company within the Limited Warranty period. Company's obligation under the Limited Warranty is limited to repairing or replacing the defective part at its option and to correcting any improperly performed labor/labour. No liability whatsoever shall attach to Company until the Services have been paid for in full. Exclusions from this Limited Warranty include claims, losses, damages, and expenses in any way connected with, related to, or arising from failure or malfunction of equipment due to the following: wear and tear; end of life failure; corrosion; erosion; deterioration; Customer's failure to follow the Company-provided maintenance plan; unauthorized or improper maintenance; unauthorized or improper parts or material; refrigerant not supplied by Trane; and modifications made by others to Company's equipment. Company shall not be obligated to pay for the cost of lost refrigerant or lost product. Some components of Company equipment may be warranted directly from the component supplier, in which case this Limited Warranty shall not apply to those components and any warranty of such components shall be the warranty given by the component supplier. Notwithstanding the foregoing, all warranties provided herein terminate upon termination or cancellation of this Agreement. Equipment, material and/or parts that are not manufactured by Company are not warranted by Company and have such warranties as may be extended by the respective manufacturer.

THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY ARE THE SOLE AND EXCLUSIVE REMEDIES FOR WARRANTY CLAIMS PROVIDED BY COMPANY TO CUSTOMER UNDER THIS AGREEMENT AND ARE IN LIEU OF ALL OTHER WARRANTIES AND LIABILITIES, CONDITIONS AND REMEDIES, WHETHER IN CONTRACT, WARRANTY, STATUTE, OR TORT (INCLUDING NEGLIGENCE), EXPRESS OR IMPLIED, IN LAW OR IN FACT, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE OR FITNESS FOR A PARTICULAR PURPOSE AND/OR OTHERS ARISING FROM COURSE OF DEALING OR TRADE. COMPANY EXPRESSLY DISCLAIMS ANY REPRESENTATIONS OR WARRANTIES, ENDORSEMENTS OR CONDITIONS OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF QUALITY, FITNESS, MERCHANTABILITY, DURABILITY AND/OR OTHERS ARISING FROM COURSE OF DEALING OR TRADE OR REGARDING PREVENTION BY THE SCOPE OF SERVICES, OR ANY COMPONENT THEREOF, OF MOLD/MOULD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR ANY OTHER CONTAMINATES. COMPANY EXPRESSLY DISCLAIMS ANY LIABILITY IF THE SCOPE OF SERVICES OR ANY COMPONENT THEREOF IS USED TO PREVENT OR INHIBIT THE GROWTH OF SUCH MATERIALS. THE WARRANTY AND LIABILITY SET FORTH IN THIS AGREEMENT ARE IN LIEU OF ALL OTHER WARRANTIES AND LIABILITIES, WHETHER IN CONTRACT OR IN NEGLIGENCE, EXPRESS OR IMPLIED, IN LAW OR IN FACT, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

12. Indemnity. To the maximum extent permitted by law, Company and Customer shall indemnify and hold harmless each other from any and all claims, actions, costs, expenses, damages and liabilities, including reasonable attorneys' fees, resulting from death or bodily injury or damage to real or personal property, to the extent caused by the negligence or misconduct of the indemnifying party, and/or its respective employees or authorized agents in connection with their activities within the scope of this Agreement. Neither party shall indemnify the other against claims, damages, expenses, or liabilities to the extent attributable to the acts or omissions of the other party or third parties. If the parties are both at fault, the obligation to indemnify shall be proportional to their relative fault. The duty to indemnify and hold harmless will continue in full force and effect, notwithstanding the expiration or early termination of this Agreement, with respect to any claims based on facts or conditions that occurred prior to expiration or termination of this Agreement.

13. Limitation of Liability. NOTWITHSTANDING ANYTHING TO THE CONTRARY, NEITHER PARTY SHALL BE LIABLE FOR SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL LOSSES OR DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION REFRIGERANT LOSS, PRODUCT LOSS, LOST REVENUE OR PROFITS, OR LIABILITY TO THIRD PARTIES), OR PUNITIVE DAMAGES WHETHER BASED IN CONTRACT, WARRANTY, STATUTE, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, INDEMNITY OR ANY OTHER LEGAL THEORY OR FACTS. NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, THE TOTAL AND AGGREGATE LIABILITY OF THE COMPANY TO THE CUSTOMER WITH RESPECT TO ANY AND ALL CLAIMS CONNECTED WITH, RELATED TO OR ARISING FROM THE PERFORMANCE OR NON-PERFORMANCE OF THIS AGREEMENT, WHETHER BASED IN CONTRACT, WARRANTY, STATUTE, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, INDEMNITY OR ANY OTHER LEGAL THEORY OR FACTS, SHALL NOT EXCEED THE COMPENSATION RECEIVED BY COMPANY UNDER THIS AGREEMENT. IN NO EVENT SHALL SELLER BE LIABLE FOR ANY DAMAGES (WHETHER DIRECT OR INDIRECT) RESULTING FROM MOLD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR OTHER CONTAMINATES OR AIRBORNE BIOLOGICAL AGENTS. TO THE MAXIMUM EXTENT ALLOWED BY LAW, COMPANY SHALL NOT BE LIABLE FOR ANY OF THE FOLLOWING IN CONNECTION WITH PROVIDING THE ENERGY AND BUILDING PERFORMANCE SERVICES: INTERRUPTION, DELETION, DEFECT, DELAY IN OPERATION OR TRANSMISSION; CUSTOMER'S NETWORK SECURITY; COMPUTER VIRUS; COMMUNICATION FAILURE; THEFT OR DESTRUCTION OF DATA; GAPS IN DATA COLLECTED; AND UNAUTHORIZED ACCESS TO CUSTOMER'S DATA OR COMMUNICATIONS NETWORK.

14. Asbestos and Hazardous Materials. The Services expressly exclude any identification, abatement, cleanup, control, disposal, removal or other work connected with asbestos or other hazardous materials (collectively, "Hazardous Materials"). Should Company become aware of or suspect the presence of Hazardous Materials, Company may immediately stop work in the affected area and shall notify Customer. Customer will be responsible for taking any and all action necessary to correct the condition in accordance with all applicable laws and regulations.

Customer shall be exclusively responsible for any claims, liability, fees and penalties, and the payment thereof, arising out of or relating to any Hazardous Materials on or about the premises, not brought onto the premises by Company. Company shall be required to resume performance of the Services only when the affected area has been rendered harmless.

15. Insurance. Company agrees to maintain the following insurance during the term of the contract with limits not less than shown below and will, upon request from Customer, provide a Certificate of evidencing the following coverage:

Commercial General Liability	\$2,000,000 per occurrence
Automobile Liability	\$2,000,000 CSL
Workers Compensation	Statutory Limits

If Customer has requested to be named as an additional insured under Company's insurance policy, Company will do so but only subject to Company's manuscript additional insured endorsement under its primary Commercial General Liability policies. In no event does Company or its insurer waive its right of subrogation

16. Force Majeure. Company's duty to perform under this Agreement is contingent upon the non-occurrence of an Event of Force Majeure. If Company shall be unable to carry out any material obligation under this Agreement due to an Event of Force Majeure, this Agreement shall at Company's election (i) remain in effect but Company's obligations shall be suspended until the uncontrollable event terminates or (ii) be terminated upon ten (10) days notice to Customer, in which event Customer shall pay Company for all parts of the Services furnished to the date of termination. An "Event of Force Majeure" shall mean any cause or event beyond the control of Company. Without limiting the

foregoing, "Event of Force Majeure" includes: acts of God; acts of terrorism, war or the public enemy; flood; earthquake; lightning; tornado; storm; fire; civil disobedience; pandemic insurrections; riots; labor disputes; labor or material shortages; sabotage; restraint by court order or public authority (whether valid or invalid), and action or non-action by or inability to obtain or keep in force the necessary governmental authorizations, permits, licenses, certificates or approvals if not caused by Company and the requirements of any applicable government in any manner that diverts either the material or the finished product to the direct or indirect benefit of the government.

17. General. Except as provided below, to the maximum extent provided by law, this Agreement is made and shall be interpreted and enforced in accordance with the laws of the state or province in which the Services are performed without regard to choice of law principles which might otherwise call for the application of a different state's or province's law. Any dispute arising under or relating to this Agreement that is not disposed of by agreement shall be decided by litigation in a court of competent jurisdiction located in the state or province in which the Services are performed. Any action or suit arising out of or related to this Agreement must be commenced within one year after the cause of action has accrued. To the extent the premises are owned and/or operated by any agency of the United States Federal Government, determination of any substantive issue of law shall be according to the United States Federal common law of Government contracts as enunciated and applied by Federal judicial bodies and boards of contract appeals of the Federal Government. This Agreement contains all of the agreements, representations and understandings of the parties and supersedes all previous understandings, commitments or agreements, oral or written, related to the Services. No documents shall be incorporated herein by reference except to the extent Company is a signatory thereon. If any term or condition of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, all other terms and conditions of this Agreement will nevertheless remain in full force and effect as long as the economic or legal substance of the transaction contemplated hereby is not affected in a manner adverse to any party hereto. Customer may not assign, transfer, or convey this Agreement, or any part hereof, without the written consent of Company. Subject to the foregoing, this Agreement shall bind and inure to the benefit of the parties hereto and their permitted successors and assigns. This Agreement may be executed in several counterparts, each of which when executed shall be deemed to be an original, but all together shall constitute but one and the same Agreement. A fully executed facsimile copy hereof or the several counterparts shall suffice as an original. No modifications, additions or changes may be made to this Agreement except in a writing signed by Company. No failure or delay by the Company in enforcing any right or exercising any remedy under this Agreement shall be deemed to be a waiver by the Company of any right or remedy.

18. Equal Employment Opportunity/Affirmative Action Clause. Company is a United States federal contractor that complies fully with Executive Order 11246, as amended, and the applicable regulations contained in 41 C.F.R. Parts 60-1 through 60-60, 29 U.S.C. Section 793 and the applicable regulations contained in 41 C.F.R. Part 60-741; and 38 U.S.C. Section 4212 and the applicable regulations contained in 41 C.F.R. Part 60-250; and Executive Order 13496 and Section 29 CFR 471, appendix A to subpart A, regarding the notice of employee rights in the United States and with Canadian Charter of Rights and Freedoms Schedule B to the Canada Act 1982 (U.K.) 1982, c. 11 and applicable Provincial Human Rights Codes and employment law in Canada.

19. U.S. Government Contracts.

The following provision applies only to direct sales by Company to the US Government. The Parties acknowledge that all items or services ordered and delivered under this Agreement / Purchase Order are Commercial Items as defined under Part 12 of the Federal Acquisition Regulation (FAR). In particular, Company agrees to be bound only by those Federal contracting clauses that apply to "commercial" suppliers and that are contained in FAR 52.212-5(e)(1). Company complies with 52.219-8 or 52.219-9 in its service and installation contracting business. **The following provision applies only to indirect sales by Company to the US Government.** As a Commercial Item Subcontractor, Company accepts only the following mandatory flow down provisions: 52.219-8; 52.222-26; 52.222-35; 52.222-36; 52.222-39; 52.247-64. If the Services are in connection with a U.S. government contract, Customer agrees and hereby certifies that it has provided and will provide current, accurate, and complete information, representations and certifications to all government officials, including but not limited to the contracting officer and officials of the Small Business Administration, on all matters related to the prime contract, including but not limited to all aspects of its ownership, eligibility, and performance. Anything herein notwithstanding, Company will have no obligations to Customer unless and until Customer provides Company with a true, correct and complete executed copy of the prime contract. Upon request, Customer will provide copies to Company of all requested written communications with any government official related to the prime contract prior to or concurrent with the execution thereof, including but not limited to any communications related to contractor's Customer's ownership, eligibility or performance of the prime contract. Customer will obtain written authorization and approval from Company prior to providing any government official any information about Company's performance of the Services that are the subject of this offer or agreement, other than the Proposal or this Agreement.

20. Limited Waiver of Sovereign Immunity. If Customer is an Indian tribe (in the U.S.) or a First Nation or Band Council (in Canada), Customer, whether acting in its capacity as a government, governmental entity, a duly organized corporate entity or otherwise, for itself and for its agents, successors, and assigns: (1) hereby provides this limited waiver of its sovereign immunity as to any damages, claims, lawsuit, or cause of action (herein "Action") brought against Customer by Company and arising or alleged to arise out of the furnishing by Company of any product or service under this Agreement, whether such Action is based in contract, tort, strict liability, civil liability or any other legal theory; (2) agrees that jurisdiction and venue for any such Action shall be proper and valid (a) if Customer is in the U.S., in any state or United States court located in the state in which Company is performing this Agreement or (b) if Customer is in Canada, in the superior court of the province or territory in which the work was performed; (3) expressly consents to such Action, and waives any objection to jurisdiction or venue; (4) waives any requirement of exhaustion of tribal court or administrative remedies for any Action arising out of or related to this Agreement; and (5) expressly acknowledges and agrees that Company is not subject to the jurisdiction of Customer's tribal court or any similar tribal forum, that Customer will not bring any action against Company in tribal court, and that Customer will not avail itself of any ruling or direction of the tribal court permitting or directing it to suspend its payment or other obligations under this Agreement. The individual signing on behalf of Customer warrants and represents that such individual is duly authorized to provide this waiver and enter into this Agreement and that this Agreement constitutes the valid and legally binding obligation of Customer, enforceable in accordance with its terms.

Safety

Trane's Safety Standard

Trane is committed to providing a safe work environment for all employees and to preventing accidents in its business operations. To accomplish our objectives Trane has instituted safety programs, procedures and training that incorporate a progressive approach to injury prevention.

Proven Safety Success

Trane's safety culture in North America is unparalleled in the building services industry and has demonstrated proven results via continuous reduction of injury rates.

Trane Injury Rates v. Industry Competitors

Since 2003 the US Bureau of Labor Statistics records reflect Trane's Total Recordable Rate (TRIR) and Days away from work (DAFW) rate have been significantly lower than HVAC repair and maintenance contractors and Specialty Trade contractors (construction). Trane's safety culture in America is unparalleled in the building services industry and has demonstrated proven results via continuous reduction of injury rates.

Trane's incident (OSHA) rates are consistently 50-70% below the industry average. This outstanding safety achievement is the end result of the rigorous team oriented approach to our safety program that creates accountability and empowerment in all employees and management and fuels our institutional safety culture. This is the key to our continual improvement.

Safety Tools, Training & Expertise

Trane's service and contracting technicians are not only among the most skilled in the industry they are also extensively trained in safe work procedures. Our technicians receive safety training, equipment, tools, procedures, and management support to identify jobsite hazards and take appropriate measures to prevent personal injuries. The resources available to Trane technicians include:

- Safety Training – 20 hrs per year, including classroom and web-based platforms.
 - Topics include, but are not limited to, Lockout/Tagout, Confined Space Entry, Hazard Communication, Respiratory Protection, Hearing Conservation, Excavations, Scaffolding, Rigging, Powered Industrial Truck operation, Ladders, Vehicle Safety, Fire Protection, PPE, Emergency Response, First Aid / CPR.
- Electrical Safety – NFPA 70E compliant – electrical PPE; flame-resistant clothing; training.
- Fall Protection – full complement of fall arrest and fall restraint equipment for each technician.
- Ergonomics – custom-designed for HVAC field technicians, includes training, material handling equipment and procedures.

Safety Tools, Training & Expertise (continued)

- Smith System Safe Driving Program – Trane's safety Managers are certified instructors; safety Managers train technicians; 1-800 "How's My Driving?" stickers are located on the back of service vehicles.
- USDOT compliance – technicians scheduled within Material of Trade and Hours of Service limits and are fully qualified under Department of Transportation rules for driving commercial motor vehicles with GVWR >10,000 and 26,000 lbs.
- Refrigerant Management – Service technicians are trained to manage refrigerant in accordance with U.S. EPA rules using a sophisticated electronic tracking system developed by Trane.
- Empowerment - Technicians are empowered with full management support to address safety hazards as they see fit. If ever in doubt about how to do a job or task safely, the technician is required to ask a qualified person for assistance before proceeding with work.

Management Leadership and Commitment

Accident prevention is a primary responsibility of management at Trane. Trane's safety culture is based on the following management principles:

- Leadership at the local level manages the local organization's safety performance.
- Management is financially accountable for safety performance.
- Local management is actively engaged in risk reduction activities and training and manages safety performance outcomes.
- Management clearly communicates to all Trane employees their safety expectations and strongly enforces compliance with those expectations.
- Employees are held accountable when they fail to meet safety expectations.

Local management and supervisory personnel at the local level are responsible for implementation of the following safety program elements:

- The Safety Management System developed by Trane – developed in accordance with OHSAS 18001.
- Audits and Inspections – Supervisors, Middle and Upper Managers must conduct field inspections. Corporate Safety conducts detailed compliance and management systems audits.
- Company safety compliance programs – ensure that they are fully implemented.
- Safety and environmental performance – tracked using a Balanced Scorecard with leading and lagging indicators and metrics.
- Subcontractor Qualification – implement this process to promote safety and safety plan compliance on multi-employer job sites.
- Six Sigma and Lean – use these productivity tools to enhance safety on job sites.
- Drug and Alcohol Policy – mandatory DOT required for-cause and post-accident testing after recordable injuries and property damage.
- Motor Vehicle Records Search – annual checking of driving records of employees driving company vehicles.

Jobsite Safety Equals Customer Value

At Trane safety is part of our culture for every employee. What this means to our customers is fewer job site accidents and the delays and liability concerns that come along with them. What this means to our staff is greater confidence in the practices and procedures they use on the job and the pride that comes from working for one of the premier service organizations in the world. Tighter safety standards and fewer accidents can also lead to better on-time project completion and higher quality results.

When you use Trane Building Services to install, maintain or upgrade your building systems you will take full advantage of our superior safety program, low incident rates and subcontractor safety management procedures. These help you manage project risk more effectively than you could using multiple contractors or even a single prime contractor with a less impressive safety record.

Sorry. I should have given you the background. The Emergency Manager was in the Flint State Building and he saw a sign on the water fountain that says "Do Not Drink the Water". He was very upset that the State would do this. You may know there is much trouble going on in Flint regarding their water. Randy Byrne wanted to talk to the person in charge of that building about this issue. So...who would that be?

We are currently buying bulk water and have this individuals on a pallet. We cannot return them .

We can use them for the re grand openings at the mason and flint.

We are spending about \$100 to provide water to the tenants. Should we continue this until the water issue is resolved? The DEQ said the water is ok to drink. It still has issues.

My thought is yes as it's a minimal cost .

Let me know

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

Michael Glasgow Assistant Supervisor

Description of Work

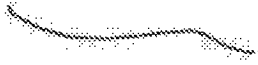

Task #	Description	Quantity	Unit Price	Your Total
PR001	Track and locate underground water main that services Michigan mart. Turn city stop box off and test for positive shut off. City valve continued to seep. At 4" OS&Y located in the mechanical room attempted to shut water to building. Interior valve also continued to leak. To insure positive shut off to building water main needed to be capped. Removed iron pipe flange with copper adaptor and replaced with blind flange. The main is now capped and wrapped in insulation. Water main was wrapped with heat tape prior to capping the main. Reused existing heat tape to help protect the main as it leaves the concrete to newly I stalled cap. (blind flange) Placed new covers on electrical connections boxes for heat tape to eliminate open wire connection.	1.00	\$1,800.00	\$1,800.00

Subject: RE: Flint SOB Interiors

Hi Kim, I went and met with the manufacturer's representative and looked at the city water booster pump. In the process of doing so it was discovered that the main 3" cold water riser in the building is galvanized and is very corroded and full of scale. With the new plumbing modifications taking place much of this scale is coming loose and plugging the new sensor faucets and flush valves. Installing a new booster pump system will cause more scale to break loose and cause more of these problems. Fortunately only the main 3" cold water line is galvanized. The rest of the cold water piping in the building is copper and is ok. It is highly recommended that the 3" galvanized main be replaced from the meter up to

the eighth floor . The opinion of probable cost for the new booster pump system including electrical is \$35,000. The opinion of probable cost for replacing the cold water main with insulation is \$50,000. Engineering fees would be \$5,500.

Thanks, Craig.

Good Morning,
Just a couple of questions...
I'm running budget numbers and I was wondering if you know the estimated costs for the following items:

Ice storage
Solar panels
Re-roofing

Also, I was talking to Mike Noonan and he asked if we could issue a Bulletin for Booster Pumps? I believe 2 of them.
I heard you selected the zinc color for exterior signs....sound good.
Thanks,

Jan Miller, RA, Project Director

Keith/Ric,

It was great meeting with you today. Bill and I agree that we all need to plan on getting together from time to time (possibly bi-monthly) to share information and keep each other current on relevant activities, projects, etc.

Attached, as we discussed, is the current 'draft' of the MOU for maintenance of the Water Street Ramp. As I noted earlier today, this document highlights/tracks the changes by UM-Flint to the MOU proposed by your office. Your feedback prior to our transmittal of this proposed agreement to our legal staff in Ann Arbor will be very helpful. Please get back to us with any feedback you may have. We intend to keep this process moving along as quickly as possible so we can wrap up this process.

Thanks much!

**MEMORANDUM OF UNDERSTANDING
BETWEEN THE**

STATE of MICHIGAN
Department of Technology Management & Budget

AND THE

UNIVERSITY of MICHIGAN

SECTION I. PURPOSE

- 1.1. The purpose of this Memorandum of Understanding ("MOU") between the State of Michigan, Department of Technology Management & Budget (the "State") and the University of Michigan (the "University") is to facilitate the ongoing maintenance of the Water Street Parking Structure.

SECTION II. LOCATION AND DESCRIPTION OF PROPERTY

- 1.1. The property governed by this MOU is located in the City of Flint, County of Genesee as described and illustrated in Attachment A (Exhibit A to Memorandum of Land Contract) to this MOU (the Premises) commonly known as Water Street Ramp, Flint, Michigan.

SECTION III. TERMS AND CONDITIONS

- 1.1. TERM. The term of this MOU is from October 1, 2014 through September 30, 2019 or such later date as provided for in 3.8.

- 1.2. RESPONSIBILITIES. The **University of Michigan** is responsible for, but not limited to, all items listed below:

- a) Utilities
- b) Common areas
 - i. Stairwells; including doors, hardware, steps, lighting and janitorial
- b) Snow removal (University levels) Fire system
- b)
 - i.
 - ii.
- c) Preventative maintenance of electrical distribution
- c)d) Maintenance of ramp drains
- d)e) Structural repairs/alterations
 - i. reference section 3.6
- f) Window washing (bi-annually)
- e)g)
 - i.
 - ii.

Comment [1]:

Our current practice is every four years; we are in full support of increasing frequency but cost to provide this enhanced service is still being determined

The **State of Michigan** is responsible for, but not limited to, all items listed below:

- a) Parking levels- basement, 3, 4, and roof
 - i. Janitorial
 - ii. Maintenance (non-structural)
 - iii. Security measures for the State-owned levels. This includes, but is not limited to security equipment and devices such as gates, roll-up doors and other gating mechanisms housed and operating on State-owned levels
- b) Fire system as long as full unobstructed access the Fire System room and equipment on the second floor is granted. If unobstructed access is not granted, responsibility for the fire system remains or reverts to the University of Michigan-Flint
- c) Snow removal (State levels)
- b)d) Elevators
 - i. including doors, hardware, lighting and preventative maintenance
 - ii. fire alarm system for the same
 - i.iii. emergency notification and response for the same
- c)e) Winterization and spring activation of water system.

Formatted: Highlight

1.3. STORAGE. The State of Michigan agrees to allow the University of Michigan to use approximately half of the available 360 square feet of storage on the basement level first floor of the parking structure at no cost. The University of Michigan agrees to use the storage area for the purpose of storing items used exclusively in the maintenance of the parking structure. The storage area shall not be used for any other purpose unless agreed to by the State of Michigan. The State of Michigan reserves the right to reclaim the space if a need arises to convert the space to additional parking. The State of Michigan reserves the right to retake the space if the University fails to abide to this agreement.

Formatted: Font: (Default) Arial, Font color: Black, Highlight

1.4. SUBLETTING. During the term of this MOU and any extension thereto, neither the State of Michigan nor the University of Michigan may sublet portions of the Premises to other local, state or federal government agencies without the written consent of the other. All subleases shall be subordinate to this MOU.

1.5. STATE AGENCY PREFERENCE. The State of Michigan and the University of Michigan will give preference to other State government agencies over non-state entities in sub-leasing space covered under this MOU to the extent available and practicable without adversely compromising the other's own operations or space needs. Sub-leases to other State agencies may be to accommodate sub-lessee's needs for staff training, special events, offices, parking and/or indoor storage and shall further provide for effective sub-lessee access to sub-leased premises.

Comment [2]:

I'm not sure why this language is even in this proposed agreement because it presumes we have excess capacity, which we will never have. And, it will always be UMF's call as to who we choose to sublease to if that opportunity were to ever present itself anyway. I have elected to delete this sentence from the paragraph.

1.6. INSPECTIONS. The State of Michigan and the University of Michigan shall jointly survey and evaluate the premises semi-annually; including inspection of the structure and all mechanical and electrical systems.

1.7. ALTERATIONS. No alterations, major repairs maintenance, modifications or improvements shall be made to the Premises by the State of Michigan or University of Michigan without notification and approval by the other party. Contractors, project managers, and all financial details must be approved by both parties before any work commences.

1.8. GENERAL SERVICES. All general services performed in common areas by University personnel will be prorated at current University hourly wages, including benefits. The State will be responsible for two-thirds (2/3) of the cost of maintaining common areas.

These services and associated supplies will be documented by an assigned University account manager and billed quarterly.

1.8.1.9. CONTRACT AND MAINTENANCE SERVICE AND UTILITIES. Expenses for contracted renovations, maintenance services and utilities will be prorated as follows:

- a) One-third (1/3) University of Michigan
- b) Two-thirds (2/3) State of Michigan

1.10. UNIVERSITY FACILITIES & OPERATIONS ACCOUNTANT. There will be a five (5) hour/month administrative fee charged to the State for accounting services dedicated to the Water Street Parking Account activities. This fee will be documented and accounted for through the quarterly billing process.

1.11. COMMON SUPPLIES. Common supplies will be purchased and expenses prorated as follows: one-third (1/3) for the University and two-thirds (2/3) for the State. The expenses will be documented and billed quarterly by the University Facilities & Operations account manager. There will be a 15% administrative fee on the State's portion of these bills for ordering, storing, delivering and tracking all common supply materials.

1.12. ELEVATOR MAINTENANCE SERVICE. The elevator expenses will be prorated as follows: one-third (1/3) for the University and two-thirds (2/3) for the State. This expense will appear as a credit on the quarterly invoices once the University receives copies of the invoices from the elevator service company.

1.9.1.13. CODES AND PERMITS. The State of Michigan and the University of Michigan shall comply with all applicable codes and obtain any necessary permits in connection with its use of the Premises.

1.10.1.14. DAMAGE AND DESTRUCTION. The State of Michigan and the University of Michigan shall be liable for any damage caused by their respective party to the Premises, less reasonable wear and tear and damage by the elements.

1.11.1.15. CANCELLATION. This MOU may be cancelled by either party with 60 (sixty) days advance written notice to the other party. Upon cancellation or termination of this MOU, the cancelling party shall clean the Premises to "broomclean condition", and shall remove all of their personal property from the Premises. Personal property remaining in or on the Premises after the cancellation or termination effective date shall be considered abandoned property, and the cancelling party shall be obligated to pay the remaining party for all reasonable removal costs.

1.12.1.16. AMENDMENT. This MOU may be amended or modified by written mutual agreement signed by the Directors of both parties.

1.13.1.17. NON-DISCRIMINATION. Both the State of Michigan and the University of Michigan The Lessor shall comply with the Elliott-Larsen Civil Rights Act, 1976 PA 453, as amended, MCL 37.2101 et seq, the Persons with Disabilities Civil Rights Act, 1976 PA 220, as amended, MCL 37.1101 et seq, and all other federal, state and local fair employment practices and equal opportunity laws and covenants that it shall not discriminate against any employee or applicant for employment, to be employed in the performance of this real estate contract, with respect to his or her hire, tenure, terms, conditions, or privileges of employment, or any matter directly or indirectly related to

employment, because of his or her race, religion, color, national origin, age, sex, height, weight, marital status, or physical or mental disability that is unrelated to the individual's ability to perform the duties of a particular job or position. Both partiesThe Lessor agrees to include in every subcontract entered into for the performance of this real estate contract this covenant not to discriminate in employment. A breach of this covenant is a material breach of this real estate contract. This covenant is cross referenced in Article XI.

SECTION IV. NOTICES

- 1.1. Each party (State of Michigan and University of Michigan)Department will notify the other of any planned use of the Premises that is thought to likely impact the other's operations and interests in the Premises as soon as reasonably possible. Either partyDepartment may request a meeting to discuss the planned use. This and all other notices required in this MOU shall be addressed and directed as follows:

Notices to:

Mike Noonan
Facilities Supervisor, Flint State Office Building
Department of Technology Management & Budget
125 E. Union Street
Flint, Michigan 48502

Notices to:

George Hakim
Director, Facilities & Operations
University of Michigan-Flint
303 East Kearsley Street
Flint, MI 48502

or to such other notification addresses as the parties may provide to each other. A copy of this MOU shall be provided to the DTMB Real Estate Division, Mason Building 1st Floor, Lansing MI 48909 upon execution.

IN WITNESS THEREOF, the parties to this MOU subscribe their names on the date(s) set forth below:

Department of Technology Management & Budget

University of Michigan - Flint

Marlene,

For the water if your agency wants to have them and pay for them that is up to dhhs to decide. We had them for a short time with the water issue in flint but we will no longer continue to provide . We have several drinking fountains on each floor.

We have a recycle program that is for non confidential materials. If you need the lockable bins that is on your agency.

On our loading dock we have a recycle program for white paper, mixed paper, card board and metal and plastic .

Hope that helps

Good afternoon Mr. Noonan, I am hoping you can answer a couple questions for us:

1. Culligan Water – We have 5 water coolers at McCree. Should I request that Culligan relocate them to SOB? I wasn't sure if you would increase your water coolers or if we should continue with our own.

2. Rapid Shred – We have 5 rapid shred containers. Should we bring them with us to SOB? Again, not sure if we should continue what we have or combine with what is there.

Thanks for your help.

Description of Work

Set up temporary fencing around the meter vault and sidewalk along with signage per MDOT code.

Excavate down to remove the concrete vault around the the 2 existing 10" water meters and water main pipe.

Cut out the existing 3 10" lead valves and removed from job site. Supplied and install 3 new 10" MJ valves per city request.

Removed the old concrete from from the job site.

Saw cut around the existing manhole located inside the Fairgrounds, and remove the concrete from the job site. Install a new valve raiser to access the valve. This was needed to be done because the existing structure had fallen in on itself.

Back filled with sand and stone per code and patched around the valve raiser with concrete.

Rebuilt the existing vault with a concrete lid and installed a new access cover. Back fill around the vault with fill dirt. Replaced 4 flags of sidewalk pr MDOT spec.

12		
13	Building Utilization Rate:	
14	•	Rentable Square Footage: 73,019; 93% occupancy (FY15 BOA Report)
15		
16	Physical Assessment (architectural, structural, civic/site, etc.):	
17	•	Building systems are outdated and inefficient. All life safety systems need to be upgraded. A detailed list of items has been developed by DCD & BOD.
18	•	Masonry masonry parapet at west elevation was cleaned, re-tucked, caulked and re-sealed (waterproofed) in 2002; south elevation in Fall 2004
19	•	Roof replaced 2000
20	•	Furniture/carpet upgrades 2nd and 3rd floors 1998/1999; 4th floor 2003
21	•	Concrete and storm sewer repairs funded in 2006
22	•	Cracked, damaged concrete & grates at storm sewer catch basin in loading dock complete in 2008.
23	•	Penthouse tuckpointed in 2012.
24	•	3 parking lots resurfaced in 2012 and 3 in 2013 (071/12219.RMP)
25	•	Carpet replacement on 2nd and 3rd floors funded 2012 (071/12284.AGY)
26		
27	Utilities Systems Assessment:	
28	Mechanical:	
29	•	Elevators replaced in 2010.
30	•	Chilled water and condensor pumps in the mechanical room are not easily accessible.
31	•	Boiler pumps should be replaced.
32	•	Existing AHU's are outdated and should be replaced.
33	•	Fire pump and Jockey pump should be replaced.
34		
35	Electrical:	
36	•	Floors 1, 4, penthouse and support areas should be upgraded to energy efficient T8 lamps and electronic ballasts or LED
37	•	Switchgear cleaned - Spring 2004
38		

	A	B
39	Building Controls:	
40	•	Controls obsolete and beyond service life
41	•	Fire alarm system's main panel was upgraded to XLS1000 and meets current State standards
42	•	Stand-alone keypads are in place for access to limited areas; panic buttons report to the security desk
43		
44	Adequacy of Utilities and Infrastructure Systems to Current and 5-year Needs:	
	•	A study of water penetration through the building envelope should be completed within the next 5 years. Decision made in 2004 to finish monsaard parapet refurbish/re-waterproof. Water penetration from penthouse has halted. Water still penetrates building from brick parapet area.
45		
46	•	A line item request was submitted in FY15 for complete interior and exterior renovations.
47		
48	ADA Compliance and Assessment:	
49	•	Restrooms do not meet current ADA standards

Facility Notification

Flint West Stairwell Closure

Date/Time:

Wednesday, October 14, 2015 through Friday, October 16, 2015

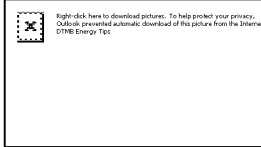

Details:

The west stairwell of the Flint State Office Building will be closed starting at 6:00 a.m. on Wednesday, October 14, and continue through the rest of the week, so contractors can do needed repairs on the drywall. During this time, please use the east stairwell to travel between floors. In the event of an emergency, the west stairwell will be open and the contractors will ensure a safe passage on all stairs.

We apologize for any inconvenience.

Contact:

DTMB Customer Service Center, DTMB-Customerservice@michigan.gov or 517-373-6227

According to the Clean Air Council, the average American throws away enough paper each year to build a 12-foot wall from Los Angeles to New York City. Consider going paperless by saving documents and manuals on a common server instead of handing them out in hard-copy form. If you must print a multi-page document, be sure to use the double-sided printing feature.

Hi Mike and Larry,

Here are the lead and copper results from the Flint State Office Building samples. No danger at this point to the building occupants from lead with the low readings.

Thanks,
Brian

Subject: Re: sampling

I just spoke to the DEQ and they stated that at both locations there was no copper detected.

#1 location had .001 for lead and #4 had .004 for lead. In order to be a concern it would have to be .015 or above so both are well within acceptable levels.

As far as bacterial or chlorine residual, those samples are submitted differently as they are done in house. Did you submit those as well? They would have been in a much smaller sample bottle. If not, I can connect you with the lab and we may have to have the tech come out.

Hi Melanie,

Any news back on the water samples I dropped off on 9/25/15 for the State Office Building at 125 E. Union St? I dropped off a few samples and was looking for lead results for sure (shocker right) and possible chlorine residual and bacteria results as well. Any news would be appreciated I know you guys are extremely busy.

Thank you,

Brian Walts

It was nice talking to you this afternoon. I forwarded your request and contact information to Mike Glasgow, Utilities Administrator and former Lab Supervisor.

I also had a brief conversation with the Lab Assistant, Chris Beatenhead who suggested that you pick up the sample bottle at your earliest convenience if you need to expedite the process.

Sincerely,

Melanie Poisson, Clerk

SNOW REMOVAL QUOTATION REQUEST 2015 – 2016
Michigan State Fair Grounds
Corner of 8 Mile and 11900 Woodward Ave.
Detroit, Michigan 48203

GENERAL SPECIFICATIONS:

PURPOSE

The Department of Technology, Management and Budget (DTMB), Facilities & Business Services Administration (FBSA) has a need for snow removal services at the Michigan State Fairgrounds in Detroit, Michigan. The requirements for this service are specified in the following paragraphs. The possibility exists for the DTMB to require additional snow removal services that may be added to this annual contract upon agreement with the vendor.

CONTRACT COMPLIANCE INSPECTOR (CCI)

The Contract Compliance Inspector for this project is:

Michael Noonan, Facilities Supervisor
Department of Technology, Management & Budget
Facilities & Business Services Administration (FBSA)
Flint State Office Building
125 East Union
Flint, MI 48502
Phone: 810-760-2051
Fax: 313-456-2282

INVOICES

Vendor will provide a job ticket detailing all services provided within a 24 hour period, which must be faxed or emailed within 48 hours to the Contract Compliance Inspector. Failure to provide timely job tickets may result in payment delays or disputes. No payment will be authorized for work, which has not been so verified. The invoice shall reflect charges for actual work done by the billing date. Invoices shall include the purchase order number and should be sent monthly to the address noted below as service is performed.

DTMB-Financial Services
Accounts Payable
2nd floor, Lewis Cass Building
320 S. Walnut Street
Lansing, MI 48913
or DTMB-Accounts-Payable@michigan.gov

INSPECTION AND CORRECTION OF DEFICIENCIES

When snow removal activities are not performed satisfactorily the Contract Compliance Inspector or his/her designee will communicate both verbally and in writing with the Contractor. The Contractor shall be required to return to the location and correct deficiencies within 24 hours of verbal communication without addition of cost to the State.

SNOW REMOVAL QUOTATION REQUEST 2015 – 2016
Michigan State Fair Grounds
Corner of 8 Mile and 11900 Woodward Ave.
Detroit, Michigan 48203

SERVICE SPECIFICATIONS

1. Complete all snow removal operations after 2 p.m., unless otherwise directed. In the event of snow storm during regular business hours, and under unusually severe weather conditions, the Contractor shall maintain the area identified in the site plan and keep it accessible to the building occupants' vital operations as needed during any such snow storm or severe weather conditions.
2. It shall be Contractor's responsibility to provide adequate snow removal equipment. When a plow cannot be feasibly used to remove snow from in front of entrances and doors to garage areas, it will be either hand shoveled or a snow thrower can be used to provide access. A snow melt will be used to maintain areas free of ice and slippery conditions.
3. Calcium Chloride, or an equivalent approved product, shall be used on all sidewalks, steps and entrances; equivalent products are to be approved at the discretion of the property manager.
4. Snow is to be pushed to the edges and sides of sidewalks, or as directed, to provide safe access to the premises. Plowed snow shall be pushed so as to cause the least amount of interference to pedestrian traffic. Snow will not be piled near dumpsters, gate openings, gas pumps, loading ramps/docks, truck wells, propane, and salvage storage areas.

Accumulation of snow left by City, State, or County plows on sidewalks and driveways shall be cleared on the same day plowing was done.

5. Accumulation of snow caused by drifting or blowing will be removed when depth of snow reaches 2" to 4" or more.
6. All fire hydrants shall be kept free of snow so hookups can be made.
7. The Contractor shall take all necessary precautions to conduct the work in a safe manner, so as to prevent injury to persons or damage to property. Any damage caused by the Contractor to State fairgrounds property will require restitution for repairs to same. This shall include such items as fences, signs, posts, buildings, trucks, automobiles, sprinkler heads, bumper blocks, plow or ice melt damage to lawn and shrubs, etc. If damage does occur, DTMB-Facilities, Building Operations Division (BOD) shall be notified immediately.
8. Access to secured areas will be coordinated by DTMB-Facilities-BOD.
9. The Contractor shall provide necessary supervision and at the Owners request, make an inspection with the owner's representative, to ascertain compliance with the specifications of the agreement.
10. The price of snow removal shall include salt, taxes, Social Security Unemployment Compensation insurance payments, employees' fringe benefits, insurance coverage of employees, property damage insurance, public liability insurance and any other expenses of any nature which the Contractor shall incur in the performance of the agreement. **Please note the State of Michigan is exempt from Sales Tax.**
11. Contractor shall maintain detailed accounts as to substantiate billing rendered under the provisions of this contract. FBSA-Building Operations shall be afforded access at reasonable times to the Contractors books, records, payrolls, correspondence, instructions, receipts, vouchers, memoranda, etc., related to billing.

Corner of 8 Mile and 11900 Woodward Ave.
Detroit, Michigan 48203

12. If snow removal /hauling from premises are required, FBSA-Building Operations will notify vendor and issue a work order for billing.
13. All snow removal services will be performed adhering to the City of Detroit Department of Public Works regulations and to the complete satisfaction of FBSA-Building Operations. If in the opinion of FBSA-Building Operations, plowing or salting is insufficient or incomplete, the Contractor will make necessary corrections without additional cost.
14. **Vendor will provide a job ticket detailing all services provided within a 24 hour period, which must be faxed within 48 hours to the Facility Supervisor. All invoices must itemize the type the service provided. Failure to provide timely job tickets and itemized invoices may result in payment delays or disputes.**
15. Exact quantities to be purchased are unknown, however, the Contractor will be required to furnish all such materials and services as may be ordered during this Contract period. Quantities specified, if any, are estimates based on prior purchases, and the State is not obligated to purchase in these or any other quantities.

STATE FAIR SERVICE AREA

Areas to be maintained per the contract include sidewalks along 8 mile from the train tracks to the shops at gate way fence. The drive way to the Dumars Field House will need to be plowed and salted. The sidewalk along Woodward Avenue to the bus stops the just south of the bus stop to State Fair Avenue from Woodward Avenue on State Fair Avenue to the train tracks at the end of the State Fair Grounds property. This will also include the main entrance off from Woodward Avenue which will need to be plowed and salted. Total area of the sidewalks will be approximately 2 miles and the area for the drive way will be $\frac{3}{4}$ of a mile.

Inside the fairgrounds will be done by staff on site. In the event of need the State of Michigan may call on you for plowing and salting at an additional charge if needed.

INSURANCE COVERAGE REQUIREMENTS

1. Liability Insurance

The Contractor must provide proof of the minimum levels of insurance coverage as indicated below. The insurance must protect the State from claims which may arise out of or result from the Contractor's performance of services under the terms of this Contract, whether the services are performed by the Contractor, or by any subcontractor, or by anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable.

The Contractor waives all rights against the State of Michigan, its departments, divisions, agencies, offices, commissions, officers, employees and agents for recovery of damages to the extent these damages are covered by the insurance policies the Contractor is required to maintain under this Contract. All insurance coverage's provided relative to this Contract/Purchase Order are PRIMARY and NON-CONTRIBUTING to any comparable liability insurance (including self-insurances) carried by the State. The insurance must be written for not less than any minimum coverage specified in this Contract or required by law, whichever is greater.

Where specific limits are shown, they are the minimum acceptable limits. If Contractor's policy contains higher limits, the State must be entitled to coverage to the extent of the higher limits.

The Contractor is required to pay for and provide the type and amount of insurance checked ☒ below:

- ☒ 1. Commercial General Liability with the following minimum coverage:
\$2,000,000 General Aggregate Limit other than Products/Completed Operations

SNOW REMOVAL QUOTATION REQUEST 2015 – 2016
Michigan State Fair Grounds
Corner of 8 Mile and 11900 Woodward Ave.
Detroit, Michigan 48203

\$2,000,000 Products/Completed Operations Aggregate Limit
\$1,000,000 Personal & Advertising Injury Limit
\$1,000,000 Each Occurrence Limit

The Contractor must list the State of Michigan, its departments, divisions, agencies, offices, commissions, officers, employees and agents as ADDITIONAL INSUREDS on the Commercial General Liability certificate. The Contractor also agrees to provide evidence that insurance policies contain a waiver of subrogation by the insurance company.

☒ 2. If a motor vehicle is used to provide services or products under this Contract, the Contractor must have vehicle liability insurance on any auto including owned, hired and non-owned vehicles used in Contractor's business for bodily injury and property damage as required by law. The Contractor must list the State of Michigan, its departments, divisions, agencies, offices, commissions, officers, employees and agents as ADDITIONAL INSUREDS on the vehicle liability certificate. The Contractor also agrees to provide evidence that insurance policies contain a waiver of subrogation by the insurance company.

2. Subcontractor Insurance Coverage

Except where the State has approved in writing a Contractor subcontract with other insurance provisions, Contractor must require all of its Subcontractors under this Contract to purchase and maintain the insurance coverage as described in this Section for the Contractor in connection with the performance of work by those Subcontractors. Alternatively, Contractor may include any Subcontractors under Contractor's insurance on the coverage required in this Section. Subcontractor(s) must fully comply with the insurance coverage required in this Section. Failure of Subcontractor(s) to comply with insurance requirements does not limit Contractor's liability or responsibility.

3. Certificates of Insurance and Other Requirements

Contractor must furnish to DTMB-Financial Services, certificate(s) of insurance verifying insurance coverage or providing satisfactory evidence of self-insurance as required in this Section (the "Certificates"). The Certificate must be on the standard "accord" form or equivalent. **The name DTMB-Financial Services-Operations Division, Delegated Procurement Unit and location of service must be shown on the certificate of insurance to assure correct filing.** All Certificate(s) are to be prepared and submitted by the Insurance Provider.

ALL CERTIFICATE(S) MUST BE PROVIDED BY THE SUCCESSFUL BIDDER TO DTMB-FINANCIAL SERVICES PRIOR TO THE ISSUANCE OF A PURCHASE ORDER. IF THE SUCCESSFUL BIDDER CANNOT PROVIDE THE NECESSARY CERTIFICATES OF INSURANCE THEN THE PURCHASE ORDER SHALL BE AWARDED TO THE NEXT COMPETITIVE BIDDER.

Subject: RE: Flint State Office Building - 7th Floor

Jan,

This is a request from Our tenants To purchase blinds for the interior windows. This will go through our E maintenance and be put on a 123 for bill back if needed. To keep things close to the same we wanted window magic to give us the quote and we would work out the cost. This does not involve Design and Construction. I thought it was clear to Brenda we wanted the quote sent to us. We would then decide if it was a bill back for service or not. So you did not need to be involved.

Patty you do not at this time need a PO for this. I will get the quote from window magic and cover the cost or who and how best for us to pay for it.

Brenda,
This quote will need to come to Brian Walts or Myself, please do not contact Patty. Sorry for the confusion. If you have any questions on this please contact me.

Jan I was not at the meeting yesterday as I was dealing with a sick kid, The last turn over date for the Lobby was January 18th 2016 From looking at this I would say not. Can or have you got a reason why and when?
Also what's the deal with the card readers on the 7th floor. I am hearing something was missed?

Also since Flint is in a State of Emergency we are giving up temporary use of the 5th floor conference for DTMB . We will have 10 PIO's here answering phones and doing Media interviews.

Have a great day!

That's fine, but can you issue Window Magic a PO?
Mike's concern is that he wants the shades to match so they're consistent with the rest of the building. Brenda at Window Magic has all the specs on the shades to make sure they match.

Please let me know if you have any questions.

Subject: RE: Flint State Office Building - 7th Floor

Hi Brenda,

While I was on site today I discussed this with Brian Walts. The way we understand it, is that while you are on site field measuring the 7th floor perimeter windows, you would also like to measure the interior desk windows.

Apparently someone from DHHS has requested shades for those windows. I was not aware of this request.

Although I don't mind you measuring for them, you will have to do the work under a separate PO since it is not considered part of the project.

We're not sure how they will be mounted since the frames & glass have yet to be installed.

Patty Curtis is copied on this email and will be your contact for DHHS. You should discuss the details with her in order to write a proposal.

Patty's office is located in Lansing and her phone number is 517-335-6856.

Please let me know if you have any questions.

DHHS is scheduled to move onto the 7th floor the weekend of March 12, 2016.

Sincerely,

Jan Miller, RA, Project Director

Subject: Re: Flint State Office Building - 7th Floor

Happy New Year....

The front desk interior windows...I believe they will be using Bullet[proof glass, not installed yet.
Do they want the shade to mount inside the frame or mount on the outside to cover the entire opening which provides more privacy?
As the furniture is not in yet, we wondered if it matters which side the shade control goes... right or left? Example, if a desk could hinder the ability to reach the chain?
Do you want the material to be Blackout rather than the SheerWeave like the other shades?
Blackout comes in White, Beige, Creamy Beige, Grey and Black.
The estimated installation time is around the 2nd week in February, after contractors done?
Thanks and let me know what you think.
Brenda

That's a great question. Potentially a hundred.

If we secure a briefing at UM-Flint or elsewhere, I wonder if we could flip-flop the JIC and conference room. Just a thought, if possible.

Hi Mike,

Let's try this again. If we could secure a location at UM-Flint as a media briefing area, that would be great.

The location would have to include space for plenty of media, cameras. Media truck parking will have to be close too.

Thanks,

Ron

<noonanm@michigan.gov> wrote:

I can take two chairs that are stored for DHHS that are like new. We will need to get two soon.

I just spoke with Larry and he said that we can get two from Lansing this week or sooner if needed.

Im sure our tenants won't mind if I borrow two chairs temporarily. Given the circumstances. I would even give them two of mine or my staffs chairs (not really in great shape mind you). I just didn't want them to have something like that.

But Monday two chairs will be in that office and we can swap out later .

Is everyone ok with that.

I received this just now from Brom as well. It is for 2 chairs. Can we make it happen?

Mike - we set up an office in Flint for Harvey Hollins in Gov's office to work on the water issue. He needs a chair.

Can we have something delivered ASAP?
Otherwise they have an extra chair in the Gov's office that someone could take up.

Oops. Two chairs.

From: Noonan, Michael (DTMB)
Sent: Monday, January 11, 2016 7:50 AM
To: Quebbeman, Marsha (GOV)
Cc: Walts, Brian (DTMB); Pratt, Jeff (DTMB)
Subject: Re: Flint Office Space

Jeff,

Can you assist Marsha with this please. Thanks

Sent from my iPhone

Subject: Work

I will be back to work Wednesday .

██████ is home from the hospital and I actually took him to school today. Not sure he will make it all day but the doctors want him to get back to his schedule.

He will have several appointments this week and next so Mom or I will have to take him as needed. But going from Saturday am being told your sons being prepared for flight care, then ok the mess are working but your going to be here 5-6 days in PICU to home on Monday night, is a true blessing.

He has never showed any signs of asthmatics and now has to see a specialist for it. Very crazy weekend...

I did run into a lady from the flint building and we talked about it and no lie it's the water its poison...

I told her I live in the country and I have well water...

I have my phone on as always and see you tomorrow

SEG. 1 / TROUBLESHOOT / ENGINE

COMPLAINT: HARD STARTING

CAUSE: LOW GAS PRESSURE

REPAIR: INSPECTED UNIT BY INSTALLING GAS PRESSURE GAUGE AT SUPPLY TO ENGINE. STARTED UNIT AND FOUND GAS PRESSURE TO BE 0 INCHES OF WATER. CHECKED SPEC. AND FOUND THAT THIS IS A ZERO PRESSURE SYSTEM. THEN CHECKED THE SUPPLY TO THE REGULATOR, AT THE REGULATOR AND FOUND IT TO BE AT 4 INCHES OF WATER. SPEC. IS BETWEEN 7 AND 13 INCHES OF WATER FOR GAS SUPPLY PRESSURE. THE UNIT DID NOT START AT 4 INCHES OF GAS PRESSURE. I TRIED TO RESTART AGAIN AND THE GAS WAS UP TO 5 INCHES AND IT STARTED BUT HARD. I COULD NOT CHECK THE PRESSURE BEFORE THE SHUT OFF VALVES DUE TO THE LACK OF A TEST PORT. I WOULD RECOMMEND A TEST PORT BE INSTALLED BEFORE THE VALVES TO VERIFY GAS PRESSURE SUPPLIED FROM BUILDING. IF IT IS VERIFIED THAT THE PRESSURE IS LOW COMING FROM THE BUILDING, THEN THE SUPPLY PRESSURE TO THE ENGINE NEEDS TO BE RAISED TO AT-LEAST 7 INCHES OF WATER TO BE SURE THE UNIT WILL START. IT WOULD BE BETTER IF THE GAS SUPPLY WAS IN THE MIDDLE OF THE RANGE (7 TO 13 INCHES) TO HELP WITH DIPS IN THE GAS PRESSURE DUE TO HIGH CONSUMPTION IN THE BUILDING.

Hi David,

DynGlobal manufactures units to remove heavy metals including lead from drinking water. Our technology is scalable from under sink units to large municipal scale facilities.

Please let me know how we can assist Flint to remove lead or other metals or bacteria from drinking water. DynGlobal's technology can be rapidly deployed within less than two months to resolve the current emergency situation.

Thank you and best regards,

Vern

Subject: City of Flint - Emergency Operations Center Recycling

Good Morning,

My name is Shane, I work for Genesee County. We are coordinating efforts with the City of Flint to recycle used water filter cartridges in order to help curtail the amount of cartridges ending up in a landfill. With this, I have already received permission from the City to provide bins for collecting the Brita and Pur filter cartridges at the locations they are responsible for. In an effort to remain uniform at all of the distribution sites, I am seeking your permission to provide two bins (one for Brita filters, one for Pur filters) at the two locations below that are under your direction. I will be responsible for ensuring the bins are emptied and will subsequently ship them to be recycled. Please let me know if I have your permission to start this effort at your locations. If you have any questions please feel free to call me. I appreciate your time and look forward to hearing from you soon.

All the best,

Thanks team,

All I can say is it's going to be very busy on the 5th floor and we have high level officials on the way as well. At this point we all have been given the direction " to do what it takes" .

It's going to be a long journey to fix the issues, but we will do our best to provide to all of our tenants as best we can at all times .

Please remind your staff on the 5th floor that there are other agencies on that floor and please respect them as they should you as well.

With the arrival of the 2 big groups to address the Flint water issues space is going to be a real concern. Please don't panic on me yet, my thinking is they will only need a little extra room then the 3 conference rooms we provided so your new extra staff will still have space but until I see what their needs are I wouldn't know. I should have it figured out by noon or so and will stop down to talk. My guess is they will only need about 5 open cubicles leaving the balance for your teams. Anything you can do will be great!

Brian and Mike,

We need at least 12 cubicles on the 5th floor (3 child welfare, 8 adult services), otherwise we will need a conference room to house our staff so that they can do their jobs or they will be sitting on the floor.

This is really impacting our day-to-day operations, including the lack of parking in the basement for our DHHS families (which it is my understanding that alternative parking is being explored).

Larry & Kylie-

I am out of the office and don't have access to my final furniture plans for Flint. Can you send me the number of people in the redesigned Flint State Office Building by doing a quick count on 1-5. Can you tell me how many are on 6 separately and how many we anticipate on 7? I just need an approximate of the number of work stations.

Thanks,

Jamie Phillippo

East Zone update 2-2-16

Sorry we could not attend... Rick is on vacation and Brian is dealing with Saginaw control issue and has to take photos for New DHHS staff ID's

Flint I am waiting for the Head of the EPA to arrive on sight. Security Detail arrived yesterday with late notice that she would be here.

Saginaw : Painting and door handle replacement

State Fair : Dumars was Denied use of the Parking lot off of 8 mile for an event in May

Jackson : New Air handler project is just about complete. There has been some Variable speed drive questions as related to pumps and horse power. Brian Knox has clarified the questions.

Flint : The short.....

This past few weeks the East Zone staff has shown exceptional intestinal fortitude. They have made space for the for 40+ federal employees who are here to help the State of Michigan, the City of Flint and most importantly the residents of this city. It has been days and nights of quick thinking and problem solving. It has involved making many unpopular decisions and thinking out of box to get these groups together. This group is working long after the close of business and all weekend.

Staff in the East zone has been on the front line going above and beyond any position description we have.

Richard Baird the governor's appointed flint man has been here working with both city and federal officials. He has been doing meet and greets and doing media interviews. Last week LT Governor and appointed staff had a meeting on sight for the flint water crisis and will continue to meet here.

I want to thank my staff for going above and beyond, they have been doing ID's, Parking assisting the SEOC in all the needs such as : Installing TV's, helping with Direct TV, IT, Governor's office needs and the list goes on and on. The complaints on parking are flying in daily and the staff here is the ones that have to handle it and here about it again and again.

Construction: Still not done and the schedule still continues to change.

Ice storage and Solar: Kick off meeting was last week. They will start February 15th and Chiller tie in's and Structural support welds on 7th floor.

Hello everyone,

I apologize that I have not sent this e-mail out sooner. I am still working on a new location for our next meeting, and will let you know as soon as I have a place set. However, our next meeting is still scheduled for this Thursday, February 4th at 3:00 p.m.

As promised, I have attached a number of documents to this e-mail. They are...

1. Minutes from last Thursday's meeting

2. Volunteer Request Form for any organization that needs event based volunteers from the Community Volunteer Reception Center. (Also, please remember that groups interested in volunteering in the work that is being done around the water crisis should visit www.flintvolunteer.org)
3. Updated contact list for the Community Partners Meetings
4. Catholic Charities support group for those affected by the water crisis
5. Long term community recovery model (introduced at last week's meeting)

Finally, remember that tomorrow (Monday), there will be a rally at First Trinity Missionary Baptist Church (1226 Beach St., Flint, MI)...at 12:00 p.m. Everyone is invited.

Hope to see everyone on Thursday. Take care.

Tony Lasher

Community Partners Meeting
American Red Cross
1401 S Grand Traverse St, Flint, MI 48503
Thursday, January 28, 2016

Introductions

- Lieutenant Governor Brian Calley: eye on sustainability, window of opportunity to help Flint, wants to be physically present in community (physical presences will be Rich Baird). Wants over communication. Wants to leave tangible money (100million) for long run before close of his run as a government official. Intends to be at next meeting.
 - Alternative to 211- 866-561-2500, Going to be on Michigan.gov
211 does not work for Obama Phones or for some of the prepaid phones.
 - Need for translation of all documents in Arabic and Spanish. Some posted to Michigan.gov.
 - Concerns raised about how will those who test negative will receive treatment if they are still affected.

National Guard I.D. announcement

- Issues with PODs
 - There are currently rumors going around, they are not working with law enforcement (I.e. ICE). The National Guard's main concern is just to get clean water out to the community. "No human being will be denied water at our five locations. You do not need to give ID; you do not need to show your address." When they ask "What is your address?" if you feel uncomfortable you can call 211 and get a delivery schedule or have someone come for you.

Planning (See PowerPoint)

- Recovery Destination: Healthy Home, Healthy Community
- 6 points of recovery (Each one over seen by someone in the room), possibly have people sign up for "committees" at a later date. KEY OUTCOME.
- Need to work from this macro distribution to a more targeted sustainable solution
- Need to carve out "players" known and unknown
- Team Rubicon: skills of military and first responders to respond to disasters
- Artist/Activist speaking about how 211 is hard and some locations not receiving resources that they need
- Flint Food Bank (810-239-4441), who works with 100 partners, is now making deliveries to over 40 sites, with 21 trucks, 372 pallets. The Food Bank plans on doing this each week. If you know of any nonprofit interested in receiving water have them call the

Food Bank. Must call for pallets only. Catholic Charities can help with smaller quantities of water.

- Some houses are being hit more than once. But there are areas where they have not seen a bottle of water. The Red Cross gets out routes Emergency Operation Center. If there are addresses and locations please leave them here at the Red Cross or call 211. Senior/ Section eight housing seems to be a main concern. Catholic Charities seems to be working on that hurdle as well.

Activity Reports

- Behavioral health support meeting with the Public Health “Flint Community Resilience Group” next Tuesday February 2nd 11am-1pm at River Front Banquet Center. Immediate, intermediate and long term behavioral health addressed.

County EOC/State EOC:

- Sheriff is encouraging everyone to use/promote 211. Or the Sheriff’s radio room has a center set up (more information?). 211 does not meet immediate need for water unless it is a special circumstance. Your name is going on a list. Rumor of State pulling out is not true, there is a “transition” going on.
- More clear guidelines on how to get answers needed. There are 600 franchise customers. Suggestion: look at where the bill comes may/may not help you know where the water is coming from. Emphasis on having people CALL to get answers. There is also the “leaving things on the door” we need to think about if people have the tools to read or call for answers.
- There was a suggestion for an online database so that people can look it up on their own if they would like to. Sean Kammer from the Mayor’s office said that he can most likely get that up tomorrow. There is one floating around out there but we should see if there are differences to make sure correct information is released.
- 95% of community reached by canvassing, 90% twice.
- Reoccurring issue brought up: Put people of Flint to work with the Flint Water Crisis?

FEMA:

- Katie Halliday: There was a federal emergency declaration allowing for four critical commodities: water, filter, filter replacement and water test kits. Also providing technical guidance.
- Staff at federal storing agency and then commodities go to the state area that goes out to distribution. You will not see FEMA out on the ground level.
- Jeannie Moran FEMA region 5 (regina.moran@fema.dhs.gov; 202-821-3867) is our contact

- Health and Human Services have also come in to set up operations on the ground to see what they can offer for sustainable, long term options.
- Department of Community Health states they have had a revolving door of FEMA and State coming through to help come up with long term goals. They are feeling heard. Health Department with EPA will be here all weekend working on long term plans to create center here in Flint. (More information?)

Partners and Stakeholders:

Good360:

- Resource for everyone. Happy to have individual calls. Partners with large local donors to procure products for non-profits. Understand that product need may not be at this time but it may show up down the road. Walmart, Home Depot, CVS, + would be working with 360. They have also been working with local government and non-profits here. Some of these companies are already on the ground.
- Non- Profits can develop their own wish list. Disasterrecovery360.org and you can create your “needs list”. There is no fee to use their services. Products offered at extreme discount or at no cost to non-profit.
- Contact: tiffany@good360.org

Community Volunteer Reception Center (VRC), Staffing request, Website

- Over 310 EBV last Saturday and 40 ARC volunteers. This weekend 360 volunteers coming in, including partners such as Michigan Carpenters.
- There is now a website for the Volunteer Reception Center: Flintvolunteer.com
- This is where large groups will be sent to get connected to VRC.
- Questions keep coming up about pledged money for jobs to help empower people of Flint and long term breaking away from relying on volunteers.
- Transition to working with United Way and how to distribute volunteers for community partners that will help beyond this cause. Starting through the current VRC will allow for this development. “Civic engagement beyond this crisis.” If agencies have a request for volunteers please fill out Volunteer Workforce Request Form (see attached).
- Hours are changing week to week and a set schedule should be released next week.
- GOAL: Eventually have partners post needs to the website and help to stay engaged through a sharing site. Looking for tools to share information.

Other business

- Catholic Charities has started a support group 1pm- 3pm at Catholic Charities' Center for Hope Warming Center 517 E. Fifth Ave
- Monday at 12:00p rally at 1226 Beach St. Flint, MI, First Trinity Missionary Baptist Church
- Metro (Chanelle) keeps a cohesive list of local events and has an email- Thought: link her to site?
- St. Michaels and St. Mary's are trying to canvas. They are going to get in touch with Catholic Charities and Bottles for Babies
- Social Media? "#volunteer4flint" Genesee County Health Department also puts stuff on their Facebook page. They are willing to put things on their page and they have a marketing specialist.
- Who has the resources to host a FB page for this group? TABLE FOR NXT TIME.
- "Bottles for the Babies" working on hitting 41,000 households will be getting magnets and flyering. Getting information from the Health Department. Water IQ (something they use to test local knowledge) results: only 50% new they needed replacement filters and less than 50% knew where to get the replacement filter.
- Cooking Matters Class also going to be offered though Catholic Charities. Time TBA on Monday Afternoons.
- Next Thursday Meeting 3:00p at the American Red Cross. Room TBA.

Importance: High

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

- Mobilize tools/materials onsite
- Install temp. protection, as needed

- Begin disassembly of ceiling grid (PLEASE INFORM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)
- Identify which electrical and mechanical components need to be disconnected and removed.
 - o This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down
 - Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work
- Begin fire proofing removal
- Get 220v power installed for welder for Wednesday 2/10 (SOM to handle)

2/9

- finalize fire proofing removal
- All lighting removed
- All HVAC diffusers removed
- Confirm 220V power

2/10

- Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work)

2/11

- Continue with welding efforts for stiffeners, plates, etc.

2/12

- Finalize all welding efforts
- Clean up

2/15 (Monday)

- Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight
- Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer)

2/16

- Continue with steel stub columns and roof patching

2/17

- Continue with steel stub columns and roof patching, if needed.
- Begin repairing all fire proofing and ceiling grid

2/18

- Continue with fire proofing patching and ceiling grid, if needed
- Reinstall lighting and mech. diffusers (B&B or SOM?)

2/19

- Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group.

A couple of things we learned today and request that I wanted to make everyone aware of:

1. Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.)
2. 220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders.
3. There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work?

Adam,

I know you scheduled a kick off meeting Thursday next week with B&B but unfortunately that will be too late in the game if we want to accomplish all this scope of work. I can make myself and our superintendent available for a phone conference tomorrow anytime or we can have a quick meeting Monday morning onsite when we kick off LaSalle with the ceiling grid/fire proof demo. Either way, I think we need to discuss in depth as a group before we go at this Monday AM.

Jan,

Can you please forward me the security clearance form that I need to submit with names, etc. since guys will, be coming into the building as early as Monday next week. I would like to get that submitted later today or first thing tomorrow.

Please let me know on this ASAP so we can plan accordingly. My cell # is below if you need to reach me today.

Thank everyone!!

Importance: High

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

- Mobilize tools/materials onsite
- Install temp. protection, as needed
- Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)
- Identify which electrical and mechanical components need to be disconnected and removed.

- This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down

Good Morning –

Jeanette is looking for any extra costs related to Flint due to the water situation. From staff time/o.t. to water to supplies or purchases. Jeanette needs to report on this every Friday.

Dane, do you want to see this information or should our staff send it directly to Jeanette?

Mike, I know you and Dane have discussed this already.

Thank you in advance -

Subject: Flint Expenses

Kerri, is anybody keeping track of Flint water expenses, either OT hours or direct purchases? Jeanette called me last week and she needs to submit a report every Friday showing actual/estimated costs. I have e-mailed Mike Noonan and he is getting me some information but not sure if there is a central area within Facilities that is tracking.

Any ideas on what would be the best way to track for Facilities?

Good Morning --

Jeanette is looking for any extra costs related to Flint due to the water situation. From staff time/o.t. to water to supplies or purchases. Jeanette needs to report on this every Friday.

Dane, do you want to see this information or should our staff send it directly to Jeanette?

Mike, I know you and Dane have discussed this already.

Thank you in advance -

Subject: Flint Expenses

Kerri, is anybody keeping track of Flint water expenses, either OT hours or direct purchases? Jeanette called me last week and she needs to submit a report every Friday showing actual/estimated costs. I have e-mailed Mike Noonan and he is getting me some information but not sure if there is a central area within Facilities that is tracking.

Any ideas on what would be the best way to track for Facilities?

Sandi & Mike,

It has been brought to my attention that there is a water boil advisory covering the City of Flint. Please see the attached two documents. Please remind staff that water must be boiled before washing hands, dishes, etc. Please post signs indicating such and you should disable drinking fountains just to be sure. Please let me know if you have any questions.

DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

CERTIFICATION:

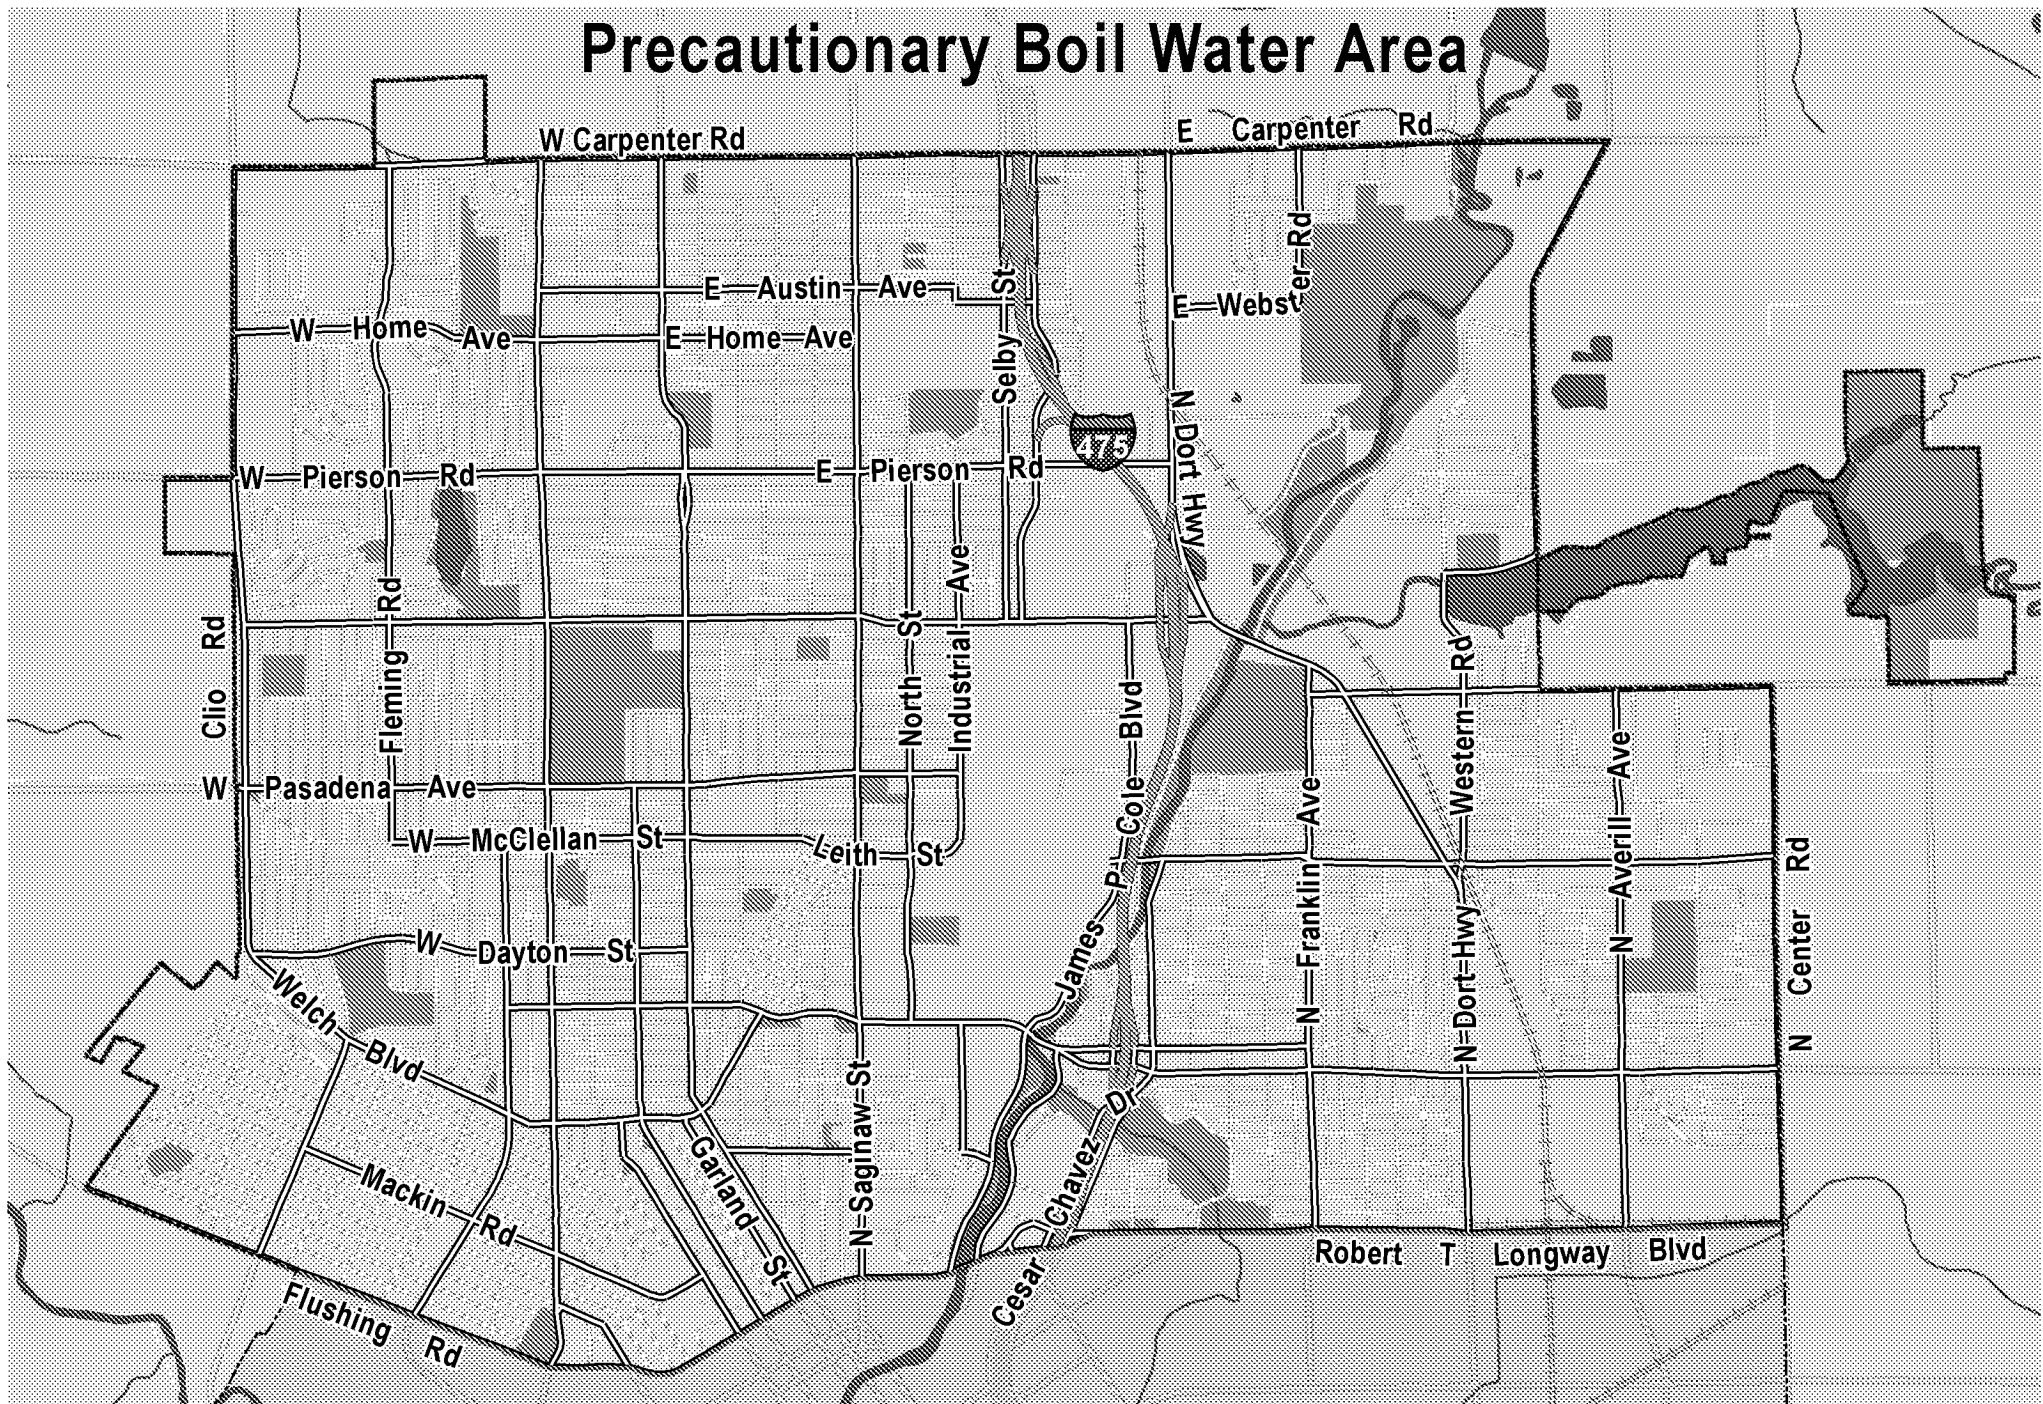

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Hello Gents,

Jennifer Wozniak parks in space 31 in the ramp and this is the first call we have received from her. But, she states that since FEMA has been parking there, over the last couple of weeks she has only been able to park in her space #31 - 3 times.

Can you look for plate DKP9245 in space 31 and see if it is part of the group for the Flint Water Crisis please. It is another PV Holding Corp car and is not registered with us. We must let them know that gen spaces only and I would like to give Jennifer a call and allow her to park in her own space, she is now in space #33 until the vehicle is moved.

Flint Drinking Water

Details:

DTMB will continue to offer tap and bottled water as options in the Flint State Office Building. An advisory has been sent asking residents and businesses within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does fall within the Area of Interest on the map. Additionally, the results of testing we commissioned in October 2015 showed no signs of threats in the water supply to our building.

We will continue to monitor the water crisis and if at any time we have evidence that our water supply poses a threat to the health of our employees and visitors, we will take immediate action. Either way, we will continue to provide bottled water as an option for those who are still concerned.

Contact:

DTMB Customer Service Center, DTMB-Customerservice@michigan.gov or (517) 373-6227

Subject: Re: Flint Expenses

No I am guessing that we will soon start to see these things start to happen.

My understanding is they cannot ask for signatures on the property, without written permission and protest should not come in the building or block the entrance, however if they need permission as well

Good Morning ---

Jeanette is looking for any extra costs related to Flint due to the water situation. From staff time/o.t. to water to supplies or purchases. Jeanette needs to report on this every Friday.

Dane, do you want to see this information or should our staff send it directly to Jeanette?

Mike, I know you and Dane have discussed this already.

Thank you in advance -

Kerri, is anybody keeping track of Flint water expenses, either OT hours or direct purchases? Jeanette called me last week and she needs to submit a report every Friday showing actual/estimated costs. I have e-mailed Mike Noonan and he is getting me some information but not sure if there is a central area within Facilities that is tracking.

Any ideas on what would be the best way to track for Facilities?

No. I'm in charge of figuring out how to get monitors in our lobbies which I'm finding is not as easy as it appeared. They already had a big presentation scheduled that I have to go to and since this wasn't an actual tour Keith said I should stay back. Alex will be driving them there and if there are notes he will take them.

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

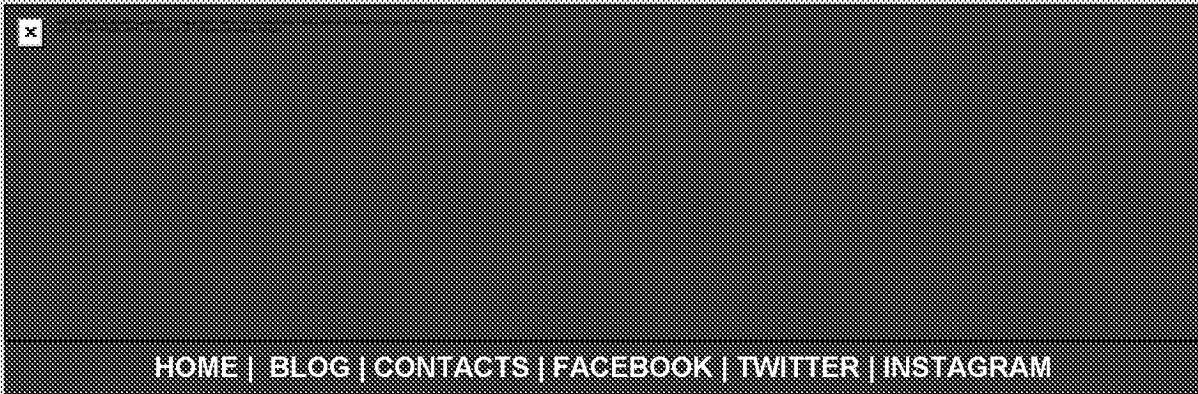

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

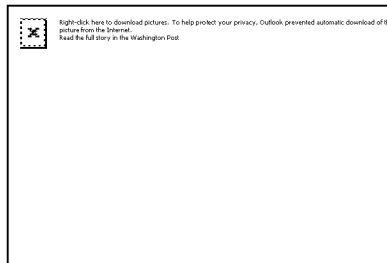

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

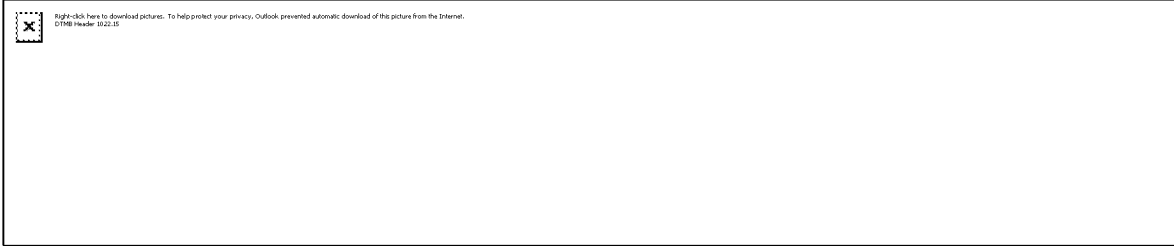

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

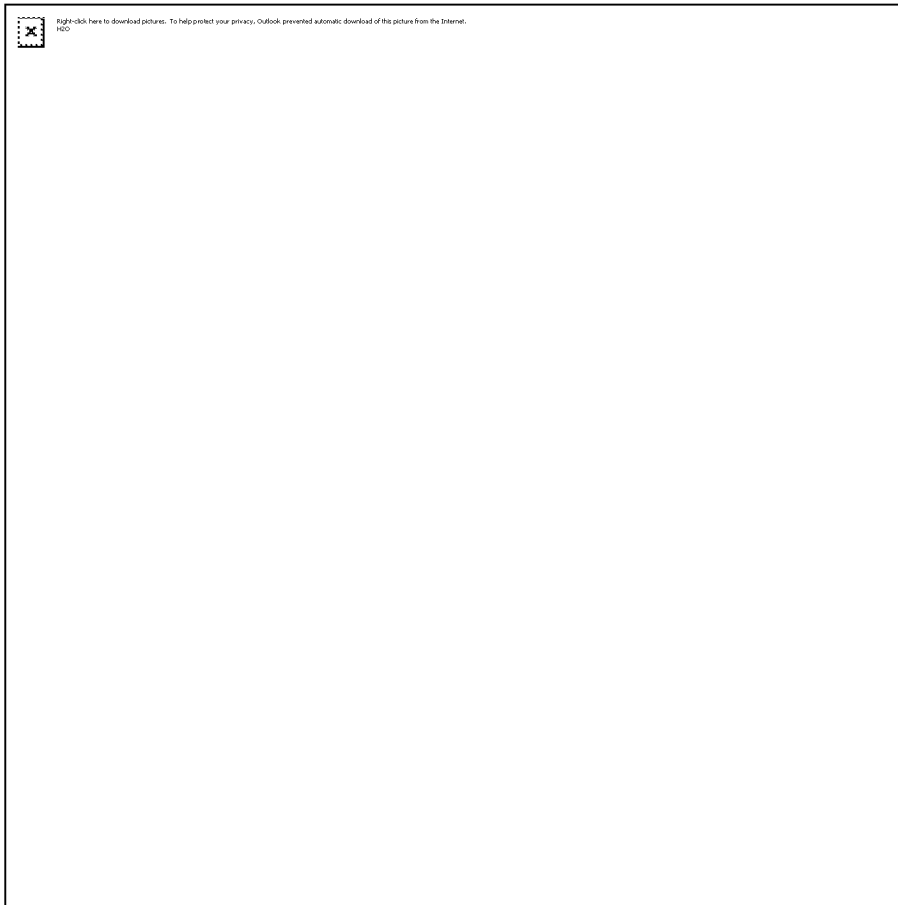

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Subject: Thank you for your service

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

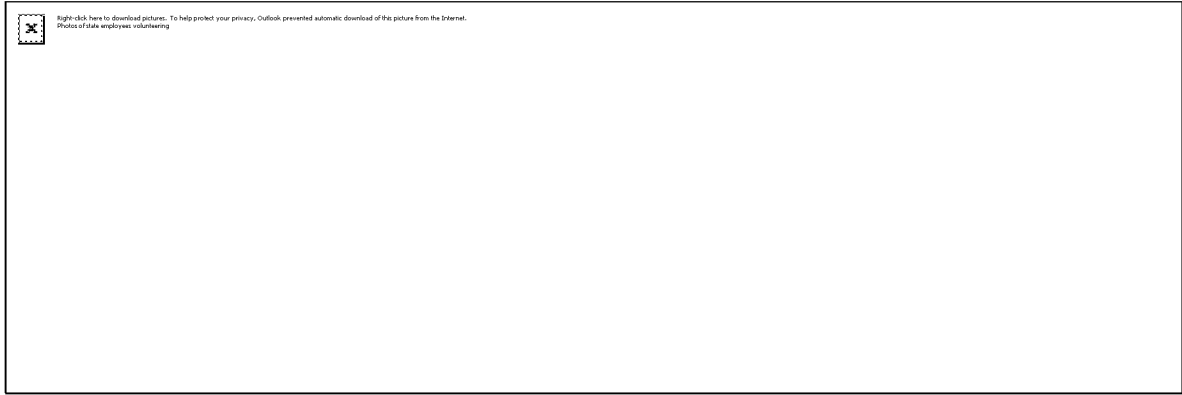

Thanks,

Governor Rick Snyder

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

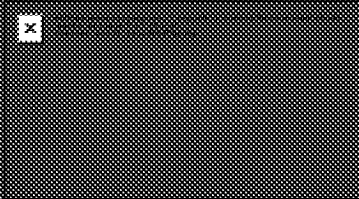

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

Subject: RE: GIS Staffing for Flint Water Emergency

Good Afternoon,

Please see updated schedule through 02/27/2016 below with DTMB staff filled in. Due to conflicting schedules and obligations, we are not able to provide DTMB Support on Thursday, 02/18. I hope this is alright since there are 5 SEOC staff scheduled. Please let us know if you have any additional thoughts.

Subject: What this year's budget means for Michigan...

VIDEO: What Governor Snyder's FY17 budget means for Michigan

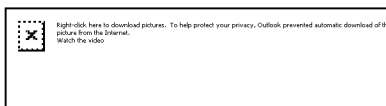

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

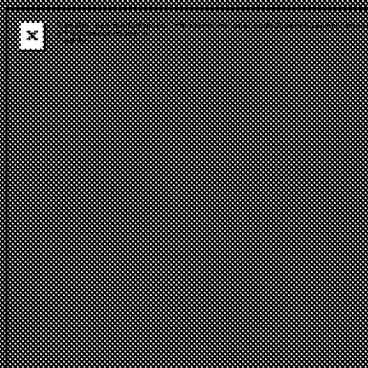

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

Subject: VIDEO: Volunteering in Flint

VIDEO: How volunteers are helping Flint

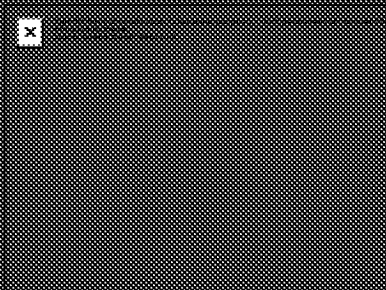

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

[Click here to watch the video and learn more about how the Food Bank of Eastern Michigan is helping Flint's families.](#)

LISTEN IN: Governor Snyder's tele-town hall with Flint residents

Governor Snyder hosted his third town hall with Flint residents on Thursday, Feb. 11, answering their questions directly. [Click here to listen to the call.](#)

SEOC FOIA Print Plan

Tips for Printing

Print Plan – Thru Friday, February 19

- When printing emails/documents, make sure to **change your default printer** to the following printer:
 - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
 - Additional helpful hints for each document type below
- SEOC IT staff will set up to “Print to Hold” for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided**.
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else’s print job**. The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor’s Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room**. They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

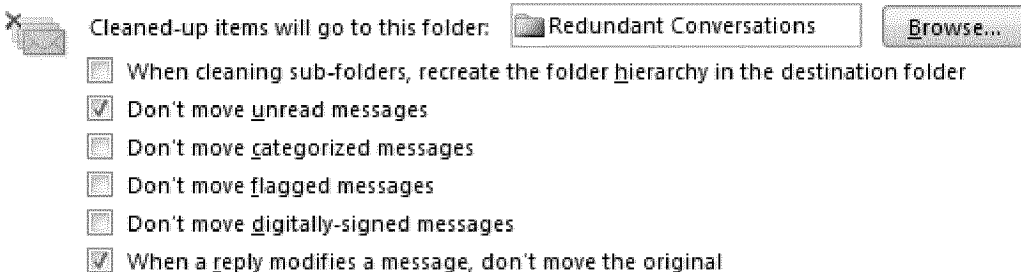

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on “Cabinet” in the list. Select “New Folder” and name it “Redundant Conversations.” Ensure the options are identical to the below:

Conversation Clean Up

Cleaned-up items will go to this folder: Redundant Conversations Browse...

☐ When cleaning sub-folders, recreate the folder hierarchy in the destination folder

☒ Don't move unread messages

☐ Don't move categorized messages

☐ Don't move flagged messages

☐ Don't move digitally-signed messages

☒ When a reply modifies a message, don't move the original

- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan

Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
 - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for “Print Attached Files” (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by “Type”.
- Highlight “like” file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
 - MSP-FOIAProject@michigan.gov
 - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Hi Walter,

Our address cleansing staff said to provide the addresses as excel spreadsheets and they will make the necessary formatting to feed it into our address cleansing and standardizing software.

Also DTMB staff were instructed that all work regarding Flint must be approved by Chris Christensen (SEOC) before we undertake the effort. Can you confirm for me that Chris is aware and has approved or should I follow up with him directly?

Thanks

On Feb 19, 2016, at 10:20 AM, Olkowski, Tony (DTMB) <OlkowskiT@michigan.gov> wrote:

John – SAP still isn't working for me. In the meantime I can work on prepping these for running through SAP when it's back up and running.

SAP needs at minimal a column for ID, address, and either postal city name or five digit ZIP code. Are all of these records in the postal city of Flint and have Flint ZIP codes? If so, I can add columns and identify the records as being in the Flint Postal city before processing. If not there would need to be a column included identifying postal city name.

Also, "active accts 1-12-16.csv" and "Franchise 2-16-16.csv" do not ID's. I can create generic ID's for SAP. Or if they want to include ID's in these two files and resend I can use those.

Tony

To: MSP-FOIAProject
Subject: Records Request

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than 2:00 PM on Friday, February 12, 2016.

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on Thursday, February 18, 2016.

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is two years. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Subject: RE: SEOC request for all addresses in the City of Flint

John - SAP still isn't working for me. In the meantime I can work on prepping these for running through SAP when it's back up and running.

SAP needs at minimal a column for ID, address, and either postal city name or five digit ZIP code. Are all of these records in the postal city of Flint and have Flint ZIP codes? If so, I can add columns and identify the records as being in the Flint Postal city before processing. If not there would need to be a column included identifying postal city name.

Also, "active accts 1-12-16.csv" and "Franchise 2-16-16.csv" do not ID's. I can create generic ID's for SAP. Or if they want to include ID's in these two files and resend I can use those.

Tony

Tony/Steven,

Attached are four files of addresses from the SEOC that I need run through SAP, ASAP. I know the software has been offline but I need one or both of you to get with Al and get it working if at all possible. I would do this myself but I am out at a meeting for at least all of tomorrow morning.

John:

Here are the lists we have.

- Assessors files are from the City of Flint assessors office
- Active accts is from the city of flint water customers
- Franchise is customers that receive water from the City of Flint but are outside city boundaries

I will work with Jeannette on getting permission to run this work.

Regards,

Walter

Hi Walter,

Our address cleansing staff said to provide the addresses as excel spreadsheets and they will make the necessary formatting to feed it into our address cleansing and standardizing software.

Also DTMB staff were instructed that all work regarding Flint must be approved by Chris Christensen (SEOC) before we undertake the effort. Can you confirm for me that Chris is aware and has approved or should I follow up with him directly?

Thanks

Subject: Records Request
Attachments: seoc related messages.pdf

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016**.

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016**.

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact [Ms. Lori Hinkley](#).

Good Afternoon,

Please see updated schedule through 02/27/2016 below with DTMB staff filled in. Due to conflicting schedules and obligations, we are not able to provide DTMB Support on Thursday, 02/18. I hope this is alright since there are 5 SEOC staff scheduled. Please let us know if you have any additional thoughts.

Here's what we know so far. We're trying to get in touch with either the County IT director or the owner of the company that created the system. They definitely want someone on-site in Flint on Monday at 8AM, it's finding the right person to send (based on what we know about the technology) that is the issue right now.

I'll send you more info as I get it.

Rodney, All,

I have a meeting set up for 8:00 am Monday morning to meet with the clerk and his IT folks. I would like someone with expertise or knowledge in the area of database information extraction from your shop to meet me there if possible. The Genesee County Clerks office is located at 900 S. Saginaw St. Flint Mi on the second floor of the county administration building.

The software that the Clerk/register of Deeds is using is through a company out of Ohio "Document Technology Systems or DTS". I have called the company's owner Pat Kelly on his cell [REDACTED] and explained in a voicemail message that we need some information on the types of databases they utilize prior to the Monday meeting. John Geason the County Clerk is down with the flu today but is assisting me in getting in contact with this company. Mr. Gleason indicated that

he will also assist in connecting us to the new IT Director for the County Monday morning, unfortunately he does not have his cell # to contact him this weekend. As I get more info I will pass it on. When Mr. Kelly returns my call who should I connect him to so our folks can discuss the databases, extraction etc., i would like to connect the data folks to him yet this weekend if possible.

Your assistance in this matter is greatly appreciated.

Thank you,
Gary Hagler
Law Enforcement Chief, MDNR
Emergency Management Coordinator for MDNR and MDEQ

Anonymous

Relaunches #OpFlint against the Government of Michigan and City of Flint

MANAGED ADVERSARY AND THREAT INTELLIGENCE

DEEPSIGHT™ INTELLIGENCE, INTELLIGENCE SUMMARY, SYMC –
300383, PUBLISHED 22 JANUARY 2016, V.1 2

Information Cut-Off Date: 22 January 2016 3

ANONYMOUS LAUNCHES #OPFLINT AGAINST THE GOVERNMENT OF MICHIGAN AND CITY OF FLINT

*DeepSight™ Intelligence, Intelligence Summary, SYMC-300383,
published 22 January 2016, V.1*

KEY FINDINGS

- On 16 January 2016, Anonymous relaunched #OpFlint in response to the recent health crisis surrounding contaminated water in Flint, Michigan.
- The operation targets officials that the Anonymous group recognizes as having ignored the water crisis, such as Gov. Rick Snyder and Flint city personnel.
- The operation activities have included distributed denial-of-service (DDoS) attacks and doxing.

EXECUTIVE SUMMARY

Members of the international Anonymous hacktivist collective have

relaunched #OpFlint to target those entities that the operation perceives as responsible for the contaminated water crisis in Flint, Michigan. Originally organized in 2015, #OpFlint was relaunched on 16 January 2016 and is ongoing against city officials and the governor of Michigan, Rick Snyder. Several hacking groups are supporting the malicious activities, which include DDoS attacks and doxing. The first DDoS attacks on 16 January took the Michigan.gov and cityofflint.com websites temporarily offline. DeepSight Intelligence judges #OpFlint will not shut down the state or city's infrastructure; however, access to the Michigan government and city websites will likely be disrupted. 4

DETAILS

The Anonymous collective's operation #OpFlint originally launched in 2015 but never gained momentum. #OpFlint was relaunched on 16 January 2016 to draw attention to the toxicity levels of the contaminated water supply in the city of Flint, Michigan. Leaders of the current effort include the US-based New World Hacking group and the Anonymous Intelligence Group (a.k.a. Anon Intel Group). The New World Hacking group launched the recent #OpFlint activity on 16 and 17 January 2016 with DDoS attacks that shut down the Michigan.gov and cityofflint.com websites (see Figure 1). The operation has an official video on Youtube (<https://www.youtube.com/watch?v=zXQfsURnE0w>) and on several Anonymous-affiliated websites.

i See the DeepSight Intelligence report *Profile: New World Hacking (NWH)*, (SYMC – 300376), 9 June 2016. New World Hacking uses their own stressor service, BangStressor, to conduct DDoS attacks including an attack against the BBC in early 2016.

Figure 1. New World Hacking Twitter post publicizing the DDoS attacks against Michigan.gov and cityofflint.com

On 20 January 2016, the Anon Intel Group's website contained a link to a "doxing" for Michigan Gov. Snyder (<https://ghostbin.com/paste/zn236>, see Figure 2). The dox did not include social security numbers, but rather revealed his mailing address, social media accounts, and phone numbers, and information for his family relatives that is easily obtained through several Google searches.

Figure 2. Dox posted on Anon Intel Group website on 20 January 2016 5

Gents:

See attached Deepsight MATI report on OpFlint generated from our SOC in Washington DC...

On 21 January 2016, Hurley Medical Center in Flint, Michigan,

confirmed it was the victim of a “cyber attack” but patient information was not compromised. According to a Twitter post by Anon Intel Group on 22 January 2016, Anonymous denies responsibility for the attack against the hospital (see Figure 3).

Figure 3. Twitter post discussions denying Anonymous activity against a hospital in Flint Michigan

OUTLOOK

As of 22 January 2016, recent #OpFlint activity has involved posting news clips on social media accounts, such as Twitter and Facebook. The group has not mentioned further DDoS attacks, although DeepSight Intelligence expects some sites to be targeted on the first weekend of the relaunch (i.e., between 22 January and 24 January 2016). Although #OpFlint relaunched on 16 January 2016, DeepSight Intelligence expects the activity to quickly diminish if it does not gain greater media recognition—Anonymous is motivated by publicity. There are no indications the operation is well organized and the Youtube video announcing the operation only mentions targeting the Governor of Michigan and the city of Flint; there are no details on how the operation will be conducted. Although #OpFlint will not shut down the state or city’s infrastructure, access to government and city websites might occasionally be disrupted.

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

[HOME](#) | [NEWSROOM](#) | [BLOG](#) | [CONTACT](#) | [FACEBOOK](#) | [TWITTER](#) | [INSTAGRAM](#)

Budget recommendation will include \$30 million request for Flint water bill repayments

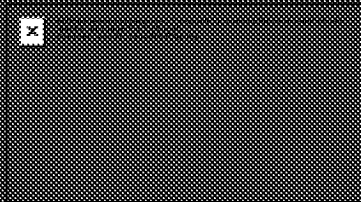

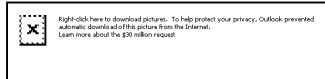

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

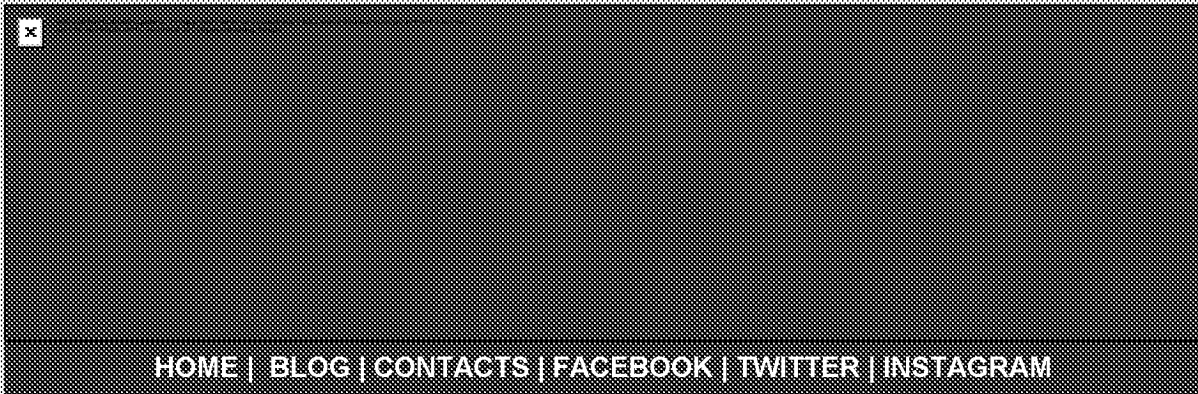

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

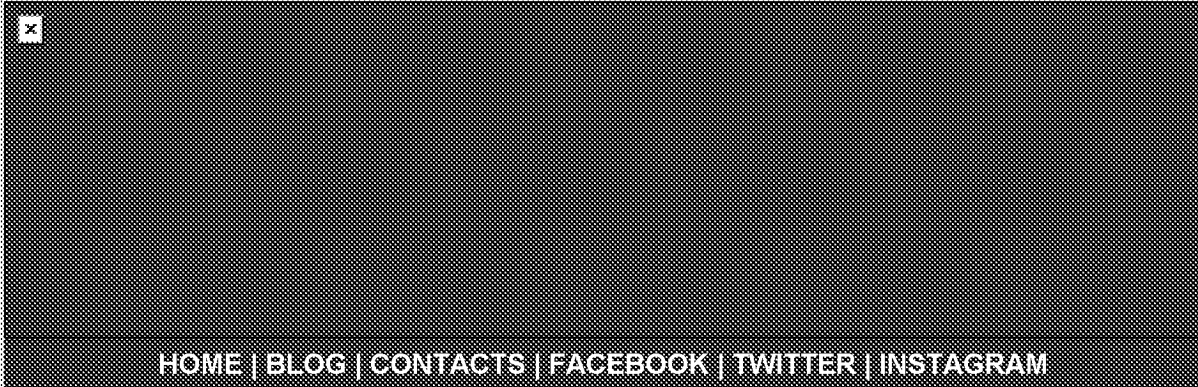

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

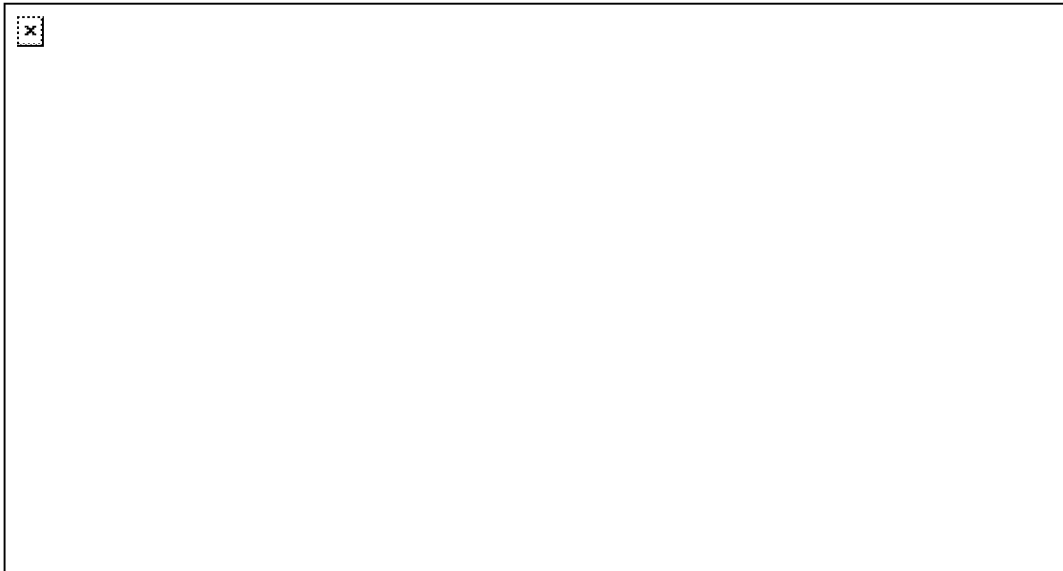

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: What this year's budget means for Michigan...

VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MIBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MIBudget

--> @OneToughNerd's #MIBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MIBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MIBudget www.mi.gov/MIBudget

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 17, 2016

TO: All DTMB Custodians of Correspondence Related to Flint

FROM: Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

SUBJECT: Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

Network Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

Non-Network Drives – includes hard drives, desktop, and thumb/flash drives

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

Attachments

- FOIA Checklist
- Attachment 1 – Search Guidance

Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

Search Terms:

- | | | |
|---|--|---|
| <input type="checkbox"/> "Legionnaire" | <input type="checkbox"/> "Karegnondi" | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella" | <input type="checkbox"/> "Genesee County Health | <input type="checkbox"/> "KWA" |
| <input type="checkbox"/> "boil water order" & "Flint" | Department" | |
| <input type="checkbox"/> "coli" & "Flint" | <input type="checkbox"/> "Flint" & "utilities" | |
| <input type="checkbox"/> "bacteria" & "Flint" | <input type="checkbox"/> "Lead and Copper Rule" | |
| <input type="checkbox"/> "microb" & "Flint" | <input type="checkbox"/> "Detroit Water and Sewerage | |
| <input type="checkbox"/> "TTHM" & "Flint" | Department" & "Flint" | |
| <input type="checkbox"/> "Lead" & "Flint" | <input type="checkbox"/> "DWSD" & "Flint" | |
| <input type="checkbox"/> "emergency" & "Flint" | <input type="checkbox"/> "Flint River" | |

Search conducted on the email account of: _____

By (your name): _____

Date completed: _____

Please return this completed Checklist to DTMB Director's Office staff by February 22, 2016, at
DTMB@michigan.gov, or
Directors Office, Cass Building, Second Floor

APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

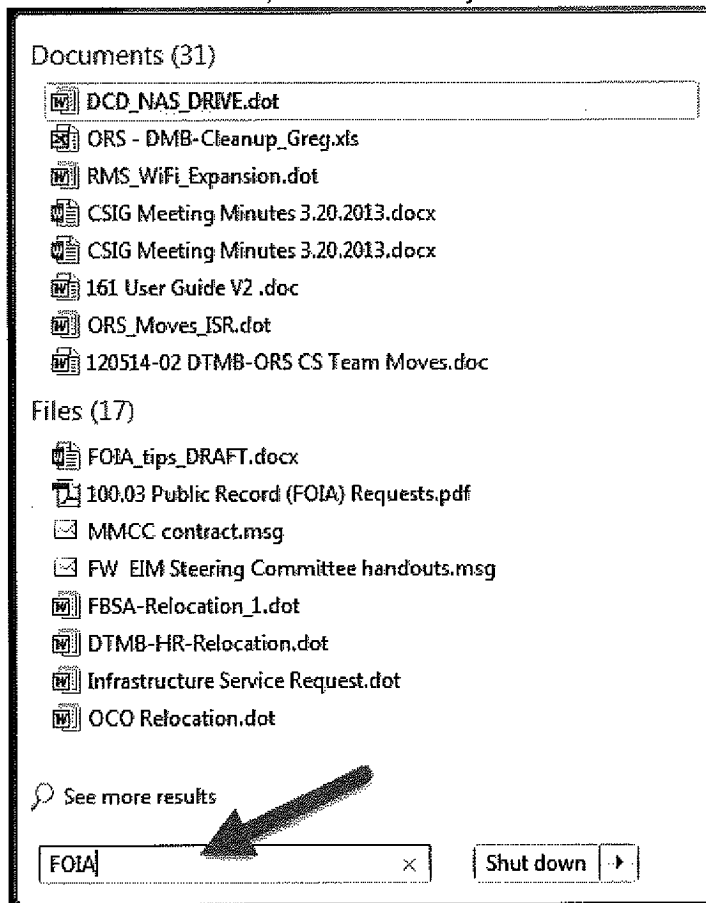

Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

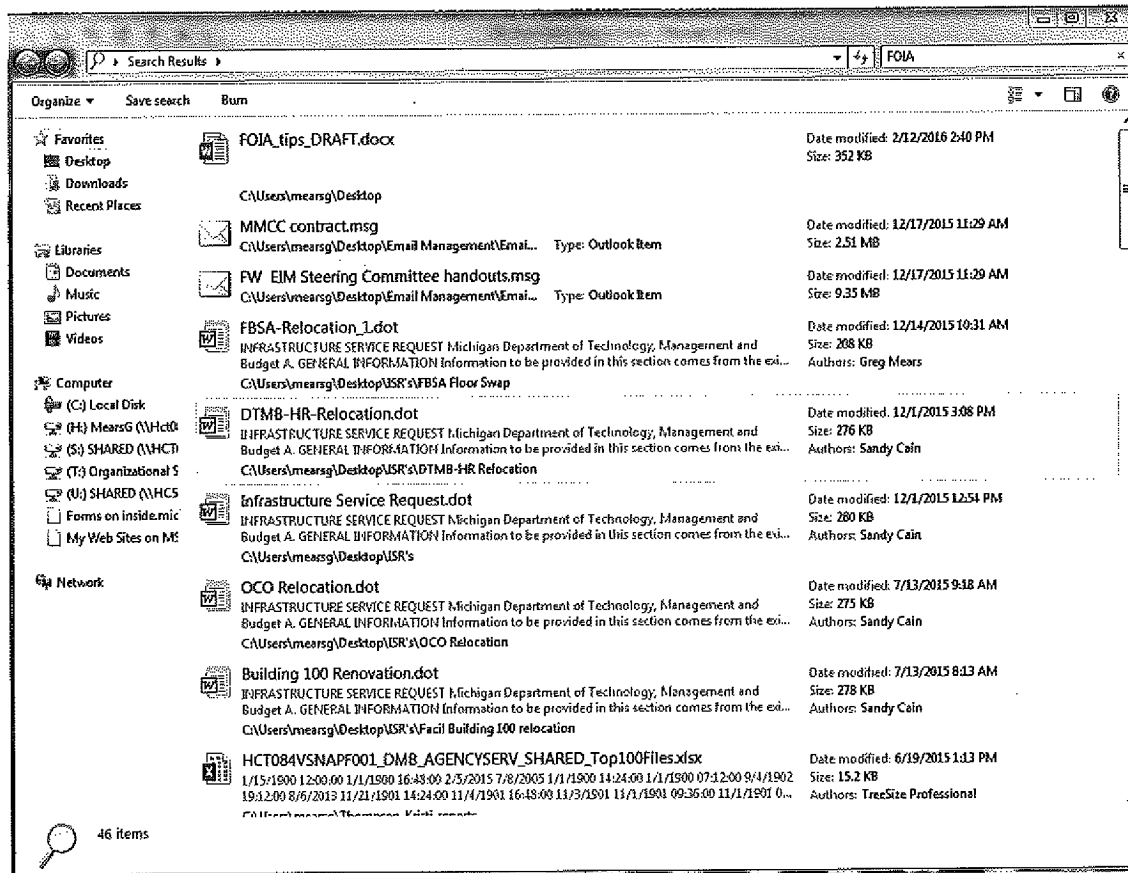

Search programs and files

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

RICK SNYDER

SUBJECT: Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

Network Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

Non-Network Drives – includes hard drives, desktop, and thumb/flash drives

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

- Attachment 1 – Search Guidance

Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

Search Terms:

- | | | |
|---|--|--|
| <input type="checkbox"/> "Legionnaire" | <input type="checkbox"/> "Karegnondi" | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella" | <input type="checkbox"/> "Genesee County Health | <input type="checkbox"/> "KWA" |
| <input type="checkbox"/> "boil water order" & "Flint" | Department" | <input type="checkbox"/> "Flint" & "water" |
| <input type="checkbox"/> "coli" & "Flint" | <input type="checkbox"/> "Flint" & "utilities" | |
| <input type="checkbox"/> "bacteria" & "Flint" | <input type="checkbox"/> "Lead and Copper Rule" | |
| <input type="checkbox"/> "microb" & "Flint" | <input type="checkbox"/> "Detroit Water and Sewerage | |
| <input type="checkbox"/> "TTHM" & "Flint" | Department" & "Flint" | |
| <input type="checkbox"/> "Lead" & "Flint" | <input type="checkbox"/> "DWSD" & "Flint" | |
| <input type="checkbox"/> "emergency" & "Flint" | <input type="checkbox"/> "Flint River" | |

Search conducted on the email account of: _____

By (your name): _____

Date completed: _____

Please return this completed Checklist to DTMB Director's Office staff by
Monday, February 22, 2016, at
DTMB@michigan.gov, or
Directors Office, Cass Building, Second Floor

APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

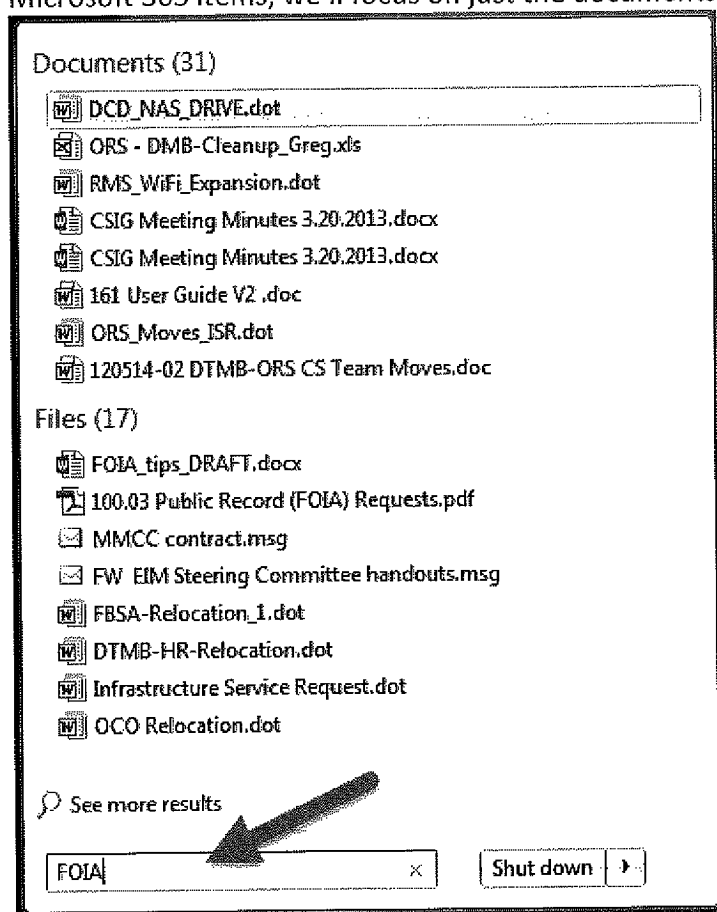

Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

Search programs and files

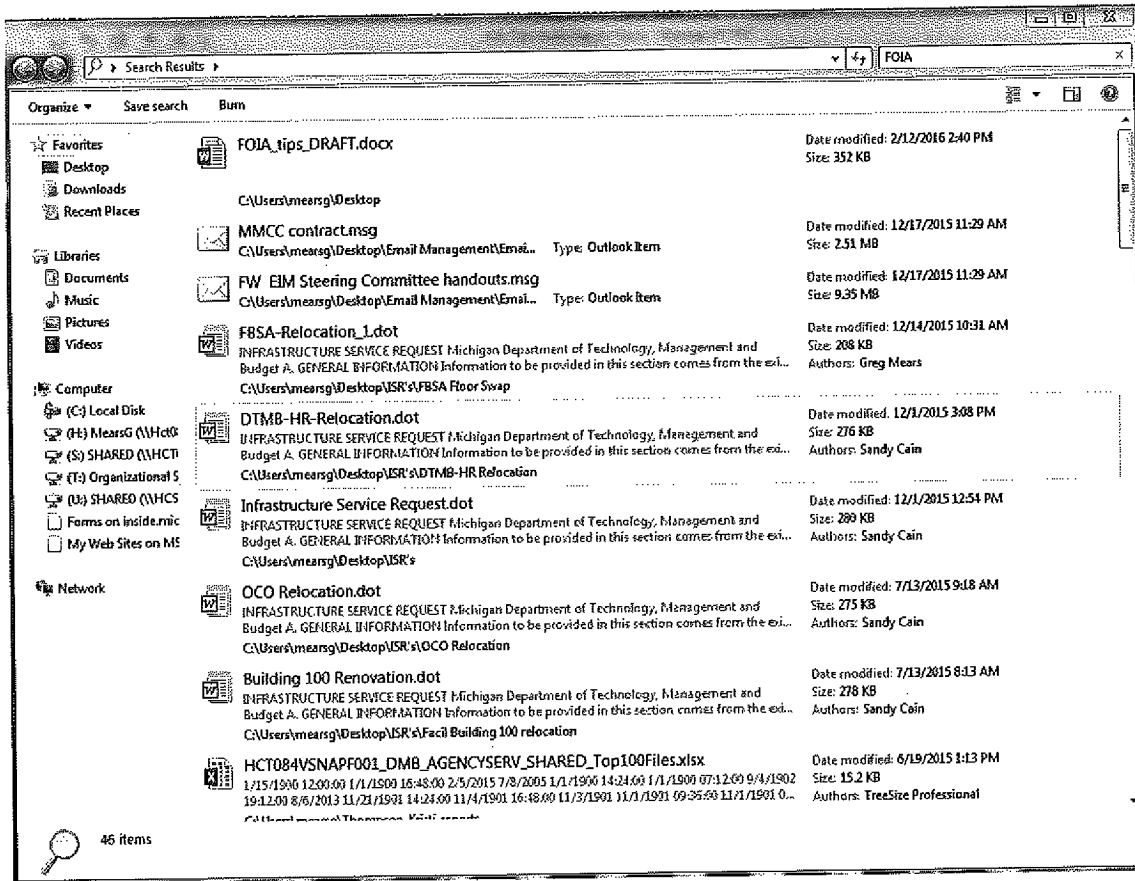

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form.

You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

THIS WEEK IN POLITICS

Top Officials at Risk and Unresolved 2016 Election Maps

BY ALAN GREENBLATT

Statewide Officials Find Themselves at Risk

Executive branch jobs are generally more stable than legislative positions. But some didn't seem too secure this week.

In Michigan, the drumbeat of complaints about Republican Gov. Rick Snyder just keep getting louder. On Monday, the Board of State Canvassers approved one of many recall petitions, which gives Snyder's critics a green light to collect signatures to put a recall measure on the November ballot. The approved petition has to do with education, but any recall campaign will focus squarely on how Snyder has handled the Flint water crisis.

In Indiana, Republican Gov. Mike Pence, who is up for re-election this fall, picked a new running mate this week after his quit. Lt. Gov. Sue Ellspermann is up for a job running a community college system, so Pence turned to Eric Holcomb, a former chair of the state GOP, to shore up his ties with party activists.

"By selecting Holcomb as his running mate, Pence sent a clear message about how endangered his political career is," wrote Matthew Tully, a columnist with the *Indianapolis Star*.

Pence is being challenged by Democrat John Gregg, a former House speaker.

Subject: FW: New web page

Just an FYI, this is the last minute site builds we get hit with and we have less than a week to build out and launch. We need to think about with the new system and it is also why we need to maintain a strong staff. John and Michelle are going to work on the new site while they are working on the MDHHS site that launches this week as well. It also means I might not get a completed Environment document but I will see how far John has gotten with it.

Cc: Estill, John (DTMB)
Subject: New web page

Hi John,

I spoke with Estill earlier about this and he said that I would need to talk to you.

This Friday, there will be a press event regarding the situation with Flint water, and Governor Snyder would like us to create a new webpage that can be shared as a resource to help Flint residents.

We're still discussing what the content would be, but I imagine it looking similar to: www.mi.gov/Detroitcantwait or www.michigan.gov/highlandparkschools

The 'header' should be: "Understanding the Flint Drinking Water Situation"

Then, on the homepage, we'd want the following sections:

- 1) Statement from the Governor
- 2) Read the latest updates
- 3) Additional resources
- 4) FAQs

I will make a graphic to go next to the statement from the Governor.

I'm sorry this is so last minute. Tomorrow we should have a better idea of what content we would like to post on the page. Again, this should be something simple that we can direct residents to that they can use as a resource.

Thank you for your help. Please email/call with any questions.

Thanks

Suzanne,

Below is another example of the need for centralized coordination of agency site administrators. It is crucial to avoid duplication of effort and to be proactive in developing a comprehensive communication from the state of Michigan.

We will reach out to Bob Andorfer to collaborate with and/or incorporate whatever they are doing to communicate the Flint Water issue to the public.

Hi everyone,

Regarding the Flint water website, it seems there might be two separate projects happening at once.

I just spoke with Karen (PIO at DEQ), and she said that Bob Andorfer and Eric Shaw are working on a flint water site.

Our team in the Gov's office asked John Estill and Michelle Stiffler to start on a site, too .

I'm not sure if you four have been working together, but we wanted to make sure moving forward that we are all on the same page.

Best,

Josh Paciorek

Subject: RE: New web page

Hi Josh,

Please work with John Estill and Michelle Stiffler to help get the site created. They are also involved in the launching of the new MDDHS this week so as long as this is going to be a relative small site with not a lot of back and forth changes they should be able to get it done by Friday. Is there someone that can assist with the creation and the publishing of the content so that John and Michelle can focus on getting the graphics and structure of the site built out?

Thanks,

John Thompson

Cyber Summit Aims To Improve Data Safety

Source: techcentury.com, Posted on: Oct 26, 2015 11:20 AM by [esdmatttroush](#)

DETROIT -- When it comes to cybersecurity, Gov. Rick Snyder is not only a leader, he's also a victim. Snyder told reporters Monday at the North American International Cyber Summit that his identity was stolen before he became governor. "I started getting dunning notices for a cell phone I never bought..."

Subject: Staff Needed for Joint Information Center
Importance: High

John,
As we discussed on the phone, the Joint Information Center has been activated by the Governor to handle manage communications involving the Flint Water Emergency. They have asked for a dedicated resource from eMichigan to physically sit in the room today to help with web changes. Please let me know the team member that will you have identified for this role.

They will need to go to 4000 Collins Rd, Lansing, MI. It is a State Police building and has gate access to enter the parking lot. Let the guard know that you are there for the Joint Information Center, if prompted. Enter the building and, once again, let the guard know what you are there for and they will sign you in and direct you to the right location.

When you get close to the building have them call Jen Holton at 517-242-2575. She is expecting the call and will be able to help you get set up. I would recommend having the individual bring their own laptop, I'm not sure what the computer situation is like.

Feel free to call me on my cell, 517-303-4038, if anyone has questions or trouble getting in.

Thanks,

Caleb Buhs

Subject: eMichigan Assisting with Flint Emergency

I wanted to let you all know about the great job eMichigan has done assisting the recently activated Joint Information Center (JIC) with the Flint water emergency. The entire team helped stand up websites from their offices on Wednesday and John Estill spent half the day today at the SEOC. He was such a great help that they have asked him to come back tomorrow, which he is doing.

John Thompson and the entire team at eMichigan is always responsive to the needs of the Governor's Office and all state departments and this is another great example.

Subject: RE: Flint Water Help Today

All,
We are ready to move all of this to a separate site for easier updating. Please mention this to the group. It would be seamless and can be done in a matter of minutes. You can see the site at w3.michigan.gov/flintdrinkingwater. The current redirect will be directed to that site and the site name will be changed to /flintwater. I think this will be a better option than having it inside of DEQ for the time being.

Having it there poses issues with permissions as we are not able to provide limited perms to this content without opening up all of DEQ and having DEQ having perms to all of the Flint Water stuff.
Let me know if you would like this separate site launched.

Anne

Subject: Flint Water Help Today

All,

I am working at the Joint Information Center in Flint today and I have been tasked with making some improvements to the /flintwater website, with your help, of course. I don't have many details yet, but I do know that they are hoping that we can create a multimedia section where all the photos and video that has been and will be gathered can be posted.

I'm likely to get more information in the next couple hours, but I wanted to get you thinking about our options. Some of the media that we have includes, video and audio PSAs, photos and video from various press events and video tutorials.

I will be in touch soon, but feel free to contact me if you have any questions in the meantime.

Thanks,

Caleb Buhs

Subject: Partnership Meetings

Just FYI on my progress to schedule meetings with our partners.

For January:

- You probably saw the email today from Flaminio about his management has not responded yet. (Still may happen this month)
- MSP declined to schedule for the end of this month due to Flint Water. Have tentatively scheduled for Feb 16-19.
- Gov's Office cancelled our meeting that was scheduled earlier this week and has not rescheduled. (Flint Water) I have asked the Admin Asst. to reschedule. (Jordan Kennedy)

February:

MSP – Tentative – Date TBD – Feb 16-19

GOV – hopefully – Date TBD

MDHHS – Quealy & Ellsworth have responded – Estill needs to coordinate with Exec Admin Assistant to schedule the VIPs.

MDOT – Sarka has responded and working on schedule

TED – Have not contacted them

March:

AG – Have not contacted them

LARA – Have not contacted them

Corrections – Have not contacted them

Subject: Volunteer Opportunity in Flint

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Hi Nick, Chad,

Please see attached.

Premier Success is an advanced support service. Actually it is this highest available for the Social Solution.

You'll see Platinum also listed in the attachment and that is available for the other components of the Marketing Cloud (email, mobile, etc.).

Contrite Snyder Says He Will Release Emails On Flint

Governor Rick Snyder said tonight at the opening of his State of the State speech that he will release his emails from 2014 and 2015 on Flint water.

Whether that will include just Mr. Snyder's emails or those of all those in the Executive Office was not immediately clear. Under the Freedom of Information Act, the governor and his Executive Office are exempt.

A clearly chastened Mr. Snyder is using the bulk of his sixth State of the State speech, as expected, to address the water crisis in Flint, outlining an immediate emergency spending plan, apologizing for errors his administration committed, offering a timeline of what he knew and when and making clear he will not resign.

He apologized profusely to the people of Flint.

"You deserve to know that the buck stops here with me," he said.

Many Democrats, from activists up through presidential candidate U.S. Sen. Bernie Sanders, have called for Mr. Snyder to resign because of his administration's role in the decisions that led to lead levels rising beyond levels requiring action in Flint's water and children seeing elevated levels of lead in their blood. A Legionnaire's outbreak in Genesee County also possibly resulted from using the Flint River as an interim source of water while the city awaited completion of a new pipeline to Lake Huron.

But Mr. Snyder was expected to say in the speech that he believes he owes it to Flint to fix the problem, not walk away. Resigning would amount to giving up on the city, he was expected to say.

As was first reported by Gongwer News Service, Mr. Snyder is also using his speech to call on the Legislature to pass a \$28.03 million supplemental to aid Flint (\$22.63 million General Fund). The bill will be taken up Wednesday morning in the House Appropriations Committee.

He will announce the state will ramp up the number of National Guard members in the city from approximately 70 to 200, enabling completion of door-to-door visits at every household in the city by the end of the week at the latest.

Mr. Snyder also will say the state is appealing President Barack Obama's denial of the state's request for a major disaster declaration. The federal government has said it has no authority to declare a disaster stemming from man-made causes.

The only other major topic in the speech tonight is the crisis engulfing the Detroit Public Schools. Mr. Snyder is expected to address the topic on a broad level and urge quick action because the district could run out of money in April or May.

Mr. Snyder, for the first time as governor, is speaking from a prepared text, departing from his traditional use of an outline. So important is the discussion on Flint that he wanted to take no chances on the wording.

Subject: RE: State of the State 2016 preview

Hey John—

The file size will be right under 31 MB.

I talked with my bosses about breaking up the file size, but there is a legal document that needs to go first in the PDF, and they said for legal reasons, they want to do what we can to keep the file as one.

I know that makes everything more difficult and I'm sorry. I think if we start experiencing problems, let's reevaluate.

Thanks for all of your help the last couple of days!

Josh

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That shouldn't be a problem. I am working on some of those changes and going to move the Preview/dev elements to the live page and when they are all in place I'll clear the cache on that page so that the page is live.

Would you like me to send you a quick email before I do the move and push it live so it can get a final proof? We will naturally be testing it out here to ensure the feed and such look good as well.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,

Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe—

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: Re: State of the State 2016 preview

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.

I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe—

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = [Click here for](#)

more information about improving the water situation in Flint.

- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice. To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Yes. Use the process you / John used to add keywords to the "Michigan01" Topic Profile. They will **automatically** be included in a new Workspace tab I created titled "Other". See screenshot. Let me know if you see that when you log in.

Note, the "Flint Water" workspace is monitoring social and mainstream news for the Flint water emergency. The keywords you/John set up are **more broad**, and include @anoncorruption, @malwareexploits, @newworldhackers, and others.

Does this work?

Suzanne - I created a customized "workspace" in Radian6. The workspace is a real-time feed of social media coverage. There are more than 1,000 #FlintWaterCrisis mentions per hour on Twitter. The dashboard allows admins to flag and categorize content as needed. The dashboard also monitors real-time stories from mainstream news outlets (as long as it's online).

Suzanne, Jeff and John - Login with your credentials here, and let me know if you can access:

Subject: Re: Radian6 Post Assignment Alert

Yes. Use the process you / John used to add keywords to the "Michigan01" Topic Profile. They will **automatically** be included in a new Workspace tab I created titled "Other". See screenshot. Let me know if you see that when you log in.

Note, the "Flint Water" workspace is monitoring social and mainstream news for the Flint water emergency. The keywords you/John set up are **more broad**, and include @anoncorruption, @malwareexploits, @newworldhackers, and others.

Does this work?

Subject: Re: Radian6 Post Assignment Alert

Yes. Use the process you / John used to add keywords to the "Michigan01" Topic Profile. They will **automatically** be included in a new Workspace tab I created titled "Other". See screenshot. Let me know if you see that when you log in.

Note, the "Flint Water" workspace is monitoring social and mainstream news for the Flint water emergency. The keywords you/John set up are **more broad**, and include @anoncorruption, @malwareexploits, @newworldhackers, and others.

Does this work?

Would you also like a separate tab to monitor:

@anoncorruption, @malwareexploits, @newworldhacking, #arrestgovsnnyder, etc.

The current workbook is configured for "flint water" and variations of that, and doesn't include any 'hacking' type accounts, unless they reference flint and/or water or the governor.

Hi Suzanne,

I'd love to see what you're working on. I'll be in and out between now and New Years. Let's try to get something on calendar.

You might want to connect with the governors' new communications director, Meegan Holland. I think a meeting with her would be valuable for you generally, so she knows the services you offer, what you're working on, and implications it has for communications, etc.

Thanks,

Mike

Hey Kent - I hope all is well! This is a long shot, but my friend from Ross (co-ed) is working on a product at 3M that prevents things like lead from leaking into underground pipes. He's trying to get in contact with someone from the City of Flint (or anyone involved in creating the solution to the current issue) to see if there is interest in what he's developing. Do you happen to know of anyone at the City or other stakeholders that he could reach out to? Thanks in advance!

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

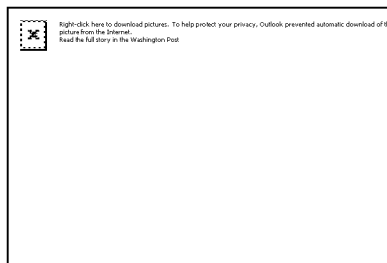

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: EPA New site
Attachments: EPA Flint Water Oder 1_21_sdwa_1431_emergency_admin_order_012116.pdf

This is just an update on the new site that the EPA is requesting in their Emergency Administrative Order - Reporting Requirements 51.

I did receive a call from Jeff Ellsworth (MDHHS) yesterday inquiring about the EPA's request for a new site to be created for the posting of reports, sampling results, plans, weekly status reports on the progress of all requirements and all other documentation. He said that no one has reached out to him about the creation of a site and the same is true for the eMichigan staff.

I did here on CNN last night that DEQ is challenging the Administrative Order which I am guessing is why we have not heard anything about a request to assist in building a site but you know we are always ready to get something put together for them.

Have you heard anything from Caleb concerning the order?

John Thompson

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF ENFORCEMENT AND COMPLIANCE ASSURANCE
WASHINGTON, D.C.

IN THE MATTER OF:	:	Proceedings Pursuant To
	:	Section 1431 of the Safe Drinking
City of Flint, Michigan; Michigan	:	Water Act, 42 U.S.C. § 300i
Department of Environmental	:	
Quality; and the State of Michigan,	:	EMERGENCY
	:	ADMINISTRATIVE ORDER
Respondents.	:	

I. INTRODUCTION

1. The Safe Drinking Water Act ("SDWA" or "Act") provides the U.S. Environmental Protection Agency ("EPA" or "Agency") with the authority to order actions when an imminent and substantial endangerment exists and the actions taken by the state and/or local authorities are inadequate to protect public health. EPA has determined that the City of Flint's and the State of Michigan's responses to the drinking water crisis in Flint have been inadequate to protect public health and that these failures continue. As a result, EPA is issuing this SDWA Emergency Order ("Order") to make sure that the necessary actions to protect public health happen immediately. The Order requires that necessary information be provided promptly to the public in a clear and transparent way to assure that accurate, reliable, and trustworthy information is available to inform the public and decisions about next steps. In addition to the issuance of this Order, EPA will promptly begin sampling and analysis of lead levels in tap water in the City of Flint's public water system ("PWS"). EPA will publish these sampling results on its website to provide the public with transparency into the process to abate the public health emergency in the City of

Flint. In the coming weeks, EPA may take additional actions under the SDWA to address the situation in the City of Flint.

II. STATUTORY AUTHORITY

2. This Order is issued under the authority vested in the Administrator of the EPA by Section 1431 of the SDWA, 42 U.S.C. § 300i. This Order is issued for the purpose of protecting the health of persons who are supplied drinking water by a PWS with conditions that may present an imminent and substantial endangerment to human health.

III. FINDINGS OF FACT

3. The City of Flint, Michigan ("City") owns and operates a PWS that provides piped drinking water for human consumption to its nearly 100,000 citizens.
4. From December 2011 through April 2015, an emergency manager was appointed by the State of Michigan ("State") under Public Act 436 to oversee the management of the City during its financial crisis. During that time, the City became a partner with the Karegnondi Water Authority ("KWA") and decided to no longer purchase treated drinking water from the Detroit Water and Sewerage Department ("Detroit").
5. The Michigan Department of Environmental Quality ("MDEQ") has primary responsibility for the implementation and enforcement of the public water system program in Michigan.
6. Before April 2014, the City purchased finished drinking water from Detroit.
7. On or around April 25, 2014, the City ceased purchasing treated drinking water from Detroit and began drawing water from the Flint River as its source water.

8. Between July and December 2014, the City conducted the first of two rounds of six month lead sampling under the Lead and Copper Rule ("LCR"), 40 C.F.R. § 141.80 *et seq.*
9. The City conducted the second of two rounds of six month lead sampling under the LCR between January and June 2015. These rounds of sampling showed that the levels of lead in the City water supply were rapidly rising.
10. On or about April 24, 2015, MDEQ notified EPA that the City did not have corrosion control treatment in place at the Flint Water Treatment Plant.
11. During May and June, 2015, EPA Region 5 staff at all levels expressed concern to MDEQ and the City about increasing concentrations of lead in Flint drinking water and conveyed its concern about lack of corrosion control and recommended that the expertise of EPA's Office of Research and Development should be used to avoid further water quality problems moving forward.
12. On July 21, 2015, EPA Region 5 discussed with MDEQ the City's lead in drinking water issues and implementation of the LCR and MDEQ agreed to require corrosion control as soon as possible.
13. On August 17, 2015, MDEQ sent a letter to the City recommending the City implement corrosion control treatment as soon as possible, but no later than January 1, 2016, and to fully optimize its treatment within six months.
14. On August 31, 2015, EPA Region 5 had a call with MDEQ to discuss outreach to citizens to reduce exposures to high lead levels in Flint drinking water and reiterate EPA's offer of technical assistance in implementing corrosion control treatment.

15. On September 3, 2015, Flint Mayor Dayne Walling announced that the City will implement corrosion control treatment and invited EPA corrosion control experts to join the Flint Technical Advisory Committee ("Flint TAC").
16. On September 27, 2015, EPA Region 5 Administrator Susan Hedman called MDEQ Director Dan Wyant to discuss the need for expedited implementation of corrosion control treatment, the importance of following appropriate testing protocols, urged MDEQ to enlist Michigan Department of Health and Human Services' involvement and discussed options to provide bottled water/premixed formula/filters until corrosion control is optimized.
17. On October 7, 2015, the Flint TAC met about the City's corrosion control and treatment. The Flint TAC recommended returning to Detroit water as the best course of action for the City.
18. On October 16, 2015, EPA established the Flint Safe Drinking Water Task Force ("EPA Flint Task Force") to provide the Agency's technical expertise through regular dialogue with designated officials from MDEQ and the City.
19. On or around October 16, 2015, the City switched back to purchasing finished water from Detroit, now called the Great Lakes Water Authority.
20. On November 25, 2015, the EPA Flint Task Force requested information that would allow EPA to determine the progress being made on corrosion control in the City; this information has not been received by EPA. This information includes water quality parameter measurements (pH, total alkalinity, orthophosphate, chloride, turbidity, iron, calcium, temperature, conductivity) in the distribution system. The EPA Flint Task Force has also made subsequent requests and recommendations.

<http://www.epa.gov/mi/flint-drinking-water-documents> The City is required by its MDEQ permit to monitor for these parameters at 25 sites quarterly and at 10 of these sites weekly. Because the City has not provided the information requested by the EPA Flint Task Force EPA does not have the information that would provide any assurance that contamination in the City's water system has been controlled.

21. On or around December 9, 2015, the City began feeding additional orthophosphate at the Flint Water Treatment Plant to begin optimizing corrosion control treatment. Notwithstanding the orthophosphate addition, high levels of lead and other contaminants are presumed to persist in the City's water system until LCR optimization process, utilizing sampling and monitoring requirements, have confirmed lead levels have been reduced.
22. On December 14, 2015 the City declared an emergency.
23. On January 14, 2016, the Governor of the State requested a declaration of major disaster and emergency and requested federal aid.
24. On January 16, 2016, the President of the United States declared a federal emergency in the City.
25. The presence of lead in the City water supply is principally due to the lack of corrosion control treatment after the City's switch to the Flint River as a source in April 2014. The river's water was corrosive and removed protective coatings in the system. This allowed lead to leach into the drinking water, which can continue until the system's treatment is optimized.
26. Lead occurs in drinking water from two sources: lead in raw water supplies and corrosion of plumbing materials in the water distribution system (i.e., corrosion

byproducts). Most lead contamination is from corrosion byproducts. The amount of lead in drinking water attributable to corrosion byproducts depends on a number of factors, including the amount and age of lead bearing materials susceptible to corrosion, how long the water is in contact with the lead containing surfaces, and how corrosive the water in the system is toward these materials. *Final Rule: Maximum Contaminant Level Goals and National Primary Drinking Water Regulations for Lead and Copper*, 56 *Fed. Reg.* 26460, 26463 (June 7, 1991).

27. EPA has set the Maximum Contaminant Level Goal ("MCLG") at zero for lead because (1) there is no clear threshold for some non-carcinogenic lead health effects, (2) a substantial portion of the sensitive population already exceeds acceptable blood lead levels, and (3) lead is a probable carcinogen. 56 *Fed. Reg.* at 26467. Pregnant women, unborn children, and children under the age of six are particularly sensitive to lead exposure.
28. The concentration of lead in whole blood has been the most widely used index of total lead exposure. Lead exposure across a broad range of blood lead levels has been associated with a spectrum of patho-physiological effects, including interference with heme synthesis necessary in the formation of red blood cells, anemia, kidney damage, impaired reproductive function, interference with vitamin D metabolism, impaired cognitive performance (as measured by IQ tests, performance in school, and other means), delayed neurological physical development, and elevation in blood pressure. 56 *Fed. Reg.* 26467-68.
29. EPA finds that consumption of lead in water contributes to increase in blood lead levels. The Centers for Disease Control and Prevention uses a reference level of 5

micrograms per deciliter to identify children with elevated blood lead levels. This new level is based on the U.S. population of children ages 1 – 5 years who are in the highest 2.5% of children when tested for lead in their blood.

http://www.cdc.gov/nceh/lead/acclpp/blood_lead_levels.htm

30. Under the LCR, the “action level” for lead is the concentration of lead at which corrective action is required. 40 C.F.R. § 141.2.
31. EPA’s LCR includes requirements for corrosion control treatment, source water treatment, lead service line replacement, and public education. These requirements are triggered, in some cases, by lead and copper action levels measured in samples collected at consumers’ taps. The action level for lead is exceeded if the concentration of lead in more than 10 percent of tap water samples collected during the monitoring period conducted in accordance with 40 C.F.R. § 141.86 is greater than 0.015mg/L (i.e., if the “90th percentile” is greater than 0.015mg/L). 40 C.F.R. § 141.80(c). When a large system exceeds this action level, the LCR requires the system to: 1) implement public education requirements; 2) implement all applicable source water treatment requirements specified by the primacy agency under 40 C.F.R. § 141.83; and (3) if the system is exceeding the action level after implementation of all applicable corrosion control and source water treatment requirements, then the system must replace lead service lines in accordance with 40 C.F.R. § 141.84.
32. All large systems (over 50,000 persons) are required to either complete corrosion control treatment steps in 40 C.F.R. § 141.91(d) or be deemed to have optimized corrosion control treatment under 40 C.F.R. § 141.81(b)(2) or (b)(3).

33. Based on the foregoing, EPA finds that water provided by the City to residents poses an imminent and substantial endangerment to the health of those persons. Those persons' health is substantially endangered by their ingestion of lead in waters that persons legitimately assume are safe for human consumption. This imminent and substantial endangerment will continue unless preventive actions are taken.

34. The City, MDEQ and the State have failed to take adequate measures to protect public health. Although some progress has been made in addressing the drinking water crisis in the City, there continue to be delays in responding to critical EPA recommendations and in implementing the actions necessary to reduce and minimize the presence of lead and other contaminants in the water supply both now and in the near future. The Respondents have failed and continue to fail to provide the information necessary for EPA, the EPA Flint Task Force and the City's PWS customers to fully understand and respond promptly and adequately to the current deficiencies. EPA remains concerned that the City lacks the professional expertise and resources needed to carry out the recommended actions and to safely manage the City's PWS.

35. In accordance with SDWA Section 1431(a), 42 U.S.C. § 300i(a), to the extent practicable EPA has consulted with state and local authorities regarding the information on which this EPA action is based.

36. This Order and the requirements set forth herein are necessary to ensure adequate protection of public health in the City.

37. As a result of the emergency, EPA will promptly begin sampling and analysis of lead levels and other contaminants in the City to assure that all regulatory authorities and the public have accurate and reliable information.

38. EPA will make its LCR sampling results available to the public on the Agency's website.

IV. CONCLUSIONS OF LAW

39. Section 1431 (a), 42 U.S.C. § 300f(a), specifies that the EPA Administrator, upon receipt of information that a contaminant which is present in or likely to enter a public water system that may present an imminent and substantial endangerment to the health of persons, and that State and local authorities have not acted to protect the health of such persons, may take such actions as she may deem necessary in order to protect the health of such persons.

40. The City owns and operates a "public water system" within the meaning of SDWA Section 1401.

41. MDEQ is an instrumentality of the State.

42. The City, State and MDEQ are "persons" as defined in SDWA Section 1401(c)(12).

43. Respondents' cessation of purchased water from Detroit and switch to the Flint River as its source water triggered a cascade of events that directly resulted in the contribution of lead and other "contaminants" that are within the meaning of SDWA Sections 1401(c)(6) and 1431 of the Act.

44. The contaminants introduced by Respondents are present in or likely to enter a PWS.

45. Based upon the information and evidence, EPA determines that Respondents' actions that resulted in the introduction of contaminants, which entered a public water system

and have been consumed and may continue to be consumed by those served by the public water system, present an imminent and substantial endangerment to the health of persons.

46. The lead and other contaminants will remain present in the PWS and will continue to present an imminent and substantial endangerment to the health of persons until the underlying problems with the corrosion control treatment and fundamental deficiencies in the operation of the PWS are corrected and sampling results confirm the lead and other contaminants are adequately treated.

47. Respondents have failed to take adequate measures to protect public health.

48. The EPA has consulted with the State and local authorities, to the extent practicable, to confirm the correctness of the information upon which this ORDER is based and to ascertain the actions which such authorities are or will be taking. All requisite conditions have been satisfied for the EPA action under SDWA Section 1431(a)(1), 42 U.S.C. § 300i(a)(1).

49. The EPA finds that there is an imminent and substantial endangerment to the people drinking water from the public water system of the City of Flint and that the actions taken by the State and/or the City are inadequate to protect public health. The actions required by this ORDER are necessary to protect the health of persons who are currently consuming or who may consume or use water from the City's PWS.

V. ORDER

Based on the foregoing Findings and Conclusions, and pursuant to Section 1431 of the Act, 42 U.S.C. 300i,

IT IS ORDERED:

Intent to Comply

50. Within one day of the effective date of this Order, Respondents shall notify EPA in writing of their intention to comply with the terms of this Order. For the purposes of this Order, "day" shall mean calendar day.

Reporting Requirements

51. Within five days of the effective date of this Order, the State shall create, and thereafter maintain, a publicly available website. Respondents must post on this website all reports, sampling results, plans, weekly status reports on the progress of all requirements and all other documentation required under this Order. The Respondents shall not publish to this website any personally identifiable information.

Response to EPA Flint Task Force Recommendations, Requests for Information and Sampling Activities

52. The Respondents shall within 10 days of the effective date of this Order respond in writing, in accordance with Paragraph 51, to all of the EPA Flint Task Force's requests and recommendations made on November 25, 2015 and subsequent dates. The response shall include all actions Respondents have taken and intend to take in response to those requests and recommendations. The EPA Flint Task Force's requests and recommendations are publicly available at <http://www.epa.gov/mi/flint-drinking-water-documents>.
53. Within 10 days of the effective date of the Order the Respondents shall provide the following information in accordance with Paragraph 51:
- a. Water quality parameter measurements (pH, total alkalinity, orthophosphate, chloride, turbidity, iron, calcium, temperature, conductivity) in the distribution

system. The City is required by the MDEQ permit to monitor for these parameters at 25 sites quarterly and at 10 of these sites weekly;

- b. All lead in water testing results for the City since January 2013, including those not used for LCR compliance; and
- c. Identification of areas (e.g., zip codes, neighborhoods) in the City with elevated blood lead levels.

54. Within 10 days of the effective date of the Order, the Respondents shall provide, without publicly disclosing any personally identifiable information, the following directly to the EPA in accordance with Paragraph 66:

- a. Existing inventory of homes with lead service lines in Excel or a similar format;
- b. Addresses of homes that have had water service interruptions or street disturbances (e.g., water main breaks, road/sidewalk construction, etc.) within the last year; and
- c. Addresses of currently unoccupied homes.

55. Respondents shall cooperate with EPA as the Agency conducts LCR sampling and other diagnostic activities in the City.

Treatment and Source Water

56. To ensure that treated water meets finished water quality goals and is consistently maintained throughout the distribution system, that existing and potential plant operational and mechanical start-up issues are identified and addressed, and that water plant operations staff are proficient in treating the existing and new source water, Respondents shall comply with Paragraphs 57, 58 and 59.

57. Respondents shall maintain chlorine residual in the distribution system in accordance with SDWA and the National Primary Drinking Water Regulations ("NPDWRs").
58. The City shall continue to add corrosion inhibitors (e.g., orthophosphate booster) at levels sufficient to re-optimize corrosion control in the distribution system.
59. To address optimization of corrosion control for the system as operated with its current water source, within 14 days of the effective date of this Order the Respondents shall submit to MDEQ and post in accordance with Paragraph 51:
- a. Submit a plan and schedule to the MDEQ to review and revise as needed designated optimal corrosion control and water quality parameters as well as monitoring plans for LCR compliance and all other monitoring plans developed to ensure that the treatment plant is consistently and reliably meeting plant performance criteria and all other NPDWRs;
 - b. Submit a sampling plan for daily monitoring of water quality parameters in the distribution system with results compiled in a weekly report in an approved format; and
 - c. Submit an operations plan for the corrosion control equipment (storage day tanks, feed/injection systems), with results compiled in a weekly format, that includes monitoring, calibration, verification (pump catch, etc.) as well as daily monitoring of finished water corrosion control parameters. Results shall be submitted and posted weekly.
60. Respondents shall not effectuate a transition to a new water source for the City's PWS (e.g., from KWA) until such time as they have submitted a written plan, developed through consultation with appropriate experts and after providing adequate

advanced notice and an opportunity for public comment, to MDEQ and in accordance with Paragraph 51, demonstrating that the City has the technical, managerial and financial capacity to operate its PWS in compliance with SDWA and the NPDWRs and that necessary infrastructure upgrades, analysis, and testing have been completed to ensure a safe transition. Such plans shall include, but not be limited to, provisions addressing:

- a. The impacts on corrosion control for any new source water and an operations plan for periodic use of existing sources of water;
- b. Completion of corrosion control study for any new sources;
- c. Implementation of a "performance period" that allows for the demonstration of the adequacy of treatment of the new water source to meet all NPDWRs before it can be distributed to residents; and
- d. The City's technical, managerial and financial capacity to meet SDWA's applicable requirements, including the NPDWRs, during and after the transition to any new water source.

Treatment and Distribution System Management

61. Within 15 days of the effective date of this Order, the City must demonstrate, and the MDEQ and State must ensure, the City has the necessary, capable and qualified personnel required to perform the duties and obligations required to ensure the PWS complies with the SDWA and the NPDWRs.
62. To ensure the City's PWS is adequately operated to meet SDWA and all NPDWRs, within 30 days of the effective date of this Order, the Respondents shall submit the steps they will take to develop and implement a distribution system water quality

optimization plan to MDEQ and in accordance with Paragraph 51, to evaluate and improve its programs that affect distribution system water quality, including: evaluating conditions within the distribution system; creating better documentation; and enhancing communication between the various utility functions that impact distribution system water quality. The MDEQ must ensure that this plan is adequate to ensure SDWA compliance and the State must ensure it is executed.

Independent Advisory Panel ("IAP")

63. Within seven days of the effective date of this Order, the MDEQ and State, with the City's input and concurrence, shall engage a panel of independent, nationally-recognized experts on drinking water treatment, sampling, distribution system operation, and members of the affected community to advise and make public recommendations to the City on steps needed to mitigate the imminent and substantial endangerment to the health of persons and general operation of the City's PWS to ensure compliance with SDWA and the NPDWRs.

64. The charge to the IAP will include the following:

- a. Make recommendations to the Respondents, and for consideration by the EPA, to ensure the safe operation of the City's PWS.
- b. Make other recommendations to the Respondents, and for consideration by the EPA, to better serve the community served by the City's PWS.

VI. PARTIES BOUND

65. The provisions of this Order shall apply to and bind Respondents and their officers, employees, agents, successors and assigns.

VII. GENERAL PROVISIONS

66. All submittals and inquiries pursuant to this Order shall be addressed to:

Mark Pollins, Director
Water Enforcement Division
Office of Enforcement and Compliance Assurance
United States Environmental Protection Agency
William Jefferson Clinton South Building
1200 Pennsylvania Avenue NW
Room 3104
Washington, DC 20460
pollins.mark@epa.gov

67. All plans, reports, notices or other documents submitted by Respondents under this Order shall be accompanied by the following statement signed by a responsible official.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering such information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

68. Record preservation. Respondents shall retain, during the pendency of this Order, and for a minimum of six years after its termination, all data, records and documents in its possession or control, or which comes into its possession or the possession of its divisions, officers, directors, employees, agents, contractors, successors, and assigns, which relate in any way to this Order. After the above mentioned six year period, Respondents shall provide written notification to EPA 60 calendar days before the destruction of any data, records, or documents that relate in any way to this Order or its implementation. At the EPA's request, Respondents shall then make records available to the EPA for inspection and/or retention, or shall provide copies of any such records to EPA before discarding.

69. Within 10 days of the effective date of this Order, or at the time of retaining any agent, consultant, or contractor for the purpose of carrying out terms of this Order, Respondents shall enter into an agreement with any such agents, consultants, or contractors whereby such agents, consultants, or contractors will be required to provide Respondents a copy of all documents produced under this Order.
70. EPA retains all of its information gathering and inspections authorities and rights, including the right to bring enforcement actions related thereto, under SDWA and any other applicable statutes or regulations.
71. Pursuant to SDWA Section 1431(b), 42 U.S.C. § 300i, in the event Respondents violate, fail or refuse to comply with any of the terms or provisions of this Order, EPA may commence a civil action in U.S. District Court to require compliance with this Order and to assess a civil penalty of up to \$21,500 per day of violation under SDWA, as adjusted by the Federal Civil Penalties Inflation Adjustment Act of 1990, amended by the Debt Collection Improvement Act of 1996, and the subsequent Civil Monetary Penalty Inflation Adjustment Rule, 40 C.F.R. Part 19.
72. Compliance with the terms and conditions of this Order shall not in any way be construed to relieve Respondents of their obligations to comply with all applicable provisions of federal, state, or local law, nor shall it be construed to be a determination of any issue related to any federal, state, or local permit. Compliance with this Order shall not be a defense to any actions subsequently commenced for any violation of federal laws and regulations administered by EPA, and it is the responsibility of Respondents to comply with such laws and regulations.

73. EPA may modify this Order to ensure protection of human health and the environment. Such modification shall be in writing and shall be incorporated into this Order.

74. This Order shall constitute final agency action by EPA.

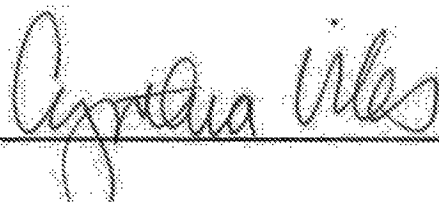

VIII. EFFECTIVE DATE

75. Under SDWA Section 1431, 42 U.S.C. § 300i, this Order shall be effective immediately upon Respondents' receipt of this Order. If modifications are made by the EPA to this Order, such modifications will be effective on the date received by Respondents. This Order shall remain in effect until the provisions identified in the Order have been met in accordance with written EPA approval.

IX. TERMINATION

76. The provisions of this Order shall be deemed satisfied upon Respondents' receipt of written notice from the EPA that Respondents have demonstrated, to the satisfaction of the EPA, that the terms of this Order, including any additional tasks determined by EPA to be required under this Order or any continuing obligation or promises, have been satisfactorily completed.

David:

This is just to update you on some steps we have taken since the call this morning.

MSP will be taking the lead on monitoring any online communication amongst the Anonymous group or threats made by them (Twitter accounts, YouTube, chat rooms, podcasts, hashtags, etc.). I have directed the MIOC commander to assign criminal intelligence analysts to assist the MC3 with this intelligence gathering

and monitoring. We will notify the group on anything that merits immediate notification.

We will also be creating a product that lists the known threats and online pseudonyms. We intend for this to be a "living document" that we can update and distribute to the group. It can also be used for MSP briefs on conference calls. If your staff identifies a relevant online posting over this weekend, please have them send it to buddeB1@michigan.gov and EllisJ3@michigan.gov to have it added. We will have a more permanent solution for sharing information on Monday.

Additionally, we will continue to investigate the disruptions that have already occurred. We will brief on this (to the extent we can) as well.

Best,

Dave

Capt. Dave Kelly
Commander
Intelligence Operations Division
Michigan State Police
333 S. Grand Ave.
Lansing, Mi. 48909
Cell: 248.331.7199

Good afternoon. You have likely seen the media reports regarding the threats being made by through Twitter and YouTube to attack and take down Michigan.gov and other websites related to state government and the City of Flint. I sent you an email last weekend to inform you of the DDOS attack that we experienced on Saturday that briefly took our sites offline.

We experienced another attempt to bring our sites down late last night. At 11:28 p.m. michigan.gov became inaccessible. Our partners at IBM responded immediately and access was restored at 11:56 p.m. We continue to closely monitor all available data and are prepared to respond to any additional attacks quickly. I am committed to keeping you updated as things happen.

Effective cybersecurity is a complete team effort. It is imperative that you and your teams are following proper security protocols for the state, and our employees, to stay safe. Recent data shows that 95 percent of cyber breaches are caused by human error such as emailing sensitive documents, clicking on phishing scams and inappropriately using flash drives.

Here are a few tips to protect you both personally and professionally:

- Choose strong passwords and change them often. A strong password uses a combination of letters, numbers, and symbols (when allowed) and does not include a person's name or other commonly known information such as their children's or pet's names.
- Do not use the same password for multiple accounts.
- Be aware of possible phishing attacks. If you receive an email claiming to be from email provider, bank, or other frequented website, and asks you to change your account password or update account information, make sure the email is legitimate. To be safe, go directly to websites to change your password, and type the link yourself rather than clicking on links embedded in emails.
- Be on the lookout for other people accessing your personal accounts. Monitor email and social media accounts for suspicious messages or messages appearing from you, but that you did not send. Monitor bank and credit card accounts for unauthorized charges.
- Be observant in state office buildings for anything unusual. Do not let in anyone without a valid state ID.

Please contact me if you have any questions or need additional information - 517-282-0194.

Thanks,
David

<Behend@michigan.gov> wrote:

Good evening. On Saturday, January 17, Michigan.gov experienced a DDoS attack, or distributed denial of service, which is intended to disrupt the services of an internet site. This effort caused performance slowdowns and briefly made the sites unavailable to users. The incident did not impact internal state systems and did not put any sensitive data at risk.

Due to the recent DDOS attacks against Michigan.gov, I'm

encouraging you and all department directors to assess your online safety habits and ensure you are doing everything you can to stay safe. Many times after an attack like the one we experienced the perpetrators turn to other tactics like “doxing” to antagonize the target organization.

“Doxing is the act of publishing someone’s personal information, of which there would be a reasonable expectation of privacy and dubious value to the conversation, in an environment that implies or encourages intimidation or threat.”

This includes information that may arguably be easy to find, such as a home address from a WhoIs lookup or personal photos from Facebook. Doxing is less about the availability of the information and more about the way it’s used to intimidate or harass a target.

Political doxing is happening more and more these days, often targeting high-profile government officials.

Below are a few tips to help you stay safe.

- Be aware of security and privacy settings on your accounts. Be selective about who you share information with and limit how often you post about your location (especially if it’s your home).
- Routinely update computers, devices, and software with the latest security fixes.
- Use anti-virus software.
- Pay close attention to links and attachments in email messages. Do not open anything that looks even remotely suspicious. If it's legitimate, the person can always send it again.

- Also be cautious of social engineering with phone calls claiming to be from something familiar to you and asking for personal information
- Add protection to your email, social media, and online bank accounts using two-factor authentication techniques.
- Choose unique, strong passwords for each of your accounts and change your passwords regularly.
- Remember that anything you post on social media might be used against you. Once it's online, you cannot take it back.

Please contact me anytime if you have any questions or need additional information at 517-282-0194.

Thank you,
David

John,

Great summary.

Thanks for your help today.

I am engaging Tom Weston (who is now at the DNR) to assist internally with some of the technology issues.

Gary

Gary Hagler

Law Enforcement Division, Chief

Michigan Department of Natural Resources

Subject: RE: Meeting with Genesee county clerk

All,

I met with Gary Hagler today in Flint to review a potential data opportunity that did not pan out. The source we met with had information but none of it that dated back to the 1950's and was in a format that we could readily use with today's technology. Recognizing that the effort may be too labor intensive Gary is following up on other leads.

While I was there I did see the EOC and meet with members of the plumbers union that were going out to individual houses and installing water filters. Today, they were also going to start collecting information on what type of pipe is being used to bring water into the house.

Although I was unable to help Gary with his request I did have these takeaways from what little I saw while in the field:

The plumbers union was using an iPad app provided by MSP to record data that was collected on paper forms in the field. While trying to demonstrate the app they were unable to locate the first address they tried. Once an address was found they used pick fields to set the values for several questions. Currently the form did not have a place to set which type of water pipe is coming into the home so I suggested that they type into the comments the following string signature until the app can be updated to collect that information:

pipe=C*

*C for copper, G for galvanized, L for lead, U for unknown

This will make it possible to perform an in string search for “pipe=” and then take the next character to determine what pipe information there is.

I am uncertain of the address source being used within the app although if I had to guess I would say it was a parcel layer. I would also suggest that if that is the case then the addresses assigned to those parcels should be passed through an address standardizer and validation such as SAP (which is a shared service from CSS and that team is willing to run the Flint data). Running those addresses through SAP should improve the quality by standardizing the address, updating street name and postal code changes and flagging any addresses that are non-deliverable.

The plumbers also indicated that apprentices were coming every day now to volunteer time as part of their career training and that they also expect many of their sister unions to volunteer time as well. Which will mean an increase in the amount of houses being processed and data having to be entered. My concern here is that there is so much manual reentry of collected paper data that the process will bog down. I see three scenarios in which this problem could be alleviated:

- Provide more devices to reenter the data (Likely the easiest solution to implement, keeps the point of entry to a select few that know how to work the devices and minimizes device costs)
- Provide even more devices (or make the app something that can be downloaded on a personal device) to take in the field to collect the data (More equipment costs and more people to train, no idea of what security issues there maybe if personal devices are used)
- Implement a better paper process to collect the information like the way multiple choice tests are handled. Students use a pencil to fill in the circle of the possible choices they could answer and then the form is scanned. There are already iPad apps that can do this sort of thing. (The user base is familiar with a paper process, their already using one, and blotting out choice boxes on a structured form is more efficient than hand writing the values. The challenge here would be to implement the scanning on the iPad, perhaps a university or college has an option)

Please note that these are my few observations from a very narrow perspective. I am not aware of what all is and has been going on between the various agencies and EOCs but I thought I would provide these here in hopes that it helps. Please let me know if there is something further I can assist with.

Subject: Re: Meeting with Genesee county clerk

Mr. Harris,

I will be at the Genesee Count Clerks Office at 8:00 am. The information on the address and location of the Clerk's Office in your email below is correct. I look forward to working with you and your staff on data collection effort. My contact information is correct in your email as well.

Thanks,

Gary

Mr Hagler,

I have been working on behalf of Rod Davenport to have a state IT specialist available to meet with you and the Genesee county clerk's IT folks on Monday morning to help with a plan to extract data from the clerk's database.

John Clark from our GIS area will be there Monday morning.

John's phone number is [REDACTED] and his email is ClarkJS@michigan.gov

I can be available via phone during the morning, if needed. Our eMichigan team will also have additional staff available via phone if needed.

I am CC'ing a couple of management staff from the GIS and eMich offices here.

I believe that your cell phone # is [REDACTED] Please let me know if that is incorrect.

Also verifying: the Genesee County Clerks office is located at 900 S. Saginaw St. Flint Mi on the second floor of the county administration building.

Regards.

Anonymous Relaunches #OpFlint against the Government of Michigan and City of Flint

MANAGED ADVERSARY AND THREAT INTELLIGENCE

DEEPSIGHT™ INTELLIGENCE, INTELLIGENCE SUMMARY, SYMC – 300383, PUBLISHED 22 JANUARY 2016, V.1

2

Information Cut-Off Date: 22 January 2016 3

ANONYMOUS LAUNCHES #OPFLINT AGAINST THE GOVERNMENT OF MICHIGAN AND CITY OF FLINT

DeepSight™ Intelligence, Intelligence Summary, SYMC-300383, published 22 January 2016, V.1

KEY FINDINGS

- On 16 January 2016, Anonymous relaunched #OpFlint in response to the recent health crisis surrounding contaminated water in Flint, Michigan.
- The operation targets officials that the Anonymous group recognizes as having ignored the water crisis, such as Gov. Rick Snyder and Flint city personnel.
- The operation activities have included distributed denial-of-service (DDoS) attacks and doxing.

EXECUTIVE SUMMARY

Members of the international Anonymous hacktivist collective have relaunched #OpFlint to target those entities that the operation perceives as responsible for the contaminated water crisis in Flint, Michigan. Originally organized in 2015, #OpFlint was relaunched on 16 January 2016 and is ongoing against city officials and the governor of Michigan, Rick Snyder. Several hacking groups are supporting the malicious activities, which include DDoS attacks and doxing. The first DDoS attacks on 16 January took the Michigan.gov and cityofflint.com websites temporarily offline. DeepSight Intelligence judges #OpFlint will not shut down the state or city's infrastructure; however, access to the Michigan government and city websites will likely be disrupted. 4

DETAILS

The Anonymous collective's operation #OpFlint originally launched in 2015 but never gained momentum. #OpFlint was relaunched on 16 January 2016 to draw attention to the toxicity levels of the contaminated water supply in the city of Flint, Michigan.

Leaders of the current effort include the US-based New World Hacking groupⁱ and the Anonymous Intelligence Group (a.k.a. Anon Intel Group). The New World Hacking group launched the recent #OpFlint activity on 16 and 17 January 2016 with DDoS attacks that shut down the Michigan.gov and cityofflint.com websites (see Figure 1). The operation has an official video on Youtube (<https://www.youtube.com/watch?v=zXQfsURnEOw>) and on several Anonymous-affiliated websites.

ⁱ See the DeepSight Intelligence report *Profile: New World Hacking (NWH)*, (SYMC – 300376), 9 June 2016. New World Hacking uses their own stressor service, BangStressor, to conduct DDoS attacks including an attack against the BBC in early 2016.

Figure 1. New World Hacking Twitter post publicizing the DDoS attacks against Michigan.gov and cityofflint.com

On 20 January 2016, the Anon Intel Group's website contained a link to a "doxing" for Michigan Gov. Snyder (<https://ghostbin.com/paste/zn236>, see Figure 2). The dox did not include social security numbers, but rather revealed his mailing address, social media accounts, and phone numbers, and information for his family relatives that is easily obtained through several Google searches.

Figure 2. Dox posted on Anon Intel Group website on 20 January 2016 ⁵

Gents:

See attached Deepsight MATI report on OpFlint generated from our SOC in Washington DC...

On 21 January 2016, Hurley Medical Center in Flint, Michigan, confirmed it was the victim of a “cyber attack” but patient information was not compromised. According to a Twitter post by Anon Intel Group on 22 January 2016, Anonymous denies responsibility for the attack against the hospital (see Figure 3).

Figure 3. Twitter post discussions denying Anonymous activity against a hospital in Flint Michigan

OUTLOOK

As of 22 January 2016, recent #OpFlint activity has involved posting news clips on social media accounts, such as Twitter and Facebook. The group has not mentioned further DDoS attacks, although DeepSight Intelligence expects some sites to be targeted on the first weekend of the relaunch (i.e., between 22 January and 24 January 2016). Although #OpFlint relaunched on 16 January 2016, DeepSight Intelligence expects the activity to quickly diminish if it does not gain greater media recognition—Anonymous is motivated by publicity. There are no indications the operation is well organized and the Youtube video announcing the operation only mentions targeting the Governor of Michigan and the city of Flint; there are no details on how the operation will be conducted. Although #OpFlint will not shut down the state or city’s infrastructure, access to government and city websites might occasionally be disrupted.

Just a quick update, the DNR GIS Team is now taking those old CAD drawings and is georeferencing the maps. With that said we have ERSI technology that we can build an app for the survey folks to use to accurately collect data that will automatically be fed to Arc GIS online.

We already use this tool to collect data in the field.

Subject: RE: Meeting with Genesee county clerk

All,

I met with Gary Hagler today in Flint to review a potential data opportunity that did not pan out. The source we met with had information but none of it that dated back to the 1950's and was in a format that we could readily use with today's technology. Recognizing that the effort may be to labor intensive Gary is following up on other leads.

While I was there I did see the EOC and meet with members of the plumbers union that were going out to individual houses and installing water filters. Today, they were also going to start collecting information on what type of pipe is being used to bring water into the house.

Although I was unable to help Gary with his request I did have these takeaways from what little I saw while in the field:

The plumbers union was using an iPad app provided by MSP to record data that was collected on paper forms in the field. While trying to demonstrate the app they were unable to locate the first address they tried. Once an address was found they used pick fields to set the values for several questions. Currently the form did not have a place to set which

type of water pipe is coming into the home so I suggested that they type into the comments the following string signature until the app can be updated to collect that information:

pipe=C*

*C for copper, G for galvanized, L for lead, U for unknown

This will make it possible to perform an in string search for "pipe=" and then take the next character to determine what pipe information there is.

I am uncertain of the address source being used within the app although if I had to guess I would say it was a parcel layer. I would also suggest that if that is the case then the addresses assigned to those parcels should be passed through an address standardizer and validation such as SAP (which is a shared service from CSS and that team is willing to run the Flint data). Running those addresses through SAP should improve the quality by standardizing the address, updating street name and postal code changes and flagging any addresses that are non-deliverable.

The plumbers also indicated that apprentices were coming every day now to volunteer time as part of their career training and that they also expect many of their sister unions to volunteer time as well. Which will mean an increase in the amount of houses being processed and data having to be entered. My concern here is that there is so much manual reentry of collected paper data that the process will bog down. I see three scenarios in which this problem could be alleviated:

- Provide more devices to reenter the data (Likely the easiest solution to implement, keeps the point of entry to a select few that know how to work the devices and minimizes device costs)
- Provide even more devices (or make the app something that can be downloaded on a personal device) to take in the field to collect the data (More equipment costs and more people to train, no idea of what security issues there maybe if personal devices are used)
- Implement a better paper process to collect the information like the way multiple choice tests are handled. Students use a pencil to fill in the circle of the possible choices they could answer and then the form is scanned. There are already iPad apps that can do this sort of thing. (The user base is familiar with a paper process, their already using one, and blotting out choice boxes on a structured form is more efficient than hand writing the values. The challenge here would be to implement the scanning on the iPad, perhaps a university or college has an option)

Please note that these are my few observations from a very narrow perspective. I am not aware of what all is and has been going on between the various agencies and EOCs but I thought I would provide these here in hopes that it helps. Please let me know if there is something further I can assist with.

Extremely difficult to give much insight because I'm reading a synopsis of a process in completely unfamiliar with. If the mobile application can be enhanced, we can look at that but I'm afraid of the turn around time. This manual process certainly seems really difficult to get full coverage but again I'm not very familiar with the effort going on.

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

On this same topic, David and I had a conversation with the Governor's office after our post-EMT meeting this morning. They have agreed that as a general rule, before we do work on anything, it must be approved by the SEOC.

Further, they have agreed that if there is something urgent that the Governor or LG's office needs to get done prior to (or in lieu of) the SEOC approving it, these requests should all come in through me. Beth Clement was going to share this message with Gov's office and LG's office staff.

Procurement should have the new form up today for vendors to use as well. We can share that with you once it is working.

Per our discussion on Monday at the EMT meeting, Chris Christiansen has provided information on where to refer vendors looking to assist Flint and contact information for DTMB-SEOC. Please see below for the details.

- If you are contacted by a vendor that would like to provide donation for the Flint water problem, please direct them to Flintdonations@michigan.gov
- If you have any additional questions relating to the Flint issue please direct them to DTMBECC@michigan.gov

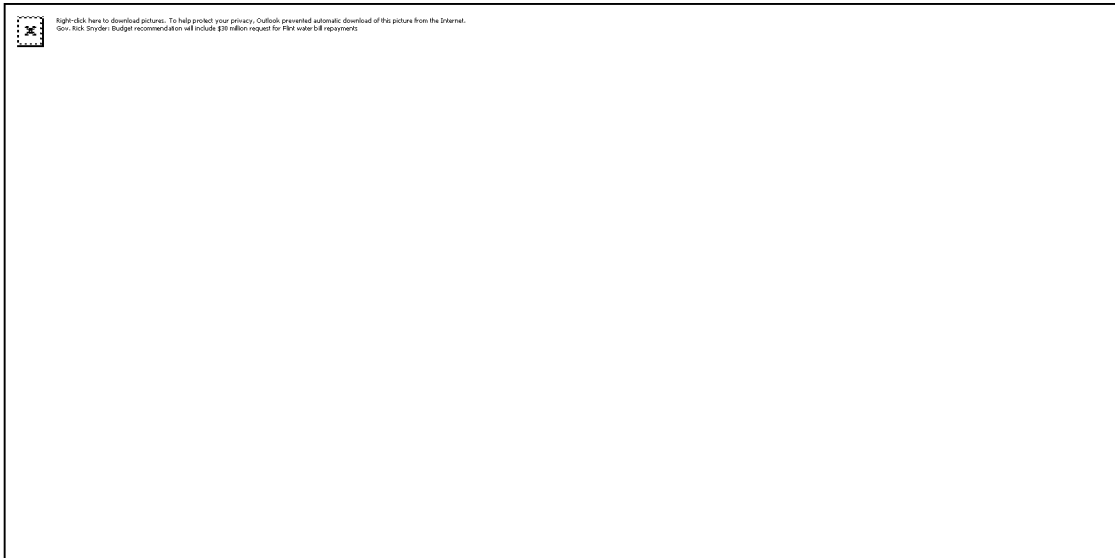

Thank you,

Chanda

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

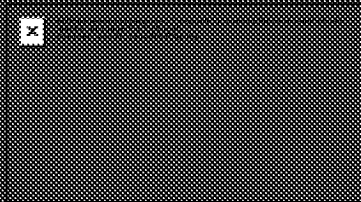

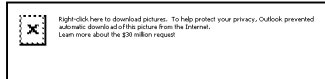

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

VIDEO: What Governor Snyder's FY17 budget means for Michigan

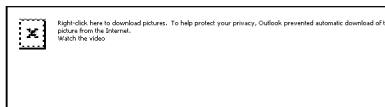

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

FOR IMMEDIATE RELEASE

Friday, Feb. 12, 2016

517-335-6397

Gov. Rick Snyder releases departmental emails produced regarding Flint water crisis

LANSING, Mich. - Gov. Rick Snyder's office today posted emails and corresponding documents that have been made available to requesting entities from state departments regarding the Flint water crisis. The documentation represents requests fulfilled to date by the Department of Environmental Quality, Department of Health and Human Services, Department of Treasury, Department of Technology, Management and Budget, and Department of Agriculture and Rural Development regarding Flint water.

"All levels of government failed the people of Flint," Snyder said. "This crisis should never have happened, but we are making progress each day to meet the needs of residents."

"By making the information easily accessible, everyone can review it and take what they need, and then we can all focus and work together on solutions, healing and moving Flint forward."

NOTE: All emails and attachments can be accessed using the below links. Documents are large and will take time to download. Viewing on a mobile device is not recommended.

LEGAL NOTICE

- The release of these documents is not a waiver of any legal privilege. Because of the voluminous nature of these records, some documents that are subject to the attorney-client, attorney work product, and other privileges may have been inadvertently disclosed. Should this posting include such documents, their disclosure here does not constitute a waiver of the privilege.
- Those seeking information as part of a legal proceeding or investigation should not rely solely upon the documents posted here to satisfy their request. Such requests should be directed to the appropriate state custodian.
- The posting of these documents does not, is not intended to, and cannot be relied upon to, create any right or benefit, substantive or procedural, that is enforceable by any external

party.

Importance: High

Morning all,

We need to supply the director's office a list of names of any staff who would have been a part of the Flint Water response. Anything in the past and current efforts are important to know. In the emails from Brom it is requested that we give this information to them today by noon. To coordinate this effort can you please reply to me your area's list of names so that I can compile one response.

Suzanne, I am including John and Yvonne on this so that they can respond while you are away at training.

Please let me know if you have any questions.

Thank you,

Aimee

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Brom Stibitz
Chief Deputy Director

Subject: Re: NEW DEADLINE - Time Sensitive Request

Please verify with Yvonne and John but I think the list would be:

Suzanne Pauley
John Thompson
Anne Nolan
Rick Peterson
Michelle Stiffler
Sunit Patke
James Foley - although he uses his IBM email mostly
John Estill
Joe Seckelman (spelling?)

I'm not aware of any involvement from our developers but verify with John please.

Also, I have some questions on what will be redacted as most of my communications on this topic have been to MSP regarding social media monitoring.

Thanks,
Suzanne Pauley

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Brom Stibitz

Subject: RE: NEW DEADLINE - Time Sensitive Request

Aimee,

The only person from the UX/QA area that had some involvement with the Flint Water response was Ellen Martin. Her involvement was pointing out that there were some ADA issues found on the <http://www.helpforflint.com/> website.

Let me know if you need anything additional,
Yvonne E. Morrison

Importance: High

Morning all,

We need to supply the director's office a list of names of any staff who would have been a part of the Flint Water response. Anything in the past and current efforts are important to know. In the emails from Brom it is requested that we give this information to them today by noon. To coordinate this effort can you please reply to me your area's list of names so that I can compile one response.

Suzanne, I am including John and Yvonne on this so that they can respond while you are away at training.

Please let me know if you have any questions.

Thank you,
Aimee

VIDEO: How volunteers are helping Flint

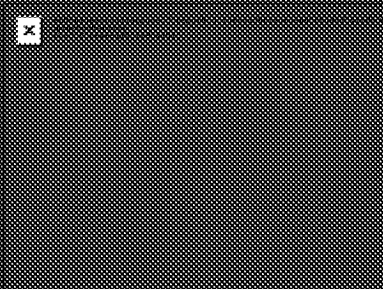

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

JANUARY 30, 2016

Welcome to a special Saturday edition of GovTech Today, where we recap our best stories of the week — just in case you missed them. Thanks for spending a little bit of your weekend with us.

Anonymous Activates #OpFlint: According to the hacker group, OpFlint promises online attacks directed toward Michigan Gov. Rick Snyder's administration in response to the Flint water emergency, which has dominated national headlines recently. Though Vocativ.com says the video doesn't explain any specifics of Anonymous' attack plan, it does assure to those affected by the water crisis that, "We will amplify your voice where the mainstream media will surely fail you, as it has in the past." [See what Michigan officials had to say](#) about the threat.

Speed Up by Slowing Down: It's becoming increasingly difficult to stay current with emerging technologies while mitigating security vulnerabilities. So what can be done to keep up? Surprisingly, [it may be best to slow down](#), look around and catch your breath. That's right — if you want to speed up innovation, many experts suggest slowing down first.

Emerging Tech Affects Jobs: A new study has some worrisome revelations for the future of the global job market: By 2020, more than [5 million jobs could disappear](#) in the wake of advancing technology. And those in the public sector are not immune.

SF's Startup in Residence: Building on a program from 2014, the San Francisco Mayor's Office of Civic Innovation announced during a Jan. 28 press conference the [2016 Startup in Residence program](#) that includes a regional partnership with the neighboring cities of Oakland, San Leandro and West Sacramento. The ultimate goal? To build toward an international program.

T	Amy Briggs	X	Carl Slempp
T	Cathy Hunter	T	Richard Reasner
T	Charlotte Allen		
T	Suzanne Pauley		

Purpose: Due to the recent DDOS attacks against Michigan.gov and in light of the Flint Water Emergency, a short meeting needs to be held to discuss a plan of action to ensure the streaming of the Governor's State of the State Address occurs uninterrupted.

Agenda

#	Item	Presenter
1.	Review current streaming support plan for State of the State	Tiziana/Nancy
2.	Agree on process should problem arise with the stream	All
3.	Additional thoughts	All

Main Points, Discussion/Conclusion, Decisions

SoS Streaming

- What has been done to ensure capacity will not be an issue? Do we have sufficient capacity?
 - Primary feed from the House, backup feed from Senate**
 - Support call placed and Leightronix states that capacity should be adequate**
 - 4 feeds out, 2 House, 2 Senate, unlimited connections, 10Gb Internet, 2Gb internal, 700Mb last year.**
- Will there be Gov Website on-site support available and ready should there be problems with the stream?

State of the State Address Meeting

Meeting Minutes

Date: January 19th, 2016

Time: 11:30 am – 12:15 pm

Location: Teleconference: 1-877-336-1829; Access Code: 9013248 - Nancy Host

2.1. eMichigan will have on-call tech on standby

2.2. Link to be embedded on Gov website later today

3. Will there be House Website on-site support available and ready should there be problems with the stream?
 - 3.1. **Senate support individual will contact Leightronix should there be an issue with the feed/stream.**
4. If there are problems is there a failover plan? **YES**
 - 4.1. If there is a plan it is automatic or manual? **Manual vis eMichigan Team**
 - 4.2. Failover between the House and the Senate systems possible? **YES, If required Senate is backup stream.**
5. What if anything does the vendor (Leightronix) have in place? **They are confident that the stream capacity is adequate. Senate contacts to call Leightronix is issues arise. One feed to Leightronix, guarantee the stream.**
6. Do we have a call-list available should there be issues and we need to initiate an issue/problem management plan? **See Below**
 - 6.1. **Support Group Names and Contact Numbers**
 - 6.1.1. **IF THERE ARE ANY ISSUES CALL THE CONFERENCE LINE FIRST**
 - 6.1.1.1. **Teleconference: 1-877-336-1829; Access Code: 9013248**
 - 6.1.2. **DTMB**
 - 6.1.2.1. eMichigan – 517.243.1380 – Rich Peterson
 - 6.1.2.2. Cyber Security – Group number – 517.335.1722 or 517.243.1640
 - 6.1.2.3. Telecom – Jay Salmon - 517.284.7364
 - 6.1.2.4. Agency Services –
 - 6.1.2.4.1. Tiziana Galeazzi – 517.749.9496
 - 6.1.2.4.2. Nancy Palmateer - 517.282.7593
 - 6.1.2.4.3. Narayan Sivaraman – 517.316.5346
 - 6.1.2.4.4. Carl Slempe – 517.331.7117
 - 6.1.2.5. CTO Office - Jack Harris – 517.242.0942
 - 6.1.3. **House**
 - 6.1.3.1. Cathy Hunter and Greg Bensinger – 517.376.9611
 - 6.1.4. **Senate**
 - 6.1.4.1. Mike Desrochers - 517.373.1928
 - 6.1.5. **Legislators**
 - 6.1.5.1. Mike Wagner - 517.373.5229 Point of contact with Leightronix

State of the State Address Meeting

Meeting Minutes

Date: January 19th, 2016

Time: 11:30 am – 12:15 pm

Location: Teleconference: 1-877-336-1829; Access Code: 9013248 - Nancy Host

Action Items

- Nancy to open Conference Bridge to report and remediate issues that may arise. Same number/code as above.
- John to talk to Josh regarding the MP4 file for retention and YouTube.

To: Prange, Laurie (DTMB)
Subject: RE: Meeting with Genesee county clerk

If they need to know the age of a home and could get us the addresses from the parcel info, we could send them through a Zillow API to get the date built. I think Zillow limits you to 1000 calls a day unless you request a higher number but I'm sure if we contact them it wouldn't be an issue.

Thanks,

Subject: RE: Meeting with Genesee county clerk

All,

I met with Gary Hagler today in Flint to review a potential data opportunity that did not pan out. The source we met with had information but none of it that dated back to the 1950's and was in a format that we could readily use with today's technology. Recognizing that the effort may be to labor intensive Gary is following up on other leads.

While I was there I did see the EOC and meet with members of the plumbers union that were going out to individual houses and installing water filters. Today, they were also going to start collecting information on what type of pipe is being used to bring water into the house.

Although I was unable to help Gary with his request I did have these takeaways from what little I saw while in the field:

The plumbers union was using an iPad app provided by MSP to record data that was collected on paper forms in the field. While trying to demonstrate the app they were unable to locate the first address they tried. Once an address was found they used pick fields to set the values for several questions. Currently the form did not have a place to set which type of water pipe is coming into the home so I suggested that they type into the comments the following string signature until the app can be updated to collect that information:

pipe=C*

*C for copper, G for galvanized, L for lead, U for unknown This will make it possible to perform an in string search for "pipe=" and then take the next character to determine what pipe information there is.

I am uncertain of the address source being used within the app although if I had to guess I would say it was a parcel layer I would also suggest that if that is the case then the addresses assigned to those parcels should be passed through an address standardizer and validation such as SAP (which is a shared service from CSS and that team is willing to run the Flint data). Running those addresses through SAP should improve the quality by standardizing the address, updating street name and postal code changes and flagging any addresses that are non-deliverable.

The plumbers also indicated that apprentices were coming every day now to volunteer time as part of their career training and that they also expect many of their sister unions to volunteer time as well. Which will mean an increase in the amount of houses being processed and data having to be entered. My concern here is that there is so much manual reentry of collected paper data that the process will bog down. I see three scenarios in which this problem could be alleviated:

- Provide more devices to reenter the data (Likely the easiest solution to implement, keeps the point of entry to a select few that know how to work the devices and minimizes device costs)
- Provide even more devices (or make the app something that can be downloaded on a personal device) to take in the field to collect the data (More equipment costs and more people to train, no idea of what security issues there maybe if personal devices are used)
- Implement a better paper process to collect the information like the way multiple choice tests are handled. Students use a pencil to fill in the circle of the possible choices they could answer and then the form is scanned. There are already iPad apps that can do this sort of thing. (The user base is familiar with a paper process, their already using one, and blotting out choice boxes on a structured form is more efficient than hand writing the values. The challenge here would be to implement the scanning on the iPad, perhaps a university or college has an option)

Please note that these are my few observations from a very narrow perspective. I am not aware of what all is and has been going on between the various agencies and EOCs but I thought I would provide these here in hopes that it helps. Please let me know if there is something further I can assist with.

Subject: RE: FYI - Article About Tonights Mi.gov Outage

From MIRS:

Anonymous Attacks Brought Down Michigan.gov Twice

The international network of "hacktivists" known as Anonymous has twice brought down the state's servers on consecutive Saturdays and a spokesman contends the attack on www.michigan.gov is counterproductive to helping Flint residents obtain water resources.

The two definite attacks were seven days apart, bringing down www.michigan.gov for about 15 to 20 minutes. The previous Saturday, the site experienced slowness and went off line for a while. Since those two incidents, not another attack was in any way successful.

M-Live reported Jan. 21 that Hurley Medical Center in Flint confirmed it was attacked by Anonymous.

Caleb **BUHS**; spokesperson for the Department of Technology, Management and Budget; said www.michigan.gov helps volunteers hand out water and filters.

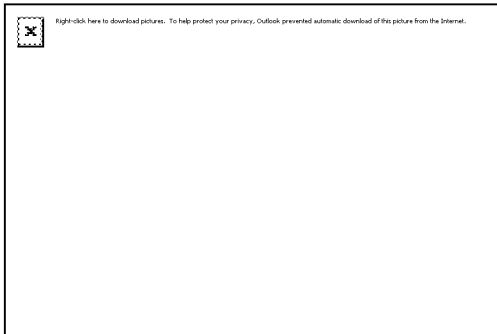

"So taking that down is pretty counter-productive to helping the residents of Flint," Buhs said.

On Jan. 20, Anonymous published to YouTube their video outlining their plans to attack Gov. Rick **SNYDER**. In the video, which appears below, Anonymous contends there is enough evidence to arrest Snyder of "either manslaughter or involuntary manslaughter" and that the group will show him "the error of his evil ways."

"It's safe to assume that children may already be doomed due to this," the video contends.

Subject: SEOC Jan 23

Saturday update at the SEOC

- DHHS – Federal HHS rep will be back on Monday.
- National Guard field teams scheduled to be complete on Sunday 1/24. Soldiers staffing Points of Distribution (PODS) will remain.
- NWS – 30-35 degrees today and tomorrow. Tomorrow light snow with drizzle which may freeze. Snow Monday and Tuesday, less than inch.
- DHHS – CDC will be sending a senior officer to Michigan next week to help coordinate response efforts
- LARA – Testing ongoing at Michigan School for Deaf. Michigan Fire Chiefs Association is conducting water drives around the state for the Flint Response efforts.
- Red Cross – 15 teams yesterday. Expecting as many as 40 teams out today. Will continue to provide meals for the volunteers.
- MSP – 15 teams out today.
- National Guard – Three (3) cyber personnel will report to MC3 on Monday to assist.
- Local EOC – Continuing to work with faith based organizations on easier distribution of supplies.
- PIO – JIC not being staffed in Flint this weekend. Will be staffed at the SEOC. Still releasing updates.
- EPA will be in Flint doing testing today. Residual chlorine testing near residents and hospitals.
- Hours will continue to be 8:00a-8:00p through the weekend. Still a lot that needs to be accomplished.
- Agency SitReps need to only have information on the current operational period, not a running list of everything to date.

DTMB Requests

- 30 Additional iPads for Water Response Teams to the State Emergency Operations Center
- Delivered 500 credentials for Water Response Teams to the State Emergency Operations Center
- Procured 90 rolls of stretch wrap for Clio Road Warehouse
- Delivered and Installed New Locks to the Flint State Office Building for JIC Conference Room

Rough Data From MSP GIS based on iPad data collection

- 38,144 total parcels in the city, single family homes (not all occupied)
- 26,073 have been identified as subscribers to City of Flint Water
- Water Resource Teams have made contact with 75% of occupied homes

Subject: Staff Needed for Joint Information Center
Importance: High

John,
As we discussed on the phone, the Joint Information Center has been activated by the Governor to handle manage communications involving the Flint Water Emergency. They have asked for a dedicated resource from eMichigan to physically sit in the room today to help with web changes. Please let me know the team member that will you have identified for this role.

They will need to go to 4000 Collins Rd, Lansing, MI. It is a State Police building and has gate access to enter the parking lot. Let the guard know that you are there for the Joint Information Center, if prompted. Enter the building and, once again, let the guard know what you are there for and they will sign you in and direct you to the right location.

When you get close to the building have them call Jen Holton at 517-242-2575. She is expecting the call and will be able to help you get set up. I would recommend having the individual bring their own laptop, I'm not sure what the computer situation is like.

Feel free to call me on my cell, 517-303-4038, if anyone has questions or trouble getting in.

Thanks,

Subject: eMichigan Assisting with Flint Emergency

I wanted to let you all know about the great job eMichigan has done assisting the recently activated Joint Information Center (JIC) with the Flint water emergency. The entire team helped stand up websites from their offices on Wednesday and John Estill spent half the day today at the SEOC. He was such a great help that they have asked him to come back tomorrow, which he is doing.

John Thompson and the entire team at eMichigan is always responsive to the needs of the Governor's Office and all state departments and this is another great example.

Subject: RE: Flint Water Help Today

All,
We are ready to move all of this to a separate site for easier updating. Please mention this to the group. It would be seamless and can be done in a matter of minutes. You can see the site at w3.michigan.gov/flintdrinkingwater. The current redirect will be directed to that site and the site name will be changed to /flintwater. I think this will be a better option than having it inside of DEQ for the time being. Having it there poses issues with permissions as we are not able to provide limited perms to this content without opening up all of DEQ and having DEQ having perms to all of the Flint Water stuff. Let me know if you would like this separate site launched.

All,

I am working at the Joint Information Center in Flint today and I have been tasked with making some improvements to the /flintwater website, with your help, of course. I don't have many details yet, but I do know that they are hoping that we can create a multimedia section where all the photos and video that has been and will be gathered can be posted.

I'm likely to get more information in the next couple hours, but I wanted to get you thinking about our options. Some of the media that we have includes, video and audio PSAs, photos and video from various press events and video tutorials.

I will be in touch soon, but feel free to contact me if you have any questions in the meantime.

Thanks,

Subject: RE: Flint Water Help Today

I now have a little more info on what is needed for the web redesign of the site. They are looking for more of a freshening up of the homepage in general and have asked that I work with you all on it. As you're aware, this site was quickly put together in DEQ and things have been tacked on through the past few weeks. I would like to take a fresh look at the site and re-design based on the content that we now know will be included.

Is there a time this afternoon that I can have a phone conversation with the e-Michigan team? I want to make sure that we put as many resources as necessary to make design this for the long term.

Thanks,

Caleb

Subject: RE: Flint Water Help Today

The Flint Water site is on its own now. The group has been created and admins added are: Christie Christman MSP, Darlene Harris DEQ, Josh Paciorek GOV, Eric Shaw DEQ...

Send me any additional names that need access to the site.

The DEQ Flint Water page remains at http://www.michigan.gov/deg/0,4561,7-135-3313_3675_73946---,00.html but is asks people to visit the new standalone site.

The URL /flintwater goes to the new site.

Anything else, just let us know.

Nick – happy new year. Wanted to give you the heads-up that we are over our monthly quota for Radian6, with 868,000 mentions and our limit is 70,000 mentions per month. We expect to be over the limit for the next few months, as we monitor a national issue involving Flint water (which has been making national news headlines).

We hope this temporary increase is acceptable to you, and once the Flint water issue has been resolved, we will remove that Topic Profile to decrease our monthly volume.

Subject: #FlintWater - approval for DTMB and MSP to use Radian6

Suzanne and Jeff – we received approval from Radian6 to extend our contract to assist DTMB / Michigan State Police and the Governor's Office in utilizing Radian6 to monitor social media during the Flint water issue.

Per the email below, while MEDC's monthly usage is 10 times over the quota, Radian6 has agreed to make a temporary exception.

I will be at the JIC in Flint on Thursday and can further assist in configuring the Radian6 tool, and more.

Nick – happy new year. Wanted to give you the heads-up that we are over our monthly quota for Radian6, with 868,000 mentions and our limit is 70,000 mentions per month. We expect to be over the limit for the next few months, as we monitor a national issue involving Flint water (which has been making national news headlines).

We hope this temporary increase is acceptable to you, and once the Flint water issue has been resolved, we will remove that Topic Profile to decrease our monthly volume.

Hi Chad,

There is a new Customer Success Manager that is assigned to work with you on the Social solution you have as part of the Marketing Cloud. His name is Rob. Things are being aligned and he/we will be in touch in the near term.

For reference, if you don't already have it, Premier Support information can be found here: <http://www.salesforcemarketingcloud.com/support/customer-support/>.

Best regards,

Paul

Hi Nick, Chad,

Please see attached.

Premier Success is an advanced support service. Actually it is this highest available for the Social Solution.

You'll see Platinum also listed in the attachment and that is available for the other components of the Marketing Cloud (email, mobile, etc.).

Hi Eric,

Here's the summary of plans for tonight:

- We met with reps from the House and Senate along with Tiziana's team this morning to put together a plan for handling any issues with the feed. I forwarded you the appt, we will have the conf line open (we'll only call in if we need it). The appointment also contains the key contact numbers.
- Per Chris Christensen, Jeff Pratt from Infrastructure Protection was given a Radian6 account today. He now has access to the Flint Water dashboard.
- John Estill and I now each have our own separate Radian6 accounts. Besides me, John is the only other person on our team that knows how to use Radian6. I will monitor during the evening hours as John has kids activities. If we need to, John can help with monitoring later this evening.
- The precautions we put in place this weekend to defend against the attack on .gov are still in place.

Question for you: How late would you like someone monitoring tonight and at what intervals?

Thanks,
Suzanne Pauley

Suzanne - I created a customized "workspace" in Radian6. The workspace is a real-time feed of social media coverage. There are more than 1,000 #FlintWaterCrisis mentions per hour on Twitter. The dashboard allows admins to flag and categorize content as needed. The dashboard also monitors real-time stories from mainstream news outlets (as long as it's online).

Suzanne, Jeff and John - Login with your credentials here, and let me know if you can access:

Yes. Use the process you / John used to add keywords to the "Michigan01" Topic Profile. They will **automatically** be included in a new Workspace tab I created titled "Other". See screenshot. Let me know if you see that when you log in.

Note, the "Flint Water" workspace is monitoring social and mainstream news for the Flint water emergency. The keywords you/John set up are **more broad**, and include @anoncorruption, @malwareexploits, @newworldhackers, and others.

Does this work?

Subject: Re: Radian6 Post Assignment Alert

Suzanne - I created a customized "workspace" in Radian6. The workspace is a real-time feed of social media coverage. There are more than 1,000 #FlintWaterCrisis mentions per hour on Twitter. The dashboard allows admins to flag and categorize content as needed. The dashboard also monitors real-time stories from mainstream news outlets (as long as it's online).

Suzanne, Jeff and John - Login with your credentials here, and let me know if you can access:

Yes. Use the process you / John used to add keywords to the "Michigan01" Topic Profile. They will **automatically** be included in a new Workspace tab I created titled "Other". See screenshot. Let me know if you see that when you log in.

Note, the "Flint Water" workspace is monitoring social and mainstream news for the Flint water emergency. The keywords you/John set up are **more broad**, and include @anoncorruption, @malwareexploits, @newworldhackers, and others.

Does this work?

Subject: Re: Test Results

I did notice that, they didn't specifically say where they'd want the results posted. I assume it would be the flint water site but if they would like a new site that will take us longer.

Using socrata concerns me a little because we don't have any resources in eMichigan that have in-depth knowledge of the tool. Depending on what was requested, I think we'd need Frank from OGG which might mean that we would not be able to react as quickly as we'd want. I would suggest that we post any results as text first and then work on any improvements such as mapping if requested.

Subject: Re: Test Results

Just read this one-see Keith is in the loop. Will have enterprise access to socrata as well if needed.

On Jan 23, 2016, at 11:59 AM, Pauley, Suzanne (DTMB) <PauleyS@michigan.gov> wrote:

We're happy to help post whatever is needed. I think the info posted on the Flint Water site has usually been vetted through Caleb or another PIO with instructions on placement provided to the eMichigan team. If it's another large file we'll probably want to utilize the Azure servers and would need someone from John McQuaid's team to assist.

We have someone on call today awaiting any requests. Caleb has the direct contact information for the on-call person so that we can get things done very quickly. But definitely let me know if you need my help in any way.

Rodney, All,

I have a meeting set up for 8:00 am Monday morning to meet with the clerk and his IT folks. I would like someone with expertise or knowledge in the area of database information extraction from your shop to meet me there if possible. The Genesee County Clerks office is located at 900 S. Saginaw St. Flint Mi on the second floor of the county administration building.

The software that the Clerk/register of Deeds is using is through a company out of Ohio "Document Technology Systems or DTS". I have called the company's owner Pat Kelly on his cell [REDACTED] and explained in a voicemail message that we need some information on the types of databases they utilize prior to the Monday meeting. John Geason the County Clerk is down with the flu today but is assisting me in getting in contact with this company. Mr. Gleason indicated that he will also assist in connecting us to the new IT Director for the County Monday morning, unfortunately he does not have his cell # to contact him this weekend. As I get more info I will pass it on. When Mr. Kelly returns my call who

should I connect him to so our folks can discuss the databases, extraction etc., i would like to connect the data folks to him yet this weekend if possible.

Your assistance in this matter is greatly appreciated.

Thank you,
Gary Hagler
Law Enforcement Chief, MDNR
Emergency Management Coordinator for MDNR and MDEQ

Subject: RE: Meeting with Genesee county clerk

If they need to know the age of a home and could get us the addresses from the parcel info, we could send them through a Zillow API to get the date built. I think Zillow limits you to 1000 calls a day unless you request a higher number but I'm sure if we contact them to get a higher limit.

Subject: RE: Meeting with Genesee county clerk

All,

I met with Gary Hagler today in Flint to review a potential data opportunity that did not pan out. The source we met with had information but none of it that dated back to the 1950's and was in a format that we could readily use with today's technology. Recognizing that the effort may be to labor intensive Gary is following up on other leads.

While I was there I did see the EOC and meet with members of the plumbers union that were going out to individual houses and installing water filters. Today, they were also going to start collecting information on what type of pipe is being used to bring water into the house.

Although I was unable to help Gary with his request I did have these takeaways from what little I saw while in the field:

The plumbers union was using an iPad app provided by MSP to record data that was collected on paper forms in the field. While trying to demonstrate the app they were unable to locate the first address they tried. Once an address was found they used pick fields to set the values for several questions. Currently the form did not have a place to set which type of water pipe is coming into the home so I suggested that they type into the comments the following string signature until the app can be updated to collect that information:

pipe=C*

*C for copper, G for galvanized, L for lead, U for unknown

This will make it possible to perform an in string search for "pipe=" and then take the next character to determine what pipe information there is.

I am uncertain of the address source being used within the app although if I had to guess I would say it was a parcel layer. I would also suggest that if that is the case then the addresses assigned to those parcels should be passed through an address standardizer and validation such as SAP (which is a shared service from CSS and that team is willing to run the Flint data). Running those addresses through SAP should improve the quality by standardizing the address, updating street name and postal code changes and flagging any addresses that are non-deliverable.

The plumbers also indicated that apprentices were coming every day now to volunteer time as part of their career training and that they also expect many of their sister unions to volunteer time as well. Which will mean an increase in the amount of houses being processed and data having to be entered. My concern here is that there is so much manual reentry of collected paper data that the process will bog down. I see three scenarios in which this problem could be alleviated:

- Provide more devices to reenter the data (Likely the easiest solution to implement, keeps the point of entry to a select few that know how to work the devices and minimizes device costs)

- Provide even more devices (or make the app something that can be downloaded on a personal device) to take in the field to collect the data (More equipment costs and more people to train, no idea of what security issues there maybe if personal devices are used)
- Implement a better paper process to collect the information like the way multiple choice tests are handled. Students use a pencil to fill in the circle of the possible choices they could answer and then the form is scanned. There are already iPad apps that can do this sort of thing. (The user base is familiar with a paper process, their already using one, and blotting out choice boxes on a structured form is more efficient than hand writing the values. The challenge here would be to implement the scanning on the iPad, perhaps a university or college has an option)

Please note that these are my few observations from a very narrow perspective. I am not aware of what all is and has been going on between the various agencies and EOCs but I thought I would provide these here in hopes that it helps. Please let me know if there is something further I can assist with.

Flint lead levels

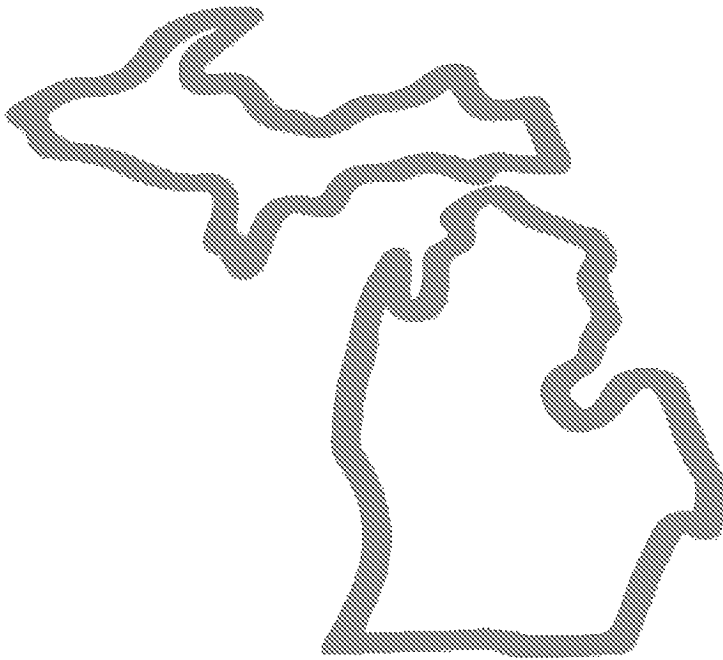

www.google.com

Address testing for lead levels above the 15 ppb federal action level in Flint per a Jan. 31, 2016, data release from the state of Michigan.

Cyber Summary

State of Michigan

February 5, 2016

Summary of Recent Cyber Events

Prepared by DTMB, MSP and the National Guard

February 5, 2016

SUMMARY OF EVENTS TO DATE

January 16, 2016

Michigan.gov

At 5:00PM, Michigan.gov began to experience slowness in web page load time. Approximately 10 minutes later the websites were inaccessible. IBM determined that the outage was caused of a denial of service using a UDP flood attack. The IBM team was able to implement a mitigation strategy to stop the attack and at 6:24PM the michigan.gov websites were again available to the public.

At approximately 7:30PM, a new attack was initiated on the michigan.gov environment. That attack focused on the DNS servers and as a result impacted not only Michigan.gov websites but other IBM customers as well. IBM was able to mitigate the attack and the websites were again available at 7:53PM.

A group identifying themselves as @NewWorldHacking (on Twitter) took credit for the attack on Michigan.gov.

City of Flint Website

During the course of the evening, the response team was also informed that the City of Flint website (cityofflint.com) was also taken offline as a result of a DDoS attack. The site remained offline for several hours. DTMB made contact with the City of Flint to offer assistance.

A group identifying themselves as @NewWorldHacking (on Twitter) took credit for the attack on the City of Flint.

State Network

Shortly after the michigan.gov websites were restored, the State of Michigan was notified by our internet service providers (AT&T) that a DDoS attempt was made against our SOM DTMB servers in the external DMZ. Once detected, this attack was blocked at the ISP and the Michigan Cyber Security team saw no signs of any other types of attacks.

January 17, 2016

Hurley Medical Center

An exploit in the Hurley Medical Center IT system was discovered on January 17, 2016. Systems were disconnected from the internet for 5 days.

City of Flint Website

The City of Flint website (cityofflint.com) was taken offline as a result of a DDoS attack.

January 20, 2016

Communications

A conversation was had with Joe Gasper regarding cyber security steps for the Governor and his family.

Social Media

Anonymous released video threatening Michigan government:

<https://www.youtube.com/watch?v=zXQfsURnEOw>

January 21, 2016

Communications

Michigan Cyber Security had a conversation with Zac Anthony regarding Wi-Fi security for Governor's residence

January 22, 2016

Michigan.gov

At 11:28PM Michigan.gov websites were inaccessible as a result of DDoS attack. The IBM team responded with mitigation and at 11:56PM access to michigan.gov was restored. The security team noted that the type of attack was different from last weekend's. The attack was TCP based with 150mb+ of malicious traffic. The twitter handle that posted the initial #offline was [@SOBL1N](#). IBM reported that they were still seeing attempts to DDoS Michigan.gov websites but were able to block them.

Hurley Medical Center

Hurley Medical Center began the recovery stage on January 22, 2016 however systems are possibly still infected.

Communications

An email sent from CSO to CSO Kitchen Cabinet members informing them of current attacks against the State of Michigan as well as potential targets indicated in posts within #OpYouDrinkThat for January 25, 2016.

Social Media

TruthSec released a video: <https://www.youtube.com/watch?v=PPaelFiwDWs>

January 23, 2016

Communications

DTMB Communications sent an email message to all Agency Directors and PIO's to make them aware of the recent events and to remind them of proper cyber hygiene.

Kerr_realestate.com was contacted and advised of possible DDOS targeting of their website.

Reinhartrealtors.com was contacted and advised of possible DDOS targeting of their website.

MSP has established communication with the FBI. MC3 databases and resources are being used for investigative leads and attribution purposes.

National Guard members were brought onboard to assist with investigative needs.

The MSP team is working to develop means of communication that are not tied to the State of Michigan system. These would be used for backup purposes. There was discussion of utilizing the HSN portal.

Hurley Medical Center

A meeting was held with key contact at Hurley Medical Center regarding their systems being attacked. The participants discussed sharing data/logs however Hurley's legal team will need to determine if that is possible. MSP feels that Hurley's data could be very valuable if they are authorized to share it.

Social Media

AT 4:20 p.m. information was posted on Twitter and Instagram stating "We will be releasing The Doxs Today just prepping up." The information was removed from Instagram but was captured in a screen shot.

MSP analysts monitoring an internet relay channel (IRC chat room) reported that a threat was made against the flint water department. Additionally, attempts to DDoS Michigan.gov were also discussed. The methods used were easily defended by common protections that were already implemented on the servers.

Twitter accounts using the hashtag 'anonymous' posted a ghostbin file listing the following targets:

- www.cityofflint.com
- www.michigan.gov
- [Mdotnetpublic.state.mi.us/drive](https://mdotnetpublic.state.mi.us/drive)
- Kerr-realestate.com
- Reinhartrealtors.com
- www.baker.edu

January 25, 2016

Communications

DTMB Communications sent an email to all State Employees with reminders on proper cyber hygiene.

Social Media

TruthSec released a second video https://www.youtube.com/watch?v=33EDI_d1WlQ

Michigan Cyber Security - MiSOC monitored #OpFlint channel in AnonOps IRC chatroom for threats described in #OpYouDrinkThat

'Doxing' information was posted on Instagram by @Anonymousnyc59. Information posted on Instagram and within the ghostbin file referenced the following members of the first family:

- Governor Rick Snyder
- Sue Snyder
- Susan Snyder
- Ren Snyder
- Jeffrey Snyder
- Kelsey Snyder
- Melissa Snyder
- Carrie Snyder
- Helen Snyder
- Allison Scott
- Kathleen Kerr
- Sheila Snyder

Additionally, the following individuals were also referenced in the ghostbin file:

- Catherine E Croft
- Elizabeth Ann Croft
- Howard D Croft
- Sara Beth Wurfel
- Bradley James Wufel
- Dr. Edward J. Kurtz

- Madonna Therese Krutz
- Krista Marie Mcguire
- Edward Kurtz
- Darnell F Earley
- Dayne Allen Walling

January 26, 2016

Communications

Joe Gasper, from the Governor's detail, will notify members of the first family that 'doxing' information was posted on social media.

MSP will notify all other individuals referenced in the 'doxing' posts.

Social Media

A pastebin file was posted with email addresses that were found by crawling/scraping the Michigan.gov websites. These email addresses are all publically available. The file can be found at <http://pastebin.com/yuCTiz5R>.

A twitter post by @C1TYofFL1NT referenced hackers gaining access to the Governor's email server. The content of the post said "I'm not saying i do BUT what they already had @onetoughnerd entire private E-mail server mirrored and being shared via TORRENT? #OpFlint". The tweet can be found at <https://twitter.com/C1TYofFL1NT/status/692043346190163968>

January 27, 2016

Michigan.gov

At 5:47PM the Michigan.gov websites were rendered inaccessible due to a SYN flood DDoS attack. IBM noted there was 30mb of traffic. Mitigation was put in place and access to the websites was restored at 6:15PM. At 6:25PM the Michigan.gov DNS servers were attacked with 35GB of UDP traffic. A new mitigation was put into place and the sites were accessible as of 6:26PM.

Social Media

A twitter post by @AnonCorruption referenced "Michigan.gov #Down" shortly after the attacks began.

An article regarding the Michigan.gov attack was posted at <http://www.ibtimes.com/flint-water-crisis-update-anonymous-hacks-michigan-website-online-hacking-collective-2283247>. The author attributed the attacks to anonymous. The link to the article was tweeted by @AnonIntelGroup.

January 28, 2016

Communications

MC3 has reached out to private partners to make them aware of the recent cyber events so that they could verify their infrastructure was not impacted.

January 29, 2016

Communications

The NYTimes.com published an article titled “Michigan Gave State Employees Purified Water as It Denied Crisis, Emails Show.” That displayed a number of state employee’s full name and signatures.

January 30, 2016

Michigan.gov

Michigan.gov was taken offline by a SYN Flood DDoS attack at approximately 7:31AM. The initial target appeared to be [Michigan.org](#) which was also taken offline. Once [Michigan.org](#) was down, [Michigan.gov](#) was attacked. Mitigation was put in place and the sites were operating normally again at 7:43AM.

At 12:12PM a new attack was initiation against Michigan.gov. The mitigation that IBM had in place absorbed the attack and there was no end user impact.

Social Media

A twitter post by @AnonCorruption referenced “Michigan.gov #Down” shortly after the attacks began. @AnonCorruption used #opFlint in the post.

January 31, 2016

Social Media

Anonymous RedCult posted a YouTube video and used #OpPoisonedH2O. The video can be viewed at https://www.youtube.com/watch?v=MN9oC_2oDOA

February 1, 2016

Social Media

@AnonIntelGroup posted a YouTube video titled "Anonymous Resistance - #OpFlint." This video is similar to the one posted on January 31, 2016, by Anonymous RedCult. Additional content stated that cyber-attacks would occur against the Department of Human Services if children were removed from their homes due to unpaid water bills. The video can be viewed at <https://www.youtube.com/watch?v=MKVZgll6Z3s>

MITIGATION AND ONGOING OPERATIONS

Mitigation and Precautionary Steps Taken

Cyber Security

IBM and the State of Michigan ISP have filtering in place to help mitigate DDoS attempts. Additionally, on 01/01/2016 IBM, in partnership with DTMB, implemented a DDoS protection service (Akamai Kona) for the Michigan.gov environment in Boulder, CO.

MSP received the detailed information on the malware that was installed on the Hurley Medical Center servers. MSP is analyzing the malware to gain additional information. MSP also passed the information to the Michigan Cyber Security team so that they could verify that the malware didn't exist on State of Michigan servers.

Joe Gasper and Zac Anthony were also notified that DTMB and MSP are encouraging all wifi access points used in the home of any doxed member to be changed to have the SSID anonymized and hidden in addition to changing the password.

Physical Security

The following actions have been taken regarding the physical security of State of Michigan and City of Flint assets:

- 1/5/2016 SEOC Activated Collins Road
- 1/13/2016 1 – Guard for the Flint State Office Building
- 1/13/2016 1 - Guard in support of protest activity at the Romney

- 1/14/2016 Design Flint Water Response Team ID Card
- 1/15/2016 Print Flint Water Response Team ID Cards
- 1/16/2016 Print Flint Water Response Team ID Cards
- 1/17/2016 1 -Armed security guard & Marked Vehicle at Flint warehouse
- 1/17/2016 OIP Analyst - Overtime ECC & Social monitoring
- 1/18/2016 Print Flint Water Response Team ID Cards
- 1/18/2016 Pickup & Deliver Grainger Order of hand warmers for volunteers
- 1/22/2016 3 Guard Con Hall added at the request of DEQ
- 1/22/2016 Extend hours for Capital Complex Rover
- 1/25/2016 11- Guards in support of DPS vs. DFT COA Hearing at Cadillac Place
- 1/25/2016 1 - Guard in support of AG Press Conference

Ongoing Operations

Communications

The Michigan Cyber Disruption Response Plan is being referenced to plan and coordinate all activities and communication.

The DTMB, MSP and National Guard teams will continue to stay in communication through emails and regular conference calls.

Social Media

Office of Infrastructure Protection in collaboration with MSP and eMichigan are monitoring social media to gather information on potential targets. Per MSP, the following social media accounts are closely monitored:

Hashtag	Twitter Users	Instagram Users

WHAT TO EXPECT AND RECOMMENDATIONS

What to Expect

In the near future, we can expect to see cyber events similar to those that occurred in Ferguson, Missouri. The likely scenarios are listed below:

1. DDoS attacks against the cities servers, websites and police website (Some were full throttle, and some utilized slow Layer 7 attacks to keep traffic under the radar with just enough traffic to max out the target machine's resources)
2. Doxing of Police Chief
3. City and police department servers taken offline
4. Hours of police dispatch tapes were accessed and released on YouTube. Announcement made on @TheAnonMessage Twitter account
5. An insider and Anonymous supporter was identified (had a Guy Fawkes mask)
6. Nefarious social media tactics such as creating dummy Facebook accounts to friend real individuals associated with the city.
7. Duration of Op was 3 ½ months, which came in waves depending on what key factors were happening since the shooting.

We expect this to be an active indecent for as long as it's in the media. Hacktivist campaigns are fueled by the social event to which they are tied. As experienced in the attacks associated to the Police shootings in Ferguson MO., the attacks on the City/State and associated personnel last for about as long as the media paid attention to the issue (approximately 4 months).

On a scale of 1-10 with 1 being a nuisance and 10 being a serious threat, our experts are telling us we're currently at a 7 or 8.

Recommendations

DTMB, Michigan State Police, National Guard and our private partners recommend that the first family discontinue use of all social media (Twitter, Facebook, Instagram, etc.) until this time of crisis has passed.

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership
FROM: DTMB Procurement
SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:

Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- o Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- o Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Importance: High

Morning all,

We need to supply the director's office a list of names of any staff who would have been a part of the Flint Water response. Anything in the past and current efforts are important to know. In the emails from Brom it is requested that we give this information to them today by noon. To coordinate this effort can you please reply to me your area's list of names so that I can compile one response.

Suzanne, I am including John and Yvonne on this so that they can respond while you are away at training.

Please let me know if you have any questions.

Thank you,

Aimee

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Suzanne,

I heard on the news this morning that Michael Moore is coordinating a protest/demonstration about the governor's handling of the Flint water crisis today...it is supposedly going to be centered at "the governor's office across from the capitol", so I assume Romney. I've told my local team to keep their personal safety paramount coming and going. Also, we're applying extra monitoring of the sites today in case Anon picks up the protest via media and uses it as an opportunity to try to attack the sites.

Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

State of the State Address Meeting

Meeting Minutes

Date: January 19th, 2016

Time: 11:30 am – 12:15 pm

Location: Teleconference: 1-877-336-1829; Access Code: 9013248 - Nancy Host

Distribution and Attendee List: (X indicates that the member was present; T indicates present via teleconference, A indicates absent)

X	Tiziana Galeazzi	X	Narayan Sivaraman
X	Nancy Palmateer		David Bates
T	Jack Harris	T	Dave Wilson
T	Mike Derocher	T	John Thompson
T	Mike Wagner	T	Greg Bensinger
	D. Smith		David Koskinen
T	Amy Briggs	X	Carl Slempp
T	Cathy Hunter	T	Richard Reasner
T	Charlotte Allen		
T	Suzanne Pauley		

Purpose: Due to the recent DDOS attacks against Michigan.gov and in light of the Flint Water Emergency, a short meeting needs to be held to discuss a plan of action to ensure the streaming of the Governor's State of the State Address occurs uninterrupted.

Agenda

#	Item	Presenter
1.	Review current streaming support plan for State of the State	Tiziana/Nancy
2.	Agree on process should problem arise with the stream	All
3.	Additional thoughts	All

Main Points, Discussion/Conclusion, Decisions

SoS Streaming

- What has been done to ensure capacity will not be an issue? Do we have sufficient capacity?
 - Primary feed from the House, backup feed from Senate**
 - Support call placed and Leightronix states that capacity should be adequate**
 - 4 feeds out, 2 House, 2 Senate, unlimited connections, 10Gb Internet, 2Gb internal, 700Mb last year.**
- Will there be Gov Website on-site support available and ready should there be problems with the stream?

State of the State Address Meeting

Meeting Minutes

Date: January 19th, 2016

Time: 11:30 am – 12:15 pm

Location: Teleconference: 1-877-336-1829; Access Code: 9013248 - Nancy Host

2.1. eMichigan will have on-call tech on standby

2.2. Link to be embedded on Gov website later today

3. Will there be House Website on-site support available and ready should there be problems with the stream?
 - 3.1. **Senate support individual will contact Leightronix should there be an issue with the feed/stream.**
4. If there are problems is there a failover plan? **YES**
 - 4.1. If there is a plan it is automatic or manual? **Manual vis eMichigan Team**
 - 4.2. Failover between the House and the Senate systems possible? **YES, If required Senate is backup stream.**
5. What if anything does the vendor (Leightronix) have in place? **They are confident that the stream capacity is adequate. Senate contacts to call Leightronix is issues arise. One feed to Leightronix, guarantee the stream.**
6. Do we have a call-list available should there be issues and we need to initiate an issue/problem management plan? **See Below**
 - 6.1. **Support Group Names and Contact Numbers**
 - 6.1.1. **IF THERE ARE ANY ISSUES CALL THE CONFERENCE LINE FIRST**
 - 6.1.1.1. **Teleconference: 1-877-336-1829; Access Code: 9013248**
 - 6.1.2. **DTMB**
 - 6.1.2.1. eMichigan – 517.243.1380 – Rich Peterson
 - 6.1.2.2. Cyber Security – Group number – 517.335.1722 or 517.243.1640
 - 6.1.2.3. Telecom – Jay Salmon - 517.284.7364
 - 6.1.2.4. Agency Services –
 - 6.1.2.4.1. Tiziana Galeazzi – 517.749.9496
 - 6.1.2.4.2. Nancy Palmateer - 517.282.7593
 - 6.1.2.4.3. Narayan Sivaraman – 517.316.5346
 - 6.1.2.4.4. Carl Slemper – 517.331.7117
 - 6.1.2.5. CTO Office - Jack Harris – 517.242.0942
 - 6.1.3. **House**
 - 6.1.3.1. Cathy Hunter and Greg Bensinger – 517.376.9611
 - 6.1.4. **Senate**
 - 6.1.4.1. Mike Desrochers - 517.373.1928
 - 6.1.5. **Legislators**
 - 6.1.5.1. Mike Wagner - 517.373.5229 Point of contact with Leightronix

State of the State Address Meeting

Meeting Minutes

Date: January 19th, 2016

Time: 11:30 am – 12:15 pm

Location: Teleconference: 1-877-336-1829; Access Code: 9013248 - Nancy Host

Action Items

- Nancy to open Conference Bridge to report and remediate issues that may arise. Same number/code as above.
- John to talk to Josh regarding the MP4 file for retention and YouTube.

Greetings Josh,

I am not sure how comfortable you are with editing the content but those blocks are set up so that you can add content to the Main body of them and the Image will become a link to the page.

I cc'd rick so you have his email handy. On that note -- I think you are able to edit the content without an issue and then clear the body cache for that page once it looks as you would like. If you are in w3.mi.gov mode you would be able to readily take care of that.

With that said -- Rick is on call and would be ready and able to help you out.

Let me know if you have any questions or want to run through some aspects ahead of time to go over some questions or concerns.

Kind Regards,
Joe Seckelman

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Hey John----

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.
To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Greetings Josh,

I am not sure how comfortable you are with editing the content but those blocks are set up so that you can add content to the Main body of them and the Image will become a link to the page.

I cc'd Rick so you have his email handy. On that note -- I think you are able to edit the content without an issue and then clear the body cache for that page once it looks as you would like. If you are in w3.mi.gov mode you would be able to readily take care of that.

With that said -- Rick is on call and would be ready and able to help you out.

Let me know if you have any questions or want to run through some aspects ahead of time to go over some questions or concerns.

Kind Regards,
Joe Seckelman

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Josh

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

- 1: the Detroit Public School link is that meant to be this one...
http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.
- 2: What type of content would the key speech page have on it?
- 3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Hey Joe ---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?
3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: Re: State of the State 2016 preview

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey John—

The file size will be right under 31 MB.

I talked with my bosses about breaking up the file size, but there is a legal document that needs to go first in the PDF, and they said for legal reasons, they want to do what we can to keep the file as one.

I know that makes everything more difficult and I'm sorry. I think if we start experiencing problems, let's reevaluate.

Thanks for all of your help the last couple of days!

Josh

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Just a side note about shared drives. I'm pretty sure the Gov's Office LAN drive is separated from the rest of the network.

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Hey John----

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea--- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though – some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Hey Joe—

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Josh

Hey John---

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,

Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.

I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Hey Joe ----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM

tonight after Governor Snyder begins his 2016 State of the State address”?

I’d like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/hiv.asp feed doesn’t work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Josh

Greetings Josh,

That shouldn't be a problem. I am working on some of those changes and going to move the Preview/dev elements to the live page and when they are all in place I'll clear the cache on that page so that the page is live.

Would you like me to send you a quick email before I do the move and push it live so it can get a final proof? We will naturally be testing it out here to ensure the feed and such look good as well.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey John---

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks--- we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea--- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.

I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---.00.html

If you could test the video player from your phone that would be nice.
To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks---we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.
I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Hey Joe ----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice. To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe----

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: Re: State of the State 2016 preview

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.

I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe—

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for

more information about improving the water situation in Flint.

- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice. To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe----

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Hey Joe—

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea— aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.
I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary – does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Hey Joe—

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = [Click here for](#)

more information about improving the water situation in Flint.

- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice. To note: the house.michigan.gov/hiv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe---

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too -- similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.

I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page: http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.
To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings,

Yes I believe some of those things are getting discussed but wanted to know about where the link on the /Snyder page would be or if you already have a piece of content in the CMA that is going to be the link to the file.

We additionally, have a backup option in the works as well to have it stored locally in the cma.

Let me know your thoughts on where to put the link on the Snyder page if you do not already have a place setup.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128-...00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greeting Josh,

We are needing to know where you want the link for the file to be placed or if you have a place in mind already ready and only need the path to it.

I will be here until 420pm and after that it will be Rick who would add the link on the Snyder home page.

Let us know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe—

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128-...00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings,

Sounds good. We'll send the link to you once we have it. If you get the press release in now. The scheduled cache clear will automatically set things live or you can do a manual cache clear.

You can contact Rick through the on-call number if you need any help and have any questions or concerns.

I will be here until 420p, but after that Rick would be the best to contact.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe---

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey John---

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts -- I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475---,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure

that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.

- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

Looks good. The page is Live but nothing is linking to it so that I can tell. So once 6pm rolls around the cache will clear and the press release will be visible.

Additionally, The speech mentioned the link would be visible from the mi.gov/Snyder so would you like to get a link on there as well?

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe---

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: Re: State of the State 2016 preview

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

We are checking on that status and once we have the path to link to it we will give it to you.

Two related things that are important related to said link:

1: The team here has requested that you add this disclaimer line next to the link to let visitors know they are downloading a Large file and it could take some time.

“Note: Due to its size, this document may take extra time to download.”

2: Test the link in a separate browser beforehand to be sure it works as you may or may not need the full <http://www.RESTOFTHEPATH...> Sort of thing.

Im about to leave so at this point if you have any additional questions or updates email John Thompson or call rick on the on call number.

Have a great day.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That shouldn't be a problem. I am working on some of those changes and going to move the Preview/dev elements to the live page and when they are all in place I'll clear the cache on that page so that the page is live.

Would you like me to send you a quick email before I do the move and push it live so it can get a final proof? We will naturally be testing it out here to ensure the feed and such look good as well.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey John----

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Hi Josh,

Have you picked a time when you want this page and information to go live?

Thanks,
John Thompson

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

<EstillJ@michigan.gov>

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe—

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- aan we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth. I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Hey Joe----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128-...00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

We are checking on that status and once we have the path to link to it we will give it to you.

Two related things that are important related to said link:

1: The team here has requested that you add this disclaimer line next to the link to let visitors know they are downloading a Large file and it could take some time.

"Note: Due to its size, this document may take extra time to download."

2: Test the link in a separate browser beforehand to be sure it works as you may or may not need the full

<http://www.RESTOFTHEPATH...> Sort of thing.

Im about to leave so at this point if you have any additional questions or updates email John Thompson or call rick on the on call number.

Have a great day.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given

the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

One more thing -- the text in those three smaller boxes refers to a Click here sort of link when the link won't be active until 7. Would you mind if I edit out those click here link text while its live now so that it doesn't confuse visitors?

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Looks great, Joel

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Josh

Hey John---

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Greetings Josh,

I am curious about a couple parts.

- 1: the Detroit Public School link is that meant to be this one...
http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.
- 2: What type of content would the key speech page have on it?
- 3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.
I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments

- a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there. Attached is a screen shot of the look.
Link to the page:
http://www.michigan.gov/snyder/0,4668,7-277-74857_75128-...,00.html

If you could test the video player from your phone that would be nice.
To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

It's in this drive: S:\COMMON\01202015 Gov Emails

Let me know if you do have access. If not, we can use a thumb drive. The file is still not quite ready. I'll email you ASAP when it is. Would it be easier if I called your desk phone?

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,

Joe Seckelman

Looks great, Joe!

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

<EstillJ@michigan.gov>

Subject: RE: State of the State 2016 preview

Hey Joe----

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

1: the Detroit Public School link is that meant to be this one...

http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.

2: What type of content would the key speech page have on it?

3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Subject: RE: State of the State 2016 preview

Hey Joe----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: RE: State of the State 2016 preview

Thanks, Joe.

Heres the content we would like the emails to be at the bottom of: http://w3.michigan.gov/snyder/0,4668,7-277-57577_57657-374050---,00.html

From: Seckelman, Joe (DTMB)

Sent: Wednesday, January 20, 2016 3:55 PM

To: Paciorek, Josh (GOV) <Paciorekj@michigan.gov>

Cc: Thompson, John (DTMB) <thompsonj@michigan.gov>; Peterson, Rick (DTMB) <petersonr@michigan.gov>

Subject: RE: State of the State 2016 preview

Greetings,

Sounds good. We'll send the link to you once we have it. If you get the press release in now. The scheduled cache clear will automatically set things live or you can do a manual cache clear.

You can contact Rick through the on-call number if you need any help and have any questions or concerns.

I will be here until 420p, but after that Rick would be the best to contact.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greeting Josh,

We are needing to know where you want the link for the file to be placed or if you have a place in mind already ready and only need the path to it.

I will be here until 420pm and after that it will be Rick who would add the link on the Snyder home page.

Let us know your thoughts.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe---

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Josh

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.
Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Hey John—

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Subject: RE: State of the State 2016 preview

Greetings,

- 1:
That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.
- 2:
Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.
- 3:
I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

- 1: the Detroit Public School link is that meant to be this one...
http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.
- 2: What type of content would the key speech page have on it?
- 3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.
I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Subject: RE: State of the State 2016 preview

Hey Joe----

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments
 - a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Subject: State of the State 2016 preview

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there.

Attached is a screen shot of the look.

Link to the page:

http://www.michigan.gov/snyder/0,4668,7-277-74857_75128---,00.html

If you could test the video player from your phone that would be nice.

To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

The link just came in.

<http://somsprod2govm001.usgovcloudapp.net/files/snyder%20emails.pdf>

Again please try this out on your end just to be double/triple sure its good and the file comes up... You will notice it takes a few to load which is why the disclaimer was requested to be put with the link.

I will add this link to the Snyder home page really fast. And send you an quick email when that is up
So that you can then do what you need to do on your end for the press release and then clear the cache.

Let John Thompson or Rick know if you have any questions.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Greetings Josh,

We are checking on that status and once we have the path to link to it we will give it to you.

Two related things that are important related to said link:

1: The team here has requested that you add this disclaimer line next to the link to let visitors know they are downloading a Large file and it could take some time.

"Note: Due to its size, this document may take extra time to download."

2: Test the link in a separate browser beforehand to be sure it works as you may or may not need the full

<http://www.RESTOFTHEPATH...> Sort of thing.

Im about to leave so at this point if you have any additional questions or updates email John Thompson or call rick on the on call number.

Have a great day.

Kind Regards,
Joe Seckelman

Greetings Josh,

That sounds good. We are thinking of a medium to put the file on as the Gov laptops and bit locker create a built in encryption when using the thumb drives so we would need to be able to decrypt it on our side.

Let me discuss a few options with rick and get back to you asap.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hi Josh,

Can we have you guys break the file up into files that are under 10MB a piece. If we place one 38MB file on the site and a lot of people try downloading it at the same time it will bring the portal to a crawl and the file will eventually become unavailable because too many people are trying to access that one file.

If we break it up into to smaller files it will spread the load across multiple files and lessen the risk.

Thanks,
John Thompson

Hi Joe—

It's a PDF and we'd like to keep it as a PDF just because it's highly anticipated and people should be able to access it easily.

We're still waiting for a couple of pages to be added. It is on the shared drive on the network, so if you can access that, you can grab it off there. I'll let you know when it is finished. We would like it to be an asset on a statement that will be posting to the mi.gov/Snyder site shortly.

Thanks!

Greetings,

What is the file type? Ideally this would be compressed into a ZIP if possible.

Where is this currently located? On the network where we can get it? OR maybe we can bring a flash drive down to you to get it and then we can manually upload it to the CMA. This is a special case given

the file size and the inability to email that size of a file and the fact that because its size we would need to manually upload this to a media server.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Looks great, Joel

For the text under "State of the State," can you change it to be:

"At 7 PM on January 19, 2016, Governor Snyder will deliver his sixth State of the State address. Watch the speech live here as the Governor addresses how—together-- Michigan can solve its most significant challenges.

Join the conversation online using the hashtag #MISOTS16."

Then I'm good with making it Live. Thank you!

Josh

Subject: RE: State of the State 2016 preview

Hey John---

Can we make it live around 1? Or early this afternoon? It won't have all of the content up yet for the pages (that stuff will be added at 7), but it would still be nice for it to be live soon to show the livestream video player.

Above or below the video player, can we also add in small bolded font: "This video is provided by the Michigan House of Representatives. It is also being broadcasted on public television."

Thanks!

Josh

Hi Josh,

Have you picked a time when you want this page and information to go live?

Thanks,
John Thompson

Thanks, Joe!

- 1) Yes- I will add the pages content between 6 and 7 and then clear the body cache for that page and the three pages.
- 2) Thanks—we can chat tomorrow when we're ready to embed the YouTube video
- 3) Thanks!

So what time do you think this updated page will be able to go live today?

Subject: RE: State of the State 2016 preview

Greetings,

1:

That sounds okay. So to confirm then, the three boxes will be links to the pages content Page which you will add between 6 and 7 and then clear the body cache for that page and the three pages that it would be getting linked to.

2:

Okay that sounds good too...for the Youtube there are some things we may wanna add to made sure it looks nice on a smaller device too – similar to how Im making the feed resize nicely with the right proportions.

3:

I will add that bit of text on it as well below the boxes to indicate when the link is active and usable.

Let me know your thoughts – I will be in and out of meetings so my response time to emails maybe delayed but this is the top priority today.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

- 1) Those three links should go to new pages. All that will be on the new pages is text with a graphic at the top.
- 2) The key speech page will have tonight just key quotes from the Governor's speech. Tomorrow, we will be adding YouTube videos of key quotes from his speech.
- 3) Good idea-- can we add something like "Click here during the Governor's speech for more information." Or something like that?

Thanks

Josh

Subject: RE: State of the State 2016 preview

Greetings Josh,

I am curious about a couple parts.

- 1: the Detroit Public School link is that meant to be this one...
http://www.michigan.gov/snyder/0,4668,7-277-57577_60279-353475--,00.html if not let me know what link you are thinking of.
- 2: What type of content would the key speech page have on it?
- 3: I have a method for you to edit those content items in the boxes after 6pm and then once your ready you would clear the cache on that pages body. I would say if this is going to be the plan though -- some additional text go up saying the links are not active until 7pm... or something to that effect and then when you are done and ready you can remove that little bit of text and clear the cache on the page.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

Subject: Re: State of the State 2016 preview

Hey Joe--

If those boxes could not be links before 7 PM, that would be great. And then at 7 pm we would turn those into links, which would lead to a DPS page, Flint page, and speech summary.

Would there be a way for me to add our content though before 7 PM, so that at 7 the links would be set to go live?

Best

Josh

Greetings Josh,

Thanks for the updates. I am just getting in this morning and will start looking at the email more in depth.
I may have some quick questions about your updates.

Really quick though, the three boxes below they could not be links if you don't want them to be and then at 7pm we turn them into links? And on that thread the links those would be going to the Flint water page, DPS, and a new page that is the speech summary -- does that sound right?

Let me know your thoughts. And talk to you soon.

Kind Regards,
Joe Seckelman

Subject: RE: State of the State 2016 preview

Hey Joe---

Thank you for your help with this site.

It's going to be a little hectic with this site and getting it ready for tomorrow, so I want to apologize in advance if we need last minute changes.

We want the updated site live at 6 PM tomorrow.

We have new graphics for those three boxes. They're attached. The order should be 1) Flint 2) Detroit Schools 3) Key Speech Moments

For the text under those boxes:

- 1) Flint
 - a. We are committed to ensuring every Flint resident has access to clean and safe drinking water. = Click here for more information about improving the water situation in Flint.
- 2) Detroit schools
 - a. Detroit Public Schools are in need of transformational changes to ensure that our students are prepared for a successful and rewarding life. Click here for more information about fixing DPS.
- 3) Key speech moments

- a. Click here for key moments from Governor Snyder's sixth State of the State address

When visitors click on those boxes, when it takes them to the new page, for the time being, can the new page just say "Check back here at 7 PM tonight after Governor Snyder begins his 2016 State of the State address"?

I'd like to populate our documents and information onto the site between 6 and 7 pm tomorrow, and then when the speech starts at 7 PM, we can make everything live.

Also, we will be directing people to watch the live stream at www.mi.gov/StateOfTheState. So thank you for helping us get the livestream up!

Please let me know if you have questions.

Thank you again for your help!

Josh

Greetings Josh Paciorek,

My name is Joe Seckelman and new with the eMichigan Team. I have set up a Preview page for the State of the state this year with the video feed right in there. Attached is a screen shot of the look.
Link to the page:
http://www.michigan.gov/snyder/0,4668,7-277-74857_75128-...,00.html

If you could test the video player from your phone that would be nice.
To note: the house.michigan.gov/htv.asp feed doesn't work with windows phones.

Let me know your thoughts.

Kind Regards,
Joe Seckelman

I think the JIC has tried hard to keep calls funneling into 2-1-1 to be distributed so that we aren't confusing people by providing them with multiple phone numbers. I defer to the JIC Manager for their input. If anything I would recommend we post a description of the number along with the number itself, rather than the link to their release.

Subject: More for Flintwater website

Importance: High

Rick,

Another item:

- Rename the 2-1-1 section of the homepage "Who to Call."
- The existing language regarding 2-1-1 can remain there.
- Under that, leave same space and then include the following language: Emergencies bring out strong emotions. The Disaster Distress Helpline, 1-800-985-5990, can provide immediate confidential counseling to anyone who needs help. The Helpline is a 24 hours-a-day, seven-days-a-week resource provided by the Substance Abuse and Mental Health Services Administration.

Do you have the name of someone who is working on the Flint water site for eMichigan that I can deal with directly? If possible, we want to get this and the previous item regarding the link to the new helpforflint.com website up today, along with one or two other items that I'll email about shortly

Please use the below language – I'm fine with Angela's suggestion for where to place it. Thanks!

Emergencies bring out strong emotions. The Disaster Distress Helpline, 1-800-985-5990, can provide immediate confidential counseling to anyone who needs help. The Helpline is a 24 hours-a-day, seven-days-a-week resource provided by the Substance Abuse and Mental Health Services Administration.

Subject: RE: SAMHSA Press Release

I think the JIC has tried hard to keep calls funneling into 2-1-1 to be distributed so that we aren't confusing people by providing them with multiple phone numbers. I defer to the JIC Manager for their input. If anything I would recommend we post a description of the number along with the number itself, rather than the link to their release.

DONATION GUIDELINES

Guidelines for Water Donation Drives

Thank you for your willingness to organize a water donation drive for the residents of Flint, Mich. To adhere to safety codes, all donations need to observe the following guidelines, which allow volunteers to transport the water safely and efficiently.

The following items are acceptable:

- Full cases of commercially packaged water (no loose bottles)
- Commercially sealed gallon (or larger) containers of water
- All containers must have an expiration date at least 6 months in the future

The following items will NOT be accepted:

- Canned water
- Containers with open/broken seals
- Carbonated water
- Flavored water
- Water past its expiration date

Donations should be delivered to:

- Donations of 100 cases or less:
 - Catholic Charities Center for Hope, 517 E. Fifth Ave, Flint
Monday – Friday, 9 a.m. – 4 p.m.
For deliveries outside these hours, please call 810-232-9950, ext.325 to make arrangements for deliveries.
- Donations of 100 cases or more (must be in pallet form and wrapped):
 - Food Bank of Eastern Michigan, 2300 Lapeer Rd, Flint
Donors must call ahead, (810) 239-4441, to schedule a dock time for delivery.
- Donations of multiple semi-truck loads can be made by calling Janet Hunter at 517-420-4162.

Subject: Clean-up to Flint Water Website

Hi Everyone,

This can wait until Friday, but I'm wondering if someone can do the following to clean up the michigan.gov/flintwater website.

Under the social media section on the homepage, there are three stray links:

- Please get rid of the "Get Free Water Filters" link entirely. That duplicates information elsewhere on the site.
- Remove the "Free Filters are NSF-approved" link from the homepage and put it on the "Filter Sites" page on the website.
- Remove the "Water Resource Site Flyer" PDF link from the homepage and put it on the "Water Resource Sites" page.

Please let me or JIC-Manager know if you need clarification.

Thanks,
Bob

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

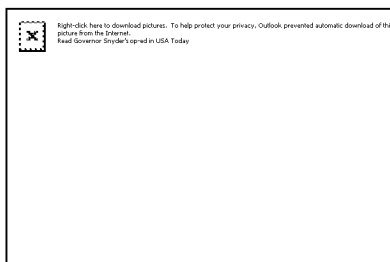

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Hi Everyone,

This can wait until Friday, but I'm wondering if someone can do the following to clean up the michigan.gov/flintwater website.

Under the social media section on the homepage, there are three stray links:

- Please get rid of the "Get Free Water Filters" link entirely. That duplicates information elsewhere on the site.
- Remove the "Free Filters are NSF-approved" link from the homepage and put it on the "Filter Sites" page on the website.
- Remove the "Water Resource Site Flyer" PDF link from the homepage and put it on the "Water Resource Sites" page.

Please let me or JIC-Manager know if you need clarification.

Thanks,
Bob

Michelle Stiffler and John Estill both have worked on the site.

Michelle is gone for the day and John is here until 5 I believe.

I am out at 4pm but am on-call this week. You can contact me after hours via the on-call phone, the number you called earlier.

I will have my computer with me and the ability to connect to the network remotely where ever I am.

Rick

Rick,

Another item:

- Rename the 2-1-1 section of the homepage "Who to Call."
- The existing language regarding 2-1-1 can remain there.
- Under that, leave same space and then include the following language: Emergencies bring out strong emotions. The Disaster Distress Helpline, 1-800-985-5990, can provide immediate confidential counseling to anyone who needs help. The Helpline is a 24 hours-a-day, seven-days-a-week resource provided by the Substance Abuse and Mental Health Services Administration.

Do you have the name of someone who is working on the Flint water site for eMichigan that I can deal with directly? If possible, we want to get this and the previous item regarding the link to the new helpforflint.com website up today, along with one or two other items that I'll email about shortly

Thanks,

Bob Wheaton

I think the JIC has tried hard to keep calls funneling into 2-1-1 to be distributed so that we aren't confusing people by providing them with multiple phone numbers. I defer to the JIC Manager for their input. If anything I would recommend we post a description of the number along with the number itself, rather than the link to their release.

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: Re: ADA form

I talked to Jim and he said he thinks the weird characters in the URL are a result of the mitigation we currently have in place. If we can find a solution that removes the weird characters that we see occasionally then let's do that. But let's do it without compromising ourselves by removing important mitigation.

John E and John T: do you think the weird characters were the reason the form was timing out when submitted?

Subject: Fwd: ADA form

Hi Sunit,

John E. is testing the forms submission going through Akamai. He told me that it works fine over VPN but the form times out when he's not on VPN. Is this expected behavior while we're testing?

The link to the form he was trying to submit is below.

Thanks,
Suzanne Pauley

Subject: Re: ADA form

It's possible that it is related to the mitigation changes but I would have do some more testing. I actually got a time out error message that I don't remember ever seeing before.

Subject: Re: ADA form

I talked to Jim and he said he thinks the weird characters in the URL are a result of the mitigation we currently have in place. If we can find a solution that removes the weird characters that we see occasionally then let's do that. But let's do it without compromising ourselves by removing important mitigation.

John E and John T: do you think the weird characters were the reason the form was timing out when submitted?

Thanks,
Suzanne Pauley

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

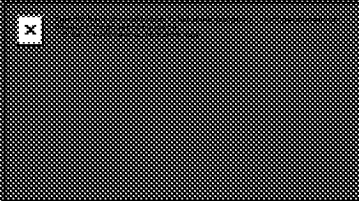

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. [Click here to watch the video.](#)

VIDEO: What Governor Snyder's FY17 budget means for Michigan

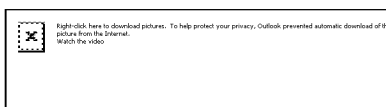

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Custodians of Co...

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 17, 2016

TO: All DTMB Custodians of Correspondence Related to Flint

FROM: Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

SUBJECT: Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

Network Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

Non-Network Drives – includes hard drives, desktop, and thumb/flash drives

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

Attachments

- FOIA Checklist
- Attachment 1 – Search Guidance

Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

Search Terms:

DTMB@michigan.gov, or
Directors Office, Cass Building, Second Floor

APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

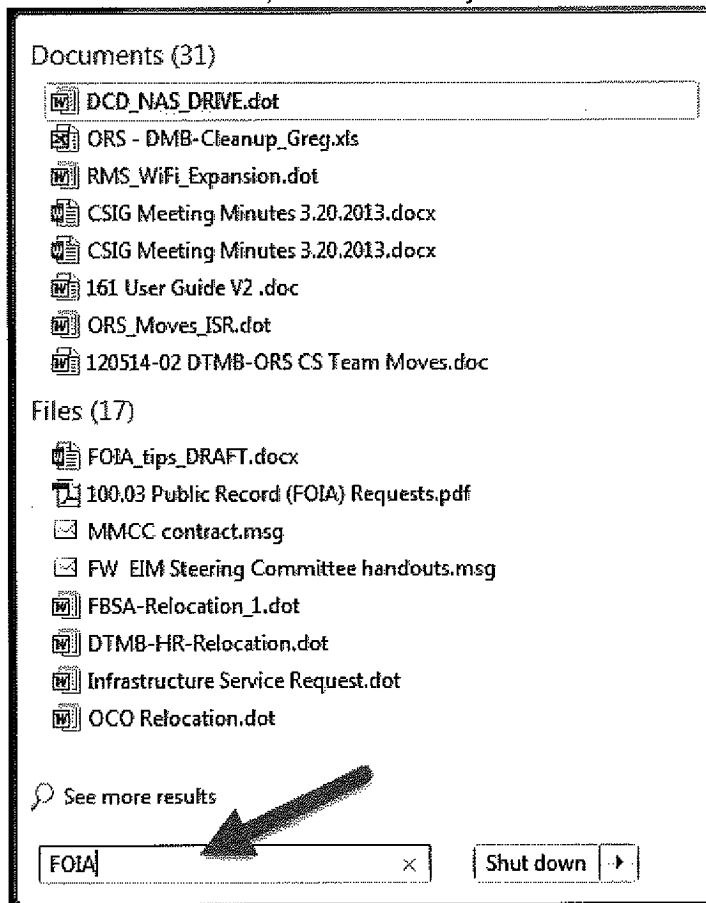

Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

► All Programs

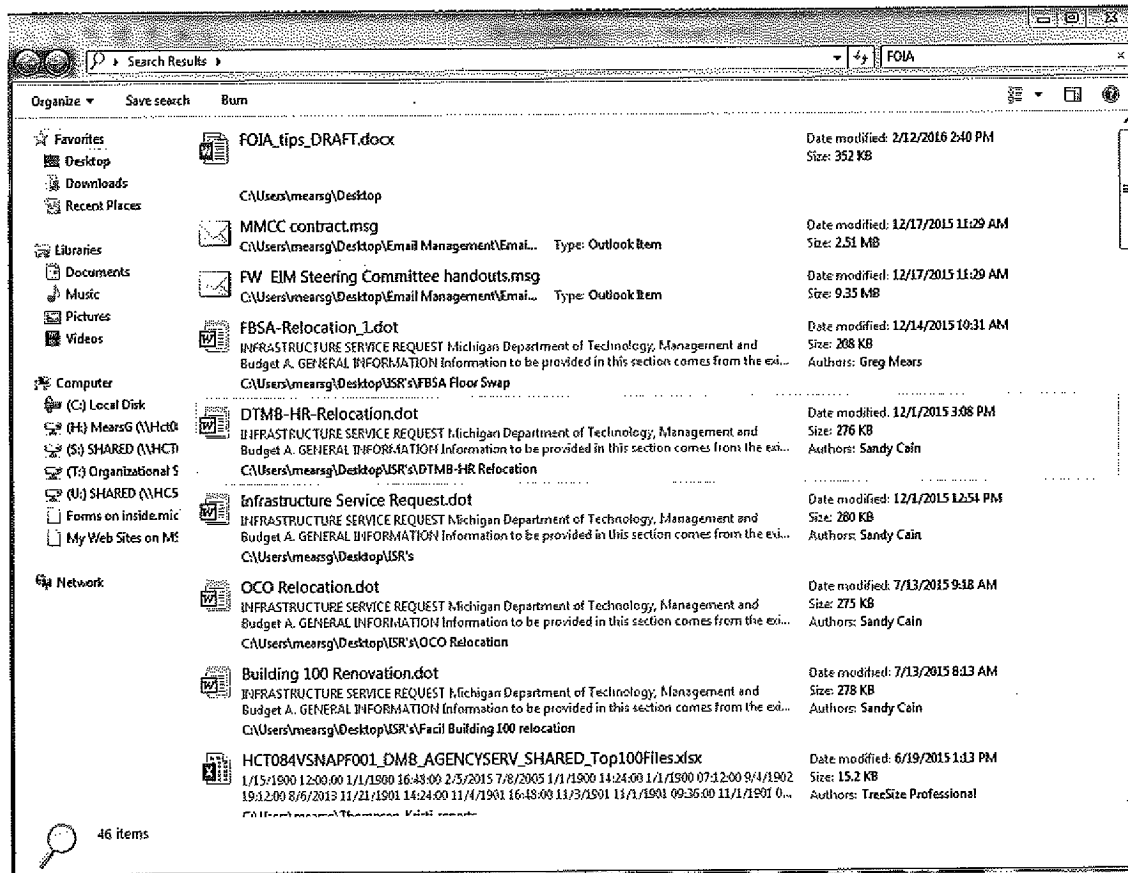

Search programs and files

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must

click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to a network drive.

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 18, 2016

TO: All DTMB Custodians of Correspondence Related to Flint

FROM: Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

SUBJECT: Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

Network Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

Non-Network Drives – includes hard drives, desktop, and thumb/flash drives

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

Subject: FW: Flint Assistance Offers and SEOC work coordination

Hello Kristi,

DTMB received information that all State staff work to support Flint must go through the SEOC for approval. This is to ensure appropriate funding approval for this work.

I wanted to get your input on the MDHHS process to approve this work so that Susan can assist to get the necessary DTMB approval.

Currently, we have DTMB staff working on the following:

- Preservation of electronic records
- Analysis of potential Medicaid eligibility related changes
- Discussing potential WIC eligibility related changes

Thanks,
Linda

Subject: Re: FOIA Project Updates to General Managers

You are correct. That is the tool that the Gov office recommended (not mandated) to the agencies on Wednesday.

DTMB is looking into the possibly of using the new ediscovery tool from AG (Relativity) for our own collection process. We feel it would allow us to collect/review/produce the emails and docs much easier than HPTrim. Brom will recommend to gov office that we use this, and we will see if they are ok.

Hi Tiziana

If agencies want to store their documents in Records Manager (HPTRIM), should we continue to work directly with Kristi Thompson's office? Was there anymore discussion on this within DTMB? The Gov's office recommended this at the meeting on Wednesday.

Thanks
Linda

All

Please note below the email below with additional information and guidelines that were provided from the Gov office to the Agencies today.

Key points:

- The agencies are being asked to conduct their own searches: please let Jodi know if any agencies request assistance from DTMB/OA or if any other questions arise regarding what OA is able to assist them with.
- Due date for the agencies to notify the Gov office of when their searches will be completed is Tuesday
- DTMB is currently working to identify the custodians for our own searches - more information will be available on Tuesday.

Thank you for your time, please call with any questions. Have a great weekend.

Happy Friday All!

As you’re aware, the Governor’s Office Legal Team is working with the agencies to gather email and documentation related to the Flint Water crisis. Each agency was invited to a meeting last Wednesday afternoon to discuss the details around this FOIA project.

Please note the following updated information:

- The Governor's Office has asked each agency to perform their own searches on their email/repositories for all information pertaining to the Flint Water crisis.
- While the agencies may approach DTMB for assistance, we are under a tight timeframe and can't possibly assist every agency and every employee.
 - If the agency asks for DTMB assistance and you have internal resources available to assist (i.e. Client Specialist), please provide that assistance.
 - **If the agency needs assistance from OA** (i.e. due to a large quantity of email/documents or a large group of people) **please forward that request to Jodi Simon**. Also, please let the agency know that requests will be prioritized by the Governor's Office and we will provide feedback on availability as soon as possible (so if DTMB cannot assist, it will still leave time for the agency to perform the searches).
- The Governor's Office will provide the keyword search terms today to the Agencies.
 - The designated agency coordinators for this project will identify which employees from their agency will be the Custodians.

Please call me with any questions.

Thank you

Subject: RE: Flint Assistance Offers and SEOC

On this same topic, David and I had a conversation with the Governor's office after our post-EMT meeting this morning. They have agreed that as a general rule, before we do work on anything, it must be approved by the SEOC.

Further, they have agreed that if there is something urgent that the Governor or LG's office needs to get done prior to (or in lieu of) the SEOC approving it, these requests should all come in through me. Beth Clement was going to share this message with Gov's office and LG's office staff.

Procurement should have the new form up today for vendors to use as well. We can share that with you once it is working.

Snyder: Flint has seen spike in Legionnaires' disease

Detroit Free Press – January 13, 2016, by Daniel Bethencourt

Since Flint switched its water source to the Flint River, officials have seen a spike in the number of cases of a severe form of pneumonia, called Legionnaires' disease — but officials say they're still looking for the cause.

There have been 87 cases in Genesee County from June 2014 to November 2015 — and 10 of those cases resulted in death, said Dr. Eden Wells, chief medical executive with the Michigan Department of Health and Human Services, or MDHHS.

That number is a jump from previous few years, when the county saw between 6 and 13 cases. It's not clear how many were fatal.

While state officials said they couldn't make a connection between the water and the spike in disease, a drinking water expert who studied Flint said the rise in cases was "dramatic," and added there's a "very strong likelihood" the river's water played a role.

"I applaud the state for releasing this (report)," said Marc Edwards, who heads the Virginia Tech Research Team which was a key player in exposing lead contamination in the city's water.

Officials with the MDHHS say they noticed the spike in the fall of 2014. Months later, in April, MDHHS said they began interviewing residents who were affected.

That summer, Edwards and his team noticed that in some large buildings, which can have older plumbing systems, there were high levels of the bacteria that can cause the illness.

"Our hypothesis is that something about the Flint River and lack of corrosion control, plus big buildings, is creating these problems," Edwards said Wednesday.

Though officials held a news conference Wednesday to alert the public about the spike, they made clear that there were no changes in recommendations for bathing or showering. Edwards also noted that the water is safe for residents to shower in.

"There's every reason to believe (the spike) is something in the past," he added.

Legionnaires' disease is a lung infection caused by *Legionella*, a type of bacteria that grows best in warm water. The bacteria usually enter the body from a person breathing it in, but it can't spread between people. The most vulnerable are those with weakened immune systems.

Gov. Rick Snyder said he learned of the disease cases only "a few days ago," and acknowledged during questioning that the increase in Legionnaires' disease "just adds to the disaster we are already facing."

Flint's water became contaminated with lead in 2014, once its supply source was switched from Lake Huron to the Flint River water, which was treated at the city water treatment plant.

The state downplayed and largely ignored the immediate complaints about the smell, color and taste. In October, the Michigan Department of Environmental Quality acknowledged it had failed to ensure the necessary safeguards for corrosion. That failure resulted in lead leaching into the water.

Lead causes permanent brain damage in children and is linked to other health and behavior problems.

The crisis became even more apparent this month, when Snyder declared a state of emergency, and Michigan State Police joined others in distributing bottled water and water filters. The state has also urged all Flint parents with children younger than 6 to have their children's blood tested for exposure to lead.

In response to Snyder's announcement Wednesday, Senate Minority Leader Jim Ananich, D-Flint, demanded that national infectious disease specialists arrive in Flint "tomorrow" and added, "We need an investigation into the past outbreak so we know what happened, whether there is any ongoing threat, and how to make sure it doesn't happen again."

Flint's water is still unsafe to drink. Officials on Wednesday did not give a firm time estimate as to when the water might be drinkable once again, though Edwards noted that lead levels in a few homes have already gone down dramatically.

At the news conference on Wednesday, Snyder fielded questions about his administration's handling of the crisis. He said that a good portion of the fault "could lie" with the Michigan Department of Environmental Quality, and welcomed the federal investigation already under way.

"We're taking every action within reason, and going beyond reason to address this," he said. He also said, "This is something you wish that never happened, and let's see that it never happens again in the state of Michigan."

Fund established for Flint children

A fund has been established to address the short- and long-term needs of Flint children exposed to lead through contaminated drinking water, the Community Foundation of Greater Flint announced Monday.

"Our Flint children deserve every opportunity to be healthy and successful," said Dr. Mona Hanna-Attisha, the Hurley Medical Center pediatrician who helped expose the tragedy. "The creation of this Fund will further ensure that our children are afforded the resources and interventions to overcome this population-wide exposure to lead."

Brinker sentenced to prison for embezzlement

WWMT – January 13, 2016, By

LANSING, Mich. (NEWSCHANNEL 3) – Ervin Brinker, 69, of Dalton, has been sentenced to 32 months to 10 years in prison after he pled guilty to embezzling and Medicaid Fraud after he diverted public funds to a psychic in Florida.

Michigan Attorney General Bill Schuette announced that Brinker will also pay \$1,020,000 as part of his plea agreement. The money includes restitution to Summit Pointe, the community mental health authority in Battle Creek, and a penalty to Michigan.

Brinker will also give up his pension from the state.

Summit Pointe records showed \$510,000 was sent to a palm reader in Key West, Florida and her husband. The records show that Brinker claimed the money went to pay a "health care consultant."

Schuette said in a release, "The cost of abusing the public trust in Michigan is very high, for both the abuser and the tax payer. I would like to thank Summit Pointe and the Michigan Department of Health and Human Services for assisting in this investigation."

<http://wwmt.com/news/features/top-stories/stories/Brinker-sentenced-to-prison-for-embezzlement-250305.shtml#.Vpafp02FO70>

Paying palm reader \$500K of public's money nets prison time for health CEO

MLive – January 13, 2016, By Rex Hall Jr.

CALHOUN COUNTY, MI – A Calhoun County health official who admitted to sending more than \$500,000 in public money to his personal psychic palm reader has been sentenced to prison, Michigan Attorney General Bill Schuette said Wednesday.

Ervin Brinker, 69, of Delton, was sentenced to 32 months to 10 years in prison for two counts of Medicaid fraud conspiracy and one count of embezzlement by a public officer, according to a news release issued by Schuette's office.

Brinker, the former CEO of a Community Mental Health Authority in Battle Creek known as Summit Pointe, learned his sentence from Ingham County Circuit Judge William Collette.

Brinker pleaded guilty to the charges in November. Summit Pointe was established by the Calhoun County Board of Commissioners and provides mental and behavioral health services to Medicaid consumers in Barry, Berrien, Branch, Calhoun and Van Buren counties.

The AG's office said Summit Pointe records showed \$510,000 was spent between May 2011 and November 2012 as part of two separate contracts to pay a "health care consultant" that turned out to be Brinker's "personal psychic fortuneteller."

Brinker, who was terminated from Summit Pointe on Feb. 17, had the authority to approve contracts without board approval and approved the fraudulent health care consulting contracts without consulting other employees, according to the news release.

As part of his plea agreement, Brinker agreed to pay back \$1.02 million, which includes \$510,000 in restitution to Summit Pointe and a \$510,000 civil penalty to the state of Michigan.

Schuette's office said Brinker also waived all rights to his public pension, which had a present value of more than \$2 million.

"The cost of abusing the public trust in Michigan is very high, for both the abuser and the tax payers," Schuette said. "I would like to thank Summit Pointe and the Michigan Department of Health and Human Services for assisting with this investigation."

Legionnaires' spike in Michigan county dealing with water crisis

Reuters – January 13, 2016, By Suzannah Gonzales

The Michigan county already reeling from lead-contaminated drinking water in the city of Flint has seen a spike of Legionnaires' disease resulting in 10 deaths that may or may not be related to the water crisis, officials said on Wednesday.

Genesee County, which includes Flint, had 87 cases of Legionnaires' from June 2014 to November 2015. State officials told a news conference they could not conclude that the increase was due to a switch in the source of Flint's water.

"That just adds to the disaster we already are facing with respect to elevated lead levels," Governor Rick Snyder said.

About half the cases were connected to Flint water and half were not, according to Nick Lyon, director of the Michigan Department of Health and Human Services.

Legionnaires is a type of pneumonia caused by inhaling mist infected with the bacteria Legionella. The mist may come from air-conditioning units for large buildings, hot tubs or showers.

Genesee County and Michigan health departments are investigating the increase as are the U.S. Centers for Disease Control and Prevention and the U.S. Environmental Protection Agency, Snyder said.

Snyder called in Michigan National Guard troops, who arrived on Wednesday to help distribute bottled water, water filters, testing kits and other supplies to Flint residents.

The governor, who has been accused of waiting too long to intervene in the crisis, also requested support from the Federal Emergency Management Agency, which has appointed a disaster recovery coordinator to help Michigan.

Financially strapped Flint was under the control of a state-appointed emergency manager when it switched its source of tap water to the nearby Flint River in April 2014 from Detroit's water system 60 miles (100 km) to the southeast to save money.

Flint returned to the Detroit water system in October after tests found some children had elevated levels of lead in their blood and lead was found in higher-than-acceptable levels in the water. The city said in December lead levels remained well above acceptable levels.

Snyder has apologized for the state's mishandling of the situation and declared a state of emergency in Genesee County to bring in additional state resources.

Last week, the U.S. Attorney's Office in Detroit said it was investigating the lead contamination of Flint's water. Flint residents have filed a federal lawsuit accusing the city and state of endangering their health.

Increase in common respiratory disease in Genesee Co. has MDHHS concerned

WLNS – January 13, 2016

LANSING, MI (WLNS) – An increase of Legionnaires' disease (LD) in Genesee County has the Michigan Department of Health and Human Services concerned.

From June 2014 – March 2015, there were 45 LD cases and from May 2015 – November 2015 there were 42 LD cases in Genesee County. Of these 87 cases, 10 people died all between the ages of 26-94.

The Michigan Department of Health and Human Services says the bacteria *Legionella* usually grows in warm water. *Legionella* bacteria causes Legionellosis, which is a respiratory disease. The disease can lead to a lung infection and pneumonia. *Legionella* bacteria cannot spread from one person to another.

"While Legionellosis cases are not uncommon, we are concerned about the increase in cases seen in Genesee County," said Eden Wells, M.D., chief medical executive, Michigan Department of Health and Human Services.

At this time the MDHHS has not confirmed that the increase in Legionellosis cases is due to the Flint water supply. The MDHHS is concerned, however, due to the recent findings of lead in Flint's water.

For more information on the Flint water emergency, visit www.michigan.gov/flintwater.

A Legionnaires' Disease Outbreak in Flint

The Atlantic – January 13, 2016, By Matt Ford

Michigan Governor Rick Snyder announced Wednesday that Flint, Michigan, and the surrounding Genesee County have seen a spike in Legionnaires' disease over the past year, killing 10 people and compounding the area's growing water-supply crisis.

Dr. Edith Wells, the chief medical executive of the Michigan Department of Health and Human Services, told reporters that 87 cases of the disease had been reported between June 2014 and November 2015. Genesee County normally sees far fewer cases than that each year, according to the *Detroit Free Press*. Ten of the infected residents died from the disease.

Legionnaires' disease is a form of pneumonia caused by the *Legionella* bacteria, which usually lives in warm, fresh water.

Epidemiologists first documented it after a mystery illness struck an American Legion convention in Philadelphia in 1976, killing 23 attendants. Investigators traced the bacteria to warm, stagnant water in air-conditioning units at the Legionnaires' hotel. The bacterium can also thrive in cooling towers, hot tubs, humidifiers, swimming pools, and similar types of reservoirs with contaminated water. The CDC estimates that between 8,000 and 18,000 people are hospitalized with Legionnaire's disease each year.

Latest: CDC Consulting With Michigan on Legionnaires' Cases

ABC News – January 13, 2016, By The Associated Press

A spokesman with the federal Centers for Disease Control and Prevention tells The Associated Press the agency is consulting with state health officials and local health departments in Michigan about the increase in Legionnaires' disease cases in and around Flint.

Spokesman Ian Branam said in an email that the CDC currently has no plans to send staff to Flint and says state and local health department have jurisdiction over investigations in their states.

Legionnaires' disease is a type of pneumonia caused by bacteria that infect the lungs.

Michigan health officials say there's been an increase in Legionnaires' disease cases during periods over the past two years in the county where Flint is located. The Michigan Department of Health and Human Services said Wednesday it can't conclude that the increase is related to the water crisis Flint, where drinking supplies became contaminated with lead after the city began drawing from the Flint River in April 2014.

Legionnaires Disease: 'We are concerned about the increase in cases seen in Genesee County'

Outbreak News Today – January 13, 2016

The Michigan Department of Health and Human Services is reporting an increase of Legionnaires' disease (LD) in Genesee County in summers of 2014 and 2015. While the MDHHS cannot conclude that the increase is related to the water emergency in Flint, the State of Michigan is treating this situation with the same urgency and transparency as the lead response in the city of Flint.

MDHHS has confirmed data through March 2015, and is finalizing preliminary data through November 2015, which indicates an additional increase in cases. From June 2014 to March 2015, 45 LD cases were confirmed in Genesee County, including seven associated fatalities. From May 2015 through November 2015, 42 LD cases, including one case of Pontiac Fever, were reported in Genesee County. There were three associated fatalities. The age range of these individuals was 26–94, with illness onset dates from June 6, 2014 to March 9, 2015 and May 4, 2015 to October 29, 2015.

Legionella is a type of bacteria commonly found in the environment that grows best in warm water, such as hot tubs, cooling towers, hot water tanks, potable water systems, and decorative fountains. When people are exposed to the bacteria, it can cause Legionellosis, a respiratory disease that can infect the lungs and cause pneumonia. The bacteria can also cause a less serious infection called Pontiac fever. Legionella cannot spread from one person to another person.

"While Legionellosis cases are not uncommon, we are concerned about the increase in cases seen in Genesee County," said Eden Wells, M.D., chief medical executive with the MDHHS. "We are releasing this report and continuing surveillance and investigations to ensure that appropriate actions are being taken to protect the health of the residents of Flint."

During LD outbreak investigations, clinical specimens are often evaluated against environmental specimens to aid in determining an infection source. One reason that the increase in cases cannot be directly related to the change in Flint water supply is due to the lack of clinical Legionella isolates from case patients. Clinical isolates are necessary to interpret the findings of an environmental investigation in an outbreak.

In the fall of 2014, MDHHS noticed an increase in people with LD and offered assistance to Genesee County Health Department (GCHD) with case investigations to determine exposures. In January of 2015, MDHHS stepped in to coordinate GCHD's response. By April 2015, MDHHS had developed an interview questionnaire and began conducting case investigations to look at travel, work, and locations visited during the two weeks prior to symptom onset. These two weeks are considered the incubation period for LD.

Of the confirmed first 45 cases, the source of water at the primary residence was City of Flint water for 47 percent of cases. When looking at additional community sources, more than half of the individuals had a healthcare facility exposure in the two weeks prior to their illness onset and the facility has since implemented multiple environmental and procedural measures to alleviate the situation. Preliminary data from May through November 2015 regarding case investigation information is being finalized and will be released soon.

Ten people had no exposure to a Flint hospital in the two weeks prior to illness nor were their homes on the Flint water system. Other possible exposures were evaluated and no other known community exposures were identified. Enhanced surveillance has continued for the remainder of 2015 and into 2016.

MDHHS has been and continues to work with the Michigan Department of Environmental Quality (DEQ), Centers for Disease Control and Prevention (CDC) and the Environmental Protection Agency (EPA) on this matter. MDHHS shared an initial report with federal partners in June 2015, and initiated and has continued to facilitate regular communication with our federal partners and GCHD to monitor cases.

Vigilant legionellosis awareness and surveillance is occurring in Genesee County. MDHHS informed hospitals in Genesee County of the increase of cases in January 2015, as well as recommended actions on their part throughout all of 2015. MDHHS has also recommended that the GCHD work with the clinical community in Genesee County to assist in LD surveillance through accurate identification, testing, and reporting of all suspect cases.

Most people exposed to Legionella do not become ill. People at higher risk of getting sick include: individuals over 50 years old; current or former smokers; those with chronic lung disease; people with a weakened immune system from diseases like cancer, diabetes, or kidney failure; and individuals who take medications that weaken the immune system, such as steroids or chemotherapy.

Spike in Legionnaire's disease in Michigan, amid water crisis

Medical Xpress – January 14, 2016

An outbreak of Legionnaires' disease over the past 18 months has killed 10 people in the US state of Michigan, where officials are dealing with a major health crisis over lead-contaminated water.

The state's Department of Health and Human Services said on Wednesday that the outbreak dates back to summer 2014 and have not ruled out a link to the toxic tapped water in the city of Flint.

"The state of Michigan is treating this situation with the same urgency and transparency as the lead response in the city of Flint," the health department said in a statement on the spike in Legionnaires' disease.

Officials said that since June 2014, there have been 87 confirmed cases of Legionnaires' disease, a severe type of pneumonia caused by bacteria, resulting in 10 deaths.

The illnesses occurred in Genesee County, where Flint is located.

Officials said that nearly half the people sickened with the disease were exposed to water in Flint.

The crisis from lead-poisoned water came after state authorities ignored months of health warnings about foul-smelling water in Flint.

State officials in April 2014 had begun drawing water for city residents from the Flint River, rather than continuing to buy it from Detroit.

Since then, the northeastern city of some 100,000 people has seen lead levels surge and a plague of health issues after drinking and bathing in the cloudy, foul-smelling water coming out of their faucets.

<http://medicalxpress.com/news/2016-01-spike-legionnaire-disease-michigan-crisis.html>

Michigan Public Health Officials See Legionnaires' Disease Rise In Flint Area

CBS Detroit – January 13, 2016

FLINT (CBS DETROIT/AP) – The Michigan Department of Public Health and Human Services is reporting an increase of Legionnaires' disease in Genessee County.

But the state is not able to say if the increase is connected to the ongoing water emergency in Flint.

The Department of Health and Human Services said Wednesday it can't conclude that the increase is related to the water crisis Flint, where drinking supplies became contaminated with lead after the city began drawing from the Flint River in April 2014.

Since the summer of 2014, 87 cases have been reported with ten fatalities — and about half the cases involve people drinking Flint water.

Legionnaires' disease is a type of pneumonia caused by bacteria that infect the lungs.

Is there a connection between the increase in cases and the water emergency in Flint?

Nick Lyon, Director of the Michigan Department of Health and Human Services, says while they investigate, Flint residents should remain diligent about their water usage.

"Not all the cases had exposure to the city of Flint water," says Lyon. "That said, the department is treating the situation with the same urgency and transparency as the lead response in Flint."

"There's no evidence of community-based transmission," says Eden Wells, Chief Medical Officer for the Department of Health and Human Services, "given that, there is no recommendation at this point to change any recommendations regarding bathing."

Residents are being asked not to drink the water, but officials say bathing is safe.

A comparative chart officials provided shows only 21 cases reported in all of 2012 and 2013.

Officials also said they had preliminary data indicating 42 cases of Legionnaires' disease between May 2015 and November 2015, with three deaths.

The city of Flint is getting heavy state and national attention and much-needed assistance as it deals with a drinking water crisis that began after officials switched water source in 2014 while under state financial management, and the tap water became contaminated with lead.

Michigan National Guard leaders began arriving in the city Wednesday to help distribute bottled water, filters and other supplies. The Federal Emergency Management Agency also approved a request by Michigan Gov. Rick Snyder, whose administration has come under fire for how it handled concerns about the water, to coordinate a recovery plan.

It's yet another challenge for a city of 99,000 people beset by numerous auto factory closures and thousands of job losses over the decades, and where about 40 percent of the population lives in poverty.

Vaccination rates top 90 percent in Washtenaw County

MLive – January 14, 2016, By Ben Freed

For the fourth year in a row, Washtenaw County's vaccination rates have increased at schools across the region.

According to data from Washtenaw County Public Health, 91 percent of students entering kindergarten or seventh grade—or transferring into the school district—had completed vaccination records. Students entering those grades or the district are supposed to provide either immunization paperwork or a waiver by the first day of school.

In 2014, the county ranked just 66th out of 84 in Michigan for fully vaccinating children between the ages of 13 and 17.

A new rule from the Michigan Department of Health and Human Services took effect in 2015 and mandates that parents who wanted to submit a waiver first have a meeting with a county health professional.

"Previously about 1,100 would be distributed every year," Washtenaw County Public Health immunization nurse coordinator Christina Karpinski said.

"This year we had provided only about 852 waivers and fewer than 500 were turned it."

The meetings were held at the Washtenaw County Health Center and Karpinski said the reviews from both parents and the health care professionals were overwhelmingly positive.

"We had some people who come in who clearly just didn't want to be here, but overall the sessions were great and gave us the opportunity to have conversations," she said. "When people left they almost uniformly thanked us and there was at least one family who came in for the waiver and ended up getting all the vaccines they were supposed to get."

In Michigan, parents can turn in medical, religious or "other" waivers for their children. The religious waivers have made up approximately 1 percent of students for the past four years and fewer than 20 medical issues are typically issued annually.

The number of children with "other" or philosophical waivers being turned in on their behalf has fallen from 694—eight percent of the total—in 2012 to 380 in 2015. Those "other" waivers made up just three percent of the eligible students. In 2014, five percent of students—674 children—had this form of waiver handed in.

Washtenaw County Public Health spokeswoman Susan Cerniglia said it's too early to attribute the drop entirely to the pre-waiver meetings, but she believed it has helped.

"It's not so much that people's minds are changing during these sessions, but making it more of a process to get the waiver has made it so people who are less invested in the waivers will get their kids vaccinated instead," she said.

"Some of our local schools have also really made positive changes such as making sure vaccinations are more accessible to families and encouraging them to get their shots instead of simply pointing people to the waivers."

By Nov. 1, all public, private and charter schools in Michigan must submit paperwork or waivers for 90 percent of students to the state or risk losing some of their funding. The schools must raise their compliance percentage to 95 percent by the time a second deadline in February rolls around.

No schools in Washtenaw County missed the November 90 percent compliance threshold, and 96 percent of students in the county have either verified vaccination records or submitted waivers. According to the letter of the law, the other four percent of students—about 442 students—should not be allowed to attend school at all until they have submitted one of the two sets of paperwork.

Legislation has been introduced in Lansing by Rep. Thomas Hooker, R-Byron Center, which would prohibit the MDHHS from enforcing waiver requirements not mandated in state law, including the immunization education discussions. The legislation would also prohibit local health officials from pulling a non-immunized child out of school when there is a threat of a communicable disease — unless that threat amounts to an epidemic.

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership
FROM: DTMB Procurement
SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:

Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- o Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- o Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- o Obtain three quotes whenever reasonably practicable
- o Post bids online to the extent practicable
- o Please escalate any questions to DTMB Procurement before executing a buy
- o DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- o DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- o Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Subject: What this year's budget means for Michigan...

VIDEO: What Governor Snyder's FY17 budget means for Michigan

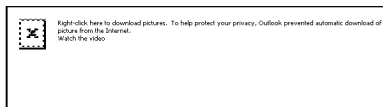

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MiBudget www.mi.gov/MiBudget

Subject: VIDEO: Volunteering in Flint

VIDEO: How volunteers are helping Flint

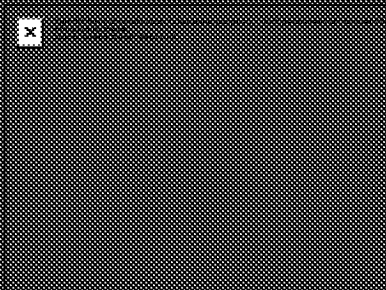

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for

14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.

- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Hello Mikelle,

Susan is following up with our DTMB team to see how we can assist with running queries related to the MDHHS FOIA requests. Also, Kurt Krause has asked Susan and I to join a meeting on Wednesday with the Governor's office and other agencies involved with Flint FOIA response. Susan will update you Thursday morning related to services we can provide.

Feel free to contact me on my cell if we need to talk sooner. 517/930-2323.

Thanks,
Linda

Please see the note I sent below. We are inundated with FOIA requests and subpoenas related to Flint. Would it be possible for us to have someone from DTMB assist us with running queries in the e-mail server that might help to identify e-mails that potentially fit the various requests?

Thanks,

Mikelle

To: Susan Moran <morans@michigan.gov>
Subject: strategy to consider re: FOIA requests

I was complaining about all of the work related to collecting e-mails and documents for FOIA requests. My husband who works in IT suggested that it is possible for us to ask someone from DTMB to set up a data base tailored to the parameters/criteria provided in the FOIAs and subpoenas (query the e-mail server by key words and dates). He said that someone would then need to sort out what is collected to make sure it fits the requests, but it would free up staff time to do the actual searches.

Bill said we would want a senior IT person who could hit the ground running without a lot of hand holding. If we pursue this he said that they should document each query they've run. The person would also need to correlate the results in a format that can be reviewed by others.

I could run it by Linda Pung to see if this is a possibility within our tight timelines. One more thing we'll need to pay for but it might provide some relief to overwhelmed staff. Thoughts?

Linda

This meeting is scheduled at 8:30 a.m. in Capitol View, 7th Floor, Large Conference Room with an option to call in. You will need to call 241.0048 so you can gain entrance to the 7th floor, I added this note to the meeting appointment.

Per Erik Frost, Brenda Lawson will most likely need to call in.

Thanks

Subject: FOIA Project Updates to General Managers
Importance: High

Happy Friday All!

As you're aware, the Governor's Office Legal Team is working with the agencies to gather email and documentation related to the Flint Water crisis. Each agency was invited to a meeting last Wednesday afternoon to discuss the details around this FOIA project.

Please note the following updated information:

- * The Governor's Office has asked each agency to perform their own searches on their email/repositories for all information pertaining to the Flint Water crisis.

- While the agencies may approach DTMB for assistance, we are under a tight timeframe and can't possibly assist every agency and every employee.
 - If the agency asks for DTMB assistance and you have internal resources available to assist (i.e. Client Specialist), please provide that assistance.
 - **If the agency needs assistance from OA** (i.e. due to a large quantity of email/documents or a large group of people) **please forward that request to Jodi Simon.** Also, please let the agency know that requests will be prioritized by the Governor's Office and we will provide feedback on availability as soon as possible (so if DTMB cannot assist, it will still leave time for the agency to perform the searches).
- The Governor's Office will provide the keyword search terms today to the Agencies.
 - The designated agency coordinators for this project will identify which employees from their agency will be the Custodians.

Please call me with any questions.

Thank you

Tiziana Galeazzi

Reason for the emergency: This is a vendor change happening Monday (during the Holiday) and is an expedited circuit upgrade due to the water crisis in Flint.

Scheduled start and ending dates and times for the change request: Monday 2/15/16 at 8:30 A.M. until 2/15/16 1:00 P.M.

Detail description of the RFC: AT&TCore Network Services will optimize WAN circuit from 50MB to 100Mb for Flint SOB, 125 E. Union St. Flint, MI]. AT&T/NTSD Core Network Services will install a new 100MB circuit parallel to existing 50MB circuit and will coordinate cutover with site.

Function/Service/Application Impact: Medium

Agency/Agencies impacted: DOS, DEQ, DCR, Treasury, DHS

Function/Service/Application Criticality:

RFC Risk: Medium

Backout Plan: AT&T will shutdown newly installed circuit and turn up the old circuit/router. Backout plan requires 10 minutes. (Note: Include back out time in scheduled "Start Date" and "End Date" window. Do not include the back out time in "Planned Downtime" minutes).

Test: AT&T & NTSD have collaborated to develop and standard implement step-by-step process to optimize (upgrade) data circuits. This is a repeatable process that have been lab tested by AT&T and validated by NTSD engineers.

Validation: NTSD Core Network Services will confirm the old circuit has been removed by use of ping and attempts to access router via SNMP. Telecom will confirm with end users that they have required internet and intranet access by having them attempt to connect to various websites and applications.

Email Received:

Please emergency expedite the RFC above. This is a vendor change happening Monday (during the Holiday) and is an expedited circuit upgrade due to the water crisis in Flint. Thank you.

Flint Medicaid

Our Understanding of Business Requirements:

- Allow individuals applying through all state application portals for healthcare coverage to indicate whether they are impacted by the Flint water crisis.
- For individuals who attest to being impacted by the Flint water crisis, provide full healthcare coverage based on the following criteria:
 - Individual's age is under 21 or individual is pregnant
 - Individual meets the citizenship and lawful presence requirements for healthcare coverage
- Individual receives a post-eligibility determination follow up to verify his/her residence in Flint since April 1, 2014.
- No income or asset limit tests will be imposed during eligibility determination for the individuals that meet the criteria
- Individual will not lose full coverage or have to complete a redetermination process until one of the following occurs:
 - Individual moves out of state
 - Individual is now deceased
 - Individual is 21 or older
 - Individual is beyond the pregnancy post-partum period
- Establish the time period when an individual was impacted by the Flint water crisis for federal and state reporting purposes
- Differentiate in all systems, beneficiaries of coverage due to the Flint water crisis from the rest of the beneficiaries for health plans, reporting requirements and ease of tracking.
- All existing healthcare beneficiaries who are impacted by the Flint water crisis, need to be identified in the system, to ensure that they do not lose full coverage and continue to receive healthcare benefits. Ensure existing healthcare beneficiaries' premium or deductible is waived off if they are impacted by the Flint water crisis.

Questions to consider:

- Where would the new coverage for Flint water crisis fall in the Medicaid hierarchy of benefits?
- Any need for a new correspondence to the client or changes to existing correspondences after the approval of the new coverage for an individual?
- Is there a need to indicate to the FFM about this special new coverage for an individual through our FFM referral process?
- Could individuals who receive healthcare benefits due to the Flint water crisis, qualify for Emergency Services Only (ESO) coverage based on their immigration status?
- Is there any need to reprocess existing healthcare beneficiaries and evaluate them for the new type of coverage for the individuals that impacted by Flint water crisis? How will DHHS identify existing beneficiaries that are impacted by the Flint water crisis
- Will there be any changes made to the DCH 1426 paper application to support the field staff's processing of application at intake at a local DHHS office? Or will a business process be established to ask the question although not listed on DCH 1426?
- Will there be a special group or office that will handle queries/questions from the beneficiaries of this new healthcare coverage?

- What are the impacts to other programs aside from healthcare? Would the other programs look to leverage a similar functionality in the long run?
- Applicants who were impacted by Flint water crisis starting April 1, 2014 will be evaluated for the new healthcare coverage. Is there a date beyond which, individuals should no longer be able to receive the new healthcare coverage at the time of application?

In order to meet the business requirements listed above, we recommend a phased approach for system implementation. The Phase I will address business needs that are critical to this project in short period of time. The Phase II will be focused on additional work required to meet all business needs and any other system enhancements post Phase I.

Recommended Short-term Solution (Option-1): Modify Bridges and MiBridges applications

Phase 1 High Level System Changes

- Screen changes to Bridges and MiBridges to capture self- attested information (if the individual is affected by the Flint water crisis).
- Modify the PDF in MiBridges to include the self-attested information
- Modify the Bridges ingestion for FFM and DCT applications to flag the individuals as affected by Flint water crisis for individuals whose address zip code is a Flint zip code.
- If the applicant's zip code is a Flint zip code modify the DCT, FFM pdf to include this information.
- Build new eligibility rules to approve a 2 new TOAs (Medicaid and MiChild) based on either self-attested information or zip code of the physical address (for FFM and DCT applications). These new TOAs will be at the top of Medicaid hierarchy (after SSI).
- Generate a list of any individual under 21, any pregnant women plus 2 months post-partum, any child born to a woman and have resided in the Flint Zip codes and provide to business users.
- Data modification to flag the individuals, as indicated by business from the above list so that future case changes will result in determination of one of the 2 new TOAs.
- Changes to MMIS interface
 - New MAGI category indicator to differentiate between MiChild and Medicaid. The new alphabet will be used to indicate MiChild. Need to discuss with CHAMPS for 2 TOAs.
 - PAMA code will be F for Medicaid
 - Scope and coverage code to be set to 1F for Medicaid and MiChild
- For applications that are routed to RSS inbox for manual registration, training will be provided to RSS staff to look at the pdf and flag the individual as affected by Flint water crisis.

Assumptions

1. Modification to the AT to capture the self-attested information does not impact HUB and MAGI
2. This solution is applicable for Medicaid and MiChild
3. No retroactive coverage will be provided to the beneficiaries for these new TOAs
4. DHHS will confirm list of existing Medicaid and MiChild beneficiaries by 2/19
5. No reprocessing of existing beneficiaries is required as part of this change. Once the case worker updates case information as part of a case change/redetermination, new TOAs will be evaluated for the client.
6. Work required to implement the changes will need to commence 2/17
7. UAT will be able to support testing for this change

Impacts to field offices:

1. Field office staff will require training and communication about the new TOAs for Flint water crisis.
2. For applications that fail file clearance and other auto-ingestion rules, RSS workers will have to manually register applications (part of existing process) and remember to capture information about whether the individual was impacted by Flint water crisis
3. DCH 1426 healthcare application (paper app) will not have the additional question listed prior to the implementation of Bridges changes, hence the RSS workers will need to ask these questions as part of the applications
4. Information about data fix will need to be communicated to the field staff so that they can be ready for any questions by beneficiaries

Schedule 1

ROM: **1882.00** Hours.

PRD Schedule:

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	19-Feb
Development	22-Feb	24-Feb
Testing (PRD-I)	25-Feb	26-Feb
Implementation	27-Feb	27-Feb

Impacts to scheduled work:

1. Passive renewals requirements gathering
2. 16.03 QAT and UAT testing defect resolution and support
3. QAT testing for 16.03
4. Technical and performance improvements
5. Production support – reduced support from application team to address production tickets

Mitigation plan for impacts:

1. Passive renewals requirements gathering to begin 2/29 and end 4/8 and will not impact 16.06 release. Business team will be able to participate in JADs during UAT week of 16.03
2. Work overtime with resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:
3. Re-schedule technical and performance changes (targeted to improve system performance and timings) that do not impact business functionality from 16.03.

Schedule 2

ROM: **1882.00** Hours.

PRD Schedule:

Phase I cycle	Start Date	End Date
Requirements and Design	17-Feb	26-Feb

Development	29-Feb	9-Mar
Testing (PRD-I)	10-Mar	22-Mar
Implementation	26-Mar	26-Mar

Impacts to scheduled work:

1. Minimal impacts to passive redeterminations
2. 16.03 UAT testing defect resolution and support
3. Production support – reduced support from application team to address production tickets

Mitigation plan for impacts:

1. Passive redeterminations will follow existing timeline (end date of 3/28) and more JADs will be scheduled to accommodate meetings impacted by Flint water crisis meetings.
2. Work overtime or on-board resources starting 2/17 to 3/26 to support Phase I development, QAT/UAT testing and defect resolution for 16.03:

Future enhancements:

- Capture additional data elements on MiBridges and Bridges pertaining to the time period of an individual's residence in the affected areas
- Establishing and implementing rules for verifications of citizenship, lawful presence and address.
- Screen changes for accommodating new TOA's such as BRET, Override etc
- Accommodate any reporting requirements
- Changes to MMIS and existing Reports
- Impacts to Data Warehouse and MiCSES

Subject: getting DTMB to approve a software installation for new lead staff
Importance: High

I am requesting an intervention at DTMB to ensure that DTMB approves our request to have Lotus Approach and ZP4 installed on the computers of Dan Albright and Veronica Tijerina, two new staff working on our blood lead data. This is essential for our timely and accurate response to the lead poisoning problem in Flint. The blood lead surveillance data have been managed using Lotus approach for many years, and although it will be retired once the new surveillance system goes live, in a number of months, it is essential that the new staff have access to the current data management system in order to address all our issues and needs with the Flint water/lead response. In addition we are requesting an exception to have "ZP4" installed, a national file of addresses, which are used to verify and look up addresses; it is essential that we can verify the addresses of individuals reported by laboratories with their blood lead test results.

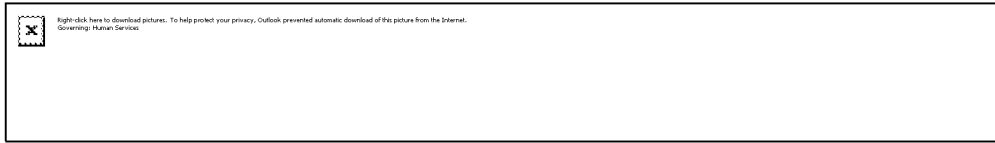

Because Lotus and DP4 are no longer a DTMB-approved applications, our request has to go to a DTMB "Exceptions Committee" meeting tomorrow. Our request is being presented to the Exceptions Committee by a DTMB staff, Nick Gates, who has been working on this, but I am requesting that MDHHS reach out to Linda Pung (pungL2@michigan.gov) and Susan Nordyke (nordykes@michigan.gov), who are higher up than Nick at DTMB, to emphasize the importance of approving this exception and getting the installation of Lotus approach and ZP4 completed ASAP, so that we can get our new Flint lead staff on board now.

Thank you for your consideration.

FEATURED STORY

5 States Shaking Up Medicaid in 2016

BY MATTIE QUINN

In his last full year in office, President Obama is eager to cement his legacy of making more low-income Americans eligible for subsidized health care. Standing in his way are the 19 Republican-led states that have declined to expand Medicaid. That's why last week he proposed a new incentive for them to change their minds: more money.

Under the provisions of the Affordable Care Act, Obama's signature health-care overhaul, the federal government fully funded Medicaid expansion for states in 2014, 2015 and 2016. Starting next year, states will have to gradually pay 10 percent of the costs by 2020. But if any of the 19 hold-out states are willing to budge, Obama wants to guarantee them 100 percent federal funding for three years -- regardless of when they expand Medicaid.

ADVERTISEMENT ... Story continues below

Obama's proposal has to make it past Congress, where there's a real possibility of failure. But he's not the only one trying to shake things up in health care.

Several states are debating or have already enacted major changes to their Medicaid programs this year. Here are the five shaking things up the most:

Flint Curbs Snyder's Future

Although it's premature to call him a lame duck, Michigan Gov. Rick Snyder's political capital has clearly been diminished by the Flint water crisis. During his State of the State address on Tuesday, Snyder offered lots of apologies: "You did not create this crisis;" "Government failed you;" and, "I'm sorry."

Since winning re-election in 2014, Snyder had been mentioned as a potential presidential or vice presidential pick on the Republican side. That kind of talk, however, has abruptly ended. "Even some Michigan Republicans concede that Snyder's national prospects are toast, at least in the short term," reports *Politico*.

DEPARTMENT OF
ATTORNEY GENERAL
M E M O R A N D U M

November 25, 2015

TO: Matthew Rick
Dept. of Health and Human Services
Bureau of Legal Affairs Director

FROM: Joseph E. Potchen *JEP*
Dept. of Attorney General
Division Chief, Corporate Oversight Division

RE: **LITIGATION HOLD FOR THE PRESERVATION OF EVIDENCE**
NOTICE – Flint Drinking Water – DHHS (AG # 2015-0125899-A)

- (1) *Melissa Mays, et al v Governor Rick Snyder, et al*, No: 15-14002 (E.D. MI)
- (2) *Notice of Intent to Sue Under the Safe Drinking Water Act by Concerned Pastors for Social Action, Melissa Mays, the American Civil Liberties Union of Michigan, and the Natural Resources Defense Council.*

A party to litigation or person that reasonably anticipates involvement in litigation has an affirmative obligation to retain and preserve information relevant to the claims that are or may be litigated. This information includes electronic documents and other data. Recent amendments to the federal and state court rules have expanded the types of information subject to discovery to include electronic data in all its forms. The increasing amount of electronic data, referred to in the court rules as "electronically stored information" (ESI) and the ease with which it can be transferred between different media, creates a particular concern for handling ESI in the litigation context. Accordingly, the Attorney General has developed this memorandum to provide specific notice to our client offices and agencies when the obligation to preserve ESI arises.

The Attorney General has determined that due to current litigation and future litigation that may involve the Department of Health and Human Services (DHHS), the following individuals have an obligation to preserve ESI for litigation purposes: DHHS's Childhood Lead Prevention Program staff and Dr. Eden Wells, chief medical executive.

November 25, 2015

You should take immediate action to preserve all electronically stored documents and electronic data relating to the City of Flint's use of the Flint River for drinking water beginning in 2014. **This obligation is in addition to the duty to preserve all other related materials.** Failure to comply with this Litigation Hold may expose DHHS and its employees to adverse rulings by the court including court-imposed sanctions.

"Electronically Stored Documents and Electronic Data" as used in this LITIGATION HOLD FOR THE PRESERVATION OF EVIDENCE NOTICE includes all associated metadata, audio recordings, videotape, e-mail, word processing documents, spreadsheets, databases, calendars, telephone logs, and all other electronic information maintained, created or received by DHHS and its employees related to the described matter.

"Sources" include all computer hard drives, removable media (for example, CDs and DVDs), laptop computers, PDAs, tablets, Blackberry devices, and any other locations where electronic data is stored. Keep in mind that any of the above-mentioned sources of information may include personal computers and all other personal electronic equipment or devices used for business related matters.

Please distribute this memo to other DHHS employees and contractors who may have documents, data, or ESI related to the City of Flint use of the Flint River for drinking water.

In order to comply with these requirements, DHHS must immediately preserve all existing ESI related to the possible litigation described above. Guidance on how to preserve this ESI is available from the Department of Information Technology (DTMB). If you need technical assistance, you should schedule a meeting with DTMB. We can participate in that meeting if necessary. If you have questions about this Notice, please contact Assistant Attorney General Joseph Potchen at (517) 373-1160 or potchenj@michigan.gov or Assistant Attorney General Santiago Rios at (517) 373-1160 or rios@michigan.gov.

Kasich's Anti-Choice Policy Blitz Forcing Ohio Women to Seek Abortion Care in Michigan

RH Reality Check – December 3, 2015, By Ally Boguhn

Michigan, Ohio's neighboring state, has seen an influx of nonresidents seeking abortion care in the wake of Republican Gov. John Kasich's relentless campaign to roll back abortion access, *FiveThirtyEight* reports.

Since Kasich, a 2016 presidential candidate, took office in 2011, he has quietly led his state to an almost unprecedented number of abortion clinic closures. Analysis of data released by the Michigan Department of Health and Human Services has revealed that many Ohio residents may in fact be turning to the neighboring state for abortion care.

Although Michigan has seen an overall decrease in abortions since 1987, that number has steadily begun to rise—and so have the number of nonresidents visiting the state for abortions.

"From 2012 to 2013 abortions rose by 11.6 percent, and from 2013 to 2014 they increased 5.8 percent," explained *FiveThirtyEight* in a report profiling Kasich's anti-abortion legacy in Ohio. "Data from Michigan's health department shows that the number of abortions performed on nonresidents jumped from 708 in 2013 to 1,318 in 2014, an increase of 86 percent."

Ohio was home to 14 clinics two years into Kasich's first term in 2013, but as they were forced to comply with medically unnecessary licensing regulations, all but eight closed or were forced to stop providing abortion services, as *RH Reality Check* has reported.

The Associated Press in November uncovered evidence that Kasich's aides had played a key role in helping craft the same measure that forced the clinic closures, an anti-abortion restriction inserted into the 2014 state budget that was previously attributed solely to the state's Republican-majority legislature. Emails obtained by the news organization and verified by the governor's office detailed how members of Kasich's team had helped write language for the abortion restriction 18 months prior to the state's budget being released to the public.

Despite often being labeled as a “moderate” Republican presidential candidate, Kasich has overseen the implementation of 16 anti-choice measures, such as a 2011 later abortion ban, and appointed Ohio Right to Life President Michael Gonidakis to the state medical board.

“The slew of new provisions has meant not only fewer options but also more obstacles for women looking to terminate a pregnancy, and in turn it has affected who is able to get an abortion in the state,” *FiveThirtyEight* reported.

Sheva Guy, a 23-year-old Cincinnati doctoral student, shared her own struggle with obtaining an abortion in Ohio after a second-trimester ultrasound showed that her fetus had a fatal spinal abnormality. In the absence of reliable access to abortion in her home state, where no doctors were willing to do the procedure, Guy was forced to travel more than 300 miles to Chicago and spend \$3,000 to receive the care she needed.

Dow Chemical a step closer to disposing sediment from dioxin cleanup in Midland landfill

Midland Daily News – December 3, 2015, by John Kennett

The Dow Chemical Co. is one step closer to being able to dispose of more than 200,000 tons of river sediment and flood plain soils from the Tittabawassee River dioxin clean-up.

In 2001, Midland County adopted the Midland County Solid Waste plan stating that no waste other than material used for daily cover as specified in the plan may enter or leave Midland County. Earlier this year, Dow requested to import up to 227,000 tons per year of sediment and floodplain material from Saginaw County, requiring an amendment to the plan.

“Their reasoning is the landfill is closer to the cleanup sites, saving on fuel and transportation expense and we have a very good relationship with them and I think they feel more comfortable placing it here than in private sector landfills,” City of Midland Utilities Director Noel Bush said.

The county board needed to appoint a 14-member committee to review the recommended amendments and make a recommendation back to the Midland County Board of Commissioners for approval. That recommendation was unanimously approved this week.

The amended plan now goes to each local government entity for approval.

“Once we have 67 percent of those bodies’ approval, we can then forward it to the MDEQ for approval and inclusion into the state solid waste management plan,” Bush said.

The 14-member committee included representatives from the following companies: Bierlein, Billy’s Contracting and Servinski Sod, along with Scott O’Laughlin, Midland Landfill superintendent. Other members included: Esther Williams, Midland Recyclers; Brady News or CM Rubber recycling volunteer; County Health Director Mike Krecek; Bush; Lincoln Township Supervisor Kevin Wray; Republic Waste or Waste Management designee; Kip Cosan, The Dow Chemical Co.; contractors Jason Long and Jeff Weckesser; and Walter Kienbaum from Bear Carpet & Restoration Services.

In other business, county commissioners:

- Approved funding of \$4,000 to develop a shared environmental health Geographic Information System (GIS) project data system. The data will primarily be property information for wells, septic tanks and suspected underground contamination areas. The total cost of the project will be \$32,000. However, a grant of \$25,500 has been secured from

the Michigan Department of Health and Human Services. Bay, Saginaw and Mid-Michigan (Clinton, Gratiot and Montcalm counties) health departments will also contribute \$4,000 each. The remaining \$9,500 may be used for other project priorities that are mutually agreed upon.

Reappointed the following people:

- City of Midland Councilman Thomas Adams to the Midland County Emergency Medical Services Advisory Board as the council representative. His second term will run from Jan. 1, 2016 through Dec. 31, 2017.
- County Administrator/Controller Bridgette Gransden to the Midland County Building Authority for a sixth term, with the term to be Jan. 1, 2016 through Dec. 31, 2018. The commission also reappointed her to the Central Dispatch Authority Administrative Policy Board for a second term, from Feb. 1, 2016 through Jan. 31, 2019.
- Craig Gosen to represent the Northwest Quadrant and Larry Leach to represent the Southeast Quadrant on the Midland County Board of Public Works. Both appointments will be for a third term, running from Jan. 1, 2016 through Dec. 31, 2018.
- Elizabeth Kline to the Midland County Juvenile Care Center Advisory Board as the Mental Health Professional representative for a second term, with the term to be Jan. 1, 2016 through Dec. 31, 2018.
- Sheriff Scott Stephenson to the Midland County Juvenile Care Center Advisory Board as the Law Enforcement representative for a second term, with the term to be Jan. 1, 2016 through Dec. 31, 2018.

State: 30 Flint residents have elevated lead levels

The Detroit News – December 3, 2015, By K. Bouffard

Thirty Flint children and adults have tested positive for elevated levels of lead in their blood, according to preliminary data released Thursday by the Michigan Department of Health and Human Services.

Blood tests were administered to 1,361 Flint residents starting Oct. 1 as part of the state's action plan for dealing with the city's contaminated water supply. Flint's crisis started in April 2014 when the city stopped getting its water from Detroit as a cost-saving measure and began instead drawing water from the Flint River, which proved corrosive.

Local health officials and the federal government are warning Flint residents that the danger from their tap water has not subsided even though the city has reconnected to Detroit's water system. The lead problem was uncovered in August when Dr. Mona Hanna-Attisha, a Hurley Medical Center pediatrician, did a deeper analysis of state testing data and found high levels of lead in Flint children.

The state's first summary report on the lead testing revealed that 21 of 969 children tested, and nine of 392 adults tested, were found to have elevated blood levels of lead — a highly toxic metal and poison that can result in severe mental or physical impairment, or death.

Three percent of the children younger than 6 years old tested since Oct. 1 have had blood lead levels greater than the federal standard.

"Our goal is to help families reduce their exposure to lead sources," said Dr. Eden Wells, Michigan's chief medical executive. "We have made progress in testing and identifying those with elevated blood lead levels, and the department

will continue to work closely with the Genesee County Health Department to reach these families. We will remain diligent in our ongoing outreach and education efforts.”

Five micrograms of lead per deciliter of blood is the level that the Centers for Disease Control and Prevention considers elevated and triggers health care professionals to follow up with families.

The high corrosive levels of the river water and a failure to use adequate corrosion controls led to unhealthy amounts of lead reaching residents.

The state health department has been providing free water filters and replacement cartridges to Flint residents. The full report can be viewed at www.michigan.gov/flintwater.

Aspen Dental – a long awaited opening

ABC10 – December 3, 2015, Sarah Mac

MARQUETTE — Today was the long awaited opening of a dental care office – one that it’s county of residence may desperately need. ABC 10’s Sarah Mac has the story.

According to the U.S. Department of Health and Human Services, 75 out of 83 counties in Michigan are known as dental health professional shortage areas. Marquette is one of those counties – also known as a dental desert.

The new Aspen Dental office will help provide care to residents in the area.

Director of Operations for Aspen Dental in Wisconsin, Minnesota and Michigan’s U.P. Ron Gornick says, “If you really look at where we focus, we focus on the under-served populations. You won’t find us in major metropolitan areas. We’re in a lot of areas like Marquette, Michigan, where we know there’s need and opportunity, and we’re up here not to judge our patients we’re here just to get them back to oral health.”

Aspen Dental was originally set to open last April, but had to push back the date until they found the right dentist for our cold weather market.

“It was pushed to find the right doctor for this location. I think that sometimes that’s a difficulty. You know, you can’t really open a practice without a dentist,” Gornick added, “and it’s not always easy to find someone that wants to live in Marquette, Michigan, and so we wanted to make sure we made the right decision with that. Dr. Lee is that person. He’s excited to be up here he wants to definitely be involved in the community and give back.”

Aspen Dental tries to make dental care available and affordable. For example, the dental center offers free new patient exams and X-Rays. Aspen Dental takes most forms of insurance and will even offer payment plans for those who are uninsured. The dental center even offers discounted rates from time to time.

The center’s resident dentist is excited to be in Marquette and is ready to serve the community.

Aspen Dental’s resident dentist Dr. Woojin Lee says, “There are a lot of dentists in major cities, overflowing actually, and there are places, cities, rural cities like this one that are under-served and that needs to be taken care of, and that’s the main reason I wanted to come to a city like this.”

The office has extended hours, including Saturdays to best serve the area, and make themselves available for walk-in dental emergencies.

For more information about Aspen Dental Marquette click here.

First Tests Conducted in Wake of Flint Water Scandal

WIN Country 98.5 – December 3, 2015, By Gary Stevens

FLINT, MI (WHTC) - The state Department of Health and Human Services reports that 30 out of over 13 hundred Flint residents tested since October 1st had elevated blood lead levels.

Of that 30, 21 were those age 17 or younger.

It was the first summary report on lead testing called for in the state's action plan related to health concerns about the Buick City's water infrastructure.

Free water filters and replacement cartridges are still being made available to Flint residents by the state after tests this fall found high lead levels among children, caused mainly by a municipal switch to local water sources last year.

GOP lawmakers oppose state aid for Planned Parenthood

The Detroit News – December 3, 2015, By Chad Livengood

Lansing — More than two dozen House Republicans want a state panel to reject a proposed \$1.2 million increase in funding for Planned Parenthood to provide family planning services for low-income Detroit women that do not include abortions.

Led by Rep. Gary Glenn, a group of 29 lawmakers signed a letter Thursday to members of the finance and claims committee of the State Administrative Board urging them to reject the increased grant for Planned Parenthood of Mid and South Michigan.

The GOP legislators contend the funding "is a clear violation of the spirit" of an amendment in the 2016 state budget prohibiting state funding for Planned Parenthood.

"It's the conscience of the House that tax dollars shouldn't be used to support abortions," said Glenn, R-Midland.

But the funding for Planned Parenthood does not go toward abortions, said Jennifer Eisner, spokeswoman for the Michigan Department of Health and Human Services.

"This contract amendment is for family planning services that are funded by federal Title X dollars, which must go toward services including contraception, preconception health, pregnancy testing, basic infertility services, gynecologic services and related preventive health services," Eisner said Thursday in an email.

Eisner said the Legislature's prohibition of funding for Planned Parenthood only applies to state tax dollars.

The grant for Planned Parenthood comes from a mixture of 35 percent federal funds, 8 percent from a restricted state fund, 8 percent local funding and 49 percent that Planned Parenthood generates from patients and donations, according DHHS.

"The state of Michigan does not have leeway to exclude a provider on philosophical grounds," said Lori Carpentier, CEO and president of Planned Parenthood of Mid and South Michigan. "This is federal money. These are not state dollars."

Planned Parenthood provides the health care services to 6,400 low-income Detroit women through a contract that was previously held by the Institute for Population Health in Detroit, Carpentier said.

Opponents of Planned Parenthood have argued that government aid for non-abortion services frees the group to spend more on abortion services.

The State Administrative Board's finance and claims committee meets Tuesday in Lansing to decide whether to approve the grant. The committee is composed of designees of Gov. Rick Snyder, state Treasurer Nick Khouri and Attorney General Bill Schuette.

The full board has a meeting scheduled for Dec. 15 in Lansing.

The proposed amendment would increase Planned Parenthood's total contract with the state to about \$10 million for the 2016 fiscal year, including the fees and donations the organization generates.

Glenn said Republican lawmakers are working on other ways to try to eliminate aid for the abortion provider by cutting off the flow of federal funds.

"If they didn't spend it to give it Planned Parenthood, they could spend it on other state activities," Glenn said of the State Administrative Board. "So they're not mandated to give it to Planned Parenthood."

Carpentier said the state is only a conduit for the federal funding and cannot prevent it from flowing to Planned Parenthood.

"This move would put DHHS and therefore the state of Michigan significantly out of compliance with the federal rules," Carpentier said.

Planned Parenthood has fought similar battles over Title X funding in other states in court, she said.

"We pretty much win everywhere," Carpentier said. "And we wouldn't hesitate to make this a legal issue."

Preliminary state data shows drop in rate of elevated lead levels in Flint

MLive – December 3, 2015 – By Ron Fonger

FLINT, MI -- Preliminary data shows 30 of 1,361 adults and children tested since Oct. 1 in Flint had elevated blood lead levels, according to a new state report.

The 2.2 percent rate of elevated blood lead is below the 6 percent rate found in tests done between July and September, the state said.

The latest numbers are on par with lead levels in the rest of Genesee County, according to the state.

Issued today, Dec. 3, the report includes the first testing data since the announcement of a state plan aimed at lowering lead levels in Flint water and in the blood of infants and young children.

Michigan Department of Health and Human Services Chief Medical Executive Dr. Eden Wells said the data for the current quarter is incomplete but is being used to identify those with elevated blood lead levels and to provide outreach.

Wells said conclusions cannot be drawn from the preliminary test results, which show a lessening of the percentage of individuals with lead levels higher than the federal threshold of 5 micrograms per deciliter.

Dr. Mona Hanna-Attisha, Hurley Medical Center director of pediatric residency, said the numbers are good news but should not give Flint residents a false sense of security.

The fourth quarter data does not reflect past exposure of people to lead, Hanna-Attisha said, because the toxin dissipates from the body in just a few weeks although the effects of exposure last a lifetime.

Unfortunately, she said, the state data also shows blood lead levels spiked in Flint after the city changed its water source to the Flint River in April 2014.

Hanna-Attisha and Marc Edwards, a Virginia Tech professor, said the blood lead levels from this quarter come from a time when many city residents had stopped drinking tap water or were using a faucet filter because of concerns about lead poisoning.

"Thank goodness we got people off this water," said Edwards, who just this week warned city residents that their tap water is still unsafe to drink without a filter despite a reconnection to the Detroit water system last month.

Today's report shows the percentage of adults and children with elevated blood lead levels peaked in the third quarter of 2014, shortly after the city began using river water.

Blood lead levels typically spike higher in the third quarter of each year because exposure to lead, including lead in dust and soil, Wells said.

Flint's results in the third quarter of 2014, however bucked a 20-year trend of generally lower levels of lead in blood, according to the state's data, rising from less than 4 percent of individuals tested to 7 percent one year later.

"There is an increase in elevated blood lead levels ... They occurred after the switch to the Flint River," Wells said. "I cannot say it is because of Flint water."

The state's release of information today also showed:

- Testing since Oct. 1 showed 21 of 969 children age 17 or younger had elevated blood lead levels as well as nine of 392 adults.
- In the third quarter of 2010, 8.3 percent of Flint children 6 and younger showed elevated blood lead levels. The figure decreased to 4.1 percent in the third quarter of 2013. During the same months in 2014, the figure increased to 7.5 percent and decreased to 6.4 percent in the third quarter of 2015.
- 3 percent of children younger than 6 years old and tested since Oct. 1 have had blood lead levels above the federal threshold for lead.

MDHHS said in a news release today that it has collaborated with the Genesee County Health Department and others to distribute information about lead testing to Flint parents.

The state is providing funding for county nurses to work with families when a child's blood lead level is found to have been elevated, the department's statement says.

"During these follow-up visits, nurses coordinate with environmental health investigators to meet with families in their homes to identify lead exposures, address questions and provide water filters," the news release says.

Flint remains in the midst of a public health emergency because of rising lead levels in water and in the blood of children. Hanna-Attisha's study, published in September, was also based on the blood lead levels of Flint children, showing the number of children with elevated levels had doubled across the city and tripled in some areas since the switch to river water.

Although state officials initially questioned the doctor's conclusions, they later reversed their position and praised her work.

Edwards and researchers from Virginia Tech have tested hundreds of water samples in Flint and conducted studies showing treated Flint River water was extremely corrosive, causing increasing amounts of lead to leach into the water supply.

State officials later acknowledged that they failed to require Flint to treat the river water to make it less corrosive.

State says blood-lead levels in Flint kids have dropped

Detroit Free Press – December 4, 2015, By Robin Erb

Fewer of Flint's children have tested positive for elevated blood-lead levels since Oct. 1, with the rate falling to 3% of children under 6, according to new state data.

It's an expected outcome in Flint, where residents have been battling water quality issues for more than a year despite government assurances that the water was safe to drink. Late this summer, independent researchers showed dangerous lead levels in the water and in children's blood, but by then, tons of bottled water had been shipped in and consumed by residents worried about what was pouring from their taps.

The numbers are based on results from 1,361 children. For those who were tested more than once, the state used the highest blood-lead level, said Jennifer Eisner, spokeswoman for the Michigan Department of Health and Human Services.

Blood Lead Level test results

The state routinely examines such data, but it packaged the data in an easier-to-read format this time for the general public as a starting point for continued testing and analysis, she said.

DETROIT FREE PRESS

Push to recall Snyder over Flint water crisis stalls

"The purpose of the report was to show the public that testing is taking place and to explain the results," Eisner said.

The data not only reflect the expected, but it is a limited picture of the population's real exposure, said Dr. Mona Hanna-Attisha, a pediatrician and researcher with Hurley Children's Hospital.

Dr. Mona Hanna-Attisha (Photo: Ryan Garza, Detroit Free Press)

That's because people excrete lead quickly. A child with high blood-lead levels one month might not register with the same levels a month later, she said.

"This most recent data does not capture past exposure," she said.

It was Hanna-Attisha's work that forced the state to reconsider its data, ultimately acknowledging the dangers of Flint's water.

DETROIT FREE PRESS

Flint water mystery: How was decision made?

She had examined the results from blood samples of Genesee County children taken both before and after the city ended its water contract with the Detroit Water and Sewerage Department and began pulling water from the Flint River. The number of Flint children with elevated blood-lead levels — 5 micrograms per deciliter or more — jumped from 2.1% in the 20 months prior to Sept. 15, 2013, to 4.0% between Jan. 1 and Sept. 15 this year. In certain ZIP codes, that number jumped to 6.3%, according to her research.

Hanna-Attisha's work confirmed earlier water testing by Marc Edwards, of Virginia Tech. Edwards showed extremely high levels of lead in water from many of Flint's households.

Five children get new homes

Clare County Review – December 4, 2015, By Pat Maurer

Clare County Adoption Day was presided over by Family Court Judge Marcy Klaus the Thursday before Thanksgiving. This year Judge Klaus finalized the adoption of five children, two girls and 3 boys ranging in age from 3 to 14 years old.

"Adoption Day is such a special day for the families and for the Probate and Family Court," Judge Klaus said. "It is the best feeling for me to look out and see the smiles and tears of happiness in the courtroom. Often the kids and families have been part of the court process for a couple of years. The hugs and smiles from the kids make it all worth it. This year we didn't have enough room for all of the folks who came to help celebrate the forever families. It's truly a pleasure and a privilege to preside over Adoption Day."

Adoption Day is an annual event that takes place nationwide just before the holidays. Truly one of the happiest days at the courthouse as friends and family came together to celebrate the finalization of "forever families".

With the theme of "Giving Thanks for Families," courts statewide celebrate Adoption Day officially on the Tuesday before Thanksgiving. Chief Justice Robert P. Young, Jr. said Michigan Adoption Day is aimed at raising awareness and encouraging potential adoptive and foster parents to step forward. "Adoption Day gives the public a window into the adoption process," Young said. "...Every child deserves a loving, forever home."

As of September 30, there were about 13,000 children in Michigan's foster care system and 2,400 children who are available for adoption because their parents' rights have been terminated. More than 1,700 children were adopted in Michigan in fiscal year 2015 through DHHS, the Department of Health and Human Services, or through private adoption agencies. On average 51 percent of children were adopted by their foster parents; 40 percent were adopted by relatives; and nine percent were adopted by a recruited family.

On Adoption Day this year judges in more than 30 courtrooms around the state created forever homes for about 100 Children.

Anyone interested in adopting a child may contact MARE, the Michigan Adoptive Resource Exchange, at 3840 Packard Rd., Ann Arbor, 48108. They can be reached Monday through Friday from 8:30 a.m. to 5 p.m. at (800) 589-6273; by fax at (734) 528-1695 or through the MARE website.

After the formal hearing, all five of the children adopted in Clare County were presented with a teddy bear by Judge Klaus, new parents received a special certificate, and a party with refreshments was hosted by the Family Court.

Past adoption days have included adult adoptions, step-parent adoptions and single parent adoptions.

Despite age, woman provides 3 teens a 'forever family'

Livingston Daily – December 4, 2015, By Abby Welsh

A 69-year-old Imlay City woman decides to foster and adopt Livingston County children.

When Norine Kilbourn received a call about a pregnant teenager who needed a good home, she was wary about fostering her.

It wasn't because the 15-year-old at the time was a teen or pregnant, but because at 69-years-old Kilbourn repeatedly asked herself, "Is fostering really for me?"

Fostering didn't exactly work out for her the first time around.

"This first girl I fostered would hit me, kick me, and just had the worst attitude toward me. She was so abusive toward me and I didn't feel safe in my own home," Kilbourn said. "Unfortunately, it didn't work out with us.

"When I first moved in, I didn't know or imagine a complete stranger could love and care for me the way Nana does for me. I never thought we would become as close as we have. We are closer than I am with my real grandma and I don't think I would be where I am or be the person I am without Nana."

Kaitlyn, one of Norine Kilbourn's three adoptive children

"It was definitely a challenge because (foster children) all have different stories and experiences. You never know what you are truly walking into ... especially at my age," she noted.

Kilbourn, who is from Imlay City and has fostered children all over the state, originally decided to apply for her foster license because she knew in her heart she wanted to help as many children as possible, no matter her age.

So, Kilbourn decided to give fostering another chance. She spoke with her adoption caseworker and a LACASA advocate supervisor, who supervises foster children and found another child in need of a good home.

That's when Kilbourn first met Kaitlyn, a 15-year-old girl expecting her first child.

"I wasn't too keen on teenagers but she was pregnant at 15 so I wanted to help and her baby," Kilbourn said.

What she didn't expect was that she would become so attached to both of them.

"I got more attached than I thought I would, actually," Kilbourn said. Kaitlyn, now 17, made the tough decision to place her daughter for adoption because she knew the infant "deserved a better life" than she could provide.

In addition to fostering Kaitlyn, Kilbourn decided it was time to foster two more children: Chyanne, 17, and Lucas, 13.

"I told myself no teenagers, but ended up with three," Kilbourn chuckled.

While there were bumps along the way, the three kids became attached to Kilbourn the last two years and formed their own family.

A new home

On an early November morning just before Thanksgiving, Kilbourn and her three foster children walked into a Livingston County courtroom, sat down and waited for their names to be called.

"It's been a long journey leading up to this day, but I'm as ready as I'll ever be," Kilbourn said as she glanced over at her three children.

It was the day three foster children became her legal children.

"I didn't know I was adopting all three today, so that was a bit of a surprise," Kilbourn laughed, thinking she had to adopt all three with separate court hearings.

Kilbourn, known as Nana to her children, was one of many statewide who legally adopted foster children on Nov. 24 as part of Michigan's 13th annual Adoption Day.

Judge Miriam Cavanaugh joined families as they welcomed new members to their families.

"This day is important to create the long lasting 'forever families' for the children of Livingston County who are in need of permanency and stability in their lives," Cavanaugh said. "Livingston County is happy to be part of this event and providing the platform for these children to become part of their own forever family."

The Kilbourn teens, as well as many other children, were able to go home to their "forever family" that day, just before the holidays.

During each court hearing, children told the judge reasons they wanted to be adopted into their foster home.

"When I first moved in, I didn't know or imagine a complete stranger could love and care for me the way Nana does for me," Katie said to the judge as tears filled her eyes. "I never thought we would become as close as we have. We are closer than I am with my real grandma and I don't think I would be where I am or be the person I am without Nana."

Chyanne followed Katie's response and told the judge he was "more than grateful" for all Kilbourn has done for the three siblings.

"She's a great person and gives us all what we need," Chyanne said. "She loves us and shows it all of the time and takes good care of us and I want to be part of this family officially."

The system

There are 13,000 children in the foster care system in Michigan. Although the goal for most of these children is reunification with their birth parents, an estimated 2,100 to 2,400 children have chosen adoption and picked the families with whom they wish to live.

"To put a face to each name on each folder ...to put a face to each name on each of these folders and seeing them go home to a loving families, is just a huge moment to be part of."

Judge Miriam Cavanaugh

In Michigan, 1,700 foster children have already found permanent homes.

The county has completed roughly 78 adoptions so far this year.

To spur more awareness and adoptions, Gov. Rick Snyder proclaimed November as Adoption Month.

The Michigan Department of Health and Human Services works with partners in the court system and private adoption agencies to find loving families who want to adopt.

"Finding homes that children in our foster care system can call their own is one of the top priorities for MDHHS," said Steve Yager, executive director of the department's Children Services Agency. "To reach their fullest potential, children need to have permanent homes. When the state can't return a foster child to his or her home, it's imperative that we find a permanent home through adoption as quickly as possible."

Before Adoption Day, the children were just names in a folder Cavanaugh read through.

"To put a face to each name on each folder ...," Cavanaugh said, pausing as her tears choked her. "To put a face to each name on each of these folders and seeing them go home to a loving families, is just a huge moment to be part of," she said.

Low income energy assistance available to residents

VP-MI.com – December 3, 2015, By Kathleen Woodford, Mineral Independent

In Mineral County, almost 30 percent of the population between ages 18 and 64, lives in poverty. And as the temperatures drop, some people may not have enough money to heat their homes. Luckily the Low Income Energy Assistance Program (LIEAP) and Weatherization is available to low income residents who need help with their heating bills. LIEAP is federally funded through the Department of Health and Human Services.

In order to qualify for LIEP individuals must be a resident of the state of Montana and they must need financial assistance for home energy costs. Income levels are as follows:

For a household size of one person, the maximum income level per year is \$21,702.

For a household of two people, it's \$28,379. For three, it's \$35,057; for four it's \$41,734.

LIEP also assists with Weatherization for residents homes. To apply, people need to provide verification of their gross income over the past 12 months along with a copy of their most recent heat fuel bill. The Missoula Human Resource Council is the contact for Mineral County at (406) 728-3710.

Michigan bills would ease vaccination waiver process, undermine new health rules

MLive – December 17, 2015 By Jonathan Oosting

LANSING, MI — A state policy requiring parents to sit down with a local health worker before obtaining a vaccination waiver for their kids is "bureaucracy gone a bit too far," according to the chairman of the Michigan House Health Policy Committee.

"It's a parent's basic right to determine their child's education and health care," said Rep. Mike Callton, R-Nashville, who plans to hold a public hearing on new legislation that would gut rules established by the Michigan Department of Health and Human Services.

"To act as if a parent who wants a waiver is irresponsible or ignorant — they have to get a lecture — I just don't agree with it."

State law generally requires parents to immunize their school-age kids against vaccine-preventable diseases, such as measles, whooping cough, polio, mumps and tetanus — unless they get a waiver.

Michigan grants waivers for medical or religious reasons, and it is also one of 20 states that allows waivers for "philosophical" objections, which is the most common form of parental request.

MDHHS, pointing to a connection between low immunization rates and various outbreaks, [adopted new rules in 2014](#) that require parents seeking a waiver to be educated by a local health worker about vaccines and the diseases they are intended to prevent.

Parents must also sign a form acknowledging that they have been informed of the risks for their child and the risks their child may be causing others.

It's a policy that works, according to MDHHS Director Nick Lyon, who pointed out that vaccination rates appear to be inching up as waiver rates decline.

"Immunizations are proven to be effective and safe. ...When people choose not to get vaccinated, they're not only putting themselves at risk, they're putting others at risk," Lyon told MLive.com this week.

"I think having a conversation with a professional to explain this is appropriate. I'm not telling people they have to (get immunized), I just want them to be informed."

Related series: [Investigating Michigan's dangerously low vaccination rates](#)

But the policy goes too far by forcing some parents to drive long distances for appointments at county health departments, according to Callton, who suggested DHHS consider offering parents an online education option instead.

House Bills [5126](#) and [5127](#), introduced last week by Rep. Tom Hooker, would prohibit the department from enforcing waiver requirements not mandated in state law, including the immunization education discussions.

"In some cases, we've had reports that parents were harassed or were being treated like they were knowingly harming their children," Hooker, R-Byron Township, said Tuesday. "Some of them that came and spoke to me said this is not a good thing."

Hooker, who noted that he immunizes his own children, said the parents who have complained to him about the policy have valid reasons for seeking waivers. Some believe it is safer to spread vaccinations out over a longer period of time, he said, and others are concerned that vaccines may contain cells that once belonged to aborted fetuses.

Hooker suggested that recent outbreaks may have less to do with immunization waivers than with the number of undocumented immigrants entering the state — "I'm saying they're bringing some of these diseases with them" — a claim that [FactCheck.org](#) has labelled a false narrative.

The legislation, which goes beyond the waiver process, would also prohibit local health officials from pulling a non-immunized child out of school when there is a threat of a communicable disease — unless that threat amounts to an epidemic.

"One or two cases of measles is not an epidemic," Hooker said. "If something like (an epidemic) were to happen, the health department would not be barred from closing a school or keeping kids from danger."

Various public health groups working to improve immunization rates in Michigan are already [preparing to speak out](#) against the bills when and if they get a hearing, which Callton plans to schedule in the next two or three months.

"This is an issue where Michigan physicians serving children and families need to put a stake in the ground and hold firm on following evidence based guidelines regarding vaccinations," Dr. Al Juocys of MedNetOne Health Solutions said in a statement. "Any legislation easing restrictions on immunizing children increases the potential for harm to our children a broader scale."

Michigan In State Of Emergency After Contaminated Water Causes High Levels Of Lead In Kids

Medical Daily – December 16, 2015, By Justin Caba

The city of Flint, Mich., made the decision to break away from Detroit's water system last year, and the city's residents have been struggling to find clean drinking water ever since. Mayor Karen Weaver declared a State of Emergency on Monday over the dangerously high levels of lead in the city's drinking water supply.

Assistant to the City Administrator, Sean Kammer, called the city's current predicament a "man-made disaster caused by the city." The city's decision to move away from Detroit's water supply was made to save money. The switch to water from the Flint River was only supposed to be a temporary measure until a pipeline to Port Huron Lake was built. They didn't count on the water being improperly treated and it drawing lead from the pipes.

"Mayor Weaver states that this was one of the things she had promised to do while campaigning for mayor," Krammer said in the statement. "Declaring an emergency intends to help raise awareness of the issue that the water is still not safe to drink and activates the City's Emergency Support Plan in order to respond to the crisis."

The city's decision to switch to water from the Flint River was reversed on Oct. 16, 2015. The city has gone back to the Detroit Water and Sewage Department as its source of water, but experts fear the switch may have come too late seeing as lead levels in most Flint homes remain well above the Environmental Protection Agency's (EPA) action level of 15 parts per billion. Flint has set up locations that offer free filtered water.

"Ensuring that families in the Flint area have access to resources that will help reduce the potential for lead exposure is our top priority," said Nick Lyon, director of the Michigan Department of Health and Human Services, in a statement. "I want to thank our partners who have mobilized to make water filters available — a point that highlights the importance of continued collaboration at the local, state and federal level as we move forward."

According to the Centers for Disease Control and Prevention, exposure to lead at a young age can result in various health concerns, including behavioral problems and learning disabilities. In fact, experts at the CDC say there is "no safe blood level" for childhood lead exposure. Some older residents of Flint have complained about a variety of health concerns potentially tied to water contamination, including itchy skin, rashes, headaches, and their hair falling out.

FEMA Sends 28000 Liters of Bottled Water to Flint, Mich.

The Leader Chronicle – December 17, 2015, By Evan Keller

Flint's water system is antiquated.

"Flint residents deserve safe, clean water, and the Governor's Office continues to work with Mayor Weaver".

Mayor Karen Weaver says that the potential impact of lead poisoning on the physical and mental health of Flint children will require federal resources that can only be accessed by making the emergency declaration.

The mayor would like Genesee County Commissioners to hold a special meeting this month to back her call to declare a state of emergency in Flint.

Flint switched from Detroit's water system a year ago to Flint River water in a cost-cutting move while under state emergency financial management. Nearly immediately, residents started complaining about the urine-colored water, saying it tasted and smelled terrible.

As this Washington Post story points out, the World Health Organization details the many effects of lead exposure to children, including "reduced intelligence quotient (IQ), behavioral changes such as shortening of attention span and increased antisocial behavior, and reduced educational attainment".

Exposure to lead can cause behavior problems and learning disabilities in young children.

Researchers are concerned though that many people in Flint may have consumed lead-tainted water for many months before switching to bottled water. In a class-action lawsuit filed in November by Flint residents, they claim: "The deliberately false denials about the safety of the Flint River water was as deadly as it was arrogant".

"For more than 18 months, state and local government officials ignored irrefutable evidence that the water pumped from the Flint River exposed [residents] to extreme toxicity", the lawsuit alleges. For decades, Flint relied on neighboring Detroit for its purified water. The Food Bank will donate the water bottles to "partner agencies", including soup kitchens, homeless shelters and food pantries, and then they'll be distributed to residents.

The Michigan Department of Health and Human Services said the switch to the Flint River was intended as a stop-gap measure until the completion of a pipeline to Port Huron Lake as the source for Flint's water.

Mercury still a danger in the Great Lakes

MSU Extension – December 16, 2015, By Katy Hintzen

Mercury is one of the most persistent chemicals found in the Great Lakes. It gradually works its way up the food chain in a process called bioaccumulation. This means that mercury accumulates in greater quantities in predators at the top of the food chain such as large fish and humans. Imagine a lake trout that contains mercury built up from all of the smaller prey fish it has consumed over time or the fisherman that eats several of those lake trout every month. Exposure to sufficient levels of mercury over time can lead to significant health consequences including damage to the central nervous system, brain, heart, kidneys and immune system. Mercury is especially damaging to the still-developing brains of fetuses and children.

How does this harmful chemical end up in Great Lakes waters? There are some naturally occurring sources of mercury but most of the mercury in the Great Lakes comes from atmospheric deposition. Coal-fired power plants, waste incineration, metal smelting and mining release mercury into the air in its inorganic form. That mercury eventually settles back down onto the surface, some of it falling onto Great Lakes waters. This inorganic mercury is then converted through a series complex chemical processes into organic methylmercury. It is in this organic form that mercury causes health problems in humans, fish and wildlife. Bacteria living deep in lake sediments play a key role in this conversion process.

In 1997 the United States and Canadian governments came together to sign the [Great Lakes Binational Toxics Strategy](#) which called for the virtual elimination of Level 1 substances from the Great Lakes. A host of harmful chemicals fall under the category of Level 1 including PCBs, dioxins, DDT and mercury. In 2010 the Great Lakes Regional Commission, a consortium of regional leaders and policy makers, authored the [Great Lakes Mercury Emission Reduction Strategy](#) with detailed regulatory and policy recommendations for state and federal action to reduce mercury emissions.

Mercury concentrations and trends vary across the Great Lakes. [A 2011 study](#) found mercury levels in sediment core samples taken from 91 inland lakes across the region were down 20 percent from 1980s levels but mercury concentrations remain three to four times higher than pre-industrial levels. All five of the Great Lakes still have fish consumption advisories in effect for mercury contamination and since the 1990s mercury levels in fish and wildlife in some areas of the Great Lakes have begun rising again. While atmospheric mercury emissions in the U.S. have declined in recent decades they've increased in other parts of the world and policy makers are increasingly concerned that these sources may be counteracting local regulatory efforts.

[A newly released report](#) by the International Joint Commission (IJC) argues that comprehensive regional monitoring of mercury levels is critical to evaluate the impact of regulatory measures and inform future efforts to design international mercury reductions strategies. There is no comprehensive sustainably funded network for monitoring mercury deposition in the Great Lakes. The IJC recommends that the Canadian and U.S. governments make funding available to

establish such a network and to investigate the sources of ongoing deposition. The IJC also recommends that the two countries advocate for international agreements to regulate global sources of bioaccumulative chemicals like mercury.

Michigan Sea Grant helps to foster economic growth and protect Michigan's coastal, Great Lakes resources through education, research and outreach. A collaborative effort of the University of Michigan and Michigan State University, Michigan Sea Grant is part of the NOAA-National Sea Grant network of 33 university-based programs.

Following recent chickenpox outbreak, doctors urge vaccination

WWMT – December 16, 2015, By

BATTLE CREEK, Mich. (NEWSCHANNEL 3) - Following a recent chickenpox outbreak throughout the state, the Michigan Department of Health and Human Services is reminding parents to get their children vaccinated.

Chickenpox isn't what it was years ago; it's becoming less common as a disease, but more severe if you contract it.

The Calhoun County Health Department says the goal is to eliminate the disease altogether, through a series of vaccines.

Doctors say your child should have a shot at age 1, and another at age 4, right before they start kindergarten.

With both of these shots, the disease is 95 percent preventable.

However, many parents are choosing not to have their kids immunized.

Because of this, doctors say chickenpox numbers are up, as Calhoun County has seen 8 cases since July--one of four Michigan counties that has seen outbreaks.

"Now some of the risks of chicken pox include serious skin infections, pneumonia, brain infections, bone infections, joint infections, and even death," said Michelle Thorne, the personal health services manager with the Calhoun County Health Department. "Those become extremely serious for babies, pregnant women, and those that have weakened immune systems."

Most insurance companies cover the cost of these vaccines, and they're available at doctors offices and health departments throughout the state.

Shingles Increases Risk for Stroke and Myocardial Infarction

Medscape – December 17, 2015, By Tara Haelle

An episode of shingles, caused by the herpes zoster virus, temporarily increases the risk for stroke and potentially myocardial infarction (MI) in the months after the infection, according to two recent studies.

One study, published online December 15 in *PLOS Medicine*, using a self-controlled case series design, identified a twofold greater risk for ischemic stroke and nearly a twofold risk for MI in the first week after shingles diagnosis. However, the risk for both incidents gradually decreased during the subsequent 6 months. Multiple previous studies have identified the link between shingles and transient risk for stroke, but fewer have linked herpes zoster to MI.

The other research, a retrospective cohort study published online December 15 in the *Mayo Clinic Proceedings*, similarly found an increased risk for stroke in the 3 months after shingles, but the findings of increased risk for MI disappeared after controlling for other confounders, including indicators of overall poorer health.

"[I]t is possible that an increased long-term risk of MI and stroke is due at least in part to the steeper multi-morbidity trajectory in patients with herpes zoster," write Barbara P. Yawn, MD, from Olmsted Medical Center in Rochester, Minnesota, and coauthors. The mechanism for increased risk for stroke in the 3 months after shingles diagnosis "is most likely due to productive [varicella zoster virus] infection in intracerebral arteries after transaxonal spread of virus on reactivation from cranial nerve ganglia," the authors write.

Dr Yawn and colleagues matched 4862 adults with at least one shingle episode between 1986 and 2011 by age and sex with 19,433 individuals with no history of shingles. The researchers compared the rate of incident stroke or MI during an average of 7 years in the patients, all aged 50 years and older and residents of Olmsted County, Minnesota.

Although obesity and smoking history were excluded as covariates because of poor records, the researchers adjusted their analysis for stroke risk factors identified by the US Department of Health and Human Services Taskforce in 2010, including hypertension, dyslipidemia, cardiac arrhythmias, congestive heart failure, diabetes, depression, and chronic obstructive pulmonary disease. They adjusted for vasculopathies and stroke for patients with MI and for coronary artery disease including MI in patients with stroke.

Among 4478 patients with shingles and 16,800 without (excluding those with history of stroke after confounding adjustment), those with shingles had 53% greater odds of incident stroke in the next 3 months (odds ratio [OR], 1.53; 95% confidence interval [CI], 1.01 - 2.33) after herpes zoster diagnosis.

An analysis of 4454 individuals with shingles and 16,740 without (excluding those with MI history) initially revealed an association between MI and shingles at 3 months, 6 months, 1 year, and 3 years after herpes zoster infection, but adjustment for other risk factors only left a significant association at 3 months ($P < .04$). "Herpes zoster and MI are not strongly associated at any point in time using any type of analysis, and the association of MI and herpes zoster identified at 3 month by logistic regression is not robust across differing analytic approaches," the authors note.

In the *PLOS Medicine* study, Caroline Minassian, PhD, from the London School of Hygiene & Tropical Medicine in the United Kingdom, and colleagues examined records of 351,865 Medicare beneficiaries, aged at least 65 years, who had shingles and either a stroke or MI between 2006 and 2011. Of these, 42,954 had an ischemic stroke, and 24,237 had an MI. In a self-controlled case series method, the time between shingles and the cardiovascular event in each person is compared, with adjustments for age, to determine whether the stroke or MI occurs more frequently closer to the shingles infection.

In the first week after shingles diagnosis, risk for stroke more than doubled (incidence ratio [IR], 2.37; 95% CI, 2.17 - 2.59), and risk for MI increased 1.68 times (IR, 1.68; 95% CI, 1.47 - 1.92). Risk for stroke and MI eased off in the 6 months after shingles diagnosis. Although the researchers did not find that herpes zoster vaccination significantly mediated the risk for stroke or MI, only 2% of those with MI and 3% of those with stroke had been vaccinated, thereby limiting the power to assess vaccination influence.

"The association we observed with MI is suggestive of a systemic association rather than one localized to the brain," write Dr Minassian and coauthors. "A less marked association was observed for a secondary analysis of zoster and hemorrhagic stroke."

Among the multiple possible mechanisms for the association between shingles and stroke or MI is "that inflammation may lead to arterial thrombosis on a background of atherosclerosis," the authors suggest. "A hemodynamic mechanism is also a possible basis for the increased risk of stroke following zoster," they write, and either blood pressure elevation from shingles pain or shingles-induced "vasculopathy with arterial rupture or aneurysm formation" could increase risk for hemorrhagic stroke.

The Minassian study was supported by a Wellcome Trust Senior Fellowship in Clinical Science, the Stroke Association, and the UK National Institute for Health Research. One coauthor has consulted for GlaxoSmithKline, and another coauthor has consulted for Gilead and GSK and holds stock in GSK. The Yawn study was supported by Merck & Company and the National Institutes of Health. The authors have disclosed no relevant financial relationships.

People on public assistance spent hundreds of millions on the lottery — and took home \$22 million in winnings

Penobscot Bay Pilot – December 16, 2015, By Dave Sherwood

AUGUSTA – Maine residents on public assistance have spent hundreds of million of dollars on lottery tickets – enough to win more than \$22 million in prizes between 2010 and 2014, including eight jackpots worth at least \$500,000 each.

The data on winnings comes from a state Department of Health and Human Services (DHHS) memo obtained under Maine's open records act. The agency cross-referenced a list of people who had won a Maine lottery prize of \$1,000 or more against a list of people on state benefit programs – food stamps, aid to families and MaineCare. The estimate of total spending comes from Dr. David Just, a behavioral economist and state lottery expert at Cornell University.

"It's pretty clear that there's a lot of money from people on welfare cycling back to the state through the lottery," said Just, whose research in Maine has shown that lottery sales increase with poverty and unemployment. "But the real story here is how much people had to spend in order to win these amounts."

Given the long odds on winning, Just, who has studied lotteries in 39 states, estimates benefit recipients statewide spent "hundreds of millions of dollars" on losing tickets in order to take home \$22 million in winnings. Since 2010, nearly one of every four people who hit jackpots of least \$1,000 in the state lottery was receiving government benefits for the poor, according to DHHS data.

According to the memo, the winners were enrolled in at least one of the state's three principal public aid programs: Supplemental Nutrition Assistance Program (SNAP), known commonly as food stamps; Temporary Assistance for Needy Families (TANF); and MaineCare, the state's Medicaid program. The identities of individual benefit recipients were not disclosed.

Sam Adolphsen, chief operating officer for DHHS, said in most cases, there is no law preventing someone who receives public benefits from purchasing a lottery ticket. Nor could he say for certain that lottery winners had been automatically disqualified from benefit rolls.

"Under current rules, it is hypothetically possible to win a million dollars and stay on food stamps," Adolphsen said.

Officials said a review of the lottery winners — part of a larger effort to ensure compliance with the eligibility rules for all public assistance programs — was still underway.

The agency memo describes a plan to tighten rules and immediately remove anyone who has won more than \$5,000 from the food stamp program. The proposal, which has yet to be announced publicly, is the latest in a larger effort by the LePage administration to reduce what it sees as waste and abuse in the state's taxpayer funded welfare system.

In fiscal year 2015, the state and federal government spent an estimated \$2.87 billion on the benefit programs for Maine's poor, according to DHHS data. The previous calendar year, nearly one thousand Mainers on public assistance won \$4 million in prizes of \$1,000 or more in the state's lottery; winning for lesser prizes have not been determined and winnings for 2015 will not be available until next year.

“Taxpayer dollars should be going to the neediest people in the state and absolutely not subsidize gambling, in any fashion,” said Adolphsen. “Even one dollar is too much.”

But a social activist and a key lawmaker said the blame rests with the government.

“I agree we shouldn’t allow people on these programs to buy lottery tickets, but this is a problem we created. Our state-funded lottery uses advertising to market itself very effectively,” said state Rep. Drew Gattine, D-Westbrook, chair of the legislature’s Health and Human Services committee. “The state is selling something to people that they shouldn’t be buying and then they want to tell people they’re bad for buying it?”

“These are very poor people. Most of them have turned to the lottery because they see no other option,” said Chris Hastedt, policy director at Maine Equal Justice Partners, a group that provides legal aid to the poor. “They’re desperate.”

KNOTTY RULES

The issue is complicated not just by politics, but also by a tangle of complex and sometimes ambiguous laws.

Recipients of food stamps, for example, are not allowed to purchase lottery tickets with their benefits, but they can with their own cash. For those on welfare, it is legal to spend cash benefits to gamble in the state-run lottery, but not at a privately-run casino. And MaineCare recipients, who receive subsidized health care, can spend their own money freely on the lottery.

“We can’t tell people what they can and can’t do with money they’ve earned, but we should be doing everything possible to ensure public money isn’t being diverted into things that aren’t helping people get out of poverty,” said Health and Human Services Committee co-chair Sen. Eric Brakey, R-Androscoggin.

For those who win, the prize must be reported to the state. But that doesn’t necessarily disqualify the winner from receiving benefits, according to Beth Hamm, a 27-year veteran of the Department of Health and Human Services eligibility division.

“This is where things get complicated,” she said. “There is no simple answer.”

Under the food stamp program, for example, there is effectively no asset test to determine how much the recipient has in bank accounts, for example, so a lottery winner could theoretically remain qualified for food stamps. But under welfare, lottery winnings would likely make a person ineligible, though existing rules might allow a winner to use that money to buy a home and still receive benefits. And MaineCare has an asset limit, but it applies only to the blind, disabled and elderly, not families with children.

Federal laws, which also apply to most benefit programs, are unclear.

The 2014 Agricultural Act, for example, requires that households with “substantial” lottery or gambling winnings lose eligibility for food stamps. But the U. S. Department of Agriculture has yet to define “substantial,” complicating enforcement, Adolphsen said.

“They give lip service to making sure these tax dollars are used only for appropriate purposes, but they don’t follow up,” Adolphsen said.

A spokesman for the agriculture department said the food stamp program said the federal government encourages states to enact their own regulations, though a change in the rules would need to be vetted by federal officials.

Some states have been successful in passing such rules.

In New York, a person who wins more than \$600 in the lottery must use a portion of the money to repay public assistance received in the past 10 years.

In Michigan, a 2012 law required state officials to begin crosschecking lottery winners against a list of public assistance recipients each week. The following year, the state removed 810 lottery winners from benefit rolls, according to Bob Wheaton, a state spokesman.

“That saved taxpayers nearly \$2 million,” he said.

Poor are avid lottery players

The Maine Center for Public Interest Reporting obtained the DHHS report shortly after publishing an investigation that found players buying tickets in Maine’s poorest towns spend as much as 200 times more per person on lottery tickets than those living in wealthier areas.

In Washington County, where one in five people receive food stamps, lottery players in some towns spent as much as \$1,313 annually on the lottery, according to state sales data. By contrast, players in Kennebunkport, a wealthy coastal town where fewer than 1 in 20 people receive food stamps, spend just \$6 per person on lottery tickets.

The average annual food stamp benefit in Maine is approximately \$1,249 per person.

The state has never studied the impacts of the lottery or its marketing on Maine’s poor and unemployed, despite tripling its in-state advertising budget in the past decade, the investigation showed.

Hastedt, of Maine Equal Justice Partners, said the government encourages poor people to play the lottery, so it shouldn’t be surprised when they win.

“The great irony is that the administration is operating a lottery system that expressly targets people living in poverty ... tempting them to dream a little about a better life for themselves and their children,” she said. “And now, it targets them ... with shame and penalties for doing just what that state-financed advertising lured them into doing.”

Following the Center’s first stories on the lottery, some lawmakers of both parties called for closer scrutiny of the \$230 million lottery, including an inquiry into whether the state may be targeting the poor in its advertising.

But for the lottery, which nets more than the state’s corporate income tax, less aggressive advertising could mean less money for state coffers — dollars that would otherwise need to be offset by higher taxes or reduced services.

“The lottery is a major revenue stream for the state,” said Cornell’s Just. “No one is likely to want to question this too closely.”

Chickenpox outbreaks prompt vaccination advisory; Midland County has had eight cases this year

Midland Daily News – December 16, 2015

The Michigan Department of Health and Human Services is advising parents to make sure their children are up to date on vaccinations against chickenpox.

Chickenpox outbreaks have been reported in recent weeks in Grand Traverse, Calhoun, Muskegon and Wayne counties, and have involved mainly unvaccinated children in school settings. Several of the cases have resulted in hospitalization.

Since the beginning of the year, Midland County has experienced eight confirmed or probable cases of chickenpox.

"The cases have been sporadic," Midland County Health Director Mike Krecek said. "It's nothing unusual. We haven't had outbreaks like Grand Traverse, Calhoun, Muskegon and Wayne. We had a couple of cases we thought were chickenpox, but when we tested them, we found out they weren't."

Before the use of the vaccine, there were an estimated 4 million cases annually, with about 11,000 hospitalizations and an average of about 100 chickenpox-related deaths each year in the United States.

Studies have shown the recommended two-dose series given in childhood is somewhere between 89 percent and 98 percent effective in preventing any mild-to-moderate chickenpox disease and 100 percent effective in preventing severe chickenpox.

Krecek said that the number of chickenpox cases in Midland County have gone way down because of vaccinations. "Sometimes the vaccines are ineffective, but then the cases are not nearly as severe," Krecek said.

The state has also seen a sharp reduction in cases.

"Since the introduction of the chickenpox vaccine 20 years ago, the immunization has greatly reduced the incidence of illnesses, hospitalizations and deaths related to the disease. Michigan has seen a 97 percent decline in chickenpox in that time," said Dr. Eden Wells, chief medical executive with MDHHS. "The best thing you can do to protect your loved ones and community against chickenpox is to make sure your family is immunized."

Optimal protection in a community occurs when everyone who can be vaccinated, is vaccinated, the MDHHS stated. Immunization against chickenpox and other vaccine-preventable diseases is required for school entry in Michigan. However, parents have the option to waive the requirement through their local health department.

Chickenpox is caused by a virus in the herpes virus family and is characterized by an itchy, blistery rash. The rash may be preceded or accompanied by fever, tiredness, headache and loss of appetite. Chickenpox is highly contagious, with the virus spreading through coughing, sneezing and other contact with respiratory secretions. The virus has the capability to remain in the body indefinitely and reactivate later in life. When the chickenpox virus reactivates it causes a painful condition called shingles.

Chickenpox can be variable, ranging from mild with few "pox" lesions to very severe illness requiring hospitalization. Complications such as pneumonia, bacterial infections and meningitis are more likely in adolescent and adult age groups.

http://www.ourmidland.com/news/chickenpox-outbreaks-prompt-vaccination-advisory-midland-county-has-had-eight/article_a1e21a70-f493-5728-9f62-a8fce57f652f.html

Michigan officials emphasize need for chickenpox vaccination

The Union Oracle – December 17, 2015, By Alonzo Wright

The Michigan Department of Health and Human Services says Tuesday that outbreaks have been reported in recent weeks in Calhoun, Grand Traverse, Muskegon and Wayne counties and have involved mainly unvaccinated children in school settings. "Since the introduction of the chickenpox vaccine some 20 years ago, we've seen significant reductions in the incidents of illness, hospitalizations and deaths", she said.

Government officials across the nation have debated vaccine requirements and school exemptions amid a growing concern that parents who won't vaccinate their children are making the nation sicker.

Chickenpox, or varicella, is known for creating an itchy rash that may be preceded or accompanied by fever, tiredness, headache and loss of appetite. It's highly contagious, spreading through coughing and sneezing.

The spread of chickenpox can be controlled with vaccination, said Dr. Eden Wells, chief medical executive with the health department. "The best thing you can do to protect your loved ones and community against chickenpox is to make sure your family is immunized". This virus has the capability to remain in the body indefinitely as a latent infection and reactivate later in life.

Children are required to be up-to-date on their immunization shots before starting school in MI, but parents can opt out of the requirement by notifying local health departments.

Chickenpox can be variable, ranging from mild with few "pox" lesions to very severe illness requiring hospitalization.

Critics claim that this vaccine has led to a rise in shingles cases.

Studies have shown the recommended two-dose series given in childhood is somewhere between 89 percent and 98 percent effective in preventing any mild-to-moderate chickenpox disease and 100 percent effective in preventing severe chickenpox.

Governor's task force on Flint water crisis releases early recommendations

MLive – December 17, 2015, By Ron Fonger

FLINT, MI -- Current actions to protect the public from lead in water appear to be taking place without a system to measure results and delineate responsibilities, according to a task force charged with reviewing Flint's lead in water crisis.

In a letter to Gov. Rick Snyder, who appointed the Flint Water Advisory Task Force in October, the group acknowledged steps, including distribution of free water filters, that have been taken to carry out the governor's plan to address lead levels in the city's drinking water.

But the group also makes initial recommendations for improvement, including that the state address:

The need for the Michigan Department of Health and Human Services and Department of Environmental Quality to set goals for actions in collaboration with local and federal agencies and organizations.

The need for a set of corresponding timelines for the goals.

The need to establish responsibility for meeting the goals in a timely fashion and for contingency plans for the state if the goals are not being met.

The need for clear, regular communication with the Flint community and stakeholder groups regarding action steps and updates.

That a single person or entity -- "potentially independent of any one particular state agency" -- serve as the point person to coordinate ongoing work.

"While the task force is far from done with our work, the initial review has presented a very disturbing situation that will require many actions to both help those that have suffered," task force member Ken Sikkema said in a news release issued today, Dec. 17.

The task force also released the governor's response to its letter. In it, the governor says he has seen progress and recognizes "there is more work that must be done to ensure that this progress continues" regarding the Flint water crisis.

The task force letter says it is important that someone "potentially independent" of any state agency be appointed to coordinate ongoing activities and report on mitigation measures.

Snyder's letter recommends that Harvey Hollins, the governor's director of the Office of Urban Initiatives, act as coordinator of Flint water work.

"Harvey is well-versed in the issues and the challenges face by our cities and will be effective in this role," the letter says.

The governor's letter says he supports the suggestion of a dashboard approach to making information "about our work and progress more accessible to the Flint community," and says he has retained Chris DeWitt, a former Democratic strategist, "to strengthen community outreach and "make sure residents have access to the information they need."

State Senate Minority Leader Jim Ananich, D-Flint, said in a statement today that Flint needs a trained emergency management professional to coordinate assistance efforts here.

"Political appointees and PR people are what got us into this mess and they aren't who we need leading us out of it," Ananich's statement says. "Anything less than a professional trained in emergency management or public health will not suffice."

The governor announced creation of the task force on Oct. 21, the same day U.S. Rep. Dan Kildee, D-Flint, and Ananich called for the U.S. Environmental Protection Agency to carry out a similar review.

The EPA later agreed to carry out it's own review, which is also ongoing.

Members of the state task force on Flint water are Sikkema of Public Sector Consultants, Chris Kolb of the Michigan Environmental Council, Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Hospital.

Sikkema and Kolb are co-chairmen of the task force.

Dave Murray, press secretary for Snyder, said in an email today that the governor and administration continue to cooperate with task force members, "who are making a thorough review of all city, state and federal responses and procedures related to water in Flint.

"We also expect members will make recommendations that could address potential challenges in other cities moving forward," the statement says. "Today's interim report and recommendations are one step in that process. We appreciate that the task force members are investing their time and expertise to help us ensure that people in Flint – and across our state – will have access to safe, clean water."

[Here's where to get free, bottled water in Flint](#)

Detroit Free Press – January 9, 2016, By Paul Egan

LANSING — The State of Michigan said Saturday it has partnered with local officials to set up depots at five Flint fire stations where city residents can pick up free bottled water, filters and other items to address the crisis related to lead contamination of the city's drinking water supply.

“The water resource sites serve as a one-stop location where residents can pick up all of the resources they need to ensure their drinking water is safe, including bottled water, water filters, replacement cartridges and water testing kits,” said Capt. Chris Kelenske, deputy state director of emergency management and homeland security and commander of the Michigan State Police emergency management and homeland security division.

The sites will be open from 9 a.m. to 9 p.m., daily, at the following fire station locations: 310 E. 5th St.; 1525 Martin Luther King Ave.; 3402 Western Road; 716 W. Pierson Road; and 202 E. Atherton Road.

Water filters and replacement cartridges continue to be available from 9 a.m. to 4 p.m. weekdays at the following locations: the Michigan Department of Health and Human Services offices at 125 E. Union St. and 4809 Clio Road; the Genesee County Community Action Resource Department offices at 4809 Clio Road and 2727 Lippincott, and Flint City Hall at 1101 S. Saginaw St.

Residents who need transportation or any other assistance can call 211.

Residents are urged to use filtered water for drinking, food preparation, brushing teeth and for pets. Unfiltered water may be used for bathing and cleaning.

In addition to the water resource sites, home water testing kits are available at Flint City Hall, the Flint Water Treatment Plant or Flint Fire Department locations, the Michigan State Police said.

Visit www.michigan.gov/flintwater or call 211 for more information.

Bay County's third heroin summit planned for Pinconning High School

MLive.com – January 11, 2016, By Cole Waterman

PINCONNING, MI — Another installment in a series of summits to discuss Bay County's heroin problem is to take place in Pinconning.

The Pinconning Police Department is hosting the summit, along with the Michigan State Police, the Bay County Prevention Network and the Bay County Library System, at Pinconning High School, 605 W. Fifth St., from 6-7:30 p.m. Tuesday, Jan. 12.

A panel of experts will discuss topics such as prevention, treatment, law enforcement, recovery and parent education.

This is the third public seminar on the county's heroin issue in as many months. Previous events were hosted by state Rep. Charles M. Brunner, D-Bay City, and by the Bay County Prevention Network and the Self-Sufficiency Task Force. The Pinconning event is geared toward the public and parents who can look for symptoms in their kids and learn how to prevent addiction and address it and intervene when it occurs.

The events are born of an ongoing heroin epidemic ravaging the county, as declared by the Bay County Health Department and law enforcement officials in June. Panelists at Brunner's November town hall commented that the rise in heroin use could be attributed to prescription painkillers. Youths who developed an addiction to substances such as OxyContin and Vicodin gravitated to heroin as it is cheaper and easier to use since pharmaceutical manufacturers changed their pills' composition so they can no longer be inhaled or melted down and injected.

Heroin's resurgence is by no means specific to Bay County, as its popularity is a national trend. According to a report from the Center for Disease Control and Prevention on heroin trends between 2002 and 2013, use of the illicit substance has increased across most demographic groups. Per 1,000 people, an average of 1 person making an annual income of \$50,000 or more used heroin from 2002-2004, compared to 1.6 people making an annual income of \$50,000 or more from 2011-2013.

Similarly, an average of 1.4 non-Hispanic white people per 1,000 used heroin in 2002-2004, compared to 3 per 1,000 in 2011-2013. Conversely, the rate of other ethnicities' use of heroin declined, from an average of 2 per 1,000 in 2002-2004 to 1.7 per 1,000 in 2011-2013, the report states.

The main age bracket of users is 18 to 25, with the average number of users in that group jumping from 3.5 per 1,000 in 2002-2004 to 7 per 1,000 in 2011-2013, the CDC report states. For those 26 and older, the average number of heroin users per 1,000 went from 1.2 in 2002-2004 to 1.9 in 2011-2013. Users ages 12 to 17 declined from 1.8 per 1,000 in 2002-2004 to 1.6 per 1,000 in 2011-2013.

Coinciding with the local Health Department's epidemic advisory, Gov. Rick Snyder in June formed the Michigan Prescription Drug and Opioid Abuse Task Force to examine the heroin issue, examine strategic options, and develop a statewide action plan. Lt. Gov. Brian Calley chaired the task force, which comprised representatives from the Executive Office, the state Legislature, state departments, law enforcement, prosecutors, mental health commissions, pharmacists, doctors, hospitals and insurance companies.

The task force also included a Regulation, Enforcement and Policy Subcommittee, chaired by Attorney General Bill Schuette, and a Treatment, Prevention and Outcomes Subcommittee, chaired by Michigan Department of Health and Human Services Director Nick Lyon.

The task force recently unveiled its findings in a report detailing 25 primary recommendations and seven contingent recommendations in the areas of prevention, treatment, regulation, policy and outcomes and enforcement.

Correlating with heroin's rise in prominence, prescriptions for controlled substances increased in Michigan from 17 million in 2007 to 21 million in 2014, the report states. Between 2009 and 2012, 4,772 Michigan residents died of unintentional or undetermined-intent overdoses, of which 19.4 percent were definitely opioid-related, the report states. Michigan ranks 10th in the nation per capita for prescribing rates of opioid painkillers and 18th for overdose deaths.

"Additionally, of the 35.9 percent of drug overdose deaths that were a result of an unspecified drug, 83 percent of the overdosed individuals had filled a prescription for an opioid in the past 30 days," the report goes on. "Therefore, opioids likely caused an even higher percentage of overdose deaths."

More than 83 percent of 4,772 fatal overdose victims were white, while 13.6 percent were black, 1.4 percent were Native American, and 0.1 percent were Asian or Pacific Islander, the report states.

Among the report's recommendations are the following:

- Updating or replacing the Michigan Automated Prescription System(MAPS).

- Requiring registration and use of MAPS by those who are prescribing and dispensing prescription drugs.

- Updating regulations on the licensing of pain clinics, which hasn't been done since 1978.

- Increasing licensing sanctions for health professionals who violate proper prescribing and dispensing practices.

- Providing easier access to Naloxone, a drug that reduces the effects of an opioid overdose.

- Limiting criminal penalties for low-level offenses for those who seek medical assistance with an overdose.

- Increasing access to care through wraparound services and Medication Assisted Treatment programs.

- Requiring additional training for professionals who prescribe controlled substances.

- Reviewing successful drug take-back programs for possible replication and expansion.

- Increasing the number of addiction specialists practicing in Michigan.

- Reviewing programs to eliminate doctor and pharmacy shopping and requiring a bona-fide doctor-patient relationship for prescribing controlled substances.

- Creating a public awareness campaign about the dangers of prescription drug use and abuse and how people can get help for themselves or family members.

- Increasing training for law enforcement in recognizing and dealing with addiction for those officers who do not deal directly with narcotics regularly.

- Considering pilot programs for the development of testing to reduce the increasing incidence of Neonatal Abstinence Syndrome, which leads to severe withdrawal symptoms for babies born to mothers who have been using opioids.

The Pinconning summit is open to the public. Registration is available, but not necessary, at <https://www.surveymonkey.com/r/pinconningheroinsummit>.

Michigan launches nation's first Medicaid system on the cloud

The Daily News – January 9, 2016, By Graham Jaehnig

LANSING - The Michigan Department of Health and Human Services (MDHHS) has launched the Medicaid Management Information System, the nation's first completely automated real-time and cloud-enabled system. The program includes a partnership with the state of Illinois.

"This is an innovative approach," Gov. Rick Snyder said in a recent press release issued by the MDHHS.

The system allows the state to more efficiently share information and resources in real time, helping residents get the health care they need, Snyder said.

The MDHHS worked with the state of Illinois, the Michigan Department of Technology, Management and Budget and Client Network Services Inc. (CNSI), a domain company based out of Rockville, Maryland, to create the system. According to the company's website, CNSI "focuses on the development of the latest technologies and processes."

Cloud computing, also known as "on-demand computing" is a kind of Internet-based computing, where shared resources, data and information are provided to computers and other devices on-demand.

The cloud platform designed by CNSI allows for provider collaboration through an online system that maximizes efficiencies for the state's Medicaid systems, the release stated. The system adheres to the latest standards of data security, ensuring the integrity of the state's health care data, according to the DHHS release.

"Moving to the cloud allows us to better serve our residents and improve health care delivery, all while reducing costs," said MDHHS Director Mick Lyon. "This unique initiative enhances our ability to maintain Medicaid systems, meet state and federal guidelines, and work with partners such as Illinois to create a multistate platform that meets the specific needs of our residents."

However, when it comes to cloud services, many people are concerned with risk to data from hackers.

Terry Meyers, owner of Meyers Computer Services of Hancock, said this type of system is very secure.

"It's a basically a virtual private networking," Meyers said. "It locks down communication between the user and the server. Nothing is ever infallible, but basically, that's the safest you're going to get. It changes http to https."

However, Meyers was cautious with a reminder.

"If hackers want to get in, they're going to get in," he said. "It happens every day, but they're not going to put something up with a lot of holes in it."

CNSI officials say the technology helps prevent fraud, because patients can more quickly see all claims filed in their name and can flag payments for services they didn't receive.

More than 1K grandparents raise grandchildren in region

Traverse City Record-Eagle – January 10, 2016, By Carol Thompson

TRAVERSE CITY — Bev Wenger's life changes dramatically at 4:30 p.m.

That's when Estrella and Isaac Wenger return home from school. They tromp through the snowy back yard outside their Lake Ann home, hurl open the back door and race for the apples and oatmeal laid out on the green kitchen counter. The children fill the once quiet space with energy.

Bev keeps a tidy house with firm, but fair, rules. Not even her pastor is allowed to drink coffee in the living room. She relents when it comes to the children climbing on the furniture, instead focusing on instilling in them the skills and values they'll need in adulthood.

Bev — Isaac and Estrella's biological grandmother — can't shower the children with gifts and candies and send them home. She adopted them three years ago and is raising them on her own.

"I don't get to spoil these kids," she said. "That is not in my mind an option. My mind is, I need to raise these kids to be ... God's children, and reach out from there and become good in the communities that they live in and be a positive force, not a negative force."

Bev turns 66 on Sunday, the full retirement age according to the Social Security Administration, but her life doesn't mirror that of many retirees.

Estrella, 11, and Isaac, 10, were born to Bev's daughter, but a Wyoming court terminated her parental rights in 2012 and Bev stepped in to adopt them that year.

"It wasn't a hard decision because I could not let go of these kids," she said. "(I said) 'I love you. You're part of me.' I want the best for them."

Bev is one of more than 1,000 grandparents in northwest Michigan responsible for their grandchildren, according to U.S. Census data. She's one of almost 300 doing so without help from her children's biological parents.

Grandparents are a natural fit when someone needs to step in for a parent who can't care for a child, said Grand Traverse Family Court Judge Melanie Stanton. The court and Department of Health and Human Services try to pair children with relatives.

"There's something to be said about family relations," Stanton said. "Kids know when they're with family and when they're not. They know, and they look for them. I think it's just in the child's best interest to maintain those family ties if they can be safe in a situation."

Seventy-four of 102 guardianships in place in Grand Traverse County in December involved grandparents and great-grandparents caring for children, Stanton said. DHHS figures show 60 percent of children adopted in Leelanau, Benzie, Grand Traverse, Antrim and Kalkaska counties were taken in by relatives in 2015.

Raising grandchildren can feel like a lonely job, said Deb Frisbie. She and her husband Dick Frisbie adopted their grandchildren Richard Frisbie Jr., 15, and Ryleigh Frisbie, 12, in 2007. The couple's peers spend winters traveling, not helping with homework and shuttling children to appointments.

"We're kind of isolated because our friends are retired," Deb said. "We can't have a relationship with them on an ongoing basis."

But the couple knows they're not alone. They launched a support group in 2014 for Benzie County grandparents raising their grandchildren and met other grandparents who find themselves in the same situation.

Census data shows almost 70 percent of 86 Benzie County grandparents responsible for their grandchildren in 2014 did so without those children's biological parents present. More than half of the grandparents were older than 60, more than 60 percent were working and more than 16 percent of were living in poverty.

Deb now works as an adoptive parent consultant with Adoptive Family Support Network, a nonprofit resource for adoptive and foster parents. She's motivated to do more than her part-time position requires. She believes every ounce of understanding and support makes parenting easier for older adults and improves life for their young children.

Richard echoed the philosophy.

"It's great to know there are other people out there like us," he said.

Richard remembers life during the adoption process, which was finalized when he was five. He was given a brown teddy bear, his sister's was red.

Ryleigh and Richard largely escaped the court system — Deb and Dick settled the adoption with their daughter privately, without going to trial. But they haven't escaped emotional turmoil that comes with adoption, something that heaps additional challenges upon families when children are separated from their biological parents.

Deb said grandparents and great-grandparents raising their grandchildren face stigma everywhere — at school, church, in the community, with extended family members.

"They think the apple didn't fall too far from the tree," Deb said. "Drugs and addictions and everything else is no respecter of people. It doesn't matter what your background is. There's no compassion or sensitivity toward people who are raising their grandchildren until you hear our whole story, and people don't ever get to know us to hear the whole story of how we got our kids."

Bev Wenger has adjusted to her second round of parenting. She considers it another chance to be a mother and homemaker, something she always considered her calling. This time she is thrust into a social circle of younger parents, people in their 30s and 40s raising Isaac and Estrella's friends.

"I've had to change, not change my friends, but add to my friends," Bev said. "(My children) want to have friends, and they want to have play dates and things like that. I don't just go for play dates. I have to know the (other) parent, and the parent ought to know me."

Bev said her health is the biggest challenge to raising Isaac and Estrella. She was 62 when she decided to become a parent again, and at the time was 75 pounds heavier and reliant on oxygen support and a walker.

She's leaner now and lives without oxygen tubes or a walker. But Bev is diabetic, and last year suffered a heart attack and went through two surgeries. She's cautious at home, refuses to climb on her step stool without another person home or her phone securely in her pocket.

Bev relies on faith. She asked God to allow her to live until Isaac is 18 and Estrella is 20, and believes she'll be granted the request.

"I'm not worried because I know God's in control," she said. "I asked God when I'm laying there on the first night with Isaac, Sept. 1 in 2011, 'God can I do this?' and I felt like he said 'Yes you can. You can do both.'"

People are living longer and healthier now than ever before, said Mary Manner, coordinator of the Great Start Collaborative of Traverse Bay, a state-funded partnership between the Traverse Bay Area Intermediate School District and the Traverse City Area Chamber of Commerce. That's a good sign for senior citizens caring for children.

Resources for aging adults abound in northwest Michigan, but Manner said they don't reflect the needs of every senior.

"The things that are in place to support our senior citizens, do they accommodate senior citizens who are looking after young kids?" she said.

Great Start launched the 5toONE project with the objective of opening neighborhood centers for parents in northwest Michigan. The centers are meant to be places where parents can bring children, learn parenting skills and meet other families.

Some grandparents bring their grandchildren to play groups at the centers, but they're not all adoptive parents, Manner said. Some are helping care for children while their parents work, sometimes shouldering most of the child care responsibility.

"There's a continuum of reasons why grandparents wind up raising their grandchildren," Manner said. "It runs from the death of a parent, to incarceration of a parent, to the permanent termination of parental rights."

Another could be the dearth of child care options in the region, she said. Waiting lists for child care can run a year long. Grandparents step in when child care centers cannot.

Grandparents are great caregivers for infants who need security, eye contact and verbal stimulation, Manner said. Children need more when they start crawling.

"By the time kids are about a year of age they should be going to play groups and having socialization opportunities," Manner said. "We're a social species ... Those are things that are getting children ready for school and for life."

Providing affordable day care and more play groups will benefit all generations, Manner said. She hopes 5toONE neighborhood centers can fill the void.

Martie Manty, 5toONE program manager, said grandparents are a customary choice when parents can't raise their children.

But it's important those families know they're not alone, Manty said.

"Families are best when they are not isolated," she said. "Families do best when they have social connections, when they know the resources in their community and beyond, when they understand child development and when they have a strong emotional rapport with their children."

Bev considers herself a stronger parent now than she was the first time around. She's learned to be cautious and is diligent about tracking the organizations that are part of her children's lives, such as the school board.

"I think as an older parent, having gone through it twice, I know where I'm advocating," she said. "I find things out more."

Deb is busy advocating, too. She's reaching out to churches, community centers and schools to raise awareness of the support group for adoptive and foster families, and to teach the community about how the trauma of shuffling from family to family in the adoption system can later affect children.

"Our children sometimes have behavioral challenges because of the trauma, the loss," Deb said.

Deb has one request for the community, something she believes will ease life for adoptive grandparents and their grandchildren.

"Just love our kids," she said.

http://www.record-eagle.com/news/local_news/more-than-k-grandparents-raise-grandchildren-in-region/article_6f9d6673-2a2d-50ba-8ee4-e9d95ee7c8c9.html

Truant students face new process

Traverse City Record-Eagle – January 11, 2016, By Michelle Merlin and Michael Walton

TRAVERSE CITY — Court staff will no longer be involved in a truancy prevention program that aims to keep students in school and out of the path of law enforcement.

Grand Traverse County's truancy prevention program brought school and court representatives together with students and their families to help identify and address root causes of unexcused absence issues long before truant cases land in court.

But the program will change because state officials recently informed court administrators statewide that the funding for the program can only go toward students who are already in the court system, not toward keeping them out of legal trouble.

Court administrators said about 90 percent of students served by the program avoid court.

The funding change is something Traverse City Area Public Schools Superintendent Paul Soma called disappointing.

"That's a real frustrating evolution here," he said. "It's so counter-intuitive to how our society should be working. It seems to me that prevention is a better course than waiting for students to find themselves caught up in the court system."

Soma said he'd like to continue the program's preventative arm but he's not sure exactly how. The school district can't afford to funnel any more money into the program, he said.

"We'll have to put more on people who are already doing a lot," he said.

The truancy prevention program since 2004 has been funded by a grant distributed to local agencies through Michigan's Department of Health and Human Services, said 13th Circuit Court Family Division officials.

What Did the Governor Know About Flint's Water, and When Did He Know It?

The Atlantic – January 9, 2016, By David Graham

In Flint, Michigan, a scandal over lead-tainted water keeps getting darker.

On Tuesday, Governor Rick Snyder declared a state of emergency due to lead in the water supply. The same day, the U.S. Department of Justice announced that it is investigating what went wrong in the city. Several top officials have resigned, and Snyder apologized. But that's only so comforting for residents. They're drinking donated water supplies—though those donations are reportedly running dry—or using filters. Public schools have been ordered to shut off taps. Residents, and particularly children, are being poisoned by lead, which can cause irreversible brain damage and affect physical health. It could cost \$1.5 billion to fix the problem, a staggering sum for any city, much less one already struggling as badly as Flint is.

The story is horrifying, on a visceral, “this isn’t supposed to happen here” level. While attention has been slow to focus on Flint, the more that emerges, the worse the story seems. The latest question is when Snyder knew about the problem. This week, an email from Snyder’s then-chief of staff to a health-department official was turned over as part of a freedom-of-information request. In July 2015, Dennis Muchmore [wrote](#):

I'm frustrated by the water issue in Flint I really don't think people are getting the benefit of the doubt. Now they are concerned and rightfully so about the lead level studies they are receiving. These folks are scared and worried about the health impacts and they are basically getting blown off by us (as a state we're just not sympathizing with their plight).

On Thursday, while declaring the state of emergency, [Snyder wouldn't say when he became aware of the lead problem in Flint](#). The governor—a trained engineer who likes to portray himself as a can-do manager—reportedly grew testy when asked repeatedly about his own awareness.

The problem dates back to April 2014, when Flint was under the direction of an emergency manager appointed by the state to try to fix the broken city. (Michigan law provides for the governor to select managers, and the provision has been used in several places in recent years, most prominently Detroit.) To save money, the city began drawing its water from the Flint River, rather than from Detroit’s system, which was deemed too costly. But the river’s water was high in salt, which helped corrode Flint’s aging pipes, leaching lead into the water supply.

The move saved millions, but the problems started becoming apparent almost immediately. The water starting smelling like rotten eggs. Engineers responded to that problem by jacking up the chlorine level, leading to dangerous toxicity. GM discovered that city water was corroding engines at a Flint factory and switched sources. Then children and others started getting rashes and falling sick. Marc Edwards, a Virginia Tech environmental-engineering professor, found that the water had nearly 900 times the recommend EPA limit for lead particles. As my colleague Alana Semuels [noted in a deeply reported feature](#) in July 2015, residents believe the city knew about problems as soon as May 2014. Yet as late as February 2015, even after tests showed dangerous lead levels, officials were [telling residents there was no threat](#).

The July 2015 date on Semuels’ story emphasizes the incredible slowness of authorities to respond. That was more than a year after the switch to water from the Flint River. This week’s state declaration of Emergency comes some 20 months after the switch. How did it take so long to get anything done?

Semuels [described the deeply interlocked](#) series of causes in her piece:

But it’s not one emergency manager, or one bad decision about pumping water from the Flint River that has led these problems—and that might be the scariest part of all. Neglected infrastructure is really to blame, but it’s not quite as satisfying to blame old pipes as it is to blame the people in charge. And the city’s financial woes have a lot to do with its shrinking population, but it’s hard to blame the people who left in hopes of finding employment or a better life elsewhere. Eroding infrastructure isn’t unique to Flint. Things just broke down there first.

Even if the causes of the crisis are elaborate and inevitable, the state’s slow response provides ways to think a little bit about how the response broke down.

First, there’s a question of democracy. [As Chris Lewis wrote in *The Atlantic* in 2013](#), the emergency-manager law raises serious questions about representation. If the manager is appointed by the state, he or she is not answerable to the population at the ballot box, and that means he or she is far less accountable when things go wrong. (This is exacerbated by the fact that the cities with managers are mostly Democratic, largely by virtue of being cities, while Snyder is a Republican.) That’s not just a bug—it’s also a feature,

since the managers are thought to be able to make painful but necessary choices that an elected official just won't have the stomach to make. Flint's water shows what can happen when the link between residents and authorities is broken: months of poisoned water supply.

There is a second, and more fundamental, question to the whole debacle as well. In 2014, a UN Special Rapporteur delivered a scathing attack on the city of Detroit, which was shutting off water services to residents who'd fallen behind on the bill. The city was in a tough spot: It was cash-strapped and deeply in debt, and it couldn't afford not to get the money. But of course that was the problem the residents were facing too; like the city, they didn't have the money. "Without water, people cannot live a life with dignity," the UN said. "Denial of access to sufficient quantity of water threatens the rights to adequate housing, life, health, adequate food, integrity of the family. It exacerbates inequalities, stigmatizes people and renders the most vulnerable even more helpless."

There's a tendency to think of access to clean water as a basic human right—and certainly one in a prosperous, developed nation like the United States. Given how slowly authorities came around to dealing with Flint's lead poisoning, even after the evidence was clear, can anyone expect the government to guarantee their own clean water?

Michigan's Snyder facing nation's most serious scandal

MSNBC – January 11, 2016, By Steve Benen

As regular viewers know, The Rachel Maddow Show has devoted a great deal of time to the water crisis in Flint, Michigan, but if you haven't been focused on this scandal yet, it's important to get up to speed.

Over the weekend, for example, the editorial board of the *Detroit Free Press* turned its attention directly to Michigan Gov. Rick Snyder (R), who's facing calls for his arrest from protestors, comparing his handling of the Flint crisis to George W. Bush's handling of Hurricane Katrina.

Right now, the State of Michigan should be able to say that it has ensured the delivery of bottled water and water filters to every Flint resident whose drinking water has been contaminated by lead.... Instead, the governor is offering placid responses and slow-walking important remedies, while the investigation into how one of Michigan's greatest man-made public health crises unfolded comes up with explanations in dribs and drabs.

It's not just derelict – it invokes inglorious comparison to other callous and insensitive official responses to tragedy. Think of the shameful federal response to Hurricane Katrina, where the same lack of urgency delayed life-saving aid. The poverty rate in Flint is 40%; 52% of Flint residents are African-American. And so we are prompted to ask: How would the state have responded to a crisis of such proportions in a community with more wealth and power?

Of course, there's a key, heartbreaking difference between recent developments in Flint and the crisis in New Orleans in 2005: Katrina was a natural disaster; Flint's disaster was the result of public officials showing breathtakingly bad judgment.

Let's recap how we reached this point.

In 2014, the city of Flint, under the control of an "emergency manager" appointed by the governor, was looking for ways to save money. To that end, the Snyder administration approved a plan in which the city would switch its water source: instead of getting water from Detroit, Flint would cut costs by drawing water directly from the Flint River.

In theory, there's nothing particularly wrong with getting drinking and bathing water from a nearby river; plenty of communities across the country already do that. But in order to make Flint River water safe for people, it has to receive a special anti-corrosion treatment. Failing to treat the water sends corrosive river water through local pipes, it starts to eat through plumbing, and the result is lead poisoning.

The Snyder administration did not take the necessary precautions. What's more, as the community grew concerned about its water, administration officials initially told local residents not to worry and to keep drinking the water.

The result, of course, is a public health crisis in which countless city residents, including many children, have been poisoned, which leads to severe and long lasting consequences. Snyder last week declared an official emergency – he also issued an apology of sorts on New Year's Eve – but the people of Flint still don't have safe, clean water.

There's also the political crisis as a result of this man-made disaster. The EPA warned Snyder administration officials about rising lead levels, but the governor did not alert the public and state officials delayed action to address the problem.

The Republican governor is now facing [calls for his resignation](#) and [#ArrestGovSnyder protests](#). Local residents are also moving forward with a class-action lawsuit over the crisis, and the U.S. Attorney's office in Michigan has confirmed it is investigating the matter to determine if any laws were broken.

The *Detroit Free Press* [reported](#) late yesterday that Michigan State Police troopers and other state officials "will start a door-to-door sweep of Flint on Tuesday to hand out bottled water and water filters, and the White House says it is monitoring the situation 'very closely.'"

Hillary Clinton: Flint deserves answers about water crisis from governor
MLive.com – January 11, 2016, By Ron Fonger

FLINT, MI -- Democratic presidential candidate Hillary Clinton says Flint's water crisis is "unconscionable," and says citizens deserve both immediate fixes and full disclosure from Gov. Rick Snyder.

"The situation in Flint, Michigan, is extremely concerning. No parent should have to worry that their kids' water isn't safe," Clinton said in a statement issued today, Jan. 11

"We now know that a General Motors factory stopped using Flint's water because it was corroding car engine parts -- yet officials continued to reassure the public that the water was safe for human consumption. That's unconscionable, and I applaud the Department of Justice for joining the Environmental Protection Agency in investigating what happened here."

Clinton's statement comes the day after Denis McDonough, President Obama's chief of staff, said the White House is very concerned about the water situation in Flint during an appearance on NBC's "Meet the Press" program Sunday, Jan. 10.

"Thousands of children may have been exposed to lead, which could irreversibly harm their health and brain functioning. Plus, this catastrophe -- which was caused by a zeal to save money at all costs -- could actually cost \$1.5 billion in infrastructure repairs," Clinton said.

"The people of Flint deserve to know the truth about how this happened and what Governor Snyder and other leaders knew about it. And they deserve a solution, fast."

Snyder has asked a task force he appointed in October to investigate how Flint's problems with lead in water unfolded and the U.S. EPA and the U.S. Attorney's Office are also investigating.

Lead levels in Flint water and in the blood of young children jumped after the city changed its water source to the Flint River in April 2014.

The decision, hailed as a way to save millions of dollars, came while the city was being run by an emergency financial manager, also appointed by the governor.

Snyder has not said when he became aware of potential problems with lead in Flint's water supply.

The governor's former top aide warned six months ago that the people of Flint "are basically getting blown off by us" over concerns about their water.

Finger-pointing over toxic tap water in Flint, Michigan
CNN --- January 11, 2016, By Sara Ganim and Linh Tran

CNN) —Flint, Michigan, lies about 70 miles from the shores of the largest group of fresh water bodies in the world: the Great Lakes. Yet its residents can't get clean water from their taps.

Nearly two years ago, the state decided to save money by switching Flint's water supply from Lake Huron (which they were paying the city of Detroit for), to the Flint River, a notorious tributary that runs through town known to locals for its filth.

"We thought it was a joke," said Rhonda Kelso, a long-time Flint resident. "People my age and older, thought 'They're not going to do that.' "

The switch was made during a financial state of emergency for the ever-struggling industrial town. It was supposed to be temporary while a new state-run supply line to Lake Huron was ready for connection. The project was estimated to take about two years.

What's in the water?

Soon after the switch, the water started to look, smell and taste funny. Residents said it often looked dirty.

"The water would come in brown and my daughter was like 'Mom ... why is the water brown?' "

Kelso thought it was sewage, but it was actually iron. The Flint River is highly corrosive: 19 times more so than the Lake Huron supply, according to researchers from Virginia Tech.

According to a class-action lawsuit, the state Department of Environmental Quality wasn't treating the Flint River water with an anti-corrosive agent, in violation of federal law. Therefore, the water was eroding the iron water mains, turning water brown.

But what residents couldn't see was far worse. About half of the service lines to homes in Flint are made of lead and because the water wasn't properly treated, lead began leaching into the water supply, in addition to the iron.

This had been the status quo for nearly two years, and until September, city and state officials told worried residents that everything was fine. Former Flint Mayor Dayne Walling even drank it on local TV to make the point.

But in August, a group of skeptical researchers from Virginia Tech came up and did in-home testing and found elevated levels of lead in the drinking water and made those findings public. State officials insisted their own research was more accurate.

"You're paying for poison. I'm paying for water that's a toxic waste," Kelso said. She and her daughter and four other families are now part of a class-action lawsuit that alleges not only lead poisoning but several medical conditions resulting from contaminated water after the switch. CNN sought responses from all the defendants, and many did not respond.

Later it became publicly known that federal law had not been followed. A 2011 study on the Flint River found it would have to be treated with an anti-corrosive agent for it to be considered as a safe source for drinking water.

Adding that agent would have cost about \$100 a day, and experts say 90% of the problems with Flint's water would have been avoided.

But Flint residents say they were kept in the dark for 18 months until a local doctor took things into her own hands.

The hero doctor

In the pediatric ward of Flint's Hurley Medical Center, Dr. Mona Hanna-Attisha was seeing more and more worried parents fretting over rashes and hair loss.

No one believed state and local officials when they said that this icky brown water was safe.

Hanna-Attisha, an animated and passionate young pediatrician with horn-rimmed glasses who everyone calls Dr. Mona, realized there was a way to determine whether the water was affecting kids. Medicare requires states to keep records of blood lead levels in toddlers. The comparison was astonishing. Lead levels doubled and even tripled in some cases.

"When (my research team and I) saw that it was getting into children and when we knew the consequences, that's when I think we began not to sleep," Hanna-Attisha said.

At first, the state publicly denounced her work, saying she was causing near hysteria. They spent a week attacking her before reversing their narrative and admitting she was right.

"Their information wasn't flawed. They had the data, but they were being told by the DEQ that there wasn't a problem, they just dismissed it," said Hanna-Attisha and confirmed by the state-appointed task force. "There was almost like blinders on," she added. CNN contacted DEQ's former director, Dan Wyant, who made the decision and later resigned over the issue. He did not respond.

"Their information wasn't flawed. They had the data, but they were being told by the DEQ that there wasn't a problem, they just dismissed it," said Hanna-Attisha and confirmed by the state-appointed task force. "There was almost like blinders on," she added. CNN contacted the former DEQ employee who made the decision, and he did not respond.

Just a few weeks later, in October, the city reverted to using Detroit's Lake Huron water supply, but the damage was done to the lead pipes.

Even with properly treated water flowing in, Virginia Tech researchers still detected lead levels -- albeit lower ones -- in water in Flint homes.

The state is now handing out filters and bottled water.

"You know, I never thought this was something that we would be begging for, crying for ... clean, affordable water," said Flint Mayor Karen Weaver.

Flint's woes began before the water, but it's all related

The past three decades have been rough for Flint. Like many blue-collar Michigan towns, it was fueled by the auto industry. General Motors plants kept it afloat for much of its prosperous history. But in the 1980s and 1990s, those plants began to close their doors, and when the jobs left, so did many of the people.

A steady decline in population has been matched by a steady rise in violent crime. It's consistently ranked among the most dangerous cities in America.

According to local officials, about 40% of residents are below the poverty rate. Fifteen percent of homes are boarded up and abandoned. Weaver says the city of 100,000 doesn't even have a grocery store. And now its residents don't have clean water either.

In 2011, Flint was declared to be in a financial state of emergency, and the state took budgetary control. Therefore, all the decisions made during the water crisis were at the state level, which state officials confirmed, not by the City Council or the mayor.

"When the governor appointed an emergency financial manager (in 2011), that person came here ... to simply do one thing and one thing only, and that's cut the budget, at any cost," said Michigan Congressman Dan Kildee.

Kildee said the water crisis is indicative of an attitude about industrial towns such as Flint that have seen hard times in the past 30 years. They're often just forgotten, he said.

"This case shows that you can't treat cities the way you treat some corporation that you might just sort of sell off," Kildee said.

Long-term health consequences

Lead poisoning is irreversible. Pediatricians such as Hanna-Attisha fear the Flint children who tested with elevated levels will suffer lifelong consequences.

"If you were to put something in a population to keep them down for generation and generations to come, it would be lead," Hanna-Attisha said. "It's a well-known, potent neurotoxin. There's tons of evidence on what lead does to a child, and it is one of the most damning things that you can do to a population. It drops your IQ, it affects your behavior, it's been linked to criminality, it has multigenerational impacts. There is no safe level of lead in a child."

There are environmental actions that can help mitigate exposure such as proper nutrition and early childhood education. But that's made more difficult in a city with inadequate resources and without a grocery store.

"We need some money for infrastructure," said Weaver, who took office in November. "We've got to get all of these kids and all of these families the services they deserve because of what's happened."

Who's to blame?

A state-appointed task force preliminarily found that fault lies with the state DEQ, and on December 29, Wyant stepped down.

Last week, three months after high lead levels were detected in Flint children, Michigan Gov. Rick Snyder declared a state of emergency over the issue.

The U.S. Attorney in Michigan and the federal Environmental Protection Agency are also investigating why the state chose to ignore federal law and go without the anti-corrosive agent, as the lawsuit contends. "Nobody has answered that question," Weaver said.

Friday evening, about 100 protesters in Flint marched from city hall, calling for Snyder's resignation over the issue.

Everyone CNN interviewed -- residents, the former mayor, the current mayor, Congressman Kildee, city workers -- they all blame the governor's office and the state Department of Environmental Quality for what happened to Flint. Snyder apologized on Thursday during a news conference.

Dayne Walling, the former mayor who so confidently went on TV and drank Flint River water to try to quell the early protests, lost his recent re-election bid in a campaign centered around the issue.

"In retrospect, I regret all of it," Walling said this weekend.

"All the way back to seeing the city move to a different drinking water source. You can't put a dollar amount of the devastation to our community, our kids, and it was completely avoidable."

Michigan governor pledges contact with every Flint household

Lexington Herald Leader – January 12, 2016, By David Eggert, Associated Press

LANSING, Mich. — An apologetic Gov. Rick Snyder pledged Monday that officials would make contact with every household in Flint to check whether residents have bottled water and a filter and want to be tested for lead exposure while his embattled administration works on a long-term solution to the city's water crisis.

He also said he first clearly knew of Flint's lead problem around Oct. 1, when state health authorities confirmed elevated blood-lead levels in children that were detected by a local doctor. Exposure to lead can cause behavior problems and learning disabilities in children.

"This is a crisis. So we're responding appropriately. There's more work to be done," Snyder said during a news conference with state and local officials in Flint.

It was the Michigan Republican's first visit to the 99,000-resident city since October, when he called for a switch back to Detroit's water after more corrosive Flint River water leached lead from 15,000 service lines and into homes. Snyder said he may ask state lawmakers for additional money for the emergency before his budget proposal in February.

Flint switched from Detroit's water system to river water in a cost-cutting move in 2014, while under state financial management. That was intended as a temporary step while a pipeline was built from Lake Huron. The city returned to Detroit's Lake Huron water in October after various problems, but officials remain concerned about the corrosion caused by the Flint River water. Extra anti-corrosion controls began last month.

"We don't want people to assume anything's good until we have a chance to do extensive testing and confirm that publicly," Snyder said.

Michigan Department of Environmental Quality Interim Director Keith Creagh gave no timeline for when the tap water would be OK to drink, saying additional testing is needed.

The state auditor general and a task force created by Snyder have faulted the Department of Environmental Quality for not requiring Flint to treat the river water for corrosion and belittling the public's fears. Former DEQ Director Dan Wyant resigned last month.

Last week, a professor who has investigated the Flint situation posted online an email obtained through a public records request that shows Snyder's chief of staff expressing concerns in July to Department of Health and Human Services Director Nick Lyon that Flint residents were "basically getting blown off." Snyder said Monday he wanted to "push on (state) departments" after hearing concerns from the community, and the agencies "reaffirmed they didn't believe there was an issue. That was not the correct outcome it turns out, in retrospect."

He said he is responsible for what goes on in state government.

Since October, more than 12,000 filters have been distributed, more than 2,000 blood tests have been done – uncovering 43 cases of elevated lead levels – and more than 700 water tests have been conducted, Snyder said.

"Those actions were not good enough. We've worked hard, but we need to get more connection to the citizens of Flint," Snyder said.

Also Monday, he issued an executive order creating a committee to work long term on resolving the crisis and health concerns. The 17 members will serve initial terms through 2018.

Last week, Snyder declared an emergency after Flint and Genesee County requested financial assistance. The state – which previously committed \$10.6 million to reconnect Flint to Detroit and to respond with filters other services after initially downplaying the lead risk – could soon ask for federal help.

Watch live as Gov. Rick Snyder provides Flint water update

MLive – January 11, 2016, By Roberto Acosta

FLINT, MI – Gov. Rick Snyder is set to speak Monday afternoon from Flint City Hall to provide an update on current actions and next steps that need to be addressed regarding the city's water issues.

Snyder is set to be joined by Flint Mayor Karen Weaver; Michigan State Police Capt. Chris Kelenske; Keith Creagh, interim director for the Michigan Department of Environmental Quality; Nick Lyon, director of the Michigan Department of Health and Human Services; and Dr. Eden Wells, chief medical executive for the Michigan Department of Health and Human Services.

Snyder declared a state of emergency Jan. 5 in Genesee County in regards to Flint's water issues.

The state has since activated the emergency operations center and worked with local officials to established water resource sites in the city where residents can pick up bottled water, filters, replacement cartridges and testing kits.

Water action resource teams, consisting of state troopers and other employees are also set to begin going door-to-door Tuesday, Jan. 12 in Flint neighborhoods to hand out the water resources and information to residents.

http://www.mlive.com/news/flint/index.ssf/2016/01/watch_live_as_gov_rick_snyder.html

In Flint, report that raised flags on lead went ignored

Detroit Free Press – January 11, 2016, By Nancy Kaffer

Everything in Flint was fine.

When Gov. Rick Snyder's chief of staff e-mailed the state health department about the brewing water crisis in Flint last July, that's what the state department of health told him, according to e-mails obtained by Virginia Tech University researcher Marc Edwards under the state Freedom of Information Act.

But the analysis of children's blood-lead levels the health department relied on to ease chief of staff Dennis Muchmore's fears was just one of two performed after his e-mail. Another analysis, done by a health department epidemiologist, showed the reverse: "There appears to be a higher proportion of first-time (elevated blood-lead levels)," the epidemiologist wrote, in a report also obtained by Edwards. "... Even compared to the previous three years, the proportion ... is highest in summer ... positive results for elevated blood-lead levels were higher than usual for children under age 16 living in the City of Flint during the months of July, August and September 2014."

DETROIT FREE PRESS

Snyder creates committee for long-term Flint response

Worse, e-mails sent around the same time show DCH staffers expressing concern that the analysis shared with Muchmore, the one that showed everything was fine, was problematic. The early childhood health manager who oversaw the analysis wasn't the right person to order or complete such work, one DCH staffer suggested, and a "fact sheet" she and her team had prepared needed "caveats." One staffer suggested that the epidemiologist should be granted time to "really" analyze the data.

In a man-made public health crisis fraught with inexplicable choices, this is yet another decision point I'm still struggling to understand: An analysis, indicating that Flint's water was safe that some staffers found flawed, was amplified, while a report that could have raised the alarm about the safety of Flint's water supply was disregarded.

Since Flint had switched its water supply in April of 2014, residents had complained that the water looked and smelled bad. It caused rashes. By July of the following year, some residents were growing concerned that Flint's drinking water contained unacceptably high levels of lead.

DETROIT FREE PRESS

State Police to deliver water door-to-door in Flint

And Muchmore thought the state's response to the brewing water crisis had been inadequate. On July 22, he wrote in an e-mail to Michigan Department of Health and Human Services Nick Lyon: "I really don't think people are getting the benefit of the doubt ... Now they are concerned and rightfully so about the lead level studies they are receiving from (Michigan Department of Environmental Quality) samples ... these folks are scared and worried about the health impacts and they are basically getting blown off by us."

Six days later, Muchmore's concerns elicited a response — that first analysis, the one that said everything was fine.

The epidemiologist's analysis, the one that showed a spike in kids' blood-lead level in the summer of 2014, never made it out of the department, a spokeswoman said.

Eden Wells, Michigan's chief medical executive, told me that the epidemiologist's report was internal, and that it wasn't clear that the three months' worth of testing analyzed were statistically significant. At the end of the summer, blood-lead levels dropped, so the epidemiologist had just three of the five data points Wells said are required to show significance. (For what it's worth, this argument didn't hold much weight with the Free Press' data analyst, who teaches graduate-level statistics.)

But Wells said revisiting that decision was "armchair quarterbacking."

"If I go back and look at this now, compared to what I knew then, I would say, 'Gee, it would have been good to compare that to the previous multiple years in the past ... compare those summer months over time and do different tests for statistical significance,' Wells said. 'I could only surmise that this was definitely one of those missed opportunities. It wasn't intentional ... Was there a connection made? Maybe that connection was not made like it should have been. I can't tell you why, it just wasn't. I wish it was.'"

Wells attributed questions about the first analysis, the one Muchmore was sent, to "cultural differences" between the epidemiology staff — the folks who study illness and how it spreads — and "program people," who operate programs aimed at intervening or solving health problems. That's something, she says, that they're working on.

Like everything about Flint's public health crisis, answering one question leads to a dozen more.

<http://www.freep.com/story/opinion/columnists/nancy-kaffer/2016/01/11/flint-lead-water/78629628/>

Snyder may ask lawmakers for money for Flint crisis

Detroit Free Press — January 11, 2016, By Elisha Anderson and Paul Egan

FLINT — Gov. Rick Snyder said Monday the state will step up its efforts to respond to a public health crisis resulting from lead contamination of Flint's drinking water and said he may need to ask the Legislature for more money to address the issue before he presents his state budget in February.

Snyder wouldn't specify how much money he might need during a visit to Flint. He said residents should continue to use filters and bottled water, and the state doesn't want people to assume anything is good with their water until extensive testing has been done.

"This is a crisis," Snyder said. "And that is something I apologize for in terms of the state's role in all of this."

He was flanked by state officials and peppered with questions by journalists during a news conference at Flint City Hall. There weren't specifics offered for many of the questions posed.

Snyder, who has been asked repeatedly about when he first learned that lead in Flint water could be poisoning children, said Monday it was around Oct. 1, and that action was quickly taken.

DETROIT FREE PRESS

Snyder creates committee for long-term Flint response

He said residents should have access to water filters, bottled water and blood tests and acknowledged that actions taken by the state have not been good enough.

Officials said more than 12,000 filters have been passed out so far to Flint's roughly 33,000 households. Parents were encouraged to get blood tests for themselves and their children, and all Flint children under the age of six should have their blood lead levels checked, officials said.

Flint Mayor Karen Weaver said there are unanswered questions about what will be done about some of the problems the city will now face.

"We know that we have kids that have been impacted by this, impacted in a negative way," she said.

She said kids will have mental health issues, behavior issues, physical health issues, learning disabilities and some kids will end up in the juvenile justice system as a result.

State Police to deliver water door-to-door in Flint

Noise could be heard from outside the room where the news conference was held by residents angry they were not allowed to attend.

“We wanted in,” said Gladys Williamson, 61, of Flint. “They wouldn’t let us in.”

She held a container filled with rust-colored water and said she has questions for the governor.

State Senate Minority Leader Jim Ananich, D-Flint, said he thinks the public should have been allowed in, adding they have the right to ask their government questions. He said the citizens of Flint are suffering.

“You’re probably never going to hear the words ‘I’m happy’ come out of my mouth because the citizens of my community never should have been poisoned,” he said. “But I’m looking to say the words ‘I’m satisfied’ and I’m not there yet.”

On Tuesday, Michigan State Police troopers and other state officials plan to go door-to-door in Flint neighborhoods handing out bottled water, water filters, replacement cartridges and water testing kits. Over the weekend, officials established sites where citizens could pick up the items.

Meanwhile several local churches have been passing out bottled water to residents and will continue to do so to meet the need for clean water.

On Monday morning, nine members of Second New Hope Baptist Church in Royal Oak Township drove to Flint in a rented a U-Haul with more than 330 cases of bottled water. They stopped at First Trinity Missionary Baptist Church and dropped off the bulk of their load.

“We had to do something,” said Pastor Eric Burr, adding they are trying to get water in people’s hands immediately.

Several churches in Detroit and surrounding suburbs donated money to purchase the water, he said.

Flint's drinking water became contaminated with lead in April 2014 after the city switched its supply source and treatment while under the control of a state-appointed emergency manager. Instead of getting Lake Huron water treated by the Detroit Water and Sewerage Department, as the city had for years, Flint started drawing more corrosive and polluted water from the Flint River and treating it at the city water treatment plan.

The cost-cutting move — which was to be a stopgap move while the city waited for the new Karegnondi Water Authority pipeline to Lake Huron to be built — resulted in a spike in lead levels in children. A recent preliminary report from a task force appointed by Snyder placed most of the blame on the state Department of Environmental Quality, which has acknowledged a mistake in not requiring Flint to add corrosion control chemicals to the water, and prompted the Dec. 29 resignation of DEQ Director Dan Wyant.

Although the state assisted the city in moving its source of drinking water back to Lake Huron water supplied by Detroit in October, concerns about contamination remain because the river water damaged pipes and other infrastructure.

Snyder declared a state of emergency Jan. 5. Three liaison officers from the Federal Emergency Management Agency are in Michigan to assist with emergency efforts, and the White House says it is closely monitoring the situation, but Snyder has not yet asked for federal financial assistance.

Snyder is under sharp criticism for not acting sooner on the public health crisis, particularly after last week's release of an e-mail from Dennis Muchmore, Snyder's chief of staff at the time, who said in July he was worried that concerns from Flint residents about the safety of their drinking water were getting "blown off" by the administration. The e-mail, sent to Department of Health and Human Services Director Nick Lyon, was among a large number of e-mails and other records obtained under the Michigan Freedom of Information Act by Virginia Tech researcher Marc Edwards, a drinking water expert who helped expose the crisis.

In addition to the task force appointed by Snyder, the U.S. Attorney's Office in Detroit is assisting the U.S. Environmental Protection Agency with an investigation.

Also Monday, Snyder signed an executive order to create an inter-agency committee to work on "long-term solutions to the Flint water situation and ongoing public health concerns affecting residents."

Snyder said in a news release the work of the Flint Water Interagency Coordinating Committee will be in addition to immediate steps that are under way, such as distributing bottled water and filters that remove lead from water, and arranging for children to be blood-tested for exposure to lead poisoning.

"We need to focus on improving Flint for the longer term," Snyder said. "This committee, made up of experts from government and the Flint community, will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires."

The new 17-member committee will include representatives from the state, Genesee County, the City of Flint and experts on particular subjects, Snyder said. "The group will analyze any long-term effects of high lead levels in Flint residents and recommend action," he said.

Ananich, said Monday that creation of the committee is a positive step, but it's one he asked for in September. The Snyder administration has acted too slowly since acknowledging mistakes in October, he said.

"People are still getting exposed to lead for the first time, and that's unacceptable," Ananich said.

U.S. Rep. Dan Kildee, D-Flint, sent letters about the crisis Monday to President Barack Obama and to Snyder and said the state's response has been inadequate.

"In November, I wrote to you encouraging the state to request assistance from federal agencies," Kildee said in the letter to Snyder. "To date, federal assistance has not been requested by the state. Since in my opinion the state's response to the ongoing crisis has been inadequate, I reached out to the White House today to request assistance with any additional federal resources that may be available."

Rochelle Riley: Snyder legacy will be Flint water crisis

Fund established for Flint children

A fund has been established to address the short- and long-term needs of Flint children exposed to lead through contaminated drinking water, the Community Foundation of Greater Flint announced Monday.

"Our Flint children deserve every opportunity to be healthy and successful," said Dr. Mona Hanna-Attisha, the Hurley Medical Center pediatrician who helped expose the tragedy. "The creation of this Fund will further ensure that our children are afforded the resources and interventions to overcome this population-wide exposure to lead."

Donations can be made online at www.flintkids.com

Doctors worry about bathing kids in Flint water

The Detroit News – January 12, 2016, By Karen Bouffard

Some medical professionals expressed concerns Monday about a state Department of Health and Human Services recommendation that children can be bathed in Flint tap water.

Michigan's top poison control doctor said parents should take care to limit the time children are in the bath and be sure they don't drink any of the water — a point reinforced Monday by Dr. Eden Wells, the state's chief medical executive

"The problem is with small children you really don't want them to swallow the shower or bath water," said Dr. Cynthia Aaron, medical director of the Michigan Regional Poison Control Center at DMC Children's Hospital of Michigan.

Dr. Sharon Swindell, assistant professor of pediatrics at the University of Michigan, said: "Any lead exposure in childhood is of great concern, especially in younger children during important stages of brain development."

Asked if she would bathe her own child in Flint water, Dr. Mona Hanna-Attisha said she would feel comfortable bathing an older child, but would take extra precautions with an infant. She said she would reduce the temperature of the water as much as possible since heat increases the concentration of lead.

DETROIT NEWS

Gov. Rick Snyder prepares to request federal aid in Flint lead crisis

"Lukewarm water is probably the best," said Hanna-Attisha, the Hurley Medical Center pediatrician who uncovered the lead problem in August.

She continues to warn residents the water is still likely not safe, despite Flint reconnecting to the Detroit Water and Sewerage Department. It was a warning echoed Monday by Gov. Rick Snyder and Wells during a hastily arranged press conference in Flint.

The Michigan Department of Health and Human Services removed a poster from its website over the weekend advising Flint parents that bathing children is safe despite elevated levels of lead. Department spokeswoman Angela Minicuci said Monday the poster was outdated and will soon be replaced with a more detailed fact sheet.

Critics such as Michigan AFL-CIO spokesman Zack Pohl were outraged by the nature of the poster titled "Hey Flint! It is safe to wash!"

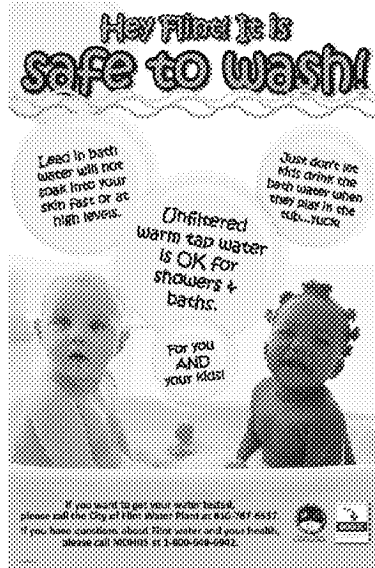

"I'd pay good money to see Rick Snyder's reaction if someone asked if he would've let one of his three kids take a bath in Flint water when they were this little," Pohl said last week in a mass email.

Wells, a clinical associate professor of epidemiology at the University of Michigan, said lead is not easily absorbed into the body through the skin — a point made in the now-removed poster. She said parents should monitor their children to make sure they don't swallow the water.

"Bathing a child, getting them clean and getting them out is the best way to make sure they're not drinking unfiltered water," Wells said Monday.

Flint parents are unlikely to feel safe bathing their kids, regardless of the state's reassurance, Hanna-Attisha noted. They are skeptical of any advice from state officials, who for many months continued to vouch for the safety of Flint water despite evidence to the contrary from residents, local pediatricians and the scientific community, she said.

"This community has gotten so many different messages. It's been a mass confusion in terms of the public. It's a mess," she said. "Obviously there's a huge trust issue, so people do not trust anything the state is saying."

Michigan Poster That Said Lead in Water Was OK Is Quietly Pulled From State Website

Inverse.com – January 11, 2016, By Sam Blum

Flint, Michigan is in the midst of a water contamination crisis. On January 5, Governor Rick Snyder declared a state of emergency due to a confluence of toxic lead particles intermingling in the city's water supply, and as of Sunday, White House officials said they were monitoring the situation: Chief of Staff Denis McDonough noted that federal

authorities are "watching [Flint] very closely" on an episode of *Meet the Press*.

But still, the problem with the water mains in Flint — a city that lies about an hour outside of Detroit — hadn't sparked quite enough anxiety for Michigan's Department of Health and Human Services.

That's because until last week, the health agency was still sharing this drastically misinformed and insanely dangerous public service announcement:

Meant to allay fears and soothe the worried minds of parents, the PSA basically claims that it's totally OK to bathe an infant in lead-swaddled waters, as long as your baby doesn't drink the water ("YUCK!").

Enter the World Health Organization to summarily dismiss this sorry excuse of a public health endeavor:

"Lead is a cumulative toxicant that affects multiple body systems and is particularly harmful to young children. Childhood lead exposure is estimated to contribute to about 600 000 new cases of children developing intellectual disabilities every year. Lead in the body is distributed to the brain, liver, kidney and bones. It is stored in the teeth and bones, where it accumulates over time. Human exposure is usually assessed through the measurement of lead in blood."

Filmmaker Michael Moore — famously a Flint native and filmmaker of *Roger and Me* — noted on Sunday that the PSA met a much deserved demise, as it disappeared without word from the state of Michigan's website:

While juxtaposing the cutesy feel of the PSA with its shocking level of misinformation should conjure a few laughs, the situation unfolding in Flint is quite serious. According to a statement from Michigan's Department of Environmental Quality, state police have been supplying residents with "bottled water, water filters, replacement cartridges and water testing kits," while a broader investigation is being conducted. The Snyder administration has caught some heat for its slow-response to the crisis and has so far not sought any federal disaster relief money.

Flint typically relies on water from Lake Huron, just as Detroit does, but saw its water supply become contaminated while drawing its water from the Flint River between April 2014 and October of last year.

Gov. Snyder speaking about Flint water situation

FOX 2 Detroit – January 11, 2016

(WJBK) - Gov. Rick Snyder will offer remarks at a press conference providing updates on current actions and next steps to address Flint water.

You can watch a livestream of his news conference by [clicking here](#).

He will be joined by Flint Mayor Karen Weaver, Michigan State Police Capt. Chris Kelenske, Department of Environmental Quality Interim Director Keith Creagh, Department of Health and Human Services Director Nick Lyon, and DHHS Chief Medical Executive Dr. Eden Wells.

Volunteers deliver water in Flint amid lead crisis

The Detroit News – January 12, 2016, by Leonard N. Fleming

Flint — In the blowing snow, state officials Tuesday officially began distributing water and filters to residents struggling without because of the lead poisoning crisis gripping this city.

Scores of volunteers with the state's department of Health and Human Services along with Michigan State police troopers and Genesee County Sheriff's office fanned out into 18-degree temps and snowfall to reach residents in north central Flint near Dupont Street.

State officials are promising residents a "continuous flow of water" so that every household is covered in the urban city.

"There's an outpouring of help from the community," said Lt. David Kaiser, a spokesman for the Michigan State Police at an early news conference with hundreds of bottled waters behind him at a holding warehouse. "We are going door to door and we will continue until every resident has safe drinking water. That's the goal."

For the residents who aren't home, they will be left with a flyer on the door "letting them know about the resources available," Kaiser said.

Each resident, state officials say, will receive a case of water, a water filter, a replacement cartridge and lead testing kits.

Capt. Casey Tofoya of the Genesee County Sheriff's Office said when he went out three days ago to deliver water to residents, they were thankful and emotional.

Tofoya said it's the "human element" that touched him most, especially with the elderly and disadvantaged.

"It's such a huge operation that we have to combine the efforts of all our local entities," Tofoya said. "When we factor in the sheriff's office, the state of Michigan and the volunteers, everyone has to pitch in here."

Lisa Smith, 46, of Flint, who is an office supervisor with the health and human services office, was one of the volunteers on hand to deliver water, which began around 11 a.m. Tuesday.

Smith said she wanted to help because "I know a lot of people that are disadvantaged and don't have vehicles."

"I want to help them so they aren't being poisoned by the lead," Smith said. "It's terrible. It's kind of scary."

Smith said she received warnings from friends who questioned her logic because of the history of crime in Flint but she wasn't deterred. She runs in Flint daily and has encountered nice people.

"I've heard a lot of negative stuff about, Oh my God, are you afraid? I'm not afraid," she said. "I'm thinking they'll be happy and appreciative."

[Click Here](#) to see video - Gov. Rick Snyder said Tuesday after touring the Detroit auto show that the state will continue to hand out water at fire stations in Flint, as well as supporting operations by faith-based organizations and conducting door-to-door outreach.

Gov. Rick Snyder said Tuesday after touring the Detroit auto show that the state will continue to hand out water at fire stations in Flint, as well as supporting operations by faith-based organizations and conducting door-to-door outreach.

"The goal is to get to every household in Flint in terms of making sure they have an opportunity for a filter, for blood tests, for what they need in terms of water to be successful while we go through this period, until we get a long-term solution," Snyder told reporters.

On Monday, Snyder said the state health department's Oct. 1 confirmation of elevated lead in the blood of Flint residents was the first time he learned of the extent of the city's drinking water crisis.

After getting Flint's water supply switched back to Detroit's system in mid-October, it took nearly three months until the governor declared a state emergency that Flint's unfiltered water is not safe to drink. Flint switched to Flint River water in April 2014 to save money.

State officials believe lead is leaching from Flint's pipes because the Department of Environmental Quality did not require the city to treat Flint River water with corrosion control chemicals.

State health officials have confirmed 43 cases of elevated lead levels in the blood Flint residents, who complained for more than a year that the brownish Flint River smelled and caused rashes. Lead can cause irreversible brain and developmental damage in children and infants who ingest it through water or lead-based paint.

Snyder expressed regret Monday for how the state's management of Flint's drinking water supply ended in what he called, for the first time, "a crisis."

Snyder said the state is starting to draft a request for federal emergency assistance with Flint's lead contaminated water crisis.

Filter delivery to Flint casts doubt on what Snyder said

Detroit Free Press – January 12, 2016, By Pau I Egan

LANSING -- Gov. Rick Snyder's statement Monday that he wasn't aware of a problem with lead in Flint's drinking water until about Oct. 1 of 2015 has prompted new questions about the role of Snyder's office in quietly delivering 1,500 water filters to the city in August.

Snyder's statement also raises questions about the speed and scope of the state's response since Oct. 1 and why state officials did not immediately instruct Flint residents on Oct. 1 not to drink the water without a filter. A [10-point plan for Flint water](#) that Snyder released on Oct. 2 said the state was making water filters and water testing available to Flint residents, but did not include a warning not to drink the water without a filter.

Today -- more than three months later -- the Michigan State Police and other state officials [have just begun delivering bottled water and water filters door-to-door](#) in Flint. Snyder declared a state of emergency in Flint and Genesee County over the water issue on Jan. 5.

The drinking water became contaminated after Flint, while under the control of a state-appointed emergency manager engaged in cost-cutting, switched from Lake Huron drinking water treated by the Detroit Water and Sewerage Company to Flint River water treated by a city treatment plant. The state Department of Environmental Quality has acknowledged it failed to require Flint to add needed corrosion control chemicals to the water, causing lead to leach into the drinking water from pipes and fixtures.

Gov. Snyder's response to the disaster in Flint

The Rev. Allen Overton, chairman of the Coalition for Clean Water in Flint, who along with other pastors had pushed for state action since shortly after Flint began drawing its water from the polluted and corrosive Flint River in April 2014, said Tuesday he "can't say (Snyder) was telling the truth or he was lying" about not finding out about the problem until Oct. 1.

But Overton told the Free Press that Snyder should have known much sooner because he and other pastors and citizens had been meeting with Snyder's chief of staff, his director of urban affairs and his department heads, raising concerns about the water for months prior to Oct. 1.

"This is hard for me because the governor has a lot of culpability in this entire problem," Overton said. "At the same time, I know for sure they were getting bad information from the City of Flint and (former Flint mayor) Dayne Walling."

At the same time, "I'm not going to give him a raincoat and say he didn't know," Overton said about Snyder. "I think he knew. I think they made a bad mistake in not responding."

During the late spring or early summer, "I asked the DEQ to come to the City of Flint to do the testing themselves and they refused," Overton said.

Snyder was touring the North American International Auto Show on Tuesday morning. At the Monday news conference in Flint, Snyder pointed to the fact that after Dennis Muchmore, Snyder's then chief of staff, raised concerns in a July e-mail that Flint residents' concerns about the safety of the drinking water were being "blown off" by the administration, officials at both the DEQ and the Department of Health and Human Services maintained there was not a problem.

Asked to follow up on the Muchmore e-mail, state officials "came back and reaffirmed they didn't believe there was an issue." Unfortunately, that turned out to be incorrect, Snyder said.

Overton said it was he who arranged for the delivery of 1,500 water filters to Flint last August, working with Snyder's director of the Office of Urban Initiatives, Harvey Hollins, and an anonymous donor who paid for the filters.

The filters were not so much aimed specifically at getting lead out of the water as improving the quality of the water generally, since residents had been complaining about the taste, smell and appearance of the water since the switch to the Flint River, Overton said. By facilitating the delivery of the filters, Snyder's office was not so much acknowledging a problem as trying to pacify Overton and others, who had been "raising so much hell" about the water, Overton said.

Asked if he and other pastors were asked to keep quiet about the role of the governor's office in delivering the filters, Overton said that Hollins told him: "Listen, the donor did not want to be announced." Overton said he replied: "I'm not going to tell anybody."

Snyder spokesman Dave Murray said Tuesday that state officials were urging Flint residents to get water filters and get their water tested and that was equivalent to telling residents not to drink the water without filters.
